Meat Rollback Cattle Raisers

SAN ANTONIO, June 19-Directors of the Texas Southwest Cattle Raisers' Association branded the meat rollback subsidy as basically unsound and un-Amer-

The 60 directors of the association also adopted a resolution in which they voiced "emphatic, unalterable opposition" to the entire program.

The subsidy program provides

for a rollback in meat prices averaging 10 per cent by both slaughterers and retailers. The reduction in the retailers' price is effective June 21, with the subsidy payment being made on a per pound basis

to the slaughterer. The resolution claimed that the consumers would lose \$210,000,000 through the subsidy program and set out that "such a program will follows: inevitably retard the protuction of

beef. falling market will not encourage ity to permit soldiers to engage in home accidents Dr. Cox said. production.

final resolt of the program will be to grant passes for this purpose if, down to one of reasonable indithe encooragement of black mar- in the opinion of the commander vidual caution. We cannot view kets in meat.

The maximum saving to consummer under the rollback was placed at \$264,000,000 on the basis ances and average rollbacks per pound.

The resolution quoted "governmental agencies" as placing the estimated cost of the subsidies as local civilians, will not interfere estimated cost of the subsidies as \$474,000,000 and added, "We as pense to the Government is in- tional crisis, is a neglect that cantaxpayers will have to bear our share of this net loss of \$210,000,-000 in addition to bearing the burden of the rollback."

Association directors also drafted a program for distribution of cottonseed and other feeds through stockmen committees appointed by county agents.

The National Youth Administration, a former depression agency, is now engaged exclusively in training youths for jobs in war plants, and has made an important contribution to the expanding labor force of industry. The NYA operates under the direction of the northern end of the state have War Manpower Commission, and receives its recruits through the |5 United States Employment Ser-

> Eligibles for NYA training are girls, 17 to 25 years of age, and boys, 16 to 171/2 years. After a four weeks' course, the student is sent to a war plant for work. One war plant in the Southwest has 3,000 NYA graduates, largely from West Texas, on its payroll. Girls and those boys ineligible for military

Gene Worley Asks Release Of Men To Aid Farm Work

From time to time it has been requested that word from Washington on various matters of current interest might be of aid to the people , whom it is my honor to represent. It will not be possible to maintain a regular column due to the press of work, but trust the things I do write will be of helpful assis-

If this column appears in your local paper thanks are due the e ditor,-Congressman Eugene Worley.

Farm labor is scarce and in an farmers in making crops I asked tuberculosis. the War Department if it was not possible to release men for this effort. I was officially informed as stairs in homes where there are

"Military personnel are not granted furloughs for the purpose "Livestock producers," the reso- of farm work. However, comlution continued, "will resent the manding officers of all posts, farm work in nearby communities of average civilian meat allow- sires permission or a pass; such and should be reduced." action will not interfere with the by the individual and all other can seriously cripple our war efconditions of his employment are fort. left to the tetermination of the soldier and his farm empolyer so

fas as the Army is concerned." Farmers in need of help in harvesting crops are asked to refer the matter to their County Agent who

service become permanent war workers, and war plant executives say that youths make highly satisfactory employes, who turn out more work than elderly persons.

The NYA should be recognized as a wartime agency of usefulness, having shed entirely its depression functions. The criticism, heard in Congress, to the effect that the NYA is useless and extravagant, fails when the facts are learned from the war plants .- Star-Tele-

Accidents In Home Cause Many Deaths

AUSTIN, Texas, June 14-The general opinion prevails in America that home is about the safest place there is. However, the facts prove that, far from being the safest, it is often quite the opposite.

