WOMEN HOLD TORCH OF WAR WORK

Texas women are rapidly answering the call of a nation at war. Thousands have literally "grasped the flaming torch" to go into plane factories through government schooling offered by NYA, now engaged exclusively in training youths for jobs in war plants.

Mrs. Von Muse, wife of a Matador blacksmith, is now in the Ranger NYA school learning to use a welder's torch expertly. When Mrs. Muse has completed the course she will return home to assume a man's duties in the blacksmith shop where her husband is employed. Repair of farm equipment is regarded as equally important to building planes and the government is providing her training through special arrange- ment, NYA officials declared.

Others from Motley county at the Ranger NYA school, include Gladys Cook of Whiteflat, Murlice Carpenter and Nine Lee Green of Roaring Springs. Mrs. Dorothy Kircancon of Northfield and J. W. Gatewood of Roaring Springs.

Miss Mary Ruth Muse, sister-in-law of Mrs. Von Muse of Matador, has completed her course of NYA training and is now employ- ed by Consolidated Aircraft Com- pany of Fort Worth.

New Order Permits Renewal Of 'A' Gas Coupons By Mail

West Texas farmers and others living at a distance from their local War Price and Rationing Boards may renew their "A" gasoline coupon books by mail, the District OPA office has announced in an effort to save gasoline and prevent loss of hours from work. This plan will go into effect on June 22 and after that time, both motorists and bicyclists should begin picking up their application forms, Local Boards will publicize the names of filling stations at which the forms can be secured, the OPA said.

Due to the fact that "A" rations expire on July 21, applications should start coming in immediately after June 22 in order that the boards will have time to process them and mail them back before expiration date. This mail renewal plan also includes renewal of the basic "D" motorcycle rations and eliminates the school-house registration that was necessary when basic rations were issued, the OPA said.

Steps pointed out in the procedure to follow include (1) on June 22 pick up application forms from designated service stations; (2) fill out forms according to instructions and mail them back immediately to the boards. Accompanying these forms should be (a) the back cover of the present "A" or "D" book (properly filled out), and (b) the current tire inspection record showing that proper inspections have been made. New applications should show serial number of tires now on a car and if there has been any change since the last tire inspection, a note of explanation and evidence of purchase should accompany the application form.

"Dear Sirs: "I am enclosing one buck for a few future copies of the Tribune. I had the pleasure of reading one of your copies, received by a buddy of mine by the name of Tom Newman, who happens to be one of your home-town boys."

"He also sends his gratitude toward your generosity shown to all service men from Matador (Motley county). Also to Miss Zona Beth Faulkner, the Home Ec teacher, who sent us a box of sweets, which was enjoyed by Tom, myself and two other boys on our crew."

"I was especially struck with the wit and philosophy shown in your column, "Trail Dust." Keep up the good work.

"We get lots of columns here but they are always 'left' or 'right'."

Victory May Depend On Salvage

Collection of scrap metals, waste fats, discarded hosiery and other vital war materials must be carried on a continuous basis until the war's successful termination, civilian salvage leaders of the South Plains were told in an all-day scrap rally held in Lubbock, Tuesday.

"We need this metal," Gen. John A. Hulen, regional salvage manager of the eighth region of the War Production board, declared. "...this fall we're going to be seriously short of this scrap again. We can't afford to be caught short and we haven't a stockpile that is going to last very long."

Vital need of tin cans, discarded nylon and silk hose and silk underwear was stressed at the meeting, attended by County Judge W. R. Cammack. Powder bags are made from discarded nylon hose and used to discharge shells from big caliber guffs. Old nylon makes parachute fabric, parachute parts, and ropes used for glider take-offs. Fifteen pairs of nylon hose are used to make one powder bag. Salvage Plan Organized

Judge Cammack said a new salvage plan for the county has been organized with Miss Dana Meredith, county home demonstration agent, as co-chairman to assist Mrs. M. J. Reilly, and county agent J. R. Emmons also to assist in the work.

Tin cans are badly needed and every resident in the county is asked to save all cans, cut out tops and bottoms and crush. Each community will have a designated collection center, to be announced later (rusty or burned cans can not be used). A general collection depot will be established here and when sufficient quantity has been accumulated, trucks will be employed to haul them to Dallas. Discarded silk and nylon hosiery and discarded silk underwear are badly needed. The local office of the West Texas Utilities Company is now the designated depot for these materials. Used cooking fats, also badly needed may be sold to markets.

County Falls Behind In Bond Sales For May To Shatter Buying Record

For the first time since the start of the war, Motley county failed to achieve its monthly War Bond sales quota during the month of May. It was disclosed Tuesday by G. E. Hamilton, chairman of the county bond-selling committee.

