

THE MOTLEY COUNTY NEWS

MATADOR, MOTLEY COUNTY, TEXAS,

THURSDAY JULY 2nd 1925

NUMBER 18

OMOBILE ACCIDENT

Automobile accident happened Monday afternoon on local road about 12 miles from Matador, when the Ford in which Mr. G. F. Wood, wife, Mrs. Wood's mother, relative of Hale Center riding, turned turtle. In making a sharp curve in the car was overturned, and occupants received several injuries from broken glass and bruises about the head. Mrs. Wood's right arm was badly scraped and dislocated. Other occupants sustained minor injuries. Passing tourists picked them up and brought them to the office of Trawack, who dresses wounds. They were then continued their journey.

CLOTHING CONTEST

A Clothing Contest for the Home Demonstration Clubs of Matador county will be held in Matador, July 18th. Miss Wintle will be in charge. Three required garments to be worn. Judging will take place at 10:00 a. m. on the date. Judging will take place in the afternoon. The style will be held in the afternoon. Pictures taken.

MORE COTTON ON FEWER ACRES CONTEST

Motley county has been congratulated on account of the interest that is being taken in the "More Cotton on Fewer Acres" Contest that is put on by the Dallas News and the A. & M. College. About one hundred men and club boys have entered in this contest to see who can produce the most cotton on five acres of ground. The first prize in the state wide contest is one thousand dollars and the Chamber of Commerce and the Farm Bureau are offering prizes to the amount of one hundred and twenty-five dollars in this county. Due to the unfavorable conditions over a great part of the state indications are that the farmers of Motley County have a good chance for getting one of the large state prizes.

All entries in this contest must be made and the land measured by a measuring committee before the first of August. Measuring committees composed of one merchant and two farmers are being appointed in each community and this committee will see to the measuring of all land in their community. Any one desiring to enter this contest or who does not know who their measuring committee is should see County Agent T. P. Metcalf at once and make arrangements to have their land properly surveyed in time to get it listed by August 1st.

BEAUTIFUL YARD CONTEST

The Beautiful Yard Contest that is being put on in Matador by the local Chamber of Commerce has created quite a bit of interest in town and about twenty-five people have entered their homes in this contest. The judging of these homes will take place some time before 10th of this month but the committee in charge will not announce the exact date. Matador has received a number of favorable comments recently on the appearance of its homes and every one who has taken an interest in making their home inviting is to be congratulated. We understand that the Chamber of Commerce contemplates putting on this contest again next year and if it is done every house in town should be entered. Matador can be made the cleanest and prettiest town in Texas if we will do it.

Be sure and see Thomas Meigham in the Alaskan at the Cozy Theatre July 3rd and 4th.

WEEKLY NEWS SUMMARY

Goree, Texas—The West Texas Utilities Company is completing a white way in this city. Installation will cover the entire business district.

Graham—There was recently held here at the city hall a meeting of the Young County Poultry Association. Plans are under way to make Younk county a banner poultry county.

Asperment—The hydrographic and topographic surveys of the streams in Stonewall county have been completed by Dr. Leroy T. Patton at Austin. Several excellent irrigation sites have been found in Stonewall County.

Spur—At a recent meeting of the Spur Chamber of Commerce, C. E. Cook, Manager of the local cotton exchange presented plans for local cotton market association. It is also planned to promote a Building and Loan Association.

Bomarton—Bomarton is becoming interested in the conservation of water and the construction of dam sites here.

Richland Springs—Under the auspices of the Richmond Springs Chamber of Commerce, a Fair Association has been perfected here. H. T. Speake is Secretary.

Rotan—Contract has been let here for a \$76,221 High School. Work is expected to be completed in time for the fall session of school.

Munday—J. A. Boger of the Planis Paving Company of Wichita Falls has completed plans for Munday's new street paving.

Merkel—J. C. Mason has suggested to the Luncheon Club of the Market Chamber of Commerce that this city stage a community picnic on July 22.

