Uncle Sam's Round-Up Completed

The branding irons are cooling. Uncle Sam has completed his decennial spring round-up in Motley and Cottle counties. The tally sheets are in; all the strays and the regular herd has been counted.

The report will be released from the Amarillo district office according to Mrs. Achsh Dugger, census crew-leader for Motley and Cottle counties.

Provision has been made for registration of residents (rural or urban) who may have failed to be counted by the enumerators. They are requested to contact Mrs. W. N. Pipkin in Matador for proper registration.

Results May Surprise
 Results of the 1950 census may surprise many people, especially Chamber of Commerce officials in small towns and some of the larger West Texas cities. Weekly newspapers throughout the area last week conceded the possibility that the number of people in small towns may be far less than claims. Larger towns may also be forced to face embarrassing facts.

The answer is simple. School teachers have been familiar with it for several years. Despite the fact that every town has more water meters, light meters and telephones than ever before, families are smaller. The estimate of 41 persons to each water meter is too high. It should probably be 31 persons to each meter. Matador has approximately 400 water meters.

GARY LAUGHLIN MINUS 2 TEETH

Gary Laughlin lost two teeth and suffered other injuries as result of an automobile accident west of Matador about 3 p. m. Saturday afternoon.

Another Nash a to mobile figured in an accident here Saturday about 10:30 a. m. when a member of the Vernon booster caravan, Henry Elbert Haseloff, 53, driving a 1950 Nash, collided with a 1948 Mercury driven by Clarence Doyle Tomison, 40, of Quanah. The accident occurred on U. S. Highway 70 about two blocks east of Main. Mrs. Haseloff who was accompanying her husband sustained a sprained ankle as result of the accident. Damage to the Haseloff car was estimated at \$300.

TRAIL DUST

By DOUGLAS MEADOR

Night was a young widow clothed in sheer darkness and wearing a silver-lined cloak. She touched the star pendant at her throat and was pensive in that instant when the wind strong and fresh with earth and sage, passed and whispered.

Creations of nature have in some instances found existence simplified since man started paying homage to the Pagan god of mechanism. The rayen has only to await the dawn for a waiting breakfast of fresh rabbit slain on the highways by the bewildering lights of crushing cars and trucks. The sparrow too has found that motor insects in motor cars catch that food is waiting when the engine stops. All history is testimony that wisdom feeds better than industry.

Rufus Emmons, Once A Race Horse, Now Ordinary Plug

Not many are aware that County Agent Rufus Emmons was once a race horse. When he was in the full bloom of young manhood on the Aggie track team.

"It is true," he declared yesterday, "that I was once a race horse but I am just an old dray horse now."

His former position in the field of sports was brought to the attention Sunday to readers of the Sunday Dallas News, in an article by sportswriter Charles Burton, "The Inside Story."

Burton had interviewed "Tireless Little Frank Anderson" Aggie mentor. The following excerpt is from the column: "Some one was asking Anderson the one was asking he would name other day whom he would name on an all-time Aggie track team. He declined, probably because he would have to name some of his present stars.

"Of those who have graduated, though, he thinks these among the greatest: Sprinters Jacob Puth of 1925, and Rufus Emmons of 1931."

A VOTER SPEAKS!

E. T. BURK FOR CONGRESS

VOTER: "Mr. Burk, I admire you. I like the way you get out and mix with the people and work 12 to 15 hours a day. I've noticed that you do the work yourself; you go out among the people. I'm for you a thousand per cent. And, I'm convinced you'll win the special election May 6 and also the Democratic primary."

BURK is ahead because he has gone out to the voters. He has traveled farther and seen more people than all the other candidates put together. BURK is a hard worker. He loves people. He is not tied by any group or individual. He doesn't seek a government paycheck, but an opportunity to serve with fairness, honesty, common sense.

BURK can be trusted. He will win!

His Punch is His Signature

From where I sit, even though your ticket is punched differently from mine, it still gets you where you're going. Just like people with their opinions. You might like coffee, another person, tea—and I'll settle for a temperate glass of beer. But what does it matter, so long as we respect the right of the other to have tastes and opinions? We're all trying to go in the same direction—towards a friendlier, more pleasant world for all of us.

