# Care Center provides job opportunities

by Marisue Potts HCCC Reporter

When the Hackberry Care Center was but a vision, the vision included not only care for the elderly in our community, but jobs that would keep families living in or moving to Motley County. The new Director of Nursing, Wendi Lancaster Flowers, is an example of a Motley County high school graduate who wanted to return to her hometown, to work and raise her children among family and friends. Hopefully, this is just the first of an exodus.

Numerous other job oppor-

tunities will exist as the Hackberry Creek Care Center begins operation in January. Among the many important positions to be filled in the immediate future are at least ten jobs for Certified Nursing Aids. A CNA must be 18 years old and have a high school diploma or a GED. Besides a genuine interest in the welfare of the elderly, a CNA should be a caring and compassionate person. Duties will include assisting patients with personal grooming and everyday activities.

For those interested in working at this new state of the continued on page 3

#### **ATTENTION SHOPPERS!**

# Matador merchants open late tonight

# Santa Claus is coming to town!

Attention shoppers - it's time to SHOP! Matador businesses will stay open late tonight (Thursday) November 30, for their annual Late Night Shopping event. 'City sidewalks, busy sidewalks - dressed in holiday style' will make this night a fun and festive evening. Downtown merchants participating in the event include the Sno Cone Stand, Matador Variety, Matador Floral, Anna's Mexican Restaurant, Pay & Save Grocery, New to You, 4R Trinkets, Motley County Library, Calico Treasures, Motley County Tribune, Jo-Barb-Dee, Main Street Cafe and the Motley County Senior Citizens. Vendors will also be set up in various locations. Bargains, bargains and fun, fun from 5:30 until 9:00 p.m.

Santa Claus will be arriving by firetruck at 5:30 p.m. and will visit with children until 7:30 p.m. inside the historic downtown Hotel, where Eternas Study Club will also sponsor their annual Christmas Kiddie Store. This much anticipated store gives little ones the chance to do their Christmas shopping at a price they can afford.

Each business is offering discounts, special door prizes and some will serve refreshments. The weather man is predicting some bone-chilling temperatures for Thursday, but the old fashioned friendliness and holiday spirit will surely keep shoppers warm with a hometown heartfelt welcome. Shoppers spending \$10 or more at any business will receive a special Christmas card. About 275 of these special holiday cards will list a prize, and all of them will offer a Happy Holidays to the shopper. Cards can be redeemed during late night shopping, but must be redeemed by December 15th. Gifts have been donated from all the participating businesses listed above, and Motley County Chamber of Commerce, Thayer & Washington, Reflexology by Diana, Wylie LP, Moore Maker Knives, Meredith Gas & Supply, Matador Branch First National Bank, First Ag Credit, Billie Dean's Restaurant, Matador Motor & Implement and Matador Ranch.

Vendors notifying the Tribune of their intentions to participate will include tupperware, Arbonne products, special gift items with baked goods, jewelry, belts & purses, Krispy Kream doughnuts & cookie mixes.

The Motley County 8th grade class will sponsor a fundraiser inside the Library Annex and will offer Krispy Kream doughnuts and cookie mix gifts. Some vendors will be set up inside Jo-Barb-Dee, where free blood pressure checks will also be given. The Motley County Sr. Citizens will hold a Bake Sale inside Jo-Barb-Dee. Vendors will also set up inside Calico Treasures.

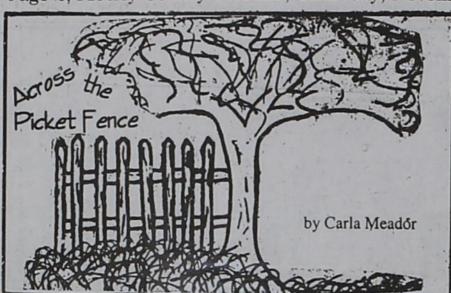

Bundle up and get off the couch, this is one special night you will not want to miss. The temperature may be low, but the spirits are sure to be high with this fun-filled

# Santa will receive letters through Tribune office

The holiday season is upon us and the Motley County Tribune is making plans for the annual special Christmas edition. Christmas greeting ads are now available for purchase to be included in that edition, December 21. These greetings from businesses and individuals give you the opportunity to say

Merry Christmas to about 1100 people with just one card. For more information and pricing contact the Tribune office at 806-347-2400.

Letters to Santa will also be printed in this edition. Santa letters are a most enjoyed feature to the Christmas paper. Santa continued on page 5

Charlie spends most of his time rushing back and forth from the pecan tree at the front of our driveway, all the way to the back, leaping to the top of the fence and on to a tree branch. And then his journey

I don't know where Charlie's residence is or where he stashes away his precious pecans. I envision someday opening the door on the storeroom and having hundreds of pecans bombard me.