Moran—One of the largest oil producers ever found in the Moran field was that of the Phillips Petroleum Company's well No. 3. Oil was found at a depth of 2029 feet.

San Saba—C. A. Reed, nut specialist of the United States Department of Agriculture has recently inspected the pecan groves here.

Moran—The Moran Chamber of Commerce Luncheon Club in view of the present house shortage in this city has undertaken to work out plans for the construction of more homes.

Memphis—Recently a party of railroad engineers and promoters arrived in Memphis and went over the right-of-way and dump of the Altus Roswell & El Paso Railroad which was projected a number of years ago, by promoter Kennedy. This road is projected from Altus, through Memphis and Lubbock to Roswell and El Paso.

Abernathy—A fifty thousand acre tract of land at the Spade ranch has been opened to settlement in tracts of 160 acres.

FROM OUR EXCHANGES

Fifty boosters braved the mud yesterday morning, between Floydada and Silverton to make the swing around the circle on a "howdying" trip and to tell the neighbors about the forthcoming American Legion Celebration in Floydada July 3rd., and 4th.

Nearly 80 persons were scheduled to make the trip, but reports of heavy rains northward, with indications that the caravan would have to pull mud all the way to Silverton caused a number to fall out.

But good luck went with the caravan, too and although some were reached the boosters were back on schedule time again by the time they reached Matador for dinner. And this in spite of the fact that they added one thriving little city to their schedule that was not on the original Gasolina, where the boosters were cordially received. To be sure, luck went with the trade evangelists for not a puncture nor any kind of car trouble overtook any of the number on the 175 mile run.

At Crosbyton the reception for the caravan was cordial. A delegation of Crosbyton business men met the caravan a mile out from the city limits and escorted them to the city where they were given a hearty welcome by the mayor.

The Ralls Band which accompanied the trade evangelists, entered into the spirit of the thing and did well. Numerous members of the party expressed gratification at the good fortune of having this organization engaged for one year.

J. D. Starks, who led the caravan kept up his record of never failing to make schedule. From the time the party reached Matador, when they were on schedule after losing time in the mud in north Floyd County, the party were on the dot at all points. Much cooler weather than usual made the trip a pleasant one throughout.

Silverton, Quitaque, Gasolina, Flomot, Whiteflat, Matador, Roaring Springs, McAdoo, Crosbyton, ton and Ralls were visited yesterday.

Tomorrow nine points will be visited. They are Petersburg, Lorenzo, Idalou, Slaton, Abernathy, Hale Center, Plainview, and Lockney. A big delegation is lined up for this trip—Floyd County Hesperian.

We note from the Florida press that little Miss Marjorie Ward, was awarded first prize as the wearer of the cleverest outfit in a "Bathing Beauty Parade" at Hollywood Florida, recently. Mrs. Ward is the youngest daughter of Mr. and Mrs. J. I. Greer of west of Spur, and was born and reared in Dickens County.

Little Miss Marjorie Ward is six years of age and we are sure that her attractiveness and beauty was inherited from the mother whose early life was a part of old Dickens county.—Texas Spur.

THE YOUNG WOMEN'S CIRCLE MEETS

The Young Women's Circle met Tuesday, June 23rd, with Miss Edith Williams for the study for our W. M. U. Manual.

All found these chapters (4.5&6) very interesting and of helpful information to all. Chapters 7 & 8 were assigned for our next lesson.

Beautifully stamped fancy work was distributed among the guests to be worked for the gift shop.

Misses Iva Barkley and Rachel Patton were pleasant visitors, and were greatly pleased with the work our circle is carrying on.

We had three new members: Misses Anna and Lelia Renfro and Mrs. Lee Guthrie. We are very glad to welcome them into our circle.

Delicious angel food cake and ice cream were served to the following: Misses Iva Barkley, Rachel Patton, Lelia and Anna Renfro, Amy Glenn, Meadames P. Y. Springer, Lee Guthrie, T. P. Metcalf, Darius Fulkerson and the hostesses.