Chickenpox Very Contagious Says Health Officer

Has chickenpox come your way? If it has, or if it does come your way in the future, the first thing to do is to call your physician, says Dr. Geo. W. Cox, State Health Officer.

Chickenpox is a common communicable disease caused by a virus. It occurs most frequently

in the winter and spring among children less than 15 years of age. The virus is present in the discharges from the mouth and nose and from the small blisters which contain a watery fluid. Chickenpox is very contagious and is probably spread by direct contact with the patient.

Panhandle Writer Praises Timmons' Law-Making Record

By Bascom N. Timmons
(Washington Correspondent;
former Amarillo editor)

To those of my friends in the Eighteenth Congressional District, who have communicated with me regarding the special election of May 6, I have replied that I hope they will give their support to my nephew, State Representative J. Blake Timmons.

In 1891 I became a resident of the Texas Panhandle when my parents moved to Washburn, Armstrong County, and although my work as a writer has called me to all parts of the Nation I have retained, and always expect to retain, my legal residence in the Panhandle Congressional District I am, therefore, no outsider.

Some years ago at the end of his distinguished public career in Washington, which had lasted for a quarter of the life of the Republic, former Vice President John N. Garner said:

"The best training for a member of Congress is in his State legislature. He learns his District and his state there. He learns the legislative process and how to work with other men. I laid the foundation for my Congressional career in the legislature of Texas."

From this training school also came Senator Tom Connally and Speaker Sam Rayburn of Texas. Representative J. Blake Timmons, 33, has ably served this District four years in the Texas legislature, exactly the apprenticeship served there by John Nance Garner.

It has become a custom of the people of Northwest Texas to choose an able young man to represent them in Congress and to keep him there, thus reaping the benefit of his increasing experience and the friendship and respect he has gained from his Congressional colleagues.

In the last 33 years this Congressional District has had three Representatives in Congress, John H. Stephens, who served 20 years, Marvin Jones, who served 24 years, and Eugene Worley, who served 16 years. It has been my privilege to enjoy the friendship of all these able men. I believe that J. Blake Timmons would make a worthy successor to them.

He is young, industrious, able and sound. He has been an upright and forthright public servant. In these critical times, J. Blake Timmons will serve his country and his Panhandle District well.

(Political Advertisement)

Chickenpox begins from about 14 to 21 days after exposure, usually with feverishness and loss of appetite. Within about 24 hours, the skin breaks out in small raised rose-pink spots which change into blisters. The blisters quickly become crusted with scabs which eventually fall off. The scabs are not contagious. Each crop completes its course from rose-pink spot to crust in from two to four days.

Scratching or picking at the blisters may cause serious sores and disfiguring scars. The doctor will probably suggest a remedy to relieve the itching, which is not very ill and begins to feel better in from one to three days.

Warning—Chickenpox is an entirely different disease from smallpox. But when a person has not been vaccinated, mild smallpox is sometimes mistaken for chickenpox, because the early symptoms are strikingly alike. Smallpox is a serious disease which spreads rapidly among unvaccinated persons.

At the first signs of what appears to be chickenpox, call your physician so that an early diagnosis can be made. If you find that the patient has smallpox, prompt vaccination will save the other members of the family and outsiders, who have been exposed, from an attack of the disease.

J. E. McDonald Says Guill Has Best Farm Program

From Amarillo Globe-News, April 17.

McDonald And Guill In Huddle

While in Amarillo for a wheat meeting, McDonald conferred with Ben Guill of Pampa, the Republican candidate for Congress.

"I have no intention to try to suggest to the people of this district how they vote for Congress," he said, "but if I were voting here, I would pick out the best man for the place and support him regardless of his party label. I think we ought to do that all over the country."

"Moreover, I'd like to say that after World War I, the soldiers were turned loose and a bunch of swivel-chair politicians wrote the peace and made a mess of it. The same thing happened after World War II. It seems to me a good idea to have the men who won the war helping run the government and writing peace policies," he declared.

McDonald visited quite some time in Guill's headquarters in the Herzing Hotel. He was photographed with Guill.

The commissioner of agriculture is a plain-spoken man.

