Matador Tribune

82nd YEAR

Tribune, Matador, Motley County, Texas, THURSDAY, AUGUST 3, 1978

ISSUE NO. 20

A Second Glance

By Leon Watson

Old Settlers day is just around the corner. Can you believe its August already? The Dallas Cowboys kick off their season with an exhibition game Saturday. Our own Matadors start workouts this month, and you guessed it -- school is almost here.

I always enjoyed summers because it was vacation time. When all of us kids were out of school we could take off and go to Dallas to see my sister, although we seldom got to because dad was a farmer.

In recent years, whether it be winter or summer, I've been able to go to Dallas several times because of the fast air travel.

Airlines are helping to take the air out of the inflation balloon. Few industries can match the anti-inflation performances of the airlines, this year or in the past decade.

Air Travel in 1978, the 75th year of powered flight, will set all-time records. U.S. airlines in domestic and international service are carrying more than 700,000 passengers a day. That's two million a month more than last year.

One reason that air travel keeps growing is that the cost of an airline ticket has increased much less than the price of other goods and services.

In the past ten years, despite soaring cost -- particularly of fuel -- the average air fare on U.S. carriers has gone up only 4.4 percent a year.

By contrast, the Consumer Price Index during the same period has risen 6.2 percent per year -- or 41 percent higher than air fares.

This year, more than 85 million airline passengers -- about one out of every three -- will get more for their dollars through widespread discount fares. That's taking air out of the inflation balloon.

+++

I have a nephew at Baytown, Texas, who is a scuba diver, and he says the oceans and seas, which cover nearly three-fourths of the earth's surface, are a watery Fort Knox, filled with gold and other precious mineral wealth.

Oil, gas and mineral resources located on the continents are rapidly being depleted. As a result, the ocean has become the new theater for oil, gas and mineral exploration.

Marine geologists are looking beneath the surface of the sea, to the ocean floor and into the sediment and rock below. There, they are finding new sources of oil and gas, plus new deposits of much needed minerals.

Guest Editorial

By John Ratliff
Paducah, Texas

The organization I am writing about is the Trilateral Commission. A question asked by the reader could be: "What is it and how does it concern me?" To answer the first part. It is an organization composed of the wealthiest, and most influential persons in the United States, Canada, Japan, and Western Europe. By influential, I mean persons who are Chairmen, Presidents, Vice-Presidents, and Directors of large corporations and companies -- both domestic and international. The Carter administration is a Trilateral one, for the President, Vice-President and the overwhelming majority of his cabinet has been or are members.

To answer the second part of the question, this organization admits to being a policy-oriented organization. The literature released or printed by the Commission states: "The renovation (to make new) of the international system will be a very prolonged process. The system shaped after World War II was created through an act of will and human initiative in a relatively restricted period of time. One power had overwhelming might and influence and others were closely associated with it. In contrast, a renovated international system will now require a process of creation -- much longer and more complex -- in which prolonged negotiations will have to be initiated and developed. In nurturing (train, educate) habits and practices of working together among the Trilateral regions, the Commission should help set the context (whole situation, background) for these mercenary efforts.

To the local independent businessman, farmer, and rancher, the message should be clear. This organization is going to control the negotiations of trade between nations and domestic business. This control will be over all trade (industrial and agricultural).

I as an American was taught by my family, that if I worked hard, had enough incentive, and got a lucky break, then I could progress upward economically. Under the Trilateralist it would be next to impossible, if not impossible, for a few would control all.

American Legion To Meet Monday

The American Legion will meet Monday night at 7:30 p.m. for their regular Covered Dish supper. The program will be given by Mark Wason and Tanya Simpson.

Oil Painting Class To Be Held

Mrs. Leon Cloyd will teach the first class in "Wet on Wet" oil painting this afternoon, August 3, beginning at 1:00 p.m. The classes will be held in the Woodruff building and any member of the Motley County Arts and Crafts club is eligible to take the classes. Information about these lessons can be obtained from Mrs. Bill McKelvey, president.

Attention

Did you loan Mrs. Eleanor Traweek a picture for her "book?" You may pick it up at the Matador Tribune office.

Time Changed For Mass. Aug. 6

Mass for August 6, only, will be at 1:30 p.m. in Our Lady of Guadalupe Catholic Church in Matador.