We have four lively Jack Russell Terriers and they spend their days, jumping and barking at Charlie. The five of them play chase. I can just imagine conversations between them. Sometimes Charlie gets a little daring. He will hang on a tiny low lying branch and somehow make the branch sway up and down, as if he's just daring the dogs. "Just try it," Charlie says. "I can scamper up this branch before you can even

The little Jack Russels can jump rather high, and there have been times, when I thought Charlie had seen his last days. My little female is the bravest. Not long ago, she caught three Bull Snakes, in two days. The snakes were about 1 1/2 ft. long each. She killed them and bit their heads off. I couldn't believe it. So, I know if she ever got a hold on Charlie he would jump his last branch. But, I truly think she enjoys playing with him too much to really try and kill him.

Oh, the joys of country life! It doesn't take much to entertain me. I work long hours and actually I'm not at home in the daylight much, but the treasured hours I am there, I have found that Charlie and the dogs have provided some stress relief.

\*\*\*\*\*\*\*\* Wind is not in short supply in Motley County, but the profits from it depend on your action before Friday, December 1.

Part III

Wind farms are only built where there are transmission lines, and a decision about such lines will be made by the Public Utility Commission on the basis of a report that will be given it by December 1, 2006.

Motley County is part of what has been designated as Preliminary Competitive Renewable Energy Zone 2, but 25 such zones have been designated as nated, and from those 25, 10 will be selected for support. We need to have CREZ 2 selected as one of the final 10.

So when you read this on Wednesday or Thursday, get ready to get busy. You need to call your state or federal representatives, or send them an E-Mail or a fax on Wednesday or Thursday.

In the call or the letter (sent by fax - the mail will be too slow), you need to stress that you are a resident of Motley County (and a landowner), and are asking that CREZ 2 be designated as a Competitive Renewable Energy Zone. You also need to ask that the location of the proask that the location of the proposed Panhandle Loop be through the CREZs and the pre-

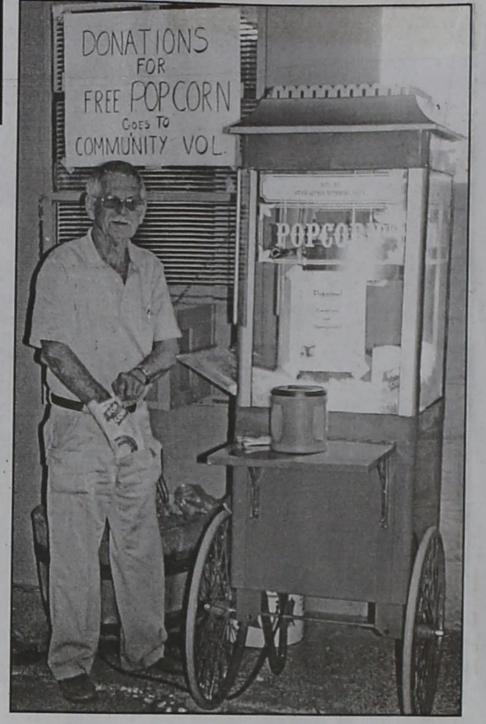

You can get the telephone numbers by calling the State Capitol switchboard at 512-463-4630. Or you can go to www.capitol.state.tx.us for telephone numbers, fax numbers and e-mail addresses.

It is also important to contact your federal representatives and ask that they extend the production tax credits for the wind companies before they expire. Wind companies build where transmission lines already exist, or in Competitive Renewable Energy Zones, so in addition to being selected as one of the 10 CREZs, Motley County needs to support the extension of the tax credits so that the wind companies will build a transmission line here.

Contact your federal representatives and ask that they support this. You can find the information for Representatives at http://www.house.gov/house/MemberWWW.shtml, and for senators at http:// www.senate.gov/general/ contact\_information/ senators.cfm.cfn?State=TX.

You can go by the post office in Matador and pick up an information sheet from the Floydada Economic Development Corporation with more information and all the addresses and telephone numbers, if that is easier.

# A Note of Chanks

To the Matador/Motley County Community,

Mere words cannot, nor will they ever be enough to express to you how much our family has appreciated your generosities during our time of loss. You comforted us with your kind words and warm embraces. You opened your homes to us when no other accommodations were available. You purchased and/or prepared food for us. You provided monies just because you felt our need was monetary. You showered us with arrays of beautiful floral arrangements which touched our heart. You presented us with cards that expressed your deepest condolences. And, you held our hand during the entire ordeal.

