(Continued on Back Page)

Quite the neatest trick we've observed for a long time is this cleverly arranged, yet delightfully simple, home frock. Especially nice for those of us who gain and lose weight or who just naturally love a smart looking wrap-around for sheer comfort and convenience. And, of course, a boon to expectant mothers. Note how the belt slips through a slit and may be simply adjusted to fit the figure. Meanwhile, one has stepped right into it as into a coat. No petticoat needed. Nice shoulders and back, aren't they? Most attractive Pattern 9321 may be ordered only in sizes 14, 16, 18, 20, 32, 34, 36, 38,

quires 4% yards 36 inch fabric. SEND FIFTEEN CENTS in coins or stamps (coins preferred) for this pattern. Be sure to write plainly your NAME, ADDRESS, STYLE NUMBER and SIZE.

smoking factory chimneys and scarcely out of hearing of the noise and bustle of Barcelona, busiest and most restless city of Spain, a medieval Benedictine monastery clings to the face of a fantastic stone peak that rises boldly from the brown foothills of Cataluna (Catalonia). It is Montserrat, the nation's hollest shrine, to which thousands of the Spanish faithful make pilgrimage each year to pay bomage to what is called the Black Virgin.

Montserrat is the name of the strange mountain, and also of the monastery, which clings like a swallow's nest halfway up its precipitous cliffs. The Black Virgin, a wooden image darkened by age, is not the only reason why it is a place of pilgrimage. Montserrat, in Catalan tradition, is the Monsalvatsh or Monsalvat of the Middle ages, site of the castle of the Grail. The Arabs called it Gistaus, or the stone watchman. Here Ignatius of Loyola, a wounded soldier, knelt in prayer, and went In more recent years the Montserrat

choir school has become celebrated. "Ah, but senor," a hotel manager asked a traveler, "have you seen Montserrat? It is Spain's most sacred shrine. It is very quaint and old, and the Benedictine monks will let you live with them in the monastery for three days! It is not far from Barcelona. You should see

the Black Virgin, and the view from the monastery is magnificent!" Monserrat is accessible to Bar celona by both railway and road. One way is as picturesque as the other: for, while the highway climbs to the monastery in a series of balroin turns and horseshoe curves, the last few miles of the 35-mile railway journey may be made en a narrow-gauge rack-andpinion line or in the bobbing cage

of a new aerial cableway. Trip There is interesting.

Many, who are in no hurry, choose route. Once clear of the spreading though the statue is not quite lifesuburbs of Barcelona, the main-line railroad strikes beldly out into the the ledge where the monastery now beautiful plain of Sardanola. as were the men who fought in the Revolution. In another thousand years we

shall probably have a common language, and the word "foreigner' will be heard no more. That is a long time to look for-

von and I shall not get much ben efit out of it. And as easier methods of trans-

portation are discovered, and the peoples of all parts of the world begin to know and understand and make allowances for one another, that mutual acquaintanceship will start world civilization toward permanent and wholesome peace.

It will not come in my time or yours. But one of our functions in this life is to make the future safer for our great-great-grandchildren. And that ought to be satisfaction enough

Some months ago two men flew without a stop from Germany to New York Such a flight would

Tomorrow have astonished the world even after Wilbur Wright came to New York with his frail little flying machine and twice circled the Statue of Liberty

Pernaps not tomorrow, but with in a very few years men will fly easily from Europe to the western side of the American continent.

Hardly do you find an issue of an American newspaper which does not record some event which fifty years ago would have been regarded as a miracle.

But with all this progress, how much has humanity changed?

People talk today of a great impending European war. There is not a big city in the country which is not from time to time, and often constantly, invad-

ed by gangsters and racketeers. When and how will there be as much progress in the way of getting rid of criminals as there is

in so many other directions? It was only a few years ago that the spectacle of a locomotive rushing down toward a motion picture audience made people turn pale and dodge in their sents

Today plays are produced on the screen almost as well as they are on the spoken stage, messages are sent through the air without wires, and locomotives are being built that will speed at eighty or ninety miles

tle more lopsided?

Couldn't there be a little more safety from criminals and grafters? Couldn't things be so arranged that no man without good reason could own a machine gun, and that crooks who wage street fights might be swiftly apprehended and put where they could do no further

barm? We are progressing beyond a doubt. But much of that progress is in the wrong direction.

We look toward tomorrow with hope. But we have been looking for-ward to it for many years, and things are getting very little better. is the engineers who have

brought about so much physical Perhaps it might be a good idea "sic" them on organized crime and grafting politics.

Blood and Thunder

By R. H. WILKINSON @. Bell Syndicate.-WNU Service

SAIH FLEMISH was past fifty. He was fat and bald and pros He was accepted in the better

circles, was, in fact, regarded as somewhat of a social lion. He attended operas and sicales Occasionally he took in a stage

hit or went to the movies. In short, Isaih Flemish was not unlike forty or fifty million other Americans who are past fifty, bald and prosperous.

And like all of the other forty or fifty million, Isaih had a weakness. It lay in the realms of literature

That is if blood and thunder stories can be called literature. Isaih doted on stories of real hemen, men who carried six-shooters and handled them with uncanny skill; men who thought nothing of running a knife between the ribs of other men, men who lived by the law of might and cunning.

classics. Not that Isaih was great. He was like great men only from a literary standpoint. And probably like the rest, Isaih's weakness

It is said that all great men mix

blood and thunder reading with the

was frowned upon by a socially ambitious spouse. There was no use explaining to her that blood and thunder, to graph office, "Old lady ought to be Isaih, was meat and drink to a soul that had been deprived of ad-

As far as Mrs. Flemish was concerned, it was all a silly and uncalled for business. The United States has absorbed Hence Isaih was forced to do his

venture.

reading in private, and was forbidden to mention the extent of his literary achievements in public. He would, Mrs. Flemish stated, ruin them socially.

He was told-and he believed it. too, that blood and thunder stories were for morons and nit-wits. No one, he was given to under-

stand, with an ounce of intelligence, would waste time and money buying and reading blood and thunder As a result of this Isaih, through

fear of being ridiculed, never mentioned his weakness to any of his compatriots. His opinions and ideas regard-

ing the great open spaces and the men who rode the range, were confined to his thoughts and secret dreams.

This, of course, was before Isaih

met Buck Willard. He was returning one day from a business trip to New York and chanced to glance over the shoulder of the man occupying the seat in front of him.

His heart leaped. The man was perusing the con-

tents of Isaih's favorite blood and thunder periodical. Moreover, the particular then being perused was written by none other than the great Buck

Willard, foremost of all blood and thunder writers. Isaih stood up and with apologies seated himself beside the

stranger. Here, he thought, was a kindred spirit, an understanding soul,

One who would listen to and appreciate the prattle that he had for years longed to pour into ears of one who would know what he was talking about.

"I noticed," said Isaih by way of an opening, "that you are reading a story by Buck Willard. A paints are nearly finished, but great writer, Willard, I enjoy his stuff immensely."

"Glad to hear it," said the stranger, smiling in friendly fash-"I'm one of his most ardent ad-

mirers. In fact, my name is Willard. Buck Willard. I wrote this Isaih's jaw sagged. He gulped.