We will meet with Lee Guthrie July 14th, for our Industrial hour. Bring your fancy work.

APPOINTED COUNTY DEMONSTRATOR

Miss Edith Wintle of Wichita Falls has been appointed as Home Demonstration Agent for Motley County and arrived in Matador Monday and immediately took up her duties and has been visiting the various women and girls of the county getting acquainted and lining up with the work left by Miss Grimes. Miss Wintle is a graduate of the College in Industrial Arts at Denton holding a degree in Domestic Science and arts and come to us as one of the most highly recommended members of the graduating class. Miss Wintle is staying in the home of Rev. Smallwood and his family and she says she is very anxious to get in touch as rapidly as possible with all work started by Miss Grimes and as it is impossible for her to meet all people and get in touch with those formerly connected with the Home Demonstration work that she will appreciate it if those connected with the clubs and other lines of work will see her and make arrangements for the continuation of the work.

MATADOR WINS FIRST GAME

The base ball game Thursday afternoon between Matador and Flomot was indeed a great victory for the home boys. However the game was a shut out up to the last half of the fifth inning when the Matador aggregation succeeded in putting four across the home bag, and another one in the last half of the seventh. Flomot succeeded in making three runs in the first of the eighth. Both sides were held to this score until the close of the game. The batteries for Flomot were Kinery and Morrison; for Matador Tilson and Groves. We consider the Matador boys did exceedingly fine for the first game of the season and in a short time they will be able to take 'em all to a good cleaning. A good crowd was present and much interest in the home boys was shown. It is not definitely decided but the boys are in hopes of matching two or three games for the coming week. The schedule for other games will be published in this paper later. Watch for the dates and come out and give the home boys some encouragement and a boost.

MAURSUND MALSBY

Mr. E. L. Malsby, of the Matador Electric and Ice Co., of this City and Miss Henriette Maur-sund of Fredricksburgh, Texas, were united in marriage at the home of the brides parents in that city, June 24th. Mrs. Malsby is not known here, but comes highly recommended as a refined and accomplished young woman, and we are sure that she will find the people of Matador very friendly and sociable. Mr. Malsby has been in our city for several months and has made Mrs. Deans, but are having a new and modern home built in the south part of town, which they will occupy as soon as completed. The News and the many friends of Mr. Malsby wish to congratulate him on his excellent choice as a help mate.

Virgil Nappier, of Floydada visited Alvin Wagley today. The boys expect to leave Friday for Quannah and Childress to spend the Fourth.

L. F. Jenkins left today for Rochester, Minn. where he will be given medical treatment. We hope he will return much benefited by his trip.

HIDDEN MONEY

Statistics tell us that half a billion dollars lies tucked away in hidden places in the United States. This means that 25 million dollars interest is going to waste, figuring at 5 per cent.

Keeping your money in a bank signifies confidence, not only in the bank, but also in your own ability to succeed.

THE AMERICAN CREED

"I believe in the United States of America as a government of the people, by the people, for the people; whose just powers are derived from the consent of the governed; a sovereign nation of many sovereign states; a perfect union, one and inseparable, established upon those principles of freedom, equality, justice and humanity for which American patriots sacrificed their lives and fortunes. "I therefore believe it is my duty to my country to love it; to support its constitution; to obey its laws; to protect its flag; and to defend it against all enemies."

A whole lot of people will be very unhappy in heaven when they find out they can't be boss.

The principal difference between a cow chewing her cud and an old maid in chewing her gum is that the cow always looks unconcerned.

A town is usually judged by the kind of streets it keeps. Matador can boast of the fact that they have good streets. Tourists notice this feature and naturally have a good word to say for our town as they pass on.

The News editor and family drove out in the Whiteflat vicinity last Sunday, and we can truthfully say that we consider some of the best farming land in the state off Texas is right here in Motley county. The crops along the road are standing the drought in good shape, and another good general rain will almost assure a crop.

