

Two Die when Truck Crashes Into Freight

TWO MEN DIED in the wreckage of this truck when it struck a freight train at Roaring Springs yesterday afternoon. Man standing in photo is Buddy Owens of Roaring Springs, man at left in white shirt is Claud Lewis, man in center (back to photographer) is S. J. Braselton, whose trucks were used in dragging debris from under train. Photo at left shows twisted rails and two units of the four unit diesel engine in the pileup of railroad cars.

DEATH WAITED at a grade crossing in Roaring Springs yesterday afternoon for two Amarillo men until their loaded grain truck crashed into the first of a four diesel engine unit of a Quannah, Acme & Pacific freight train.

Walter L. Robinson, 33, and Gene Vancamp, about 25, died in the grotesque pattern of destruction that followed the impact. Derailement of three units of the engine and eight freight cars immediately following in the 34-car train, left a wake of property damage probably without parallel in this county's history.

Freight cars piled up on top of each other and the three units of the diesels turned on their sides, plowed into the earth and became motionless like stricken giants.

Lead Engine Remains Upright

The lead engine miraculously remained upright, altho it had received the impact that resulted in the derailment. None of the five-men train crew was injured. Veteran engineer Elton Marsalis was at the throttle and shared the cab with Fireman R. L. Choat. Three other members of the crew, Conductor Guy Adams, Rearend Brakeman Fred Pierce and Head Brakeman B. J. Nance were in the caboose, which came to a stop a short time after it had passed over the Dutchman River Bridge.

Time of the tragedy was approximately 4:30 p.m. with unlimited visibility. The grade crossing is at the east side of the Roaring Springs city limits where State Highway 70 crosses the railroad. The train was headed west with a load transcontinental freight. The grain truck was headed south with a cargo of wheat from Colorado consigned to Corpus Christi.

Corby (Corky) Lee Marshall, Roaring Springs feed store owner said he was one of the first to reach the scene of the wreck. He said with others who arrived about the same time, it was obvious that Robinson was dead beneath the wreckage of the truck. Vancamp, who was still alive in the battered truck cab, was brought to Stanley Hospital here in an Eudy-Seale ambulance, but died within about an hour.

Some residents of Roaring Springs heard the wreck and believed the sound to be that of a jet plane breaking the sound barrier. For a time the portion of the train remaining on the track blocked State Highway 70 and traffic was routed over the business route through Roaring Springs.

One of the cars immediately behind the engines was a new "piggy-back" truck on a flat car, loaded with wearing apparel, including dresses, shoes, etc. The aluminum truck body seemed to have exploded, scattering the cargo into the railway right of way.

News services and daily newspapers were calling the Tribune for information within a short time. Wichita Falls Record-News sent a reporter-photographer here and he obtained two Tribune negatives of wreck scenes. Before leaving last night he called his office and learned that Associated Press wire service had already received pictures from the same shots at the top of this page which had been put on the wire from Lubbock.

The pictures, which were made shortly before sundown, were developed here and rushed to Lubbock for the Avalanche. The pictures were carried by Mr. and Mrs. Carl Pierce, Mrs. R. E. Donovan, and Mrs. Douglas Meador, who waited for engravings. They returned here about 1:30 this morning.

PRICE SEVEN CENTS

TRAIL DUST

By DOUGLAS MEADOR

Grotesque and shabby, the red brick railway station stands apart in the senile community. It is a lighthouse in the dry floor of a receding sea. Scars of the old right of way are obliterated except in the cuts through the hills and the decaying debris of bridges. Time has no schedule. The thunder of the last train spilled into silence and the depot windows became a part of a design for shadows when the last coal oil lamp was extinguished; when destiny signalled that the track was clear.

The weight of transgressions is not a satisfactory ballast for the trim ship of dreams.

Age has no contribution for my physical agility except to allow me to put my foot in my mouth with undiminished ease.

One method of vindicating antipathy for the income tax collector is to fail to earn enough to require payment. This, of course, has its drawbacks, since predatory creditors do not hesitate to create an atmosphere of discomfort.

Our enemies are our friends whom we have never taken the trouble to understand.

Implement Firm To Serve Free Cakes

Like hotcakes? Then be a guest of the Matador Motor & Implement Company Saturday where the tasty cakes will be served all day. It is not necessary to buy a Farmall tractor to get a plate of the steaming goodies. In fact you don't have to buy anything to be served pancakes and coffee.