Reddened. "You-you don't mean it! You're not Buck Willard, really?" "None other. And no one

joys reading my stuff better than myself. Great, I calls it." "Say!" Isaih's eyes filled with admiration. By George, this is a pleasure. By George! You don't know how I've followed your stories. This is an honor! Can't im-

agine anything I've wanted more

than to meet a real he-man writer

like yourself. You're good!" Mr. Willard beamed "Sure, I'm good. Hope to be bet ter some day.

"Look here, Mr. Willard," said Isaih earnestly, "mind telling me how you get material for stories? must be interesting work." "It isn't," said Mr. Willard. "It's

drudgery. Forever plowing through encyclopedias and reading western novels and going to movies. It's drudgery, I'll tell a man." Isaih was a little nonplussed.

He couldn't quite conceive how writer of blood-and-thunder stories could call his work drudg-

Isaih changed the subject, "What part of the West do you come from. Mr Willard? Arizona, I suppose? Most of your stories are laid down there. Must be a great country?" "Don't come from the West," Mr.

Willard said briefly. "Never been outside of New York state in my life. Don't want to. Like it here. Wouldn't live in the West if I was paid for it."

"But-but-you must know a lot of westerners-two-gun men?" "Don't know any. Don't believe there are any. Far as I can make out cowboys are a dirty, ignorant lot of nincompoops who can't find anything better to do." Mr. Willard picked up his maga-

zine and went on reading. Isaih hesitated. He was bitterly disappointed, sick

to his stomach, disillusioned.

He hesitated a minute, made as if to speak, changed his mind and stood up. He returned to his seat, and his glance fell on a copy of the latest issue of Western Thrills, his favorite magazine.

He had anticipated an enjoyable journey home, with two-gun artists as his dream companions.

Sight of the magazine angered him. He picked it up, flung it on the floor and slumped into his seat.

After all, he thought, a man is coolish to read that sort of stuff. Hereafter, he'd devote his time to better literature.

Read the classics, try to improve himself so that he could talk intelligently when Shakespeare or Trollope and Dickens was being dis-

cussed by his literary friends. Isaih did not again see Buck Willard. The writer left his seat shortly after Isaih had returned to his own compartment and disappeared. At Bridgeport, Buck Willard alighted, even though his ticket read

"Easier than I thought," he told himself as he hurried into the telesatisfied."

He grabbed a blank and scribbled the following message: "Mrs. Letty Flemish, Boston, Mass. Plan worked fine. Your husband fell for gag. Is thoroughly disgusted with Buck Willard and all blood-andthunder stories. Will expect check by return wire. Signed, Pau' Jones.

Angel Fairy Decorated

Birds to Match Woods When the world was very young and all the lovely things like trees and flowers were being made, an angel fairy was sent to paint the birds so that they should be as beautiful as the woods where they lived, observes a writer in the Montreal Herald.

So eager they all were that a long queue had to be formed for the birds to wait their turn. The large ones came first, the little ones stood at the end of the line.

Last of all, among the small birds, was the goldfinch. Such a perky little attractive fellow, too. Chirping impatiently to attract the fairy's attention, he hopped rest-

lessly, instead of keeping his place. "What a lot there are to be painted before my turn comes," he thought. "I'll take a fly around

while I'm waiting." Up and down he soared on his little wings, revelling in the clear sunlight and bright blue sky. Presently he flew down again. What a lovely world it was, fresh and young and glowing with color. He was admiring the just opened flowers and leafy trees when he suddenly remembered his own coat and flew back to the meadow. But the long queue of birds had gone. They had all been decorated and the angel fairy was just packing up his paints

and palette. The poor little goldfinch was left dowdy and plain in a beauti ful world. Overcome with sorrow he sat weeping on a branch unti

the fairy took pity on him. "You were too late through you own fault, little bird," he said, "My

will do what I can for you.' He still had some scraps of color left and set to work on the finch's coat with these. There was a dab of crimson for his face, a touch of blue on his head and long wing feathers, cream and yellow and soft browns for his body, andwhat luck-a big splash of gold for each wing. So that is-so it is said, how the little goldfinch came by his beautiful coat,

Eggs of Other Nations

A favorite article on the menu of Peruvians is the egg of the cormorant, a bird which inhabits the islands off the coast of Peru. In Nicaragua the natives dig in the sands for alligator eggs which contain large yolks and are said to taste like duck eggs. Sea bird eggs form a delicacy for the Eskimos. Apparently the taste of man varies with different countries for in Mexico the eggs of certain species of flies are used in making a kind of food paste considered by the Mexicans as a great treat.-Pathfinder Maga

Sweden Keeps Relics of Past In preserving relics of its past,

Sweden keeps not only examples of costumes and handicrafts, but whole houses, barns and mills from every part of the country. At Skansen in a 70-acre outdoor museum are buildings representing almost every development in Sweden's national life and giving one a full picture of life in former times. To preserve the iljusion completely the curators have furnished the dwellings with kitchenware, furniture, hangings and wall paintings typical of each pe

Pipe Sure!: Should Be

Broken in by This Time

Hallin Hatem Ellis of Shawnee, Ohio, is smoking a pipe that dates back to 1656, when it was purchased by Ado Hatem, at Haman in Persia. He handed it down to Nader Hatem in 1700 and it went in turn to Aca Hatem in 1740; Soma Hatem in 1870, on to Alias Hatem in 1890, and to Hallin Hatem Ellis in 1905. says the Detroit News,

Without much fear of contradiction save from the occasional archeologist who dares puff a clay pipe made by the mound-builders, Ellis may say when he sits down to draw the smoke through six feet of pipe stem that he is inhaling from the oldest pipe in active service in these

United States. Mounted on a glass bowl and standing 30 inches high, this ancient pipe is inlaid with ivory. When in operation, the glass bowl is filled with water, and the smoke is inhaled through the water from the tobacco bowl on top of the glass receptacle. The tobacco is soaked in water first, and is kept burning by means of charcoal.

Advice to Girls Some girls who set out to be agreeable score a victory over those who spend hours trying to look pretty.

Not Cause for Conceit Money should not swell one's head, but can one be blamed if possession of enough gives one a deep quiet sense of repose? As lage said, "Put money in thy purse;" and begin thinking about it not later than the age of twenty-five.

Many a Friend Recommends BLACK-DRAUGHT

People who have taken Black-Draught naturally are enthusiastic about it because of the refreshing relief it has brought them. No wonder they urge others to try it! . . . Mrs. Joe G. Roberts, of Portersville, Ma., writes: "A friend recommended Black-Draught to me a long time ago, and it has proved its worth to me. Black-Draught is good for constipation. I find that taking Black-Draught prevents the billious headaches which I used to have."... A purely vegetable medicine for relief of

The Road to Health

By DR. R. ALLEN GRIFFITH

CHEW YOUR FOOD

WHAT are your teeth for? They are placed in the mouth as the first aid in digestion. Their loss throws an additional burden upon the balance of the alimentary apparatus, which is frequently unable to stand the strain

Thorough mastication can only be accomplished by proper and sufficient teeth. Modern man lives large ly on a herbivorous diet. The more herbivorous an animal the greater the necessity for thorough chewing of the food. It has been proved by scientific experiments that those who bolt their food, those who have insufficient teeth or no teeth, lose 26 per cent of their vegetable food, three-fourths of their entire nourishment and 70 to 80 per cent of their food fill.