We are in receipt of a letter from Beth Payne of Memphis, Tennessee, informing us that for some reason she had not received the last two copies of the News, she also stated "I had rather have the paper than a letter lots of times" and that "The city is great but our own little town of Matador is the best little town after all." We have corrected her address according to her letter and are in hopes she will have no trouble in getting the paper hereafter.

At this day and age young men are in the saddle in most every avocation of life. The reins of government, the management of great corporations and the commercial interests of the land are in their hands. They are the leading spirits in the financial and business world. If a man has not acquired a competence and an income by the time he is 45 years of age he seldom does. The business men of Matador are mostly young men and in this fact lies principally the phenomenal success of our little city.

Te Nens wants to call the attention of its readers to the Harry Willett and Co's ad in this issue regarding peddlers making house to house canvas, endeavoring to sell various kinds of merchandise. These peddlers are coming into our town most every day selling their goods and taking the money out of town, and nine chances to one are leaving an inferior grade of goods. They represent every class of business, even the printing game. They will make prices that the local printer or business man cannot meet, as an inducement to dispose of their stuff, which is to be shipped from their office or factory, and the result is that you have to take it, whether you are satisfied or not, as the down payment when the order is taken is usually one half the value. Our advice to the residents of Matador is to refuse such peddlers entrance to your home when they seek admission.

One hundred years ago yesterday General Lafayette was welcomed to Boston and by the Freemasons and citizens, and attended the laying of the corner stone of Bunker Hill Monument, erected to Perpetuate the remembrance of the defenders of the rights and liberties of America.

One thing about the News, we have not made any big to-do about our political affiliations as some newspapers over the country do. Nor do we intend to make any personal fight along these lines. Neither have we made any statements as to our party affiliations, as our name at the head of the mast column in this paper reveals that, and we will naturally support that ticket in the general election.

SULPHUR AS AN INSECTICIDE AND FUNGICIDE

(By G. S. Fraps, State Chemist)
 Some readers of my previous article concerning sulphur seem to have secured wrong impressions as to its use as an insecticide and fungicide. If the idea has been gained that sulphur has no value for dusting and spraying, it is as incorrect as exaggerated statements referred to in my previous article, chiefly dealing with sulphur as a fertilizer. My article did not refer to lime-sulphur solution, and was not intended to discourage the use of spraying or dusting sulphur for the control of red spider or rust mites of citrus trees, cotton flea or red spider on cotton, powdery mildew or roses or grapes, or any other insect or plant diseases for whose control it is recommended by a competent authority. As stated in the article referred to: "Those who want to use sulphur for insects or plant diseases should first find out from some competent authority when and how it is effective and use it accordingly." Anyone who follows the advice in the last sentence can hardly go astray, and unbiased information can be easily secured free from the Texas Experiment Station, the A. & M. College, the United States Department of Agriculture, or the County Agent.

It is only fair to say that the exaggerated statements regarding sulphur as a fertilizer, insecticide or fungicide referred to in my previous articles, did not originate with the Stauffer Chemical Company, the Freeport Sulphur Company, or the Texas Gulf Sulphur Company. These concerns the fact that unwise recommendations or exaggerated statements leading to failure in the use of sulphur, would have the effect of arousing prejudice against it. They are cooperating with agricultural agencies to find out, how when, and where sulphur can be successfully used, and basing their recommendations for the sulphur as an insecticide and fungicide upon the work of the Experiment Stations and the United States Department of Agriculture.