CONGRATULATIONS . . . J. E. McDonald, Democrat, Commissioner of Agriculture for the State of Texas for twenty years, shakes hands with Ben Guill of Pampa, 40 year old Navy Purple Heart veteran, who is running for Congress in the May 6 election. McDonald, one of the most respected agricultural experts in the world, said that Ben Guill is the only candidate with a constructive and intelligent farm program.

Ben Guill, the son of a farmer and a resident of the Panhandle for thirty-one years, says: "The farmer has been kicked around and dictated to by the bureaucrats in Washington too long. When I go to Congress I shall bring with me a farm program dictated by the farmers of the Panhandle themselves and I shall fight for that program on the floor of the House."

S. News & World Report Says:

FLYING SAUCERS' EXIST, MANNED BY LIVE PILOTS

here is what it believes to be the true story. The first successful saucer was built in 1942 and made more than 100 test flights. Current advanced models are circular, 105 feet in diameter, and about ten feet thick. They have no protruding surfaces of any kind. They are powered by jet engines using a secret fuel. The power is exerted through a series of jet nozzles around the saucer's rim.

Their performance, according to the magazine, is next to unbelievable. They can stand still in the air, like a helicopter, and rise almost vertically. Their cruising speed may be as high as 600 miles an hour. Due to the helicopter feature, they do not need conventional airfields for landing or take-off—a very small space is adequate. Control is achieved by tilting the jet nozzles to desired angles, and by turning certain nozzles off and on. Maximum forward speed is attained by turning the nozzle to the rear and applying full power.

U. S. News emphasizes that this is not a Buck Rogers concept. The principles on which

COUNSEL TO TEXAS PRISONERS—The Salvation Army, the largest parole agency in Texas, takes its spiritual welfare program to men and women behind the bars in jails and prisons all over Texas. More than 1,000 prisoners are paroled to The Salvation Army in Texas alone, and in recognition of the rehabilitation work which is being performed by the agency throughout the country, Salvation Army Prison Sunday will be observed on April 30. In the picture above Salvation Army Captain F. M. Gaugh counsels with a prisoner prior to his release on parole.

"SALVATION ARMY PRISON SUNDAY" TO BE OBSERVED

Salvation Army Corps of Texas and corps throughout the U. S. Will join April 30 in the observance of "Salvation Army Prison Sunday."

The organization will devote the day to special religious services for men and women behind bars in jails and prisons throughout the state. Lt. Col. John A. Morrison, Texas divisional commander, announced.

"We have always considered it one of our duties to work with the prisoner in the rebuilding and maintenance of faith and courage against the day of his release and return to normal life," Colonel Morrison said, "and our year-round work in jails and prisons has long been an important part of our welfare program."

The Salvation Army is the largest volunteer parole agency in Texas today, and more than 1,000 ex-prisoners are under its guidance.

The Salvation Army receives an annual appropriation from the Matador Community Chest.

the saucers are allegedly built in secret, are sound, and are accepted by the top aeronautical engineers.

Who, then, is building and operating the saucers? The magazine thinks it most likely that the Navy—in spite of this Service's denials—is the agency.

The Navy has been given twice as large a guided-missile research budget as the Air Force and no public accounting is made of how the money is spent. And these saucers could be flown from any combat ship, not just the carriers.

The possible significance of the saucers is tremendous. U. S. News sums it up in these words: "In war, the combination of helicopter and fast jet planes will easily out-fly any present types of military aircraft. In peacetime, the safety of a nearly crash-proof aircraft may be expected to revolutionize civil air transport. It all points to a big advance in the science of flying."

Where Are We Headed?

Some people are bewildered about where we are headed. Some people quote the frightening pronouncements of trouble-makers. Some people point to sensational reports and opinions. Some people are alarmed by scare words. Is it any wonder that some people... good people... are bewildered?

Most of us believe that this is the fairest country in the world today... a country where good citizens give their courage and talents to helping others... to working to build a better community... a better America... a better world.

Most of us believe that ours is a nation of families... where every family deserves the right to dream of and work for a home—and, if need be, to defend that home against political abuses.

Most of us believe this is a land where folks have an inherent right to prosper by their skill, their toil, their management.