Food which is appetizing and pleasant to the palate is not completely nutritious unless thoroughly chewed. Mastication grinds and mixes the food with the saliva which starts the necessary chem-Ical changes in the starches and sugars. It also excites the secretions of the gastric juice. Thoroughly chewed food reaches the stomach in which a sufficient amount of pepsin, rennin and hydrochloric acid awaits it. The transformation of food into nourishing body stuff begins here.

Most of us eat too much. This is are to haste, nervousness, bolting, the inability to chew food properly, and because many foods are prepared so they may be eaten without chewing.

This in turn causes stagnation of the cells that produce the digestive fluide Sufficient hydrochloric acid is not secreted to prevent fermenta-Fermentation manufactures gases. Micro-organisms, mixed with food under these conditions, produce ptomaine and other poisons. Food poisons, the result of incomplete digestion, together with microorganisms from dirty mouths, produce the symptoms covered by

term auto-intoxication. The certain cure for eating too much food is careful and proper chewing. This can only be accomplished by an efficient masticating

FORTY TO FORTY-FIVE

apparatus.

S OMEWHERE between these ages a man has usually reached the highest point of his efficiency, and from then on it is a question of continued vigilance to keep from sliding rapidly down the grade that has only one end for us all.

You don't need to be a health fanatic, but it is well to ask yourself when you reach this age, if you are really 100 per cent well. Don't you occasionally have a headache, little attacks of indigestion, constipation, or sleepless nights once in a while? These are apparently little insignificant things. but are really nature's warnings that it is time to look after your-

Not many of us will follow this out even when we know it is for our own good, but simple cleanliness will accomplish wonders, and we should all take time to keep clean, especially our mouths.

When we get up into the forties it becomes more and more common to hear that some one of our friends has been stricken. The older we get the oftener we lose some good old friend that was apparently in good health only a few days or weeks before. Perhaps the last time you saw him you remarked how good he looked. Don't these things

Death which is not accidental is due to the effects of the action of micro-organisms, a result that might be acute and sudden, or chronic and slow, in its termination. These micro-organisms usually have some limit. small focus of existence and growth, and that point is usually where everything enters the system, the mouth. These micro-organisms are found at the apex of a dead tooth. in pyorrhea, around unsanitary

dental work. There can be no doubt that these causes are responsible for more deaths and misery than war and whisky combined. The only reason we don't try to eliminate it is that it works silently, while war and whisky create a lot of noise and

are more or less spectacular. Even diseases that are not caused directly by unsanitary mouth conditions are greatly aggravated by them, through a lowering of the resistance. When you feel below par and have lost your pep, some little bug is getting in its work. When blood stream is constantly polsoned by pus germs continuously pouring into the system there must come a time when the resistance is broken down and you limp along like an automobile on a few cylin-

When you are past forty it is well to know that the human mouth is where those bugs grow that are almost sure to get you if you don't clean them out.

A Split Second Later He Was Sprawling on the Deck.

Slippery Eels

By James J. Montague

THE whistle had blown, the gong had sounded. From his post by the gang plank a sailor man had repeatedly cried "All ashore that's going ashore," and turned away to other duties. The captain and his subordinates were on the bridge, and the engineer himself presumably stood by the throttle, for this was a small liner and required no gold braid on the engine room or costly flotilla of tug boats to swing her out into the stream. Deep within the belly of the craft sounded a gong, and on deck one felt a slight tremor. Obviously we were on our way.

Looking toward the shore I observed a human figure approaching. and gesticulating as it approached. Its occupant wasted no breath in sound, but applied himself only to the serious and obviously important business of joining our vessel before it was everlastingly too late. He ran low to the ground, only glancing up now and then to note how wide a gap the ship had opened perhaps four or five feet to clear meat off of him to pay all the overbetween her and himself. There was when he set his right foot on the string piece. While the passengers stood gasping, the runner slightly coiled his figure, then opened it swiftly out and took off. A split second later he was sprawling on the deck, engaged in a violent effort to regain the breath that had been knocked out of him by his contact with the deck.

Presently he succeeded in this highly important undertaking, and looked up, at first in trepidation at the bridge, afterward curiously at those of us who stood near his alighting place. His eye met mine, After a second look to make sure he said, slowly and painfully:

"Always late, ain't 1?" "But this time you at least managed to arrive," I said, while the spectators, having been deprived of the spectacle of a man plunging into the uttermost depths of the harbor had begun to walk slowly

"Yep," said the informal visitor, "I'm improvin'."

He was, indeed, for he was a regular member of the crew, and that meant a job at least as long as it required the ship to journey from New York to Savannah. And for this young man that was consider-

The next day I found him engaged in polishing the brass work and other shining metal trimmings on the boat deck. Anxious to learn where and how he had occupied himself since we last had foregathered on another ship and in another port, I inquired of him if it would be too violative of ship's disciplne ever make you think? Could you, if he dropped in on me in my room during his watch below. He said that it could be managed, and that night he arrived, bearing in a newspaper under his arm a package which it would be permissible to open after we passed the ten-mile

> Having nothing of any import to tell about himself, I asked him to pick up his story from the time I had last seen him, almost on the other side of the world.

I listed my questions in the order of their importance. "What had become of the whale

farming enterprise?" "Had he got any steamship magnate to listen to his scheme to have

a trout pool, and a thicket for grouse oting on a great liner?" "Had he perfected his five lap to the mile track so that small motor

cars could be raced on ship board during a voyage?" "And had be pursued any further his researches into the possible use

fulness of electric eels?" "All of 'em was flops but the eel idea," he said. "And that would of been all right if I'd of had sense enough to get out in time. An' you can't hang that on me very hard. for look at all them birds in the stock market who thought a good thing was goin' to last forever.

Where are they now?" "But what about the eels?" I in-

"Well. I was wrong about one hing, an' that was that you could et electricity out of electric eels. | fields and 580 auxiliary fields.

You can't get away from the fact that the juice is in 'em, but gittin' it out an' makin' it of commercial

use was the trouble." "About five years ago when I was in the tropics I stepped off the freighter I was servin' on without speakin' to the skipper about it, an' got some boys ashore to show me where these here eels was doin' their stuff. After giggin' for 'em for three weeks I had enough to start. an' build me a pond so I could get them at work. But I ain't no engineer, an' though I tried every way I could think of to get the juice out of them wriggling fish an' into a storage battery, it wasn't no good.

