EXPECT RECORD CROWD TO SING

A record-breaking attendance is expected to participate in the Motley County Singing Convention to be held in the Matador high school auditorium Sunday, June 26th, according to members of the attendance committee. Invitations have been mailed to singers throughout the county and neighboring counties and a general invitation has been sent to many newspapers in this section, seeking publicity for the affair.

Details are practically completed by the arrangements committee. It was announced yesterday and the program is also near completion, officials declared. The 47-year old Motley county organization which meets semi-annually promises one of the best programs in many years for the meeting Sunday and everyone who sings, enjoys good singing or is interested in singing, is invited to attend.

With "singing all day and dinner on the ground," all are requested to bring a well-filled basket, and make plans to spend the day. The program is expected to start about 10:30 a. m. according to final plans.

Low Rates Extended On Land Bank Loans

The reduced interest rates on Federal land bank and Commissioner loans have been extended by Federal legislation for a period of two years, according to word received today from the Federal Land Bank by M. S. Patton, Secretary-Treasurer of the Matador National Farm Loan Association.

On Federal land bank loans thru national farm loan associations the temporarily reduced rate of 3 1/2 percent per annum will be continued for all interest installments payable prior to July 1, 1940.

The temporarily reduced rate of 4 percent on Land Bank Commissioner loans is also continued until July 1, 1940. M. S. Patton, Secretary-Treasurer said.

The temporary interest reduction does not change the contract interest rate, that is, the rate written in the mortgage at the time a loan was made.

At present the contract rates on new land bank loans are 4 percent for loans through unimpaired associations.

The contract rate on all Commissioner loans made through the land bank is 5 percent. Under the law, as now amended, both land bank and Commissioner borrowers will resume interest payment at their respective contract rates on July 1, 1940.

Farmers who now obtain new loans through an association at the 4 percent contract rate, will get the benefit of the 3 1/2 percent rate for all interest installments payable prior to July 1, 1940, and after that will not have to pay more than the 4 percent contract rate for the balance of the term of the loan, which may be as long as 20 to 30-odd years.

This will affect 275 farms and \$1,005,270.52 loans serviced thru the Matador National Farm Loan Association.

Two Injured As Car Hits Farm Tractor

Man Jailed For Driving Without Lights On Tractor

Two Matador citizens, Rang Thornton and Simon Hall were patients at the Traweck hospital and Lee Roy Hibblin a farm mechanic was lodged in jail as a result of an accident on Highway 70 about 11 miles east of Matador at 10:30 Sunday night. Messrs. Thornton and Hall were returning from Paducah when the Modle A Ford in which they were riding struck a farm tractor on the highway. Both men received severe injuries, including cuts and bruises and shock and were rushed to the Traweck Hospital for treatment by sheriff L. A. Carlisle also returning from Paducah a short distance behind the two other local residents. Sheriff Carlisle arrested Hibblin for driving a tractor on a public highway without lights, and placed him in jail. His fine was paid by W. E. Skins of Rochester, Texas, owner of the tractor, and he was released Monday.

Car Is Total Wreck

Mr. Thornton's car was reduced to junk metal by the impact and was towed into town Monday by the Matador Wrecking Shop. Mr. Thornton declared he was driving at a moderate rate of speed and that he did not see the tractor until his car had hit it. Both occupants of the car were cut about the head and face and bruised about the body. Mr. Thornton's medical treatment required a number of stitches be taken in his forehead. The tractor was brought to town Monday and kept in the jail yard until Hibblin's release.

DATES SET FOR TRAIL DRIVERS DALHART MEET

DALHART—The Trail Driver's Association of the Southwest will hold its annual meeting in Dalhart during the Third Annual XIT Reunion next August 8 and 9, announces Col. Jack M. Potter, of Clayton, N. M., president.

"We will have a special program both days for members of the association and for all others who want to come, especially the old-timers," declared Col. Potter when in Dalhart this week to perfect arrangements for the session.

Among outstanding speakers he hopes to have are Jim Hinkle, former governor of New Mexico, who in the 1880's punched cattle in the breaks of the Pecos river. "I worked with him many a time," Col. Potter recalled. "He was with the Penasco Cattle Co. at Roswell and I was with the New England Livestock Co. at Fort Sumner."

Col. Potter says he believes J. Frank Dobie, Austin, will also be here. Mr. Dobie is nationally known for his books on the Southwest, and as a collector of folklore, legends and songs of the cattle lands. Another well-known westerner to attend, said Col. Potter, is J. Everett Haley, rancher, and author of many widely-known books, including a history of the XIT ranch.