Area Crops Get Welcome Rain

Rain clouds moved across Motley County Sunday night, giving welcome moisture to area crops and ranchland.

Heaviest report of rain received at the Tribune was three miles east of Matador on the Dean Turner farm, where 1.6 inches were recorded. On another place farmed by Turner three miles west of Flomot .4 inch was recorded, although Mrs. Turner told the Tribune that she believed more moisture was received in Flomot.

One inch of rain was received at the Vann Francis Bear Creek Ranch seven miles East of Matador, and .8 was reported by Billy Paul Simpson of the Northfield community.

In Roaring Springs, Buzz Thacker's official reading registered .4 of an inch and .42 inch at the air port. Kenny Barton reported .4 on his farm at the Whiteflat community and Harold Campbell reported another .4 on his ranch 10 miles West of Matador.

Emilio Aguilar, local ASCS official, said Monday that area crops, as a whole, look good. Only in isolated spots were the farmers crops suffering, he said.

"The crops especially look good toward the Flomot area," he stated. "Of course they all could use more rain. If farmers got another good rain by Saturday it would help them out a lot, but right now most farms look pretty good."

County residents are urged to call in their rain reports in order to help the Tribune have a more detailed rain report coverage. Call 347-2400 with your weather news.

Delegates Return From Seminar

Carla Hart and Shannon Jameson returned home Friday, July 21 from the 16th annual Farm Bureau Citizenship Seminar held at Baylor University in Waco where they learned the important role the youth of America have as citizens in the United States of America.

The 388 delegates attending were told the basic purpose of the Citizenship Seminar is to contribute to the strength and continuity of the freedom philosophy on which the American way of life is founded. In this day and time where the overthrowing of governments, persecution of people who stand up for their beliefs and war on foreign land is so prevalent, the American people can be and should be truly thankful to live in a free country where they have the freedom to stand up for what they believe.

Carla, daughter of Mr. and Mrs. Boyce Hart, and Shannon, son of Mr. and Mrs. H. R. Jameson of Whiteflat, the Motley County delegates, participated in panel discussions and educational lectures and sessions with outstanding statesmen representing numerous professions from throughout the nation.

Snyder Rites Held For Mrs. Rhodes

Funeral services for Annie Mae Rhodes were held July 15, 1978 at Snyder, Texas. Services were at Bells Funeral Chapel at Snyder. Burial was in Snyder, Cemetery. Mrs. Rhodes died July 12 in Dogdell Memorial Hospital at Snyder.

She was born July 13, 1898, the daughter of early settlers, Sam and Mattie Harris at Whiteflat. She had lived in Snyder the past 55 years.

She was married to Charlie Rhodes Dec. 13, 1913 in Whiteflat. He preceded her in death in July 1957.

She is survived by a daughter, Nora Gray of Dunn; two sons Elmer Rhodes of Phoenix, Ariz. and Charles of New Orleans, La.; five grandchildren, fourteen great-grandchildren; three brothers, Henry Harris of Matador, Herb Harris, of Idalou, Jack Harris of Tucson, Arizona; two sisters, Kate Truett of Lubbock and Marie Price of Petersburg.

Jeremy Perkins, age 22 months, son of Mr. and Mrs. Jesse Perkins is shown as he tries out the saddle to be given to the winner of the Old Men's Roping at the Motley-Dickens Counties Old Settlers Reunion in Roaring Springs, August 24, 25, 26. The saddle is on display at the First State Bank in Matador.

Boys State Report Given For Lions

Mark Wason, summer delegate to Boy's State in Austin, reported on the event, Tuesday at regular monthly meeting of Matador Lions Club. The luncheon meeting was held in the basement of First Baptist Church, where Walter Jones served a delicious barbecued chicken meal.

More than 900 boys from over the state attended the annual Boys State sessions, Wason said. The delegates are divided into political parties and learn about government through individual participation. They visit the Capitol and attend sessions of the legislature. They participate in various sports events, and attend programs where addresses are given by well-known statesmen. Keynote address this year was by Governor Dolph Briscoe. Delegates to Boys State are sponsored locally by the American Legion and Lions Club.

Serving as program chairman was J. B. Cooper, who introduced Mark as "one of our most outstanding native sons." He is the son of Mr. and Mrs. Billy Wason.