In using flowers of sulphur as a dust, it is important to get light, finely divided flowers of sulphur. The control of insects and plant

diseases is studied by the Entomologist and Plant Pathologist, not by the Chemist. It is to them we must look for expert advice and information. The proper use of sulphur to destroy the control plant diseases is briefly stated as follows by Dr. J. J. Taubenhaus, Chief of the Division of plant Pathology and Physiology of the Texas Experiment Station: Flowers of sulphur used as a dust is very effective for the control of powdery mildew on certain plants, such as grapes and roses. It cannot be advised for use on powdery mildew of cantaloupes or cucumbers because it burns the plants seriously. Serious damage was caused in the Valley last year by the use of sulphur dust on cantaloupes. This Division is studying powdery mildew of cantaloupes and we hope to be able to advise methods for its control. Flowers of sulphur have also been effective to control scab of Irish potatoes and pox of sweet potatoes, on certain soils. It is not effective on soils containing much lime, such as some of those on which potatoes are grown around Wharton. Lime-sulphur spray is used in controlling many plant diseases, such as peach leaf curl, peach scab and brown rot of peaches.

Dr. F. L. Thomas, Chief of the Division of Entomology of the Texas Experiment Station, makes the following statement in regard to sulphur as an insecticide: "Sulphur applied as a dust has long been recommended and used to control red spider, and also rust mite of citrus trees. It has recently been recommended by Dr. W. D. Hunter, of the U. S. Department of Agriculture, as valuable in controlling the cotton flea or hopper." It is not at present recommended for any other insects found in Texas. The use of sulphur in all insecticides, especially dusts, is recommended by good authorities, not for the purpose of killing the insects but to increase the adherence. Lime-sulphur solution is used for the control of rust mite and red spider of citrus trees, and other insects. It is very extensively used compound. However, lime-sulphur and sulphur are entirely distinct articles, and should not be confused."

STOP THAT ITCHING
 If you suffer from any form of skin disease such as Itch, Eczema, Pletter or Cracked Hands, Poison Oint, Ring Worm, Old Sores or Sores on Children. We will sell you a Jar of BLUE STAR REMEDY on a guarantee. It will not stain your clothing and has a pleasant odor.
 CITY DRUG STORE

WHY BE PESTERED?

Friends tell us that agents, canvassers, and doorbell ringers are getting so thick that some days they keep one running to the door every few minutes—and usually they come the thickest when one is the busiest.

Why Encourage This Type of Selling?
 Every time you admit a peddler to your home or make a purchase from one you are encouraging him—and more like him—to come again.

Take Silk Hosiery for Example
 You always pay more to the peddler for a medium or fair quality hose than we charge for one of good quality. We are prepared to prove this if you will come in and ask us to do so.
 When you buy hosiery from us
 You see it before you pay for it.
 You don't have to buy more than one pair at a time, in order to get a fair price.
 If you're not satisfied we're here to make things right.
 We carry a larger assortment of styles, sizes and colors than any peddler.
 We'll prove that we can give you better hosiery for less money, and we don't pester around your door.

Compare Our Values with the Peddler's Offerings!
 Rollins, Phoenix and Humming Bird Silk Hosiery
HARRY WILLETT & COMPANY

REGULAR LIGHT SERVICE

The 24 hour light service started the first of last week, and the plant will be turning out ice in the near future at the rate of about 10 tons per day. This plant is a wonderful asset to the city of Matador, and of much benefit to the people.

Mrs. J. Mrs. J. F. Torrens and children of Dallas are visiting her sister Mrs. D. J. Brandon of this city.

Want—To sell or trade for Matador property, two different houses and lots in Anson, Jones County, Texas, approximate value of \$6,000.00. See me over First State Bank. T. J. Sanders.

EPWORTH LEAGUE CONFERENCE

The Epworth Leagues of the North Texas Conference met at Amarillo June, 22nd in annual conference, presided over by Mr. A. G. Waugh, of Lamesa. There were about four hundred and fifty delegates besides many visitors and distinguished speakers, among whom were Dr. P. W. Horn president of the Tech. College, at Lubbock, H. K. King returned missionary from Poland and several other prominent men.

The Leaguers were taught a course in league work by a special faculty, one of whom was Mrs. J. E. Eldredge, formerly of Matador. Classes were taught from 8:00 a. m. until 2:30 p. m., then dismissed until 7:45 p. m., at which time interesting sermons and addresses were delivered by Drs. Horn, King, Haynee and others.