Schweitzer and children, Houston, Bert and Frances, returned home Tuesday evening after a month's absence during which time they visited relatives in Clifton and Prescott, Arizona, made a trip to Grand Canyon, and visited with Virgil Leonard, formerly of Matador, now of the Double Circle ranch near Datil, New Mexico.

System Of Terraces To Protect Pool

Menace Of Floods To Be Alleviated At Roaring Springs

Construction was started this week on a system of pasture terraces designed to prevent floods at the Roaring Springs pool, according to Frank A. Buckley, county agent, who is supervising the work. The ridges, which are six feet wide and one foot high, are constructed on level lines approximately one hundred feet apart. The bar-ditch is made on the upper side of the ridge which doubles the water holding capacity. A strip of undisturbed grass is left between the bar-ditch and the ridge to encourage revegetation.

None of the terraces are very near the springs but they cover the entire watershed which lies within the Matador ranch. In addition to the ridges, contour furrows will be placed at seven-foot intervals between to help retard runoff and aid grass growth. Water from adjoining fields will be caught in a stock tank to be constructed, and all surplus water will be diverted from the spillway to a nearby draw.

The work, when completed is expected to greatly improve the condition of this part of the range by forcing all rainfall to soak into the soil instead of causing floods farther down the draw. All of the practices to be used will be carried out according to recommendations of the A. and M. College Extension Service and will meet specifications of the government Range Program.

The pasture ridges are being constructed for the Matador Land and Cattle Company by the county terracing machine. The county machine has just completed a system of terraces on each of two farms owned by the same company, one, three miles north of Roaring Springs and the other, five miles west of Roaring Springs.

Candidate Seeking High State School Place Here Tuesday

S. R. LeMay of Athens, Texas, candidate for the office of State Superintendent of Public Instruction, visited in Matador Tuesday in the interest of his campaign.

He has taught in one-teacher rural schools, in town and city schools, and in the teacher colleges and in the University of Texas. Mr. LeMay has also been principal and superintendent of rural, town and city schools. For the last 16 years he has been superintendent of the schools in Athens.

While here, Mr. LeMay declared that the most important objective of his drive for the office of State Superintendent are to regain for the Department of Education, the respect of the other departments of the state government and of the friends of education everywhere, and to take political maneuvering out of the administration of rural aid funds.

MULE— From Danna Langhorne, Democratic committeewoman at Timpson, comes this gem which she got she knows not where. The author is anonymous but good: Over the hill trailed a man behind a mule drawing a Dixie plow. The farmer was broadcasting.

"Bill, you are a good mule, the son of a jackass, and I'm a man made in the image of God. Yet, here we worked hitched together here in and year out. I often wonder if you work for me or I work for you. Sometimes I think that this is a partnership between a mule and a fool. For surely I work harder than you do. Plowing here we cover the same distance, but you do it on FOUR legs, and I do it on TWO. So, mathematically speaking, I do twice as much work as you do.

"Soon we will be preparing for a corn crop. When the crop is harvested I give one third to the landlord for being king enough to let me use this corner of God's Universe. The other third goes to you and what is left is my share. But, while you consume all of your one-third, with the exception of a few cobs, I divide my third with seven children, six hens two pigs, two ducks, one goose and a banker. If we both need shoes you are the one who gets 'em. Bill you are getting the best of me; 'taint fair for a mule, the son of a jackass, to rob a man, the lord of creation, of his substance. And come to think of it, you only cultivate the corn. After that, I cut

Proper Storage For Clothing Essential

Clothing Storage is one of the most essential things of a home, according to Mrs. Juanita G. Butler, Home Management Supervisor of the Farm Security Administration. In this section of the country where dust and sand storms are so bad, a clothes closet is more valuable than ever, Mrs. Butler stated.

"A place for everything and everything in its place is as convenient and proper a place for clothes in the home as for instruments in a doctor's office." A well arranged, well kept, clothes closet contributes greatly toward prolonging the life of our garments, helps us appear well-dressed and minimizes the amount of energy of caring for clothing.

The essentials in a closet to make it a well arranged and convenient closet must have the following: It should be two and one-half or three feet deep and at least 6 feet long; a rod and hangers; a row of shelves across both ends and one or two shelves near the top the entire length of the closet; a shoe rack; and may have under the last shelf a drop-door, hinged at bottom and fastened at the top with catches, this makes an excellent place for dirty clothes if you do not have one in your bathroom.

TWO CLAIMS PER MINUTE

Old-age insurance lump-sum claims are now being approved by the Social Security Board at the rate of two per minute of each working day. During April, the Board certified and sent to the United States Treasury for payment 19,370 claims, valued at \$824,234.