Most of us believe this is a country of men and women who are capable of standing on their own good judgment in selecting those to represent them in Washington... selecting Representatives who will place right above personal pride... duty before pleasure... the good of the majority ahead of special interests... service against empty political promises.

Most of us believe this is a country where faith will not be denied... where people can continue to depend upon Divine guidance and help!

Altavene Clark FOR CONGRESS

These are the things in which ALTAVENE CLARK believes and for which she stands. ALTAVENE CLARK is a candidate of ALL the people—not the candidate of any special group or interest. When elected she can and will work CALMLY BUT FEARLESSLY for all these things. Now is the time when EXPERIENCE counts!

The Chatter Box

Well, guess we can start off again since the six weeks tests are over with. You know there aren't very many more days until the end of SCHOOL, which everyone will be proud of, so guess we'd better make it good. What'd say?
First let's start off talking about Peck. Wish he'd make up his mind which it is, Marlene or

Barbara. If he doesn't hurry and decide, we'll decide for him. Don't you think we should help him out?

Jerry has gotten into the habit of walking Bonnie home from school. Now, school is too near out for something like that to get started.

This "Letuce" that we've in High School sure gets around. Don't you think so? Well, any way she was sure cruising about Saturday night. Now this old cruising won't get you any where. Better watch it kid. Just don't get into a habit of these things.

Joyce and Albert are still making the old steady line, all the sometimes we do wonder.

Joy was riding in a good looking car with a good looking man the other night. Getting things ahead hm, hm, hm.

Wanda and Eddie must have

had a swell time the other night at Paducah. Oh yes, more fun did you say? We probably would have too if we had been down there.

Melba and Garland are still flying around here. They are a swell couple of senior kids. (Students I mean).

Geppers, did you see that Sybil Saturday night? Now come on and tell us about these things Sybil. Don't hold a thing out on us.

Crit-ter-ree, did you see who picked Sappo up after the baseball game Wednesday afternoon. Well, it was none other than the "Black Chevy". You know who I mean!

Wonder why Jimmie never makes a charge for the Lunch room when the bell rings. I bet I can guess the. Reckon it is because of a certain good looking man in a green pick-up who waits on her? (Reckon!)

THE TRAGIC HOUR . . .

After the ashes have stopped smouldering . . . the impact of your tragedy suddenly strikes you . . . Your home and your prized possessions, which may have taken a lifetime of work and saving to accumulate, are now but a heap of rubble! Will you have to begin again — or do you have adequate fire insurance to cover such tragic emergencies?

Feather-bedding scheme of Firemen's Union to put an additional fireman on diesel locomotives has been

Fact Finding Boards appointed by Presidents Roosevelt and Truman have said these demands were "devoid of merit" and they were

Now the Firemen's leaders seek to paralyze railroad transportation to compel the railroads to employ a wholly unnecessary additional fireman to ride on diesel locomotives. This scheme is plain

FEATHER-BEDDING!

LEADERS of the Firemen's union have called a nationwide strike starting with four great railroads on April 26. These railroads are the New York Central, Pennsylvania, Santa Fe, and Southern.

The union claim that a second fireman is needed on grounds of safety is sheer hypocrisy. Safety has been dragged into this dispute only in an unsuccessful effort to give a cloak of respectability to vicious feather-bedding demands.

After a careful study of the first demands of this union, a Presidential Fact Finding Board on May 21, 1943, reported to President Roosevelt that there was no need for an extra fireman on diesel locomotives.

Again, on September 19, 1949, after a second hearing on the union leaders' demands, a second Board reported to President Truman that: "there presently exists no need for an additional fireman . . . upon either the ground of safety or that of efficiency and economy of operation."

extra fireman is needed for "safety" reasons. Here's what the Board had to say on that point:

"The safety and on-time performance of diesel electric locomotives operated under current rules have been notably good . . .

"Upon careful analysis of the data submitted on safety, we have concluded that no valid reasons have been shown as a support for the Brotherhood proposal under which a fireman would be required to be at all times continuously in the cab of road diesels. The proposal must be rejected."

The real reason behind these demands is that the union leaders are trying to make jobs where there is no work. In other words, a plain case of "feather-bedding."

