Little Jacob Johannes, son of Mike and Cindy Johannes of Matador, is getting ready for the 4th of July, with a sparkler. Jacob says "be careful" when you do your fireworks Thursday night. Jacob's parents have a Fireworks Stand on Hwy. 70 in Matador.

*

Fireworks Safety Urged

every year. A physician at Baylor College of Medicine in Houston says statistics show that many of these injuries are preventable.

"Most injuries from fireworks occur in teenage and pre-teen boys," said Dr. M. Bowes Hamill, assistant professor of opthalmology at Baylor. "The injuries we

most often see, to the hands and eyes, can be prevented by proper, adult supervi-sion."

Children frequently throw firecrack-ers at each other, causing injury as severe as blindness or deafness when they ex-plode in midair near the head. Injuries to the hand and face occur when fireworks with short fuses go off while they are still being held.

being held. "I recommend that parents take their

Betty's Tax Talk

SETTING TAX RATES

Once the ARB approves the appraisal records, the chief appraiser prepares an appraisal roll for each taxing unit. An appraisal roll lists the taxable property within the boundaries of the taxing unit. At this point, the appraisal district's job is finished for the current year. It has pro-vided one set of equal and uniform values for use for all the local taxing units. Now the taxing units decide what services they will provide in the coming year and how much money they will need. Each taxing unit adopts a tax rate that will raise the needed tax dollars.

HOW DO TAX RATES WORK?

As a taxpayer, it's important for you to

As a taxpayer, its important for you to understand how government spending, property values, and tax rates affect the size of your own tax bill. * Property values determine each taxpayer's share of the total taxes. Changes in property values may change the tax bills of individual owners. * A taxing unit's under determine

* A taxing unit's budget determines the total amount of taxes. A change in the tax rate by itself doesn't show if total taxes are going up or down. Total taxes increase only when government spend-toning entry.

ing increases. * The only meaningful way to com-pare tax rates to compare the amount of tax revenue they produce.

Brent And Brian Marshall Named To Dean's List

A total of 94 students in 50 Texas cities and towns have been named to the combined President and Dean's Honor Lists for the Spring 1991 semester at South Plains College. They are a total of 591 students named to the lists.

"We are always proud of the academic achievements of our students," said Dr. Orlo Sundre, vice president for academic affairs. "Being named to the President's and Dorek Lister in constraints for the president's and Dean's Lists is a prestigious honor which demonstrates a lot of hard work,

determination and period of nard work, determination and period of nard work. Students named to the President's List must'maintain a 4.0 or straight A grade point average, while those named to the Dean's List must maintain a minimum 3.25 GPA. Honor students must carry at least 12 semester hours least 12 semester hours.

Brent and Brian Marshall of Matador were named to this list. They are the sons of Kennith and Mary Marshall of Matador.

This much more air in your tires will save us over two million gallons of gas a day.

State the "truth-in-taxation" laws give xpayers a voice in decisions that affect their property tax ra

Beginning inearly August, taxing units take the first step towards adopting a tax rate: calculation and publication of the effective and rollback tax rates. The effective tax rate gives the taxing unit approximately the same amount of money to spend as it had the year before on properties taxed in both years. For example, if property values go up,

the effective tax rate goes down. The effective tax rates gives you a way to tell if the taxing unit's proposed tax rate rep-

resents a tax increase. If a unit adopts a tax rate that is higher than the rollback rate, voters in the unit can circulate a petition calling for an election to roll back-or limit-the size of the tax increase. The rollback rate provides the taxing unit about the same amount of tax revenue as it spent the previous year for day-to-day operations plus an extra eight percent cushion, and sufficient funds to pay its debts in the coming year

Each taxing unit publishes the rates in a local newspaper, along with a list of the debts it must pay and the amount of unspent money left over from the previ-ous year

If taxpayers believe that the rates haven't been calculated and published in good faith, they can ask a court to stop the taxing unit from adopting a tax rate until

Paper waste now accounts for about 37 percent of landfills, stud-ies show. The reason so much paper winds up in our landfills instead of getting recycled is that a lot of paper waste includes labels that cannot be recycled.

waste includes labels that cannot be recycled. Fortunately, a new totally recy-clable label stock may help solve that problem. Motley County Lifestyles & Society

Donna Ewing and Jess Little Exchange Wedding Vows

Mr. and Mrs. Jess Little

The bride is the daughter of Carolyn Ewing and the late Don Ewing. The groom is the son of Jess and Linda Little of Kermit.