"But I ain't no quitter. What does a promoter do when a scheme blows up on him? I says to myself. 'He onloads it onto somebody else' I answers back. An' that was what I started out to do. I got a feller who runs a newspaper down in one of them island towns to do my printin' for me, an' we sent out circulars out large pieces of coarse gold. about our eel farm, an' how before very long all the machinery in them parts would be run by eel power, an' when a eel give out, which he seldom done, you could get enough

"By an' by I got a few bites from people who lived on some of the big islands, but most of 'em wanted to know how they was to tell if these was real electric eels I had to sell, or just common eels without no kick into 'em. So I wrote 'em all that if they would get somebody on my island that they knew an' trusted to see a demonstration I'd prove that my eels was the real McCoy an' would supply power as advertised. By that time it struck me it might be a good plan to find out something myself about them fish before I

"Well, I got some ship engineers, any place, an' so prove eels was be removed. electrical. An' blast me if ary eel crock in a basin of water.

else would of done in my place. I rants: advertised in newspapers in coun- sent to Siberia." tries thousands of miles awaycountries where they didn't have no electric power, but needed it bad. An' by an' by I began to get letters of inquiry, and not only that but letters with money in 'em. I kept up supplyin' 'em with information about our plant an' how we was improvin' the breed of eels, an' how before five years you could send eels all over the world to run little local electrical machinery, an' the a little comma. money come in so fast that I figgered I had my fortune all made. "An' then one day a quiet little feller comes along an' asks to see the eels work. I tried to stall him once, an' then says: 'What country does this island belong to?

an' a bunch of local cops come out an' looked me over an' give me two days to get out of the place an' take my eels with me. What do you think of that?

"Here I was doin' what many a supposed big business man has done, an' I got kicked practically off the ocean for it, an' had to go back to work as a deck hand. It ain't right, I tell you. No wonder there's so many Reds an' Soviets and things growin' up all around us." 6. Bell Syndicate.-WNU Service.

TREMENDOUS TRIFLES

By ELMO SCOTT WATSON

TYPOGRAPHICAL ERROR

N THE spring of 1898 a Swedish tailor in Berkeley, Calif., read an advertisement in a San Francisco paper that said "Tailors wanted for whaling cruise in Alaskan waters." Some ancient memory of his Norse ancestors stirred in him. He applied for the job. A few days later he was aboard the whaler "Re-

"Get aloft there and help unfuri them sails!" bellowed the first mate to Eric. "You go yump in the ocean," was Eric's calm reply. But before the mate's fist could crash into his face, the captain, Swedishborn and a kindly soul, interfered. To his demand for an explanation Eric produced a crumpled newspaper clipping and pointed to the "Help Wanted" advertisement.

"The newspaper made a mistake," said the captain with a laugh. "I wanted sailors, not tailors." But Eric was very angry and only the captain's assurance that he could travel on the ship as a passenger until they put in at Port Clarence,

calmed him. There he got a boat and started down the coast. At the mouth of the Sinrock river he met with three prospectors who had found a little gold there and they gave him a small nugget. A short time later Eric showed this to an Eskimo chief who pointed up toward the hills and exclaimed excitedly, "Umalaktok, umalaktok emetna!" meaning "much more the same." The chief then took him up the river to where it forked and there by searching in the gravel they were able to pick

At first this place was known as Snake river but later when a horde of frenzied fortune-seekers pitched their tents and built their shacks there it became Nome City. Thus a typographical error launched one of the greatest gold rushes in all history.

HIGHLY IMPORTANT COMMAS

A COMMA is only one of many punctuation marks and, except for the period, is about the smallest and most insignificant of them all. But put it in the wrong place and disastrous results may follow.

Once upon a time a misplaced comma cost the United States government the tidy sum of \$2,000,000. A clerk transcribing the tariff free list did it. For instead of writing took a chance on a public exhibi- "All foreign fruit-plants are free from duty," he wrote "All foreign fruit, plants are free from duty." an' other educated fellers to come Two million dollars' worth of foran' see the rest, an' to bring com- eign fruit had come into the counpasses along which would point to try before this little comma could

PROTECT YOUR L AND THE LIVES OF OTHERS!

THERE are three questions you should ask yourself about the tires you buy:

1—"Will the non-skid tread give me the greatest traction and protection against skidding?"

2—"Are they built to give me the greatest blowout protection?"

3—"Without sacrificing these two important safety features will they give me longer mileage, thus making them the most economical tires I can buy?"

Answer No. 1-Harvey S. Firestone early realized the value of tire traction and safety and was the first to design an All Rubber Non-Skid Tire. Through the years Firestone has led the way in the design and development of tires with most effective

non-skid treads. Firestone does not depend solely on traction and non-skid tests made by its own engineers - it employs a leading University to make impartial tests for non-skid efficiency of its tires, and their most recent report shows that Firestone High Speed Tires stop the car 15% quicker than the best of all popular makes of tires.

Answer No. 2 - Blowout protection must be built into a tire. Friction and heat within the tire is the greatest cause of blowouts. Firestone protects its tires from friction and heat by a patented process which soaks every cord and insulates every strand with pure liquid rubber. This is an additional process known as Gum-Dipping, by which every 100 pounds of cotton cords absorb eight pounds of rubber. This extra process costs more and is not used in any other make of tire.

Leading race drivers investigate the inbuilt qualities of the tires they use, because their very lives depend upon their tires, and they always select Firestone Tires for their daring speed runs. In fact, Firestone Tires have been on the winning cars in the gruelling Indianapolis 500-mile race for fifteen consecutive years, and they were on the 5000pound car that Ab Jenkins drove 3,000 miles in 231/2 hours on the hot salt beds at Lake Bonneville, Utah, at an average speed of 127.2 miles per hour, without tire trouble of any kind. These amazing performance records are proof of the greatest blowout protection ever known.

Answer No. 3-Thousands of car owners reporting mileage records of 40,000 to 75,000 miles, is proof of the long mileage and greater economy by equipping with Firestone High Speed Tires. Let these unequaled performance records be your buying guide.

Volume-Direct Purchasing-Straight Line Manufacturing and Efficient and Economical System of Distributing to our 500 Stores and to 30,000 Dealers, enables Firestone to give you greater values at lowest prices

AUTO SUPPLIES AT BIG SAVINGS large volume enables us to save you money on every auto supply need for your ear. All Auto Supply and Service Stores, and many of our large tire dealers, have complete stocks, have the added convenience and economy of having them applied.

MOVIE CHATTER

By A Rogue

for Friday and Saturday that's really a good one. The stars are Buck Jones and that lovely little spanish lady Carmalita Cagherity.

The story starts during the world War-over there. You see the boys in action on the western Front, then it shifts back to Arizona, with Buck going into Old Mexico, to the Rancho Del Rey, where he is to meet the sister of his wartime buddy. There is lots of action, and a good Mexican background. This is a "good"

Ruby Keeler and Al Jolson Sunday and Monday it's "Go Into Your Dance", the latest of Warner Bros., musical hits, and I'm telling you its among the best. The writer of this column has seen this picture; and its real. If you think that sweet faced little Ruby was cute in "Flitation Walk", just wait 'til you have seen her in "Go Into Your Dance". She is the lovliest little thing here you ever saw. What I mean, they show that little girl up.

And Jolson, personal he is just a pain in my neck, but I liked him time in this picture. If he doesn't and it shall be its duty to define look out that little wife of his will make a star out of him again.

QUANAH, ACME & PACIFIC RAILWAY COMPANY hereby gives notice that on May 20, 1935. it-filed with the Interstate Comerce Commission at Washington, D. C., its application for a certificate that the present and future ottblic convenience and necessity permit the abandonment by it of a line of railroad extending from a connection with its main line at Matador Junction in a general distance of 8.08 miles, all in Motley County, Texas.

in his report that the federal gov. quiring the parcels of land the TVA ernment had expended a total of \$132,792,000 in development of the power facilities, equipment necessary appurtenances. property was transferred by the ederal government to the Tennessee Valley authority, a corporation, and is carried on the corporation books at \$51,000,000. This is 38 per cent of the actual cost to the taxpayers of the property transferred.