The last day was devoted to memorial exercises for the League officers who had died within the last year; and the Hughes-Carpenter fund, there being \$2500 raised for that fund.

The North Texas Conference is composed of districts, Matador being in the Plainview district, this district received the loving cup this year and last year, also, on points of general excellence and on having the greatest number of Leaguers.

The Delegates were taken on a picnic Thursday afternoon to the Palodura Canyon, every one had a fine time.

The Conference adjourned to meet at Clarendon or Abilene, the place to be decided by committee. All delegates seemed to enjoy the meeting, and it is certain that they learned much because of the efficient manner in which they were taught.

Those going as delegates from Matador were: Misses Josephine Moore, Evangeline Williams and John Hamilton.

Mr. and Mrs. Walter Ford are visiting relatives on the plains where they will spend about two weeks.

SIX THOUSAND FARMERS VISIT THE LUBBOCK EXPERIMENT STATION

College Station June 20th— That farmers interested in the researches being made at the Experiment Station near Lubbock are paying increasingly close attention to the work there, as it progresses, is shown by the records kept by the Station noting the number of visitors on the Station each day. During 1924 there were 6,153 visitors as against 415 in 1916 and about the same number for the three years following. This increase of 1382 percent in 9 years, shows a steady growth in usefulness of the station. The annual number of visitors to the station for the nine years was as follows: 1916, 415; 1917, 389; 1918, 389; 1919, 400; 1920, 667; 1921, 2,103; 1922, 2,624; 1923, 3,412; and 1924, 6,153.

Commenting on the significance of the steady and rapid growth of the tendency for farmers to visit the station and keep in close touch with the useful results of the station work, Dr. B. Youngblood, Director of the Experiment Station System, said: "These people evidently believe in Experiment Station results, and the large increase in farm products during recent years indicates that they are using these results. Numbers of these visitors have made several visits each during the past five years and their frequent return means that they recognize the progressive nature of the work, and it may be observed that there is no better evidence that the Experiment Stations are functioning in a most efficient manner, than the rapidly increasing number of farmers who visit them."

W. W. Moore, called at the News office the first part of the week and had us advance his time on the paper for another year.

Will have my boot shop open soon. Save me your boot orders. C. Blatherwick.

COURTEOUS TREATMENT — FAIR PRICES
L. S. Jenkins, Manager.

Friday of last week 115 acres of cotton was hailed out on the W. P. Marshall farm on Duck Creek. Mr. Marshall had \$1,500 insurance on the crop. A good shower of rain accompanied the hail which benefitted other surrounding crops. Mr. Marshall being the only one to suffer damage in that territory from the hail.— Texas Spur.

Thomas Meighan In the Alaskan
By James Oliver Curwood
This is one of Meighan's biggest pictures. His sweetheart gets lost in the cold hills of the cold state of Alaska. As she wanders around in the hills, she finds herself surrounded by a bunch of crooks, who try to capture her, but her lover comes to her rescue. Meighan and the bunch a big fight on top of a tall precipice. Thousands of feet below they rush the cold water and rocks. Finally Meighan wins the battle by sending his enemy down the deep canyon. Everybody should see this picture. You will enjoy it.

Tuesday night July 7th, Rudolph Valentino in Monsier Beaucaire. See this picture.

SUMMER SCHOOL CLOSES

The Summer school conducted by Mrs. W. R. Snow closed riday. About twenty-five took advantage of the school and all are highly pleased with Mrs. Snow as a teacher.

Residence Lots

I have a number of choice residence lots for sale, located in the Walton Heights Addition, near the new school building. Good water and splendid location. Priced right.
Harrison Williams.

MISSIONARY SOCIETY MEETS

On Wednesday afternoon the Irene Eldredge Missionary Society met with Mrs. Harry Willett for a voice program and a business meeting. A real interesting program was given after the program was given. After the program was given quite a bit of business was discussed. Officers were elected for the ones who had resigned.