The mothers of the bride and groom were escorted in by the groom. Escorted and given away by her broth-res, Clay Ewing and Brad Wilson, the bride wore an elegant gown of candle-light taffeta and ivory imported BonTon lace. The gown was designed by the bride and made by Geneva Martin, aunt of the bride and the bride's mother. The bodice was taffeta with an overlay of lace, high-lighted by puffed sleeves with a lace overlay and a scalloped deep V dipping to the waist in the back. The lace on the bodice was hand beaded by relatives of the bride with seed pearls, glass beads and irridescent sequins. The hemline of Hagding the beaded and sequined. The lightly beaded and sequined. The The mothers of the bride and groom lace, lightly beaded and sequined. The train was decorated with matching cut out lace, also hand beaded by relatives and friends of the bride, it was accented by a large bow attached below the waist-

Donna Carol Ewing of Perryton, and Jess Craig Little of Brownwood ex-changed wedding vows, Saturday, June 15, at 4:00 p.m., in the First Baptist the groom performed the ceremony. The bride is the dampter of Carolyn The bride is the dampter of Carolyn The bride is the dampter of Carolyn grandmother of the bride. It was of Ivory Tulle, silk gardenias, and roses. color was added with mauve and greensilk flowers and highlighted by glass beads, seed pearls and irridescent glitter. The bride carried a bouquet of fresh garde-nias, white roses and stephonitis that was atop the bible her mother used in her werdding, the bible cover use used her ing, June 28. Matador postmaster and wife, Freddie and Lavita Morren and postal employees, Brown served cake and lemonade. Mrs. Patrick continued on her mail route with gifts, cards and best wishes. Hostesses of the farewell party in Flomot were postmaster, Mrs. Ruth Lee, Mrs. Geneva Martin and Mrs. Mary Jo Calvert. They presented Mrs. Patrick a

This organization is based on volunteers. Each and everyone that has contributed time and effort deserves an individual thank you. We, the officers, wish to thank you again for your help. All of our efforts are for the young people of this county, so that they might learn and enjoy. Parents, please remember that when we ask for volunteers, we ask so that everyone takes their turn to provide for the young people.

Page 6, Motley County Tribune, Thursday July 4, 1991

"Summertime and the livin is easy. Fish are jumping and the cotton is high." Ole George Gershwin painted a beautiful picture but he ignored the hazard

of sunburn. The 4th of July holidays kick off the start of our really hot weather. Watch out for the heat and the sun. Living and working in air conditioned homes and offices, it is easy to get too much sun during that first summertime trip to the great outdoors.

Years ago most people in our part of the world worked outside on the farm. Neither houses nor businesses had air conditioning. Everyone was conditioned to the temperature changes as the seasons changed. But now, even hot tubs are installed in air conditioned rooms, cars without A/C are considered museum pieces, and hard manual labor is done to aerobic music at the climate controlled health club. In short, a changed lifetitude here sourced units to here mergenerated for the hoeft of 1000 temperate a changed lifestyle has caused us to be unprepared for the shock of 100+ temperatures that can occur in the summer.

Get a good sun screen and use it. Remember when sun tan lotions were oily and had the fragmace of cheap french aftershave? Modern sunscreens are odorless,

greaseless, waterproof and more importantly, extremely effective at blocking harmful UV rays that prematurely age and wrinkle the skin and cause skin cancer to appear after a delay of some 20 or 30 years! Check out the SPF rating. An SPF-2 indicates that one that stay in the sun for twice as long as without any lotion. An SPF of 15 indicates that one can enjoy the sun for 15 times the normal length. The length of protection varies for each person. Blue eved people are at greatest risk

person. Blue eyed people are at greatest risk. My wife uses a SPF-15 even on trips to the grocery store. She mumbles something about not wanting ANY premature wrinkles and no skin cancer. If you are also concerned about the sun, a rating of SPF-15 should cover all but those really long days in the sun. After looking over this column maybe it was better when Mr. Gershwin

After looking over this column maybe it was better when Mr. Gershwin didn't have to worry about sunburn. HOT HINTS -- Try wearing a long-sleeved, loose fitting shirt. Drink plenty of liquids and remember that alcoholic beverages will cause increased dehydration. Ice water or gatorade-type drinks do more good than colas on a hot day. Fishing gives a double dose of UV because of water-reflected sun. Many successful anglers wash their hands with a special soap that eliminates any odors from their sunscreen. DR. JUICE has a special soap called "Hand and Lure Cleaner". It works and is worth adding to your tackle box. NOW is a great time to visit that favorite deer country and offer to hunt some coyotes. Ranchers rarely say no and will usually invite the courteous hunter back for some deer hunting. HAVE A SAFE 4TH OF JULY!

With God all things are possible!

DPS Urges Caution For Summer Driving

tions. The Texas Department of Public Safety wants to remind us that thousands of tourists will be coming to Texas for VJ.Cawthon, Regional Commander of the Texas Department of Public Safety. He stated, "With all the additionau

raffic that will be on the streets and highways and the warmer weather this means additional traffic in and around the recreational areas, this will mean more alcohol consumption and of course more accidents " more accidents.