Disclosures of this fact brought many charges in the course of the committee hearing and led to the conclusion by several house members that no electric rate based upon 38 per cent of the cost of the production facilities could be considered honest. In other words, the thought was that a yardstick based on such a method of calculating investment necessarily would have to be made of rubber.

Mr. McCarl told the committee also that he had found various haphazard and "Trick" "trick" methods

Bookkeeping of bookkeeping and that he had found it necessary to disallow expenditures of something over two million dollars which he said were The comptroller general did not refer to these expenditures as having been fraudulently made but he told the committee it was his opinion that the law had to be stretched rather far by any spending agency to construe the payments as justifiable.

The comptroller general took Legion, the Veterans of Foreign sharp exception to the bookkeeping | Wars and various and sundry other methods used by the TVA. It is organizations of former soldiers, upon these records that the electric sailors and marines are prepared rate is based. Likewise it is upon for a bitter fight next year against the basis of these records that the those representatives and senators TVA must show whether it has who dared to oppose cash payment earned a profit.

"Despite the apparently excessive depreciated value at which the is the greatest and most expensive Muscle Shoals property was taken lobby in Washington now. It knows up on the books, the authority is its power and it does not hesitate not using the valuation basis for to characterize opponents of the depreciation but instead is basing cash bonus as traitors. 'See America First" Now More Than Just a Slogan

THE MATADOR TRIBUNE

TELL, well, well. So the Smiths are going to spend their vacation in Europe this summer? Well! Be right in the swing of things, won't

they! As a matter of fact, the Smiths won't. For these last two or three years the swing of things has been definitely away from setting Europe as a goal for vacation travel. Steamship lines and travel bureaus report a steady decline in tourist book-

There are several reasons for this. One of them is that the average pocketbook is decidedly slimmer than it was a few years back. Green, hend of the American Fed-one. That is the fact that Ameri-It is announced, but not by Mr. The others don't count-except for eration of Labor, that a great strike cans are beginning, it seems, to ver that the good old U. S. A. has appeal, scenery and travel interest in an abundance that the

There was a popular song a few take a wiser course and work, as years back that got the idea over as well as anything could: "You'll find your eastles in Spain through your window pane, back in your own back yard. . . ."

That's almost literally true. Just suppose now that you are sitting there dreaming about far-off Spain. famed for its sunny skies, brilliant afternoons, gay, starlit evenings and white towers glistening under merry red roofs.

It's not so far off as you might imagine. Like a metropolis of Old Spain itself is the southern California city which millions will probably visit on their vacations this summer. It is San Diego, home of America's 1935 exposition. Here, on the bay discovered by Cabrillo in 1542 is a setting that today resembles the explorer's native land; here are the azure skies, the white buildings and the red roofs. It is Spain of the Renaissance, yet the travel comforts are those of modern

Much of southern California is like this. The bountiful country. spotted profusely with orange groves and sloping vineyards, guarded by snow-capped mountain neaks. sprinkled with old Spanish missions, lovely in architecture and rich in tradition, often built 300 years or more ago. The climate oncedes nothing to the Mediterranean summer. Yet eleven days or more of two-weeks' vocation may be spent in this happy land, no matter where you live in America.

Offers Many Attractions. California, like any other vaca tion spot in the United States, of fers the visitor attractions that are distinctly American. In addition to the glamour and thrill of Euroout-of-the-way place in Icehand. A pean atmosphere. There is Hollywood, with its endless wonders of the most fascinating of all industries, and the ever-present possibility that you may run into Clark Gable or Joan Crawford face to face. There is San Francisco with its world-famed Golden Gate; there are national parks unsurpassed in beauty and grandeur the world over, and countless points of interest inter-

spersed. Visiting California, you may pass through other glories of the West-Arizona, Colorado, New Mexico, Where in Spain will you find a Painted Desert, a Garden of the Gods, a Yosemite falls?

Or let's say it was England you were thinking about. The charm of the English countryside you will find in many parts of the New England states. On a Vermont hillside you may stop for lunch or for a day or two of rest and recreation in a quaint old English inn. In Boston, Maine, New Hampshire and Connecticut you might well imagine you were on the British Isles, There is a section of the Maine hills which has been called the Scotland of America; it is said to resemble the bome of the kilt and the bagpine more than any other place on earth. only six Japanese, which sounds Leaving New England, you may return home through the Irish hills in southern Michigan, where slopes

By WILLIAM C. UTLEY, | and takes are reminiscent of the "ould sod."

You'll find Germany in several Take a moonlight trip down the Hudson river some evening. All you Tacht" and it will be as easy as apple strudel to imagine you are North. floating down the Rhine, especially as you pass the "castles" of the United States military academy at West Point. If you're looking less for romance and more for recuperation, such as you might find in the baths at Baden-Baden, why there are Hot Springs in Arkansas. French Lick in Indiana, Waukesha in Wisconsin and numerous other you can find the romance there, too,

Or perhaps it's the weather you're worrying about. Sweltering in a stuffy office or shop, or toiling in the fields with the torrid summer sun tain side or watching your breath dart forth in little puffs of steam as | tourist season of 1935, you sigh relief in getting away from the heat of July and August.

cooling-off place of the Swiss Alps? Forget the Alps.

Forget about the Swiss Alps. The Pacific Northwest is calling you. Rainer and Glacier national parks, Mount Baker and other snowcapped peaks becken with promise of cool, clear weather and scenery not even surpassed in the Alps. Paradise valley in Rainier National park is one of the world's greatest winter sports centers, and the real winter sport season lasts well through June. Even after that you will find plenty of snow in the vicinity, for the giant glacier areas haven't yet wilted under the summer sun.

Don't worry about missing the sights of the Riviera. When you see them you will be likely to depreciate them anyway, for it is almost bound to strike you that you've got something like this back home, only better. That's one objection Europeans generally find to American visitors. They just can't help bragging about something bigger and better back home. What the average European doesn't real-

ize is that it's the truth.

Summer along Lake Michigan brings the vacationer the climate of the Riviera. (Have you ever stopped to realize that Lake Michigan is just as far south as Riviera?) The long stretches of white beach, wide expanses of blue sky and water, tree-crowned bluffs along the shore lie have a charm and beauty that is enjoyed by hordes year after year. Swimming, fishing, summer sports and opportunity for relaxation are ever-present; so are the amusement galeties of the resort world, such as dancing and cabaret entertainment.

Educational and historical relics. monuments and atmosphere are part of the magnet that used to draw American tourists to Europe. It is true that Europe's attractions are distinctly its own in this respect. By the same token it is also true that America has tradition and historical education possibilities that are certainly individual. The American tourist has too often overlooked the lore of old-time batthedeuts and spots consecrated by the blood of his ancestors right

here at home. Historical Trips.

The South is replete with such attractions of a more serious nature. So is New England and so are many parts of the Middle West. There are many tour arrangements that plan complete historical trips for the vacationer, sandwiching in enough sport and entertainment to afford him sufficient divertissement from his everyday labors and keep him from going stale.