Boss Lion Franklin Price presided and called for a report by Billy Wason, on plans for the club's 50th anniversary observance. Although plans are underway, the program has not been arranged, Wason said. The date will be set when the program is completed, according to Lion Price. Matador Lions Club was organized in September, 1928.

The possibility of reworking the street signs was discussed at the directors' meeting Monday morning, and Lion Price Tuesday named a committee to investigate and initiate this project. Lions Joe Freeman, Ray Zabelski and Frank Pohl were appointed. Also named was the club's athletic committee for the coming season, as follows: Lions Charles Johnson, Larry Hoyle, Lewis Bostick, John Barnhill, Joe Freeman and Philip Hilton.

Bob Stanley welcomed the following guests: Rev. Phil McClendon, who has been serving as interim pastor for the United Methodist Church until this week when Rev. Terry Kirk arrived to SEE LIONS PAGE TWO

Football Practice Begins August 14

Football practice for Motley County High School will officially get under way on August 14 when two-a-day workouts begin, head football coach Ronnie Bradshaw announced this week.

Issue of equipment will start on Wednesday August 9, when team members will be given shoes and workout shorts. The next Monday the boys will begin their drills to get in shape, before donning pads on August 18 to start their contact practice.

The first scrimmage of the season will be Friday August 25 against Class B Smyer, at Smyer.

School Classes will begin on August 28, and the first football game is to be played at Paducah on September 8.

Association Formed By Senior Citizens

Two representatives from the Office on Aging of South Plains Association of Governments (SPAG), Lubbock met with a group of Motley County citizens Thursday, to assist with the organization of a Senior Citizens Association for Matador.

Also discussed were a Senior Citizens Center for the county and a tentative schedule for the minibus which has been designated for use in Motley County.

Ms. Betty Shannon, Project Director and Ms. Virginia Ferebee, Program Specialist from the Office on Aging outlined procedures for establishing a Senior Citizens Center.

Ms. Shannon presided for the organization of a Matador Association, and temporary officers were named as follows: Wynona Gilbreath, chairperson; June Keltz, vice-president; Lila Meador, secretary-treasurer. These, together with Billy Whitaker also comprise the board members, with others to be added later as the organization becomes permanent.

It was suggested since Roaring Springs Senior Citizens are already organized and serve the south part of the county, that SEE SPAG -- PAGE TWO

MR. AND MRS. RICKY LAWRENCE

New Managers At Cooper Butane

Ricky and Naomi Lawrence became the new managers of Cooper Butane in Matador effective July 26, it was announced by Elliott Petroleum Company this week.

Ricky had worked at Spot Cash grocery for two years prior to taking the managers position. He was raised in Matador and graduated from Matador High School in 1972. Naomi, also raised here, graduated from Motley County High School in 1975. They have one son, Chad, age 21 months. They were married in 1975. Ricky is the son of Mr. and Mrs. Givens Lawrence and Naomi is

the daughter of Mr. and Mrs. James Simpson.

The company was founded in the 1940s by Freeman Thacker, who employed J. B. Cooper. Cooper bought the firm in 1969 and changed the company name to Cooper Butane. On October 1, 1977 Cooper sold the business to Elliott Petroleum of Oklahoma. Charles and Sue Duncan of Paducah ran the company until July 26 when the Lawrence couple took over.

Ricky says the company is now servicing about 300 tanks of local businesses and residents.

Kay Phillips Wins
In 4-H Contest

Winners in Texas Agricultural Extension Service District 34-H record judging were selected July 24 when screening groups met at the Texas A&M University Research and Extension Center at Vernon, according to Thelma Wirges and Ed Garnett, District Extension Agents for the twenty-one District 3 counties. Kay Phillips won first place with her Consumer Education Record Book. She is the daughter of Mr. and Mrs. Grady Phillips. She has been a very active member of 4-H for eight years. This year she won first place in her division of the Motley County Food Show and a blue ribbon in the Motley County Dress Revue, a second place in photography and her Sharp Shooter Award. Kay is also a member of the National Honor Society. Kay's entry was sent to the State 4-H Competition on August 2, 1978.