Major Cawthon said, "With the use of a little courtesy and obeying those little traffic laws, large accidents can be avoided.'

The Summer season is rapidly ap-proaching and now that school is out, condition before they start out on vaca-most Texans will be planning for vaca-tion. Remember, to take at least a 15 minute break after every two hours of driving, avoid drinking alcoholic bever-ages and don't forget to buckle up the

safety belt. Major Cawthon emphasized the need to reduce our speed in the residential neighborhoods because of children, who

are now out of school for the summer. Don't forget to use our safety helmet when riding a motorcycle, whether it's on public streets or private property.

Plan your irip so that you have plenty of time to reach your destination and return with time to spare. Don't try to cram a months worth of vacation into a week, after all we do want you around to priori part upon with the you around to

A person needs to have the family enjoy next year with us.

special one. One that no one will ever forget! I wish all of you a great 4th of July and I also want to say Welcome Home! It may only be one thank you from a 17 year old girl, but it goes out to the thousands of troops who were in Desert Storm!

Storm!

State and local government employ-ees are the largest remaining group of American workers not covered mandatobe affected. Among them are workers rily by the Social Security program. On July 2, 1991, however, about 2.3 million employees in this group who are not members of a State or local retirement program will acquire Social Security protection. This expansion of coverage is mandated by the Omnibus Budget Re-conciliation Act (OBRA) of 1990, which was enacted last November. In the past, coverage of State and local government employees under Social Security was provided on a group basis only. Each

State decided, within the framework of statutory provisions, which groups would be covered. Because the law gave the States a great deal of latitude in deciding who would be included, the extent of coverage varied widely from State to State. The current legislation does not impose mandatory coverage on students who meet the legal criteria for exclusion. it is designed to provide basic Social it is designed to provide basic Social Security protection to most State and local government employees who are not

members of a retirement system. About 98 percent of full-time State and local government employees are already covered by a retirement system as part of their employment. This fact sug-gests that the gret majority of workers who will be affected by the OBRA provi-

whose age or probationary status makes them ineligible for existing retirement plans in their jurisdiction. Often, employees who are not cov-ered by Social Security do not arrange for alternative retirement, survivor, or disability protection. Many part-time workers are long-term employees who will not obtain this type of protection through other jobs. Their inclusion under the Social Security program will provide them with protection during the years in which they

work for a State or local government. Currently, the Social Security Admini-stration and the Internal Revenue Service are cooperating in efforts to identify and resolve questions regarding the implem-tation of this provision.

OF SAFETY

Whether you drive a car or a bicycle, you're a lot safer thanks to the ways plastics are used. In your car, the safety may be behind the wheel. An air bag, made from spe-cially coated nylon, remains folded under the plastic hub of the steering wheel until a significant frontal im-pact. In less than 1/20th of a second from the time of impact, the bag is

Plastic helmets also protect bicy-clists from injury. The helmets are generally made from expanded polygenerally made roll expanded poly-styrene foam (plastic) and covered with either cloth or a hard outer plastic shell. According to the Na-tional Safety Council, 75 percent of the more than 14,000 fatalities an-

nually involving bicycles and auto-mobiles can be avoided if bicyclists wear proper head protection.

Here's another safety fact to drink in: reinforced plastic towers are used to purify water. In DelRay Beach, Florida, 57-foot high towers are used to strip out organic com are used to strip out organic com-pounds that contaminated much of the city's water supply. Because the towers are made from reinforced plastic, they will not corrode from contact with the compounds and they will withstand harsh coastal salt air.

Train up a child in the way he should go: and when he is old, he will not depart from it. Proverbs 22:6

INDIVIDUAL FAITHFULNESS

The Church is composed of all its members in much the same way a rope is constructed. I mean by this, all of its strands make up the rope. Therefore, a rope is its strands and a church is its members. A rope is no more or no less than the fiber strands of which it is made. And a church is no more or no less than the aggregate of the members comprising it.

The rope is made strong by all its strands pulling together and lending support to all other strands. When we think of a strong rope we may not think particular-ly of the inter-dependence of its many

tiny strands. In the same way we may be overlooking the essential element of church

A rope is materially weakened by the failure of any single strand. It places a heavier burden on every other strand and thus jeopardizes the entire rope. In much the same way, the failure of any church member places an undue burden on every other member.

The rope begins to fail when any one of its strands ceases its function. The Church's growth is often defeated by just one member! Achan caused the defeat of all of God's people at Ai. Read the account in Joshua chapter 7.

Eternity alone will disclose how many churches suffered defeat because one member failed to function faithfully. Each Christian should keep inmind that the Lord's church and its strength in the community, rests directly upon his or her individual faithfulness. One loose strand weakens the entire rope!