LUMP SUMS PAYABLE

Wage earners in this vicinity who reach age 65 may be eligible to file a claim for a lump-sum payment under old-age insurance provisions of the Social Security Act. Inquiries should be directed to the Social Security Board, 1012 Oliver-Eagle Building, Amarillo.

A person need not be totally unemployed to receive unemployment benefits. Under the Texas Unemployment Compensation Act, a worker may receive benefits for partial unemployment. He will draw, in partial benefits, enough to make his weekly income \$2.00 more than what he would receive from total unemployment benefits.

Under a plan just adopted by 37 states, a worker who goes from work in one state to work in another, may draw any out-of-work benefits earned in any state by filing his claim in the state where he loses his job. He need not return to a state where he worked in order to establish his claim.

A home economics cottage, which National Youth Administration boys are assisting in building at the Dunbar High School in Mexico, is nearing completion. J. C. Thirty-six youths in DeWitt County are working part-time on an NYA farm produce cannery project at Cuero. Youths assist in canning vegetables and meats, and process approximately 300 cans daily.

Texas topped every state in the Union in April in finding jobs for her unemployed by the State Employment Service. California was second, placing 29,783; Texas placed 31, 911.

Fly-Traps Urged For Rural Homes

Now is the time to protect our Family's Health, according to Mrs. Juanita G. Butler Home Management Supervisor of the Farm Security Administration. After having the great amount of rain, flies and mosquitoes are much worse around our homes, especially the rural home, Mrs. Butler stated.

All the Farm families cooperating with the Farm Security Administration are urged to make fly traps, one for the house and one for the barn. Also they are urged to repair or put on new screens on every window and door.

Fly traps are easily made by using an apple box and screen wire. Remove the bottom, then put screen on sides where top and bottom have been removed. Place large spoons at one end for legs. Also on this same end in the center cut a hole 4 or 5 inches in diameter. Make a funnel of screen wire and place in this hole with the point inside of the trap. The point of the funnel should have a small hole left in it for the flies to go through. Place a saucer of sweetened water or syrup on the floor beneath the hole in the trap to draw flies to the trap.

Once or twice a week the trap should be cleaned, but be sure all flies are dead before opening. One may kill them by spraying with fly spray. When the flies are poured out they should be burned.

METHODIST CHURCH

Eugene L. Naugle, pastor The story has often been told of the man aboard a sinking ship with two bags of gold. They were his all, the treasure for which he had spent the best part of his life. But he could not carry the gold with him if he would escape from the doomed vessel. He had to choose between the gold and safety. He chose the gold and went to the bottom of the sea with it in his arms. That was the situation of the rich young ruler. He wanted the life that Christ alone could give, and his desire for it was great and keen. Nevertheless, he wanted his wealth more. Therefore his fatal choice. Every weight that impedes our progress to Christ is to be laid aside. "Wherefore seeing we are also compassed about with so great a cloud of witnesses, let us lay aside every weight, and the sin which doth so easily beset us, and run with patience the race that is set before us." Heb. 12:1.

Power Restored Quickly After Clyde Cyclone

The job of re-building the picturesque little town of Clyde, struck last Friday by a tornado which took a toll of 14 lives and nearly damaged \$100,000 in property damage, includes construction of many blocks of electric distribution lines, according to C. A. Pitts, local manager of the West Texas Utilities Company, who said speedy restoration of light and power in the unstricken portion of the village had been cited as "greatly facilitating rescue work."

Despite the tangled mass of poles and lines, unrooted and hurled into the jumble of splinters from some 20 homes and 19 freight cars, lights were on again in Clyde only 32 minutes after the storm first struck the company's 66,000-volt line a few miles north. The "juice" was cut off almost instantly so that there was no danger from "live wires" when the tornado swirled into the residential section.

"Our service men from Baird, in charge of the electric system at Clyde, were on the scene in 20 minutes," Mr. Pitts said. "The first line went out at 8:27 P. M., lights were on again at 8:59 P. M., and our first emergency truck and

crew was in the stricken area 9:15 P. M., helping to distribute both living and dead from the debris when the first night patrol arrived."

Damage to the electric system was estimated at less than \$100,000, he said.

"While the storm's violence was one of death and destruction," said H. H. Monk, WTU district manager of Cisco who was near Clyde, "it served to reveal the splendid spirit of cooperating and assisting in our organization and capable system built through the years to meet just such emergencies. Towns served by WTU have the protection of a trained staff of men whose loyalty extends beyond the company and into the homes of those it serves."