For all of these things, we, the Mangram family, salute you and we thank God for you. Our prayer is that God will bless you for the love which you have shown to us.

## Poor Quality Doesn't Sell

One poll asked consumers what they thought of products and services compared to years ago. Most said that quality had definitely gotten worse, and they didn't believe they were getting their money's worth anymore. Another study had traced the drop in quality directly to the work people did.

Customers, it's pointed out, want the most reliable goods and services they can get for their money. "You can't sell poor quality, no matter how low the price," is a powerful observation. Quality, error-free work does much to benefit the business world, and the smart ones are aware of that and doing something about it. They know that quality work gets noticed, both inside and outside of the business.

People look at our work in the church and they know if we're putting much into it or not. The quality always shows. The answer is not in "gimmicks" or "eye-catching things," nor to try and get by as cheaply as we can, but to do what the Lord has called us to do with the best, most creative attitude and effort that we can muster that not only honors Him, but does the best it can to serve people and meet all of their needs.

It's still loving the Lord with all of your heart, soul, mind, and strength, and loving your neighbor as yourself (Mark 12:30-31) and you will see the results.

# THC announces new program for local cemetery preservation

Austin, Texas -- The Texas Historical Commission (THC) announces the RIP Guardian program, the newest addition to cemetery preservation programs for the state of Texas. RIP stands for Record, Investigate, Protect and the new program provides volunteer organizations with specific guidelines to follow to preserve local

cemeteries. The RIP Guardian program is part of the THC's overarching RIP cemetery preservation initiative. Surveys were completed in 49 counties determining that approximately 37 percent of local cemeteries are at risk of becoming lost due to encroachment, vandalism and neglect.

"To lose a cemetery is to lose a valuable part of local history," said Gerron Hite, state coordinator of the THC's cem-

etery preservation program. "It takes a dedicated group of volunteers interested in all aspects of a cemetery, from preservation of individual grave markers to identification of historic and heirloom plants, to safeguard a cemetery from neglect or vandalism.

Residents in Hays, Hill and Uvalde counties are some of the first volunteers to take advantage of the new program to pro-

tect their historic cemeteries. "We in Hays County share the same desire as all of our sister counties: preventing the potential loss and deterioration of our rural cemeteries," said Jim Cullen, cemetery coordinator for the Hays County Historical Commission (CHC). "The RIP Guardian program offers a comprehensive plan - a more-thanshort-term answer to many of these vulnerable cemeteries' needs."

CHCs help cement the success of this new program by working with local RIP Guardian programs and gathering and maintaining information at the county level and making it

readily available to the public. The RIP Guardian program provides education, consultation and assistance to cemetery organizations and associations to preserve these important cultural resources in Texas. Volunteers selected to participate in this new program will have the opportunity to be trailblazers in cemetery preservation statewide and nationally.

"This is a wonderful opportunity to bring the significance of cemetery preservation to the forefront," said Larry, Oaks, executive director of the THC. "We're looking forward to seeing local RIP Guardians become part of a much larger statewide network of Texans dedicated to saving history."

For more information on the THC's RIP Guardian program, contact Anne Shelton at 512/475-

THE ATTRIBUTES OF GOD

(Part Nine) God is triune. Here we launch into the Holy Trinity. It is deep, but then, no learned person ever said that all about God is simple, or fully understandable by us. It isn't! Last week, we established that there are only three religions with any chance of being correct (Christianity, Judaism, and Islam), because only they correctly teach Monotheism (One God). Here we separate the wheat from the chaff, and nowhere are the differences more profound than as regards the trinitarian nature of God. Islam and Judaism deny it, thus denying the Deity (God-nature) of Jesus Christ, whereas Christianity affirms it. Somebody is clearly wrong! The short answer is simply: "Jesus proved the trinitarian nature of God by the immutable fact of His resurrection from the dead - something that only God can do (Muhammad is still dead)." (Muhammad is still dead)."
Muslims respond (with no good evidence) that Jesus was not crucified, but a substitute, thereby sidestepping the question, but sadly, their real problem is that they don't begin to understand the Trinity Islam is violently monotheistic, and Muslims think Christians worship three Gods, which is pagan polytheism, the worst form of polytheism, the worst form of

heresy. They are uniformly sur-

prised when they learn that Christians also affirm. ONE

We all know that Judaism is in denial, and that it has gone to every conceivable length to discredit the Diety of Jesus, and not succeeded. The biggest problem is that Jesus was not the kind of Messiah they wanted and expected. But followers of Judaism (if they are serious), and even devout Muslims, place great stock in the Old Testament of the Bible, which in Genesis 1:26 says: "Let US make man in OUR image" (emphasis added). Here's the question: "Just who is the "us" and "our" in Gen. 1:26? They can't or won't answer the question! It is obvious. So, while the word "trinity" is not in the Bible, it was coined later, the existence of the three persons of the Holy Trinity begins to be revealed in the First Chapter, and is mentioned in over 700 verses thereafter. We can't fully comprehend it, but we most certainly do apprehend it -like gravity. It goes beyond rea-son, but NOT against reason. It is there, and that is a fact. As the greatest apologist of the last century, C.S. Lewis, put it: "It is what it is, and that is that!"