The advertisement, appearing elsewhere in this issue of the Tribune advises readers to "bring the whole family... fun and food for everyone" and "bring your neighbors." This sounds almost too good to be true.

A word to the doubtful: Manager Mike Hoyle will not cook the hotcakes (he is a consumer rather than a producer). It is the International Harvester people's idea of getting a chance to tell the public about their new farming implements. This should do it.

Grade School Boys Top Cage District

WINNING District honors is getting to be a habit with Matador grade school boys who completed their basketball season last weekend by gaining the district championship, the second time in succession.

The team, featuring fine defensive play and an alert offense, defeated the Quitaque team in their first game 26-22, with the first team playing little more than one third of the game. They defeated the Flomot team 35-2 to advance to the finals, and then defeated the Turkey grade school for the title. The regulars, Gary Campbell, Richard Campbell, Tommy Green, Tim Green and Chuck Ezzell played only the first half. The team ended the season with 15 wins and one loss.

The school completed a highly successful season with the high school girls team winning two district championships in a row. Grade school girls won second place.

Feed Grain Survey Started In County

A SURVEY of the grain producing acreage in Motley County was started Monday at the ASC office, as changes in the agriculture picture are focused on an order to begin the work. All producers of corn, grain sorghum, oats and barley are asked to cooperate in listing 1959 and 1960 acreage.

"We realize the farmers are very busy at this particular period," Tommy Moore, County ASC office manager said Monday, "but it is important that every farmer list his acreage in these crops."

"Our office has been charged with the responsibility of making the survey and the time allotted is only about two weeks. We think it is possible the survey could be the basis for future legislation. We are confident the survey will establish a base that will affect the land in event it is retired, a support price is set, or an allotment determined. We are required to make our first report March 16."

"We have sent notices to producers in the county and wish again to remind them of the urgency in coming to our office and completing details of the report. It is probable that failure to report feed grain acreage may result in no feed grain base being established for the farm."

Mr. Moore and A. K. Wilkinson, chairman of the County ASC committee, went to Knox City last week to an area meeting where some details of the work were explained.

Lions Members Go To School After Tuesday Meeting

MATADOR Lions got a chance to look in on the operation of school system here Tuesday, after the regular luncheon was held in the school lunchroom and children got a chance to look at Lions, who were about as ill at ease as if they had been students. It was all a part of Texas Schools Week.

After being served the excellent luncheon at the school lunchroom, the Lions were dismissed. Boss Lion L. M. Cox asked members to visit the school rooms. Some Lions had children (and grandchildren) in the various rooms. A larger than usual group visited most of the elementary rooms.

Lion Tom Tilson was perhaps the most entertaining of all the visitors. He performed one of his many magic tricks in each room. The pupils were delighted as he changed the color of a handkerchief merely by drawing it through a hollow tube.

Yesterday was parents and friends day and many visitors were recorded in the various rooms. The public was privileged to eat lunch in the school lunchroom at a charge of only 50c.

Observance of Texas Public Schools Week in Matador will come to a close Friday night when the students will entertain with an "Amateur Hour" program in the high school auditorium.

Girls' BB Team Loses Bi-District

The McAdoo girls' basketball team stopped Matador's playoff hopes with a 49-35 win at Lockney last Tuesday night. The victory enabled McAdoo to go to the Regional tournament at Canyon, but it ended the Matador's season.

Matador held an early lead of 6-0, but McAdoo reared back to tie the score 8-8 after one quarter and take a 17-14 lead at the half. They upped their lead to six points in the third quarter, and pulled away for the win. The difference in the game was in free throws, where McAdoo hit 19 to Matador's 5. Frances Cooper led the Matador scorers with 20 points, Carol Campbell tallied 8, and Jill Scaff contributed 7 more.

Matador finished the season with a 23-7 mark and their second consecutive district championship. They lose only two players from this year's squad and are expected to be strong again next year.

WHAT GOOD ARE LITTLE THINGS?

For lack of a nail, the shoe was lost;

For lack of a shoe, the horse was lost;

For lack of a horse, the rider was lost;

For lack of a rider, the message was lost;

For lack of a message, the battle was lost;

For lack of a battle, the kingdom was lost.

As we can see, it is often the little things which count. It is easy to spend money to buy expensive gifts, yet much harder to give the gifts of consideration, sympathy and loyalty.

