WHY NOT FOLLOW THE Signs of Spring?

SIGNS OF SPRING cannot be overlooked, even by the most self-centered individual. They are too many, too varied and insistent. Birds that return, hedges that pop into leaf, and a restless stirring in human hearts.

But there are other Signs of Spring that point the way to increased happiness along all the trails of Summer-the advertisements in this newspaper. Think of them as guideposts to value. If you overlook these signs, you will spend without adequate information about new things, better products, more beautiful and satisfying merchandise. These advertisements, truly, are the official reports to you by the best manufacturers of the nation, who season by season combine science and art with vast resources to place better things at your disposal.

And every time, the advertisements speak with authority. They are signed by firms of standing and repute. You can trust them ... and profit well by them.

We believe they will handle the affairs of the city in an economical and progressive manner, consistent with our growing and expanding communities.

We believe that a conservative policy can be carried too far, just as a policy of over-expansion can bring hardships to people of Big Spring.

We believe that HALL and SCHERMERHORN will be alert to the opportunities for development in our community, and above all, will take prompt action on the many problems now confronting our city which need immediate attention.
