Spirit Rally Scheduled Tonight At 8:00 p.m.

The Spirit Rally, sponsored by the Motley County PTO and Booster Club will be held at the football field tonight (Thursday) at 8:00 p.m.

The purpose of the

at 8:00 p.m.

The purpose of the rally is to introduce faculty, employees, administrators, cheerleaders, coaches, football players and managers.

Ice cream and cake will be served following the introductions and yells led by the cheerleaders.

SOAP AND TOWEL NIGHT INCLUDED

"Soap and Towel Night" has been Night" has been included this year to encourage people to donate soap, towels, shampoo or other

articles to be kept in the locker rooms. These items will be used by all athletic programs and all donations will be greatly appreciated by

these young people.

Everyone is encouraged to attend the "Spirit Rally" and of the faculty and help support the young people.

Silverleaf Weed Is Threat To County Cotton Crops

Silverleaf nightshade

Silverleaf nightshade could pose more of a problem in Motley County cotton crops in 1982 than ever before. "Cotton farmers in Motley County will undoubtedly be facing heavy infestations of silverleaf nightshade in their cotton fields," says Dr. Richard D. Voth, Dallas District product development repredevelopment representative for Monsanto "The record rainfall that took place in April, May and June has continued to heavier and taller weed growth. Since silver-leaf nightshade thrives

leat nightshade thrives on moisture, it will probably be a major problem this year." Infesting some three million acres nation-wide, silverleaf night-shade has long been considered a primary yield reducer in cotton A warm season perennial, silverleaf nightshade can repro-duce by both seed and creeping rootstocks. Its extensive root system makes it a formidable

Selective Equipment
With the use of
preplant incorporated
dinitroaniline herbicides, many annual
weeds are controlled,
thus reducing the need thus reducing the need for frequent cultivation. However, this situation provides an ideal environment for silverin since perennial silverleaf nightshade in not controlled by DNA herbicides.

Frequent cultivation, deep.

traditional ways of fighting silverleaf

nightshade. "However, these methods are both costly and time-consuming, and also fail to eliminate the roots that form the basis of weed growth," says Dr. John R. Abernathy, weed scientist Taxas Dr. John K. Abernathy, weed scientist, Texas Agricultural Experiment Station. "Probably the best way to eliminate infestations of silverleaf nightshade after mergrange of the silverleaf nightshade after emergence of the after emergence of the crop is by applying Roundup herbicide through selective equipment," he points out. Roundup translocates through the plant system to the root. system to the root system and thus eliminates root growth

According to Abernathy, growers have several options when choosing selective equipment. Some of these units can be frontmounted on a tractor, while others are self-propelled. One type of unit features a series of seats from which workers can spray emerged weed growth with a two percent solution of Roundup in

as well as emerged weed growth. Roundup should be applied to mature plants for best

can also be effective for control of silverleaf nightshade were the nightshade is above the crop or in skip-row patterns, notes Aber-nathy. Many growers use the multi-rope unit which features a series of rope sections that provide improved weed contact.

Another kind of ropewick applicator,

solution of Roundup in water. Growers who use the pipewick can obtain higher recharge and improved wicking by using a recently developed polyester-over-acrylic rope instead of the standard

instead of the standard solid-braid nylon rope. Whatever kind of selective equipment growers choose to use, Dr. Abernathy advises them to selectively apply Roundup only to mature plants. "It's mature plants. "It's critical that the application be made at the right time-which is when the berries of the when the berries of the silverleaf nightshade plant begin to turn yellow." he says. "A timely application of Roundup herbicide through either a ropewick or other selective applicator will go far in eliminating infestations of this very common and troublesome weed that plagues cotton crops," he concludes. he concludes

Newspaper **Apologizes**

Our apology to Motley County senior Bill Luckett for failing to football article that he was All-District offen-sive center in 1981. Bill added size and

quickness to last year's team and was a major factor in the teams success last fall.

FREE EDUCATION AND THE UNDOCUMENTED WORKER

Supreme Court ruled, 5-4, that Texas and other states must provide free public education for the children of un documented workers—people in this country illegally.

people in this country illegally.

Our current Lt. Governor, Mr. Hobby, was happy with the decision, praising it as the "only rational decision" the court could have made. On the contrary, I think it was a wrong decision that defied both law and logic. One of the principal underpinnings of an orderly society is that one should not benefit from breaking the law. All around the world, law. All around the world, thousands of people stand patiently in line at our embassies, waiting for legal entry into this country. By its recent ruling, the Supreme Court told these people that, if they are smart, they will ignore our immigration laws find some other way to enter and then there's a good likelihood all manner of

will be open to them and their families. We can all feel sympathy for people driven to emigrate by desperate economic conditions. And I believe we should be compassionate toward the children of undocumented workers who are here through no fault of their own. We have been told we must educate these children and we will: it is our duty. But I am deeply concerned about the effect this will have on our school systems and the quality of education. We have only a certain amount of desks and dollars with which to address the problems of educating Texas' children.

The court was essentially

Texans need computer literacy

Texans may find themselves branded functionally illiterate in the near future, even though they can read and write if they do not understand and know how to interface with a how to interface with a computer...says a Position Paper on Computer Literacy from the Texas Association for Educational Data Systems (TAEDS). TAEDS and the Texas Computer Education

Computer Education Association are professional organizations

sional organizations sponsoring a Joint Statewide Committee to Promote Computer Literacy in Texas. Committee chairman, Dr. Philip Gehring, a computer scientist and Austin resident, says the proliferation of computers in every aspect puters in every aspect of our lives highlights the need for computer literacy. "All students, literacy. "All students, regardless of academic ability and previous academic record should have the opportunity to become computer literature to decrease the gap between the have's and have-nots in

our society,"
Computer should be imbedded in should be me elementary school elementary school subjects, Gehring noted. For example, in social studies, a student could examine how computers affect our society and some of the problems associated with them, such as individual privacy.