SPAG FROM PAGE ONE

From Northfield and Whiteflat communities to the north, work with the Matador association. A committee was named to work on the bus schedule in implementing a route feasible for all areas of the county. The committee is composed of Mr. and Mrs. J. D. Mitchell, Mrs. Ora Stonecipher and Mrs. Minnie Dye of Roaring Springs, and Mesdames Naomi Tilson, Wynona Gilbreath and June Keltz, Matador. Thirty-nine residents of these two communities attended the meeting, which was held in the Educational building of the United Methodist Church. A long range planning program was projected for the creation of a Senior Citizens Center county-wide. These will be studied at subsequent meetings.

Lions FROM PAGE ONE

assume the pastorate; Rev. Kirk, Larry Neighbors, new basketball coach; Ronnie Bradshaw, head football coach; Rob Lackey, Baptist music director and youth worker; Miss Janis Sherrod, Social Security representative from Plainview; Mrs. Tommie Masterton of Dallas and Jerri Ann Campbell, sister-in-law and granddaughter of Lion Forrest Campbell; and local resident, Lila Meador.

Screening Clinics To Be Held

The Texas Department of Health will hold two Multiphasic Screening Clinics for adults in Motley County during the month of August, 1978. These clinics will be held on August 7 and on August 28 from 10:00 a.m. to 4:00 p.m. at the Motley County Courthouse in Matador. Screening services available at these clinics will be available to adults at no charge. These screening services will include: blood pressure check, diabetes screening, height, weight, hearing, vision, urinalysis, Pap tests, dental screening, and others.

Wedding vows were exchanged by Kelli Sue Parson and Donnie Joe Jackson, Saturday, July 29, at 4:00 p.m. in the First Baptist Church, Floydada. Rev. Jimmy McGuire, pastor of First Baptist Church, New Deal, performed the double ring ceremony.

The bride is the daughter of Mr. and Mrs. Dewie Parson of Floydada and the groom is the son of Mr. and Mrs. Johnnie Jackson of Matador.

A brass archway was the background for the exchange of vows. On either side were brass spiral candelabras holding apricot tapers. The archway and candelabras were entwined with emerald greenery. The nuptial area was centered with a table laid in white, which held the unity candle.

The bride given in marriage by her father, wore a classic silhouette, formal gown of white crystal organza. It was designed with a fitted bodice of French Chantilly lace graced with tiny bows and seed pearls. Defining a Victorian neckline trimmed in crystal pleating was a row of seed pearls. The back yoke was fashioned with self covered buttons that ran to a white satin bow which formed the waistline. The full Bishop sleeves were accented with a wide band of Chantilly lace and seed pearls; with cuffs formed of Chantilly lace and edged with narrow crystal pleating. The bouffant skirt was trimmed with crystal pleating and swept to a chapel length train. Trimmed with the same white crystal pleating. Her veil was a fingertip mantilla of English silk illusion, adorned with wide French Chantilly lace. The bridal bouquet was a cascade arrangement of sonia sweetheart roses and baby's breath accented with long streamers of white bridal satin and lace.

Following tradition, "For something old" the bride wore her maternal grandmother's wedding band. "Something new" was her wedding attire. "Something borrowed" were pearl earrings from her bridesmaid, Connie Martinez. "Something Blue" was a blue garter, and she wore pennies in her shoe bearing the birthyears of she and the groom.

Miss Kim Bertrand served as maid of honor. Other bridal attendants were Connie Martinez and Nanette Soto. The attendants wore long dresses of apricot knit with floral sheer organza and were an old fashioned Victorian design with full sleeves and princess cuffs. They carried long stemmed sonia roses with baby's breath tied with streamers of apricot satin.

Carter Luckett of Matador served the groom as best man. Groomsmen were Jimmy Morris and Ricky Green both

of Matador. Ushers were Fred Parson, brother of the bride, Floydada and David Green, Matador. Toast colored tuxedos, trimmed in brown with apricot boutonnieres were worn by the best man, groomsmen, ushers and fathers of the bride and groom. The groom was attired in a solid white tuxedo and wore a boutonniere of an apricot rose.