The railroads have no intention of yielding to these wasteful make-work demands.

"The Safety Record of Diesels is Outstandingly Good . . ."

PRESIDENTIAL FACT FINDING BOARD REPORT

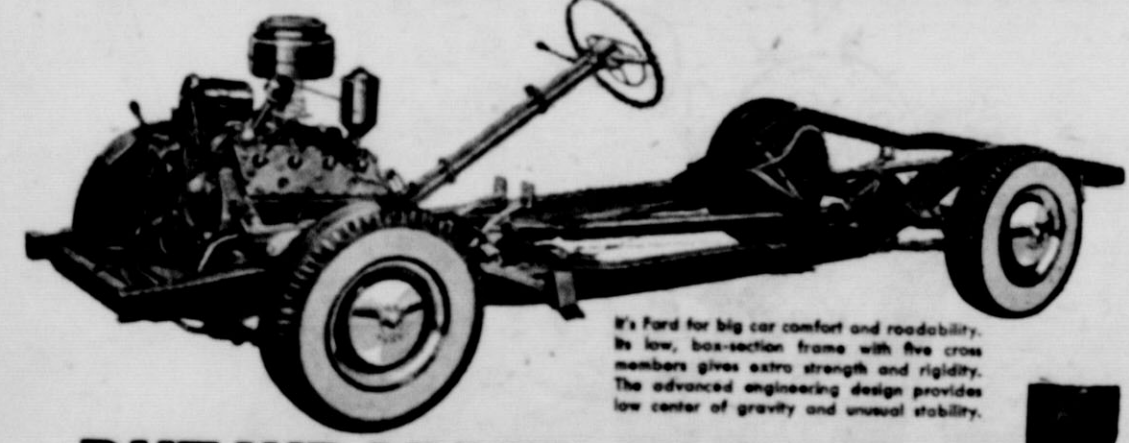

Read these excerpts from official reports of Presidential Fact Finding Boards:

"The safety record of Diesels is outstandingly good, and it follows that the safety rules now applicable have produced good results."

"The safety and on-time performance of Diesel electric locomotives operated under current rules indicate that Diesel electric operation has been safer than steam locomotive operation . . ."

Remember! These are not statements of the railroads. They are just a few of the many similar conclusions reached by President Truman's Fact Finding Board which spent months investigating the claims of the union leaders.

**KING RANCH HEIRS
GET SETTLEMENT
AFTER LONG FIGHT**

HOUSTON, April 21—A small meek man walked into a Chicago law office 17 years ago and asked Attorney Thomas Hart Fisher to help him wrest his rightful share in a vast estate in Texas.

He set in motion in 1933 a lawsuit that culminated yesterday in Federal Judge Kennerly's court when trustees of the estate of Mrs. Henrietta King handed him the keys to the gates of 125,000 acres of ranch land in Wilacy county, 10,000 acres in adjoining counties and checks totaling \$345,779.

The man was Edwin K. Atwood, middle-aged grandson of Captain Richard King, whose aggressive tactics had won him 1,000,000 acres of Texas land and uncounted thousands of cattle when the state was young in the union.

The vast fortune also precipitated a court battle as 13 grandchildren were involved in the 1935 partition of the King estates and properties.

Edwin Atwood was subsisting on a modest income from the King ranch estate and trying to make a name as a writer of biography when Fisher filed the lawsuit in the federal court in Corpus Christi.

The litigation resulted in his being cut off from any income from the estate, and he scraped along for many years on what he could earn.

Yesterday he approved, in a tired, hollow voice, the arrangements whereby his sister, Miss Alice B. Atwood of Chicago, obtained approximately an equal portion of the vast holdings as he received.

Mrs. Elise A. Baldwin, smartly dressed and vigorous, approved the agreement whereby she received approximately half as much as her brother Edwin and her sister Alice. Richard W. Atwood, another brother, residing on an Illinois estate, also received a share about the size of that given Mrs. Baldwin.

The settlement made a rich man of his attorney, Thomas Hart Fisher, who received 40 per cent of Edwin's interest for his 17-year's efforts in the King ranch heir's behalf.