Mr. Hamilton said the total May sales were short approximately \$2,000 from the quota of \$14,100. He declared that the prospects of reaching the June quota is also very dark, since only a small amount has been purchased against the county's quota of \$14,200.

He urges everyone to realize the importance to continue the high record established by the county, and help meet the Treasury Department's appeal for quotas to be exceeded by at least 10% during

Implement Dealers To Meet Next Week

Full explanation of the procedure to be followed in securing for farmers and ranchmen the necessary and essential tools and other supplies needed for their operations, under new War Production Board orders which became effective June 7, will be given at a public meeting in Lubbock, Tuesday, June 22, at 2 p. m. at the Hilton Hotel Ballroom.

Since most of the detail connected with the actual securing and selling the items to the agricultural producers will be handled by retail hardware merchants, the meeting, and the information it will develop will be of particular interest to such dealers—and all of them, in all of the towns on the South Plains, are urged to attend.

The shortage of tools available to sell to farmers in the area, has been extremely critical the last ninety days. The matter was called to the attention of the Lubbock Chamber of Commerce in March. The organization immediately petitioned WPB for relief. Several detailed briefs were prepared and presented to Federal officials all the way to Washington. Other organizations and many individual merchants joined the campaign.

The new orders, and the greatly simplified procedure which they allow, WPB representatives assert will straighten out the matter and provide within sixty days adequate stocks of tools for all retailers who follow the provisions of the new rules.

A fatality reduction of 33.6 per cent—from 1,981 to 1,316 last year was recorded by the department. City of Lubbock, only municipality between 25,000 and 50,000 population to escape without a single fatal motor accident, showed a 200% decrease over the previous year. Abilene in the same classification, showed a 50% increase.

Forty-six counties in the state had no fatal accidents in 1942, as against twenty-seven counties in 1941.

Deathless Days Listed
The state had 27 deathless days in 1942 as against only 12 such deathless days in 1941. Week-ends continue to be the most dangerous days of the week. EDGAR LEE
 This week, from a buddy Edgar Lee, of Matador, in the Hawaiian Islands, I contribute to the people of Matador, the Tribune, from his interesting as follows:
 I am well acquainted with you people by reading the Matador Tribune. I presented this opportunity by one of my closest friends, a lad of your age, who you all call him, for a little while ago, and have been reading the Tribune for the last seven months. Our careers closely paralleled, our induction centers only army camps we served in together.
 "Trail Dust" is a jewel, shows you to be quite a writer. Some of the sayings in your column are well worth reading.
 I am interested to know of the most common occurrence in our squadron has been reported by many of the letters stating that his "is" is no longer true, nor understand (Tex, Lipka a triumvirate) that a man would get panicky and being far away and long gone, and feel that a sense of security in marriage slimmer as the years go out of sheer decency, the young ladies should let at the other end in on it, and them down—easy or bump, whichever they at least let them down then it seems that some were behind the door grey matter was passed than such little idiosyncrasies, the army has treated us well. We would like to wrap this tea party up and hit the states, but we can't complain too much about our lot. We will feel a bit satisfied when we have that drink in the U.S.O. club in Tokyo.
 Looking forward to the future editions of the Tribune and again congratulating you as the guiding hand of such a grand little newspaper, I will terminate,

I am in about twelve days then gone again but every time when I get in, I have three or four papers waiting, then get one or two more before I leave again. In fact I just got my mail today, and had two papers.

Thanks a lot to you and the ones who make it possible for us to hear from home. Best wishes to everyone.

THESE HORSES HAVE JOINED THE CAVALRY!

The merry-go-round has gone to war!

Like the plants that made refrigerators, stoves, furniture, and many other familiar household items, a plant that made merry-go-rounds is now turning out vital equipment for our fighting forces.

It was the biggest job ever performed by American industry to change over from washing machines to guns, from automobiles to planes and tanks. A job that demanded more machinery, more equipment, more men—and more electric power!

That's part of the story why America clicks, of our amazing ability to get things done. Let's feel proud of our achievement . . . proud that we have more electric power here in America than all the rest of the world combined, and we are using it.

Yes, we have built up in this country more kilowatt-hour output than all the Axis dominated countries combined.

The electric power line is another line the Axis cannot hold.

Lines have been extended to new factories and military training camps ahead of schedule.

It was not an accident that America was power-full.

Electric companies, under business management like the West Texas Utilities, had planned ahead. Knowing their business, schooled in emergencies, they saw to it that Uncle Sam had plenty of electric power—wherever and whenever needed!

It's on tap for all civilian needs too—no shortages, no rationing, no increase in cost.

It's an outstanding wartime example of what free men can do. Free enterprise works!

We're fighting this war to hold this freedom. Government bureaucracies should place full emphasis on winning the war and desist from their political endeavors to permanently change our system of government.