Tennessee, Kentucky, Georgia, Virginia, Mississippi and other southern states have preserved many of the most historic buildings

and battlefields of the Civil war. No American's education is complete if he has not scanned the countryside from the crest of Lookout mountain, spent a few moments in reverie at the sites of the battles of Chattanooga, Chickamauga, Shenandoah. Andrew Jackson's home, the scene of Sherman's march to the sea and the sites of some of the great Confederate victories should not be overlooked. Northerners will be interested in the places on the United States map. sight of cotton growing and fascinated by the charm of southern hospitality, just as southerners are need is the deck orchestra playing interested in the vast wheat fields, "Zwei Hertzen im Drei Vertel the great industries and the summer recreational possibilities of the

No trip through the South should overlook the most beautiful capital city in the world. Washington, D. C., if it is not that already, is certainly destined to become that. It is considered the most important capital in the world, and it is surely the busiest at the present time. These things that we have been

talking about are for the larger part vacation attractions in America that are comparable with those in Europe. But the United States has more and more to which Europe can never pretend. Most important of these are the

beating down, more than often gives | national parks, which were host to inspiration to fanciful revels in nearly 4,000,000 persons last year fields of snow, skiing down a moun- and will probably be visited by an even greater number during the

America has its own "Mediterranean" coast, you know. The palms Where? At St. Moritz, famed and beaches along the Gulf of Mexico are visited by throngs in the summer as well as in the winter. Florida's climate and vacation attractions might be compared to those of southern Italy. New Orleans is a piece of Old France, even to the dress and habits of many of its people.

Great Scenic Parks.

Outstanding of all these national parks is the Grand canyon of the Colorado river. There is nothing like it anywhere else on this earth, at least. This fearful panorama of nature at its wildest, most awesome and at the same time most beautiful is a sight to remember for the rest of your life.

Some of the other national parks have sights to see that are nearly as grand, but in a different way. There is Sequoia, in California, with the oldest living things in the world, the glant trees, whole forests of them, which tower above as high as the skyscrapers of our metropolises. Yellowstone is the oldest of our national parks and one of the most popular, with its Old Faithful Geyser and its other natural wonders. The Yosemite with the greatest waterfall in the world draws its share of the sum-

Other national parks, some of which may be included in your summer tour, are Lafayette, in Maine; Glacier, in Montana; Rocky mountain, in Colorado; Rainier, in Washington; Crater lake, in Oregon; Lassen volcano, in California; General Grant, in the glorious Sierra Nevada range of California; Mesa Verde, in Colorado; Platt and Hot Springs, in Arkansas; Sully's hill. in North Dakota, and Wind Cave, in South Dakota,

Our national parks contain good hotels, where fine meals are served and where prices are adjustable to almost any pocketbook. They get us out of doors in summer, when we need a relief from the year's work, and let us follow their delightful trails through gigantic laboratories of nature. They give us a true picture of what our forebears had to conquer when they first explored this land and built upon it the nation which we like to think is a good deal better in which to live than any other on earth.

There is little that the European vacation can offer us that we cannot duplicate here in our own country. And the difference in expense it is needless to say, is tremendous. Raliroads, especially the western railroads, as well as other travel media, have prepared tour programs this year which most of pe can afford, and have reduced regular rates for the summer months. It's easier than ever this year to

"see America first."

Whether be will get back in control again is a matter for the courts. To circus folk he is "Mr. Jawn" and there was a reverence about the shy greetings of performers who came up to welcome him for his brief stay.

I've been to a half dozen birthday parties lately. Around 35 everybody should begin to soft pedal birthday talk. At 40 it should never be mentioned. But even avoiding the subect, there are a!ways rememberers. helped a lot with this telegram: "It must be swell to reach 80 and not

By EDITH M. BARBER SPRING lamb has long been considered a delicacy. Our first written records mention the roasting of young lambs for the feasts mentioned in the Bible and the Homeric tales. The word "spring." however, has become an adjective which denotes tender, rather than seasonable, meat and sometimes is applied when lambs are approaching the mutton stage.

You may distinguish tamb from mutton by the pinkish tinge and creamy fat. Mutton has a darker color and the outer skin is slightly vellow and has a dry appearance. the appearance Some one asked me the other day why we could not get mutton in this country of as good a quality as in England. The reason is that in this country most of the mutton comes from old sheep. In England and Australia mutton really comes from a fat, young animal. In the winter time you sometimes see on a restaurant menu or in the butcher shop the sign "hot house lamb." This comes from young lambs which are especially fed during the

While many housewives feel that small legs are better than the large legs, there really is no difference In the quality of the small or large legs of lamb if it is young.

The leg and the ribs are used for roasting, as is also the shoulder, which, although less expensive, has a very fine flavor. The loin, the ribs and the shoulder are used for chops. Of these the loin is particularly tender, but many of us prefer the rib chops with their long bones. For special occasions they are sometimes "Frenched," that is, trimmed to improve their appearance at the expense of that crisp, brown meat, which I think has the best flavor. Sometimes double chops are cut for hearty meals,

Lamb, like beef, needs a hot fire as a start for its cookery. After the meat is well browned the temperature may be lowered. Personally I like lamb well cooked through-

a company dinner is a crown roast of lamb. One of the least expensive is a stuffed shoulder. Another attractive lamb dish is a stew with vegetables and dumplings. Leftover lamb is delicious sliced and served with chill sauce.

Lamb Chops With Mushrooms. Broil "Frenched" lamb chops. In the meantime chop one can of mushrooms, drained; mix to a paste with a very little thick cream sauce. Spread the chops with this mixture, dip in beaten egg, then crumbs and fry in deep fat 380 degrees Fahrenbeit, until golden brown.

Curried Lamb. 3 tablespoons butter

4 tablespoons flour

14 teaspoon salt 2 caps meat stock or 2 bouillon

cubes dissolved in 2 cups boiling water

1 teaspoon curry powder Pepper

2 cups diced cooked lamb Melt the butter, add the flour and salt and brown. Add the meat stock slowly and stir until thickened. Cook one minute. Add curry powder and pepper and more salt if necessary. Add the meat, reheat and serve in the center of a ring of

boiled rice.

1/2 cup vinegar 1/4 cup finely chopped mint leaves Dissolve sugar in vinegar. Pour over mint and let stand half an hour in warm place. If vinegar is very strong, dilute with water. Mutton Stew With Dumplings.

11/2 pounds neck or breast of mut-

1 teaspoon salt 4 teaspoon pepper 2 tablespoons flour 3 tablespoons bacon drippings 2 onions

Meat stock or water 1 turnip 2 carrots 1 stalk celery Sprig of parsley

2 or 3 medium-sized potatoes Cut the meat into half-inch cubes. Salt and pepper them, and dredge

with flour. Melt the bacon drippings in a heav frying pan and brown the meat, add the sliced onions and let them brown slightly. Add enough stock to cover the meat. Add the turnip and carrots which have been cubed, the celery cut in small pieces and a sprig of parsley. Cover and let simmer for two hours. Add the cubed potatoes and cook more rapidly until the potatoes are done. Thicken the liquid with flour stirred to a paste with water and serve with dumplings.

Dumplings.