At the junior high level, a student might be required to study computer literacy as a

order to ensure equal opportunity for all students no prerequistives should be required

for such a course, Gehring said. Subsequently, each student entering high school who is interested in continuing computer study would have a multitude of options. These include Voca-These include Voca-tional Education (word processing, computer operations, etc.), business data processing, problem solving through additional programming in science and math, or possibly Computing Science itself in a magnet school—a school which

With business growing need for computer knowledge-able employees, more

opportunity for employ-ment would be available for those who are computer literate. computer literate.
There is also a large computer industry in Texas, Gehring pointed

out.

The committee's simple goal is to promote the integration computer literacy into all levels of education. The joint committee is trying to encourage the State Board of Education to consider it as an essential element of the

the last Legislature required them to

develop. However, teachers must first be computer literate and educated teach to teach computer literacy, Gehring said. "It is the responsibility of the State Board of Education and the professionals at the Texas Education Agen-verse Education Agency to define the details of how computer literacy will be taught in schools and teacher colleges," he also emphasized.

Copies of the position paper can be obtained from, TAEDS, P.O. Box 632, Austin, Texas 78767.

Services Held Wednesday For Archie Brawley

Funeral services for Criswell of Hobbs, N.M. Archie Brawley, 71, of and Mrs. Elisha Bridges Roaring Springs were held Wednesday, August 18, at the First Baptist Church of Baptist Church of Roaring Springs, with the Rev. Roy Mosley, a retired Baptist minister from Odessa officiat-ing. Burial was in Roaring Springs Ceme-tery under the direction of Seigler Funeral Home of Matador. Mr. Brawley died Monday morning in Lubbock Methodist Hospital after a illness.

Hospital after a illness.

Brawley was born September 15, 1910 September 15, 1910 and was the son of the late James Allen Brawley and Annie Bridges Brawley, who survives him.

Brawley was a longtime resident of Motley and Dickens counties, coming here at an early age.

He was a graduate of Lubbock High School in 1930, where he was a member of the football team there.
Survivors include his

mother, Annie of Roaring Springs; four aunts, Mrs. Jess Freeman of Guthrie, Mrs. Monroe Carr of Lubbock, Mrs. Lydal

and Mrs. Elisha Bridges of Hereford; and

of Hererory, several cousins. Pallbearers were Yeates, Dean McInroe, Buzz Thacker, Clyde Clifton, Brown Hinson, Lem Miller, Carl J. D. Mitchell and Robert Miller.

Summer Winter or Spring

your filter can get dirty, clogged, waste energy...

but a clean filter saves energy, money.

The purpose of a filter on your air conditioning or heating air blower is to help catch dust and dirt before it can enter your unit. In time, the filter will accumulate dust and dirt. . . if it gets clogged, it can't do the cleaning job it's supposed to and uses more electricity. To avoid damage to your unit and to save energy and money, be sure filters are clean. Permanent types can be cleaned according to the manufacturer's instruction. Non-permanent types should be replaced. It is wise to check filters every 30 days.

Save energy . . . save money . . . use clean filters.

Shower Honors Reneigh Gwinn

bride-elect Burns was honored with a miscellaneous shower, Tuesday, August 10 in the home of Mrs. Roy

the home of Mrs. Roy George Hobbs. The serving table was laid with a white hand-chocheted lace cloth over yellow, the bride-elects chosen colors. The centerpiece was a centerpiece was a hurricane lamp, decor-ated with yellow silk flowers and a single white taper. A crystal punch bowl and silver-serving trays completed

the table decorations. the table decorations.

Crop Alternatives Are Discussed

By Kevin Wright

Several of Motley County's soils have a very high wind erosion hazard when used as cropland. Sandy loams, loamy sands, fine sands

loamy sands, fine sands and sands can lose more than 40 tons/ acre/year when farmed. According to the local Soil Conservation Service, these soils can be sown to improved pasture grasses and virtually eleminate wind erosion. Several county soils are extremely marginal

are extremely marginal for the production of food and fiber. Annual crops are difficult to establish and maintain on these soils. Valuable topsoil is also lost because of insufficient ground cover. Robin Darsey, a Whiteflat farmer/rancher, rea-; lized this problem was occuring on several cropland fields he was farming. With technical assistance provided by the local Soil Conservation Service, Robin has

begun to seed these fields to weeping lovegrass. Weeping lovegrass was selected because of its ease in establishment and excellent production of forage even in years. With p years. With proper fertilization, rotation, and a late season rest, Robin plans to run one animal unit for every two acres of lovegrass during May-August. This allows him to harvest a forage crop while eliminating wind erosion on his land. Robin has seeded 126 acres of lovegrass and plans to seed an additional 375 acres in the future. proper

cropland. For more information on im-proved pasture grasses for your cropland, contact the local Soil Conservation Service in the Motley County Courthouse.

the future.

Weeping lovegrass
and other improved pasture grasses provide an excellent alternative to consider for marginal

WEEPING LOVEGRASS along with other improved pasture grasses can be managed to provide excellent forage and maintain sufficient ground cover. This alternative should be considered by farmers and ranchers with marginal cropland.