In commenting on the urgent need for the protection of life and limb in the American home, Dr. Geo. W. Cox, State Health Officer. today declared that accidents in the home are the cause of more deaths than diphtheria, scarlet fever, whooping cough, and measles combined; of more than appendicitis; of nearly as many as diabetes; of over two-thirds as many as automobile accidents; and effort to secure more help for the of over a third as many deaths as

"Slippery floor surfaces, lack of handrails on cellar steps, absence work without injuring the war of protective gates at the top of small children, toys left on stairs, unanchored small rugs on polished floors, poisons in medicine cabinets accessible to children, and the careless storage of sharp tools. payment of a subsidy, the price of camps, stations, divisions, and and firearms are some of the more livestock will be lowesed and the lower separate units have author- prominent hazards resulting in

"However," he added, "in the The resolution added that the during normal off-duty periods or last analysis, the problem boils concerned, an emergency exists in complacently the more than 30,000 a nearby farm community due to deaths annually due to home acthe shortage of available farm cidents. These deaths, chargeable labor; the soldier concerned de- to remediable carelessness, can

Pneumonia Showing New Texas Increase In Texas

The unusually high incidence of oneumonia in Texas at this time being over twice that of the seven year median is undoubtedly one of the dangerous and disabling sequelae of the current epidemic of influenza according to Dr. Geo. W. Cox, State Health Officer.

"Pneumonia is a killing disease and a contagious one," Dr. Cox warns. "It is definitely transmitted from one person to another in the same manner as other contagious diseases. The pneumonia patient should be isolated with the exception of the attendant, and all paper tissues used for receiving nose and throat discharges should be immediately burned.

Dr. Cox advises all persons suspecting the presence of influenza to place themselves immediately under the care of the family phyinstructions. Bed rest, liquid diet greatly st and proper nursing will play a major part in the safe recovery of produced was \$954 the influenza patient.

"Pneumonia is the most frequent complication resulting from influenza and is certainly one of ruced in 1942 was the most dangerous. The death rate in pneumonia remains high in natural gas and spite of medical efforts to control counted or most of it and when it follows so debilit- Texas would rank his ating a disease as influenza, the states without the patient naturally has less resis- ing the last two tance and vitality with which to combot it," Dr. Cox declares.

Hog Raisers Are Advised By County Agent's Office

The following advice is supplied by county agent J. R. Emmons, and will be found helpful in successful hog-raising: Minerals, feed equirement and care.

One of the common hog defiiency diseases is leg weakness. down in the back and paralysis of hind quarters, believed by many to be caused by worms. It can be prevented by feeding the following mineral mixture:

2 pounds limestone flour, 2 lbs. steam bone meal and one pound of salt.

Feeding Requirements

Granted good stock and good management, about 400 pounds of feed will produce about 100 lbs of pork. Good pasture will reduce the amount of protein supplement required to finish a hog, by about 50 per cent. Pigs that have access to good pasture until they weigh 100 pounds, can be finished to 200 reasonable profit.

Regarding the care of hogs, it is advisable to break off the temporary tusk which pigs have at birth, to prevent the cutting the udder of the sow and injury to other

pigs. A sow should have plenty of water but nothing to eat for 24 hours after farrowing.

Still, if a woman doesn't have strong sense of intuition, how is

What boy wouldn't like to just sit in a flying fortress! And to fly it . . . well, this pilot ranks with Superman!

One look at the instrument panel and you feel the same way. It's hard to believe that ordinary mortals could ever master the maze of dials, buttons, levers and switches required to fly and fight a 30-ton bomber.

But a lot of West Texas boys are doing it with deadly efficiency. (Ask Adolf, Benito or Tojo.) And they don't learn their jobs just by reading a book. It takes intensive training and practical experience to produce the bomber teams who risk their lives together.

The electric business is like that. You can't make kilowatt-hours with theories. You've got to learn how -the hard way.

That's the way most of the men and women with us

got their start. It's the American way. Do a better job d you get better jobs to do.

It's the system of free enterprise. It's simple-but it works.

It works so well that America's big peacetime industries became great war machines overnight.

It works so well that America's electric companies, under business management, were able to supply war plants with far more electric power than any nation has ever known before in addition to normal peace-

They're doing the job without rationing—and with-out increased cost to you!

It works so well that we're winning the war in spite of socialistic bureaucracies. But to hasten the day of victory, the bureaucrats must concentrate on the war and desist from their plans to permanently change our system of government by which America stands to lose its freedom at home.