½ teaspoon sait 2 teaspoons baking powder 4 to 4 cup milk

I teaspoon fat drippings Sift the dry ingredients, cut in fat, and add enough milk to give a oth dough. Drop by spoonfuls over the top of the stew. Cover the and allow the dumplings to steam about 12 to 15 minutes.

The Household By LYDIA LE BARON WALKER

EVERY possession a person has means care and work, unless

the thing is utterly ignored and neglected. When this is the case, nature has a way of reducing the value, or seeing to it that it becomes a total loss to the owner. Even land which is imperishable goes out of the owner's hands unless care is taken to pay the taxes. Residences go to rack and ruin

without the work of occasional repairs. After continual neglect by the owner, and of the property belonging to no special person. it is not an unknown occurrence for one with no title to the property to use it, and even put up some sort of a dwelling. The old saw

that possession is nine points of render it .difficult to oust the occupant and resume complete ownership. least lawsuits pend, and these mean extra work.

cost, and careful attention. So in order to get the benefit from ownership of anything, work and care are

Equipment Requires Care.

There are certain articles and devices which come under the hea! of labor-saving equipments. While they reduce work, they do not eliminate it entirely. Fortunately some of these devices minimize tasks so decidedly that extra man or maid service may not be needed, the possessor being able to perform the tasks himself or herself. However, the care of the equipment Itself One of the most expensive roasts | means that work on it cannot be glected, and have it function prop-

A vacuum cleaner is a good example of a customary labor-saving equipment which reduces cleaning house decidedly. But the brush, if there is one, will not pick up threads, etc., unless it is free to work. The bag must be emptied often or the suction feature is reduced decidedly. The cord must be unbroken and correctly attached or the power is gone. While these are trifling tasks to attend to, compared with the strenuous labor of sweeping, yet it is easy to see that work and care cannot be done away with

One Consolation.

Persons who crave possessions, who wish they had this thing or that, whatever the articles or things desired may be, little or large, costly or cheap, and who have not the ways and means of getting them, may have one consolation. That is, they are relieved of the work of caring for them. Rich people sometimes crave the freedom from the cares of possessions. Occasionally a family moves into smaller quarters rather than have the care of a large estate, even though the manual labor of doing the work does not fall on them, but on a retinue of servants.

In these times of financial stress, it is well to consider the work and care of possessions, and gain a measure of contentment in the freedown from these features, when possession is not feasible or possible. In other words be contented with what you have and make the best of it.

Wall Paper Is Help

Wall paper is a great aid for barnlike rooms with high ceilings. Here's one recipe for "bringing the ceiling down" and making the total area of the room seem less. Choose a paper having a design in which horizontal lines or patterns predominate and do not cover the walls from the baseboard to the celling. but to a point about two feet below the ceiling. Use your molding here, or a wall paper border.

Then extend the ceiling paper down to meet the side walls. Thus, you will appear to lower the ceiling. Also, your eyes will follow the horizontal lines in the paper and the room will seem less "tall" to

On the other hand, if you are papering a small room with a low Willing, choose a wall paper having vertical stripes or patterns to carry the eye up and to add to the apparent height of the walls. And do not "drop" the ceiling, of course.

FASHION is recapturing the elepespeak a truly feminine season. This message of a return to the exquisite, the aesthetic, the lovely and alluring in matters of dress is being told in countless beguiling

trends.

A most happy evidence of increasing sentiment expressed for the sweetly feminine in dress, is the revival of that charming custom of wearing flowers, carrying flowers beauty. This most alluring dinner and trimming prettiest gowns with ensemble is in gray (a very highflowers. No need to tell you the fas- style color for evening) pure-silk cinating things designers are doing with flowers, the illustration herewith speaks for itself.

Another evidence of the dawn of a new era of exquisitely feminine fashions is the re-enthronement of silk, real genuine "all-silk," mind

This call for real silk from those of discriminating taste is not a mere passing fancy, but rather a sense of fabric identification which gown" with "red riding hood" cape is developing among the fair sex. to the right in the group is of ex-We are coming to know that such terms as crepe, satin, taffeta, and the like, are not necessarily called silk crepe, silk satin, silk taffeta and so on.

The duo theme of flowers and real silk sounds enticing-and is it? For answer, please refer to the trio of adorable evening creations in the accompanying picture. It adds a glamorous note to these distinguished and exquisite modes that they were selected for illustration from among a collection of costumes entered exclusively by society women shop owners in the met-

> Lesson for June 9 THE HOLY SPIRIT

(Pentecost Lesson) LESSON TEXT-John 16:7-11; Romans 8:10-17, 26, 27.

GOLDEN TEXT—For as many as are led by the Spirit of God, they are the sons of God.—Romans 8:14.

PRIMARY TOPIC—Jesus Keeps

is Promise.
JUNIOR TOPIC-The Coming of the Holy Spirit, INTERMEDIATE AND SENIOR TOPIC-How the Holy Spirit Helps YOUNG PEOPLE AND ADULT TOPIC-The Work of the Holy

1. The Holy Spirit Promised (Joel 2:28, 29). The prophet foretold that in messianic times there would be a mighty effusion of the Holy Spirit. He was to be poured out. He was to be bestowed upon all flesh, irrespective of age, sex, or

class. 3. This out-pouring was to issue

4. This activity was to be ac companied by marvelous signs. II. This Prophetic Promise Was Partially Fulfilled at Pentecost (Acts 2:1-21, 32, 33).

The unusual behavior of the disciples at Pentecost, with Peter's preaching which resulted in the conversion of thousands, evidenced the supernatural, but the cosmic signs which the prophet predicted to take place in heaven and earth pure silk) fashions were not in evidence. The real fulthe stately evening gown to the left, which bears out fillment of the prophet's prediction word from Paris that deep Illac is in the future and will find fuland violet tones are outstanding fillment in connection with the regathering of Israel and the estabthis season. The wide bordering of silk violets which outlines the lishment of the Messianic Kingdom. graceful cape speaks eloquently of III. Some Names of the Holy the fascinating and ingenious play

Spirit. 1. Comforter (John 14:16, 17) which designers are making with "Comforter" means literally "one called to one's side as a part taker, The costume centered in the pican advocate, a helper and defendture reflects a very ecstasy of er." He is called "another Comforter" as he was to take the place of Jesus, who was soon going away. The Witness (John 15:26). quaint flowing-from-the-elbow sleeves | The Spirit peculiarly witnesses of

Christ. He does not speak of hims graced with a youthful collar self, but takes the things of Christ and shows them unto us (John tady carries an intriguing muff done | 16:13). The Spirit of Truth (John 16:13). The Holy Spirit guides into Vaporous, elusively sheer and all truth. Those who are taught floating, muchly-draped and shirred

by him know the truth. Some Works of the Spirit. 1. He regenerates (John 3:3-8). The new birth is peculiarly the Spirit's work.

2. He teaches (John 14:26). The Holy Spirit was to take up the of teaching the disciples where Christ left off. Convicts the world of sin

(John 16:8, 9). The Holy Spirit alone can show men the demerit of their lives and their shortcomings before God. 4. Convicts the world of right-

eousness (John 16:10). The resurrection and ascension of Christ prove that he is the Righteous One and that righteousness is only possible as he is accepted as Sa-

5. Convicts the world of judgment (John 16.11). Sin unatoned for shall be punished. The sinner who refuses the righteousness which God provided in Jesus Christ shall be judged.