Next time, we'll flesh it out.

It's a little early but our kitten, Little Toot, has been looking for Santa Claus all week. She has climbed up into our chimney four times and had to have three baths in one week because she was so sooty. She can't go far but far enough to get very black! Little Toot is likely only 10 to 12 weeks old but her name fits to a tee. She is the most mischievous kitten I have ever had. I wonder how many baths she shall need before she catches on that it's too early to be looking up the chimney. (We did stuff some chicken wire up inside hopefully to prevent any more

look-sees!) Our hearts are saddened by the death of Jeannie Adams. She fought a valiant fight. Corky's cousin, Darwood Marshall of Guthrie, died last Friday from West Nile Virus. Darwood had a liver transplant almost two years ago. The medications he had to take to prevent his body from rejecting the liver weakened his immune system. They were told that no one who had had a liver transplant survived West Nile. He also fought valiantly. He lived one month after contracting the disease. Word came this morning that Troy Webb who grew up in our community and is the brother of Dorothy Webb Watson died this morning. He had a stroke some months ago. He lived in Abilene.

Roaring Springs has had a population swell for the holidays. Several families had out of town families home for Thanksgiving.

Caleb and Kenzie Martin, grandchildren of Jackie and Sharon Martin were at their grandparents' home. The big event was to help Nannie put up her Christmas tree. Sharon said she always needed children to help her get her tree up.

Pearl Patten had many family members at her house. They were JoAnn Reagan and Brice of Quitaque; Willita and Larry Burkes of Paducah; Buddy and Linda Allen, Jared and Darin; William and Shelly Palmer, Matt and Micha; Pug and Bennie Mae Mitchell; Joy Beeson; Darin and Natalie Waddell; Myles and Brianna; Linda, Arnold Parker

The Brooks family had a large gathering of family at the Roaring Springs Volunteers Community Center. Among the out of town guests were Keith and Debbie Brooks of Del Rio; Mickey Brooks and his children, Hanna, Sam, Jacob and Cassie of Granbury; Danny Perryman and his daughter Meagan; Kim Traywick and her grandchildren, Taylor, Kyle and Nikki of Brownsboro; Pat Warren and her daughter, Donna Kaye Solt of Artesia, NM; Stanley and Cinda Brooks of Austin; and Bobby Fletcher's son, Paden Fletcher. Also attending were Betty Bearden and family of Quitaque.

Zella Palmer spent Thanksgiving with her son and daughter-inlaw, Johnny and Tammy Palmer. Also visiting were Scotty, Nesa and Seth of Channing, Steven, Miranda and Tinley Slover, James and Jennifer Adams, Ty and Dylan all of Lubbock.

## TPWD unveils slate of possible regulation changes

Austin-- Among the possible changes in hunting and fishing regulations next year, the Texas Parks and Wildlife Department is considering altering restrictions on spotted sea trout in the Lower Laguna Madre and a 16inch maximum length limit on largemouth bass on a handful of lakes.

TPWD staff briefed the Regulations Committee of the Texas Parks and Wildlife Commission Wednesday, Nov. 1, on a slate of possible changes designed to increase recreational opportunity and further enhance the state's fish and wildlife resources.

The annual regulatory review process begins each fall after resource assessments by biologists and game wardens, as well as independent recommendations received from various groups. During this scoping portion of the process, TPWD gathers public input and weighs the biological implications of each issue before presenting the commission with a set of proposed regulation changes in January. Additional discourse is sought during special public meetings in the spring, and the commission at its April 2007 meeting determines the final regulation changes.

The most dramatic change being discussed addresses coastal fisheries biologists' concerns about declining numbers of legal-sized spotted sea trout in the Lower Laguna Madre bay ecosystem compared to historic levels. Although officials point out the sea trout populations in this bay system are on par with numbers statewide, they believe proactive steps will help ensure and enhance the future health of this world class fish-

TPWD will be gathering public input during the next six months on a variety of strategies emphasizing possible reductions in daily bag limits to achieve management goals.

