# Are Mighty Weapons in this War!

Superiority in the air .. the prerequisite to victory on the battlefield . . . can only be attained by the use of hundreds of planes, bombers and fighters. These planes must be armed. The fighter must have thousands of rounds of machine gun bullets; the bomber must have bombs, fifty pounders or block-

YOU, an American housewife, can help arm these planes. The spoonful of waste grease you pour into the empty tin can is a mighty weapon of war. The grease you save and sell to your local grocer goes into the making of nitroglycerine . . . the basic explosive used in bombs and bullets.

Our job here at your electric service company is to furnish the power that turns the wheels that makes the planes that carry the bombs and the bullets which your kitchen helped to furnish. The job of producing planes to secure and maintain superiority of the air is a job that only American industry backed by power produced in business managed, privately owned electric companies

Seven-eighths of all power used in war production is produced by companies operating under the American system of private enterprise.

# **Draft-Aged Farmers Released** for Temporary War Jobs!

State Headquarters for Selective Service permits draftage farmers in this area to accept war jobs during slack seasons without affecting their deferment classifications.

Because men are urgently needed in vital war industries in this area, farmers and farm laborers may accept temporary jobs in essential industries under the following conditions as cited in a Headquarter memorandum of Dec. 6th to all local boards, WMC Area No. 6:

(A) They remain in their seasonal occupation for a period of not less than 8 months of the year;

(B) They become engaged during the

off-season for farming operations in some occupation in war production or in support of the war effort; and

(C) Upon the reopening of the season in which they may pursue their normal seasonal occupation they return to the seasonal occupations that constituted the basis for their original deferment and resume their status as necessary men therein.

Two veteran past members the local ration board, D. I. W. Birnie and Raymond Ross, who served 12 months or more without compensation, were absen from the meeting, but received equal applause for their valuable services, Mrs. Sterling Price, chief clerk of the board, while not receiving an award, was honored for her faithful and efficient work Certificates of award were presented only to those who serve

G. E. Hamilton, in charge of the program, declared the work of the rationing board one of the world's most thankless joks, but cited the necessity during war times. "It is my opinion," he declared, "that the Motley county board has functioned in a most efficient manner and possibly with less discord than in other counties ... it is a thankless job they have done, since the conduct of the people must be regulated during wartime and a registration program is essential. These people have served faithfully and without pay, to become the targets of criticism in some instances, but they have done their duty. We of Motley county and the Lions Club appreciate their efforts and take this means of expressing our grat-

THE PROPOSED expansion program of Wayland college of Plainview, Tex., is clearly portrayed in the architect's drawing. The over-all project calls for an expenditure of approximately \$750,000. This will provide adequate housing and equipment to accommodate more than twice the present enrollment.

The new dormitories are to be modern in every detail and each will care for about 125 students. The present dormitory for girls will be remodeled throughout to provide light housekeeping facili-

The college anticipates extensive courses in agriculture to provide a long felt need. Facilities are being provided to make this possible. The library will be built in connection with the chapel building. The present administration building will be reconditioned and used for English, Language, Social Science and other departments.
