Mrs. John Smith Called by Death

DEATH Monday night claimed one of Motley County's early pioneers when Mrs. Minnie Lee Smith, 82, (Mrs. John Smith) of Roaring Springs died in the Spur Convalescent Home after an extended illness. She was married to John Smith in Dickens City on Dec. 1, 1892. Mr. Smith was an early-day cowboy and wagon boss on the Matador Ranch. He died in 1927.

Wheat Allotment Deadline July 1st

Wheat allotment acreage applications must be filed by July 1, according to Ben Edwards, chairman of the Motley County Agricultural Stabilization and Conservation county committee.

Land on which no wheat was seeded for grain in any of the years 1956, 1957 and 1958, and for which a 1958 wheat acreage allotment was not established, is eligible for application of a 1959 wheat acreage allotment. Owner or operator must apply in writing to the ASC committee by July 1, otherwise the 1959 wheat acreage allotment will not be established.

Edwards said 1958 wheat acreage on a farm which does not have a 1958 wheat acreage allotment, does not qualify the farm with wheat acreage history for the purpose of establishing acreage allotments.

A 1959 old farm wheat acreage allotment will not be established for a farm without wheat history in 1956 and 1957, and on which wheat was planted for grain in 1958 without a wheat acreage allotment, unless an application is filed by July 1. Blank application forms are available at the ASC office.

He will be at the American Legion building between the hours of 11 a. m. and 7 p. m. (June 30) where the pictures will be made.

Rains Circle City; Temperatures Drop

It was a cool day in June, Monday, as rains circled the city of Matador. High winds brought in a northern cool front at noon to put a temporary end to the pressing summer heat. Temperatures dropped as much as 24 degrees, and surrounding farms and communities reported rains of an inch and more.

Steam rose from hot pavements as a light drizzle continued to fall through the afternoon. According to Bob Stanley's thermometer and rain gauge, the immediate town of Matador received only 0.15 of an inch of moisture.

On the Emmitt Lawrence farm about 8 miles east of Matador 1.60 inches of moisture was measured. About 3 miles south-east of town, Marvin Patton reported 1.30 inches of rain. Decorative Colors For Home Living Is Program Theme

"Decorate for Living in Your Home" was the theme for the adult interior decorating class that met at the Whiteflat Club Room, Friday, June 6.

Mrs. A. L. Fair was the speaker for the occasion. In her interesting talk on interior decorating plans she placed special emphasis on color because it "influences our lives every waking moment; only when we sleep is there complete lack of color."

Central idea of Mrs. Fair's talk dealt with selecting colors to suit ones temperament. Temperamental people should choose colors carefully. Depressive natures should choose more warm colors to surround them, but should break these with touches of cool colors.

Warm colors are red, yellow, orange - colors associated with fire, sun, and danger. Cool colors are green, blue, and purple - colors associated with cool shade, sky, and water.

Room locations should also determine color selections. North rooms need vivid color. West rooms look best with balanced color schemes. East rooms can be brightened with sunny yellows. South rooms take to cool deep colors.

Decoration is an individual family privilege and the emphasis is now on family togetherness. Regardless of expert advice, colors which irritate an individual should be avoided.

Eleven women and two high school girls attended the talk and covered dish luncheon. They were Mesdames Bob Martin, Bess Patton, F. C. Bourland, Wilson Barton, Tom Edwards, W. L. McWilliams, H. S. Watson, Lou Jones, F. M. Casey, L. A. Carlie, H. M. Murphy and Misses Vella Ree Edwards and Dixie Barton.

Love story

It seems this girl was so crazy about the service she got from her Phillips 66 Dealer that she'd buy only one gallon of Flite-Fuel at a time... just so she'd have an excuse to come back often.

It was rather trying for this Phillips 66 Dealer, considering all the free services he provides for every customer on every visit. Brushing out inside the car, for example. Cleaning the windows all around. Checking the tires, battery, and radiator.

It turned out just about as you'd expect. Such an obliging fellow, she decided, would be a handy man around the house. So she hooked him.

The trouble is, of course, that most Phillips 66 Dealers are so dedicated to their jobs that household chores get short shift. No moral here for wives. Obvious moral for motorists.

Remember his first great adventure?

With full heart and watchful eyes you helped him enjoy his very first taste of independence.