6. Gives victory over the flesh (Rom. 8:2, 12, 13). By the energy of the Holy Spirit the carnal nature can be kept in subjection. 7. He leads the believer (Rom.

8:14). The Spirit-filled believer lives the life of the Son of God. 8. He gives assurance to the believer (Rom. 8:15-17). The Holy Spirit witnesses together with the human spirit to the reality of the new birth.

9. Enables the believer to pres according to the will of God (Rom. 8:26, 27). The Holy Spirit helps from ripping revers to double jabot the believer's infirmities in prayer. V. The Diversity of the Gifts of portant as a detail that promises

the Spirit (I Cor. 12:4-11). In the Church there are to be found those possessing the gifts of wisdom, faith, healing, miracles, prophecy, discernment of spirits, divers kinds of tongues and the interpretation of tongues.

VI. The Sealing of the Spirit (Eph. 1:13, 14).

Into the regenerated life comes the Holy Spirit at once. The indwelling of the Divine Spirit is God's seal of ownership. It is not only a seal of ownership, but of security. It is also the guarantee of the completion of the work of redemption. VII. The Unity of the Spirit

(Eph. 4:1-6). Christian unity is only possible when effected by the one Holy Spirit. VIII. The Sin of Grieving the

Spirit (Eph. 4:30). The Spirit may be grieved by failure to respond to his initiative, by yielding to the lust of the flesh, the lust of the eye and the vainglory of life, by failure to render rection of the Spirit.

HAND-SHAKING OUT OF DATE?

Jugoslavians in Movement to Abolish It.

The formation of an Antihandshaking club in Yugoslavia is noted by the omniscient London Times, which remarks in approbation that trusting one's right hand to a stranger is to give "the most valuable of hostages, and on occasion, as when mastering the left sleeve-link (one of the) indispensable allies in the battle of life."

editor continues, "used to be thought ments. a quaint survival from the days when right hands held daggers or the keeping of another was to clear yourself of any dangerous intention agers, on the average, to be twentyly combining the remembrance of antiquity with the action prescribed in diagrams of Swedish drill.

the quest for physical fitness and agent-has some sensible views on social geniality by constant bowings the subject. In the first place, he in extraordinary activity and serv- from the blps, bringing important abdominal muscles into play and getting better exercise in proportion as the obeisance is marked. The bow course, as in the case of the genius and the salute have this further advantage also, that they do not betray their makers as handshaking can. People who offer a hearty grip, with a feels physically the more fit he feels 'Doctor Livingstone, I presume?' im pression that two strong white men have at last managed to meet, de not at all like it if their palm is hastily and lightly stroked, or if they are given a fleeting sense of a flabby and shapeless mass. "There are secrets of handshak-

ing, hidden rituals and squeezes of the brotherhoods for those who en-Joy them; but from these subtle pressures and convolutions of the fingers much unhappy fumbling and discomfort arises, for many a man has been thought to have been giving some secret sign when in fact he was merely trying to extricate his unhappy hand. An occasional handshake on a big occasion between the parties to an engagement or marriage, or other major partnerships, and on other important events, is all very well, an old custom and not a bad one. But when it grows to ludicrous lengths in the interests of salesmanship and a politeness without ordinary good will behind it, it is time to cry halt and to fill in the membership forms which will enable one, as of right, to extend, for once only, the right hand of fellowship to the stalwart men of Ljubljana."

Depression's End Seen for Peanut Industry

Some people have theories about the superiority of lower animals to the human race. They claim, for instance, that animals eat enough, and having satisfied their appetites, oult. Therefore animals have few digestive disturbances. Of course, anyone who has tried to bring up a dog knows there is something wrong with the idea, but the theorists laugh off this objection by maintaining that the dog is almost human. Take the snake, they say: it eats, then lays off for days or weeks at a time.

Now comes the report from Chicago that the zoo animals are sufering from what the French call vil of the heart, but what we someimes refer to as tummy-ache, from eating too many peanuts. They are being given the well-known and effective remedy.

We merely point out two thingsthat the ability of animals to restrain their appetites in the presence of peanuts has been overestimated by those who hold up animals as exemplars of dietary wisdom; and that the depression is over when kids can buy enough peanuts to sicken a whole zoo.-Detroit News.

Scientists Claim Brain and Brawn Go Together

The theory that brains and brawn go together was put forth recently by a group of scientists who had assembled to discuss the world's ills and how to cure them. A large chest expansion is a symbol of mental breadth, it was said, while a parrow chest denotes compressed intelligence. Children who are the best students, surveys have shown, are those with the biggest chests. Statistics were called in to show that more successful persons, as a rule, have more generous height and girth measurements than their less fortunate neighbors. Thus the idea of brain power being associated with brawn has been elevated somewhat from "This handshaking business" the the field of physical culture argu-

Among the statistics cited in support of the theory that larger dimencould draw swords; to place it in sions are indicative of business success were those showing sales manor ability. Business men have often five pounds heavier and one inch laughed to think how little meaning taller than salesmen. Railroad presithe ritual need have today when dents appear to be thirty-one pounds fighting and ambushes take other heavier and one and one-half inches forms. Fascists and Nazis have taller than station agents. The relalearned to make a gesture more near- tive avoirdupois of generals and private soldiers was not given.

Regardless of the scientific explanations of these phenomena, the or-"The efficient Japanese combine dinary man-possibly the station readily will grant, good health is the best stimulant for a smoothly working brain. There are exceptions, of who has cultivated his brain cells to compensate for physical deficiencies, but in the main the better a person for head work,

End freckles, blackheads quick Be lovely! Have the flawless, satinsmooth skin men admire! No matter

You need the same tire protection that race drivers demand

KELLY PETILLO ON MAY 30, WON the 500-Mile Indianapolis Race on Firestone Tires, Breaking the track record and driving the

entire distance at a rat of 106.240 miles per hour. This record is an astounding demonstration of tire efficiency. To go 500 miles in less than five hours on this rough and bumpy 26-year-old brick track demonstrates the strength and blowout protection that Firestone builds into their Gum-Dipped Tires.

AB JENKINS ALSO RECENTLY DEMONSTRATED THE stamina, efficiency, and blowout protection built into Firestone Gum.
Dipped Tires. He drove his 5000 pound car over the hot salt beds at
Lake Bonneville, Utah, 3000 miles in 23½ hours. This was an average speed of 127.2 miles per hour, and although temperatures were as high as 120°, he had no blowouts or tire trouble of any kind.

These records are made possible by special construction features built into Firestone Gum-Dipped Tires. Take no chances—protect your life and the lives of others by letting us equip your car with Firestone Tires.

Before you buy new tires ask yourself these three questions Answer No. 1 -University tests 1-"Will the tread give me the greatest traction and

2-"Are they built to give me the greatest blowout protection?"

3-"Without sacrificing these two important safety features will they give me longer mileage, thus making them the most economical tires I can buy?"

show Firestone Tires stop your ear 15% quicker than best tires. protection against skidding?"

Answer No. 2 -Unequaled performance records prove that Gum-Dipping gives the greatest blowout

Answer No. 3 -Car owners report unequaled mileage records of the longer wear and greater economy of Firestone Tires.