It isn't as difficult to declaim in flowery speech as it is to say a simple "I'm sorry."

Have you ever stopped to think what one friendly smile can do for the shy person? What one small chat can do for a lonely one? Do you know the value of a compassionate gesture to the broken-hearted? Or a few

words of encouragement to the person whose spirit is low?

As we students of MHS strive for big achievements and big honors, let us not forget the greatness of so-called "little" things.

Biology Students Hear Dr. Stanley

In 1628, William Harvey, an Englishman, proved that the blood travels toward the heart through the veins. He also proved that the heart pumps the blood all over the body. And finally he proved that the blood flows all over the body through the arteries and back again through the veins. Later he reasoned that the heart pumps 34 pounds of blood an hour.

Many of Harvey's beliefs were correct, but today we know that the heart of a human adult pumps something like 600 pounds of blood an hour. Without the efforts of those before us who led research such as Harvey, we would not be as advanced as we are now in the field of science.

Biology students have come to realize this as they have studied some of the pioneer experiments, such as Ivan Pavlov's experiments with the inborn reflexes, conditioned reflexes, and the inhibition of dogs. They have learned much about the importance of science, not only in space research, but in everyday life.

Dr. J. S. Stanley visited the class March 1 and explained such things as the cause of hiccups, the effects of polio, the importance of the appendix and tonsils, the cause and treatment of warts, and the causes of heart trouble. The biology students and Mr. Moore enjoyed the lecture very much.

Have you ever stopped to think that perhaps one of our own students may someday be the brilliant scientist who finds a cure for cancer? Who knows?

Senior Sidelines

by Frances Cooper

The senior civics class has indulged in many activities lately—such as seeing films, giving

current event reports and what's this? Listening to radios in class?

The class is proud of their two basketball captains, Frances Cooper and Carol Campbell, and also manager Jane Scaff.

While senior boys try to lick physics problems, the girls continue to give English reports on 18th century authors.

The class play, "The Ghost of Rhodes Manor" is to be presented the last of the month and tryouts will be scheduled soon. Make plans for a real thriller! The play will be an evening of laughter and terrifying suspense.

Sophomore Scoop

by Judy Hart

The sophomore FHA girls enjoyed the trip to Lubbock for the Area 1 Meet very much. Many of them went on Friday and stayed in the Plainsmen Hotel that night. It was a new and exciting experience for some of the girls.

The class members are all glad that six weeks tests are over once again and that spring is nearly here. Spring, to them, means no snow and no school!

CAMPUS CLIPS

by Donna Williams

Here's a pat on the back to the girls basketball team for playing hard to the last minute in the Bi-District game with McAdoo. Also to the loyal fans—the bleachers looked good full of MHS'ers cheering for classmates!

The FHA girls enjoyed their Lubbock trip. Many had the added privilege of going on Friday and seeing the picture show "The Alamo."

Most MHS students were re-

luctant to return to classes Monday after Friday's vacation while the teachers attended the District Teachers' Meeting.

The One-act Play is progressing well. The cast rehearses each day under the direction of Miss Sturdivant.

Thought for the week: Don't wait until you're a man to be great, be a great boy!

Your RIGHT TO VOTE

MR. AND MRS. VOTER, do you feel that you should have an opportunity to vote on legalizing Parimutuel Horse Race Betting?

A constitutional amendment (H.J.R. #4) is being considered whereby Texans will be given an opportunity to legalize horse race betting in Dallas, Tarrant, Harris, Galveston, Bexar, Midland, Hidalgo, Cameron and Webb Counties, subject to approval by LOCAL OPTION.

H.J.R. #4 provides for distribution ANNUALLY among all counties that do not have race tracks, one-half of the STATE TAX REVENUE obtained from horse racing. Each county would receive approximately \$1.00 per capita population the first year. Counties where the tracks are located would receive 2% of parimutuel handle. The state's tax income from horse racing alone would run close to \$12,000,000 the very first year—possibly more—besides all the income tourists would bring to Texas—which would amount to millions of dollars, plus a great ad valorem tax on race tracks, breeding farms and many valuable race horses.

Please express your opinion by checking the appropriate box below. You do not have to sign your name unless you like, but we would prefer it.

POLL

YES: I feel that the people should have an opportunity to vote on horse race parimutuel betting.

NO: I am not in favor of letting the people vote on the subject.