And how proud you were when he achieved his goal, all by himself, and then, laughing, ran to your waiting arms to share his triumph with you!

Nothing you can give your child is half so precious as this wonderful opportunity to be himself. All through life you want him to be free to choose his way.

That's why it's so important to be on the watch for ideas or ideologies that could set limits to his independence. The idea, for instance, that government should own and run more and more businesses, services, institutions. Don't forget that when government runs more and more things, the individual has less and less freedom and independence!

Think of your son's first "independence day" when you hear talk like that. Point out that in countries where government does control almost everything, the individual is controlled, also. And the loss of anybody's independence is a threat to everybody's freedom.

Very much aware of this danger are the independent electric light and power companies, because government already runs part of the electric business. And powerful people are pressing to take over more.

WHITES RECEIVE NEW ASSIGNMENT

Mr. and Mrs. R. W. White, formerly of Texas and Washington, who have been located at Elim, Alaska the past three years, are being transferred to Klukwan in southeastern Alaska.

Mrs. White, a former teacher in the Matador schools, is employed as teacher by the Bureau of Indian Affairs, while Mr. White is employed under civil service, and heads the maintenance department of the school.

Regarding their new assignment, Mrs. White wrote recently, "The people will be the Tlingit Indians, the fierce tribe that gave the Russians 'fits' in the early days. They just may give their teacher 'fits' in these later days."

"I will be spending the first two weeks of June in Sitka. This is the scene of the old Baranof castle, the first Russian church, and many other historical landmarks as well as the site of the new Japanese owned pulp mill."

"I plan to spend from June 30th to Aug. 7th in Fairbanks at the University. I'll be taking a course in photography from the standpoint of how to illustrate news and magazine stories. I plan to pan for gold along the Yukon along with the eager beaver tourists as well as taking a few other outings."

"Klukwan is only some forty miles from Skagway and the famous Chilkoot Pass of the gold rush days. In June, I believe, a respondent is scheduled to drive his trailer home down the highway past Klukwan and into Skagway with a view to writing articles of the interesting sights and people he finds. I intend to glimpse this lucky creature if possible. I may get shoved into the inlet and drown in the attempt but if so, maybe I can at least send up a happy gurgle."

Mrs. France Barton of Whiteflat drove a carload of the group to Buffalo Gap, but she did not remain.

About Your Health

A weekly public service feature from the Texas State Department of Health.

Henry A. Holle, M. D., Commissioner

The advent of penicillin and other so-called "wonder drugs" has revolutionized modern medical practices. Those new drugs—called "antibiotics"—have caught the public's fancy, and have given physicians powerful

weapons in their conquest against disease.

But into this symphony of praise has crept a sour note. Cases of incorrect dosage and self-prescription are becoming common, raising the danger of serious reactions.

It is a waste of time to run for a shot of penicillin for an oncoming cold. The drug is ineffective against the viral diseases, including common colds, flu, measles, and mumps. Taking penicillin in lozenges or other forms for scratchy throats, for upset stomachs, or a variety of mild illnesses which would quickly run their courses anyway, is unwise unless prescribed by a physician.

A common pattern of self-prescription goes like this: The doctor prescribes an antibiotic for a sick patient. Some of the pills are left over after the patient gets well. Several weeks later, the patient again feels bad and—on his own initiative—takes the left-over pills.

There are at least five good reasons why drugs should not be taken without prescription.

1. When improperly used, they may prevent or retard action of the body's natural immunity. This sometimes happens because drugs work on germs while the natural defense mechanism remains inactive.

2. Germs vary in strength and ability to cause disease. Stronger ones may become resistant to drugs, just as some insects have become resistant to DDT. They multiply and produce new generations also capable of resisting antibiotics. Recent outbreaks of infection in hospitals are proof of this.

3. Some diseases call for massive doses of drugs for prolonged periods. Taking small quantities on your own initiative might mean germs you are trying to kill may actually flourish.

4. Some people are allergic to drugs. One person in 25 is allergic to penicillin, and one in ten may develop allergic reactions after repeated doses.

5. Self-administration of antibiotics can often mask a really serious illness by obscuring symptoms, thus making an accurate diagnosis difficult or impossible.

Increasing use of wonder drugs have shown up their limitations. A most appropriate rule of thumb to follow in the use of any drug is never to take them without a physician's recommendation.