In addition to regional sea trout regulations, TPWD is considering the following potential

 Increasing the minimum length limit on sheepshead to provide sufficient protection for this popular fish to reach sexual

maturity and thereby ensure sustainable productivity.

· Provide protection for diamondback terrapins by banning harvest. Biologists are concerned about the possibility of a growing commercial market for the species.

· Increase the minimum length limit for retention of a tarpon to 90 inches.

 Expand current rules pro-hibiting use of airboats to rally or harass schools of fish to include all boats.

A modification to the spring Rio Grande turkey season to offer better hunting opportunity to hunters. Two years ago TPWD simplified spring Rio Grande turkey seasons by merging the north and south zones into a single zone and increased hunting opportunity by adding a week to the season. In the process of monitoring and evaluating the new season, staff has concluded that while the 44day season is fine, hunting opportunity can be optimized by reinstituting the zone system, allowing the South Texas season to open earlier and the North Texas season to run later.

· Eliminate the double tagging requirement for mule deer on properties operating under Managed Lands Deer permits and make those permits avail-able for use during the archery

• Increase the possession limit for stiped bass on Lake Texoma to 20 to eliminate confusion among anglers and more closely align with Oklahoma

· Create a 16-inch maximum length limit for largemouth bass on a handful of lakes to address management concerns over lack of improvement in bass population structure and current limits. Seven lakes are being considered, including Bridgeport, Bryan, Cypress Springs, Georgetown, Hawkins, Joe Poole and Nacogdoches.

Public comment about these issues and others of interest may be made to TPWD, l Regulatory Proposals Public Comment, 4200 Smith School Road, 78744, by phoning 800-792-1112 or by visiting the Web (http://www.tpwd.state.tx.us/)

ANIMAL OWNERS AND 4-H MEMBERS

With the cold weather starting to move in, please make sure your animals have plenty of warm bedding, food, water and a heat lamp. Please check and make sure your animals are well protected as we don't want any animals to get sick due to cold weather, so please take precautions. Conditions in corn fields across the High Plains were right this year to produce a deadly toxin already respon-sible for the death of two horses in the Panhandle, said a Texas Veterinary Medical Diagnostic Laboratory official in Amarillo.
Dr. John Haliburton, head of diagnostic toxicology for the vet lab, said fumonism has been found in a random sample of corn by the Texas State Chemist Office at Texas A&M University in College Station, and in two samples he tested in Amarillo. Fumonism comes from a mold in corn, Haliburton said. The fungus that produces the toxin is found in every corn field, however the toxin only materializes under ideal conditions. "This past growing season, the temperatures and ample moisture early were ideal to produce the toxin," he said. Horses are the most sensitive to this toxin, with pigs the next most sensitive, Haliburton said. Cattle are not as sensitive, and therefore, can eat corn that is not suitable for horses or pigs. "We have thousands of backyard horse owners who may be feeding corn or corn screenings and they need to be aware of the potential problem this year," he said. Corn that is going into a horse ration should not have more than 5 parts per million of the toxin. The total ration that includes the corn cannot have more than 1 part per million, Haliburton said. The three corn samples he tested had more than 20 parts per million. Horses that eat the toxic corn develop lesions in their brains, causing blindness that can oc-

treme depression or extreme agitation and finally death, he said. In pigs, the toxin affects the lung and causes massive edema. "It's 99.9 percent fatal," Haliburton said. "We've already had two horses die from this disease," he said. "My concern is with the problems we've been having with horses and West Nile Virus, this might get mis-diagnosed." "I'm advocating anyone who is feeding corn from the Texas High Plains to horses should get it tested," Haliburton said. To get a test conducted through the vet lab, contact Haliburton at 806-353-7478. He will give instructions on how to properly submit a sample. Horse owners buying a commercial feed might want to contact the feed manufacturer to verify the corn is tested for fumonism, he said.

CHOLLA CACTUS

I recently received a phone call from a client looking for landowners willing to let him come and remove cholla cactus' from their property. Cholla cactus, often called tree cactus, is a species of cactus that has cylindrical stem segments, joined end to end in a branching, treelike manner. Cholla cactus is widely distributed throughout New Mexico, but can be found in the Panhandle and Rolling Plains of Texas. This type of cactus encroaches upon valuable range until dense thickets develop. These thickets hinder livestock operations and compete with needed forage for moisture and nutrients. Chollas also have a woody skeleton with a rectangular patter which are often used to make canes or other souvenirs. If you or anyone you know has cholla cactus growing on their property and would allow this client to come and remove them, please contact me at 806-347-2733.