Mrs. Andrew McCulley, organist, presented wedding selections including "A Time For Us," "Colour My World," "Greensleeves" and "Love Story." As the ushers lit the candles and the mothers of the bride and groom lit the white tapers on either side of the Unity Candle, Mrs. McCulley played "Romance". Mrs. Kay Crabtree, pianist, accompanied his wife, Hope, as she sang "We've Only Just Begun," "Evergreen," and "The Wedding Song."

Special guests attending were grandparents of the bride, Mr. and Mrs. Jim Fitzgerald, Floydada and M. D. Parson, Lubbock. The groom's grandmother, Mrs. C. P. Jackson, Matador and Miss Laurie Grivel, Omaha, Nebraska.

RECEPTION HELD The reception was held in the Wall Street Annex. As guests entered the reception area, Miss Susan Fitzgerald,

cousin of the bride, secured names in the Candlelight Bridal Book. The registration table was laid in apricot taffeta edged with white Chantilly lace and held a sonia rose in a crystal vase.

The bride's table was covered with apricot taffeta overlaid with white lace. The three tiered wedding cake was white with tiny cascades of apricot roses. The top layer held three white satin wedding bells under an arch flanked by apricot flowers. A silver punch bowl, crystal appointments, buttermints, white napkins inscribed with the couple's names and wedding date and a silver candelabra with white tapers holding the bride's bouquet completed the table decor. Attending the bride's table were Mellane Parson, sister-in-law of the bride and Miss Connie Welch of Amarillo.

An ecru cutwork cloth over brown covered the groom's circular table which was centered with a brown and apricot flower arrangement. Serving from the silver coffee service was Mrs. Carter Luckett, Matador. Chocolate fudge cake and roasted pecans were served by Mrs. Raby Webb of Matador.

Members of the houseparty were Mesdames Buddy Lutrick, J. A. Welch, Pete Rogers, Morris Applewhite

and Miss Kathy Burk. Reception attendants wore corsages of white daisies with apricot streamers.

The bride selected for her "going away" attire, a navy blue pantsuit with draw string sleeves trimmed in ecru cotton lace, complimented by her corsage taken from her bridal bouquet.

Following a wedding trip to Colorado the couple will reside in Matador.

COURTESIES HELD

The rehearsal dinner was held at King's Restaurant and was hosted by Mr. and Mrs. Johnnie Jackson, parents of the groom.

The bridesmaid luncheon was held at Gardski's Loft in Lubbock, with special guests being the bridal attendants.

TOURNAMENT AT FLOYDADA

The Women's Association of Floydada CC hosted a partnership low ball tournament last Tuesday. It's always enjoyable to play on that most scenic course - greens and course were in great shape.

There were 60 players from Lubbock, Spur, Childress, Paducah, Petersburg, Ralls and Matador... these played from Matador: Louise, Laverna, Geneva, Leona (they are members there), Mickey, Lucretia, Opal, Frances, 'Cretia Jr., Winifred and Hazel. Mickey had as her partner, daughter-in-law, Bridget, from Dougherty.

Upon registering, all players were given balls and divot repairers, and enjoyed coffee and doughnuts.

Louise and Geneva won 3rd place (79) in championship flight - and received gift certificates.

Following play we met for a most delicious lunch at RedMan's - which was thoroughly enjoyed - those tasty cheese rolls are the best - as well as everything else!... Lois and Dorothy, returning from Lubbock joined us for lunch.

+++

MOST BOGEYS PLAY

Playing Thursday were Leona, Mary, Lois, Laverna, Winifred, Geneva, Dorothy, Tommy, Rita, Kathy, Kathryn, Frances and Hazel. Mary won the ball - having

7 bogeys. Her 17 putts turned her would-be birdies and pars into bogeys. She did have 1 par.

Meeting for lunch were Mary, Leona, Geneva, Laverna, Winifred, Tommy and Hazel... with Lois and Dorothy enjoying coffee.

When we arrived to play, Rita and Algie had just finished playing 9 holes - and Rita was ready to join us for play.

+++

Mary, Tommy, Kathryn and Kathy enjoyed 18 holes of play at Floydada CC last Wednesday.

+++

The Golf Girls, received this card (sent to Hazel) from Francine, who has been in Alaska for several weeks, with sister Patti and family:

"Hi Golfers!
"What a pretty place! Rain every day! Sun has come out only part of 4 days. Duck flew us to Kenaia and over 4 glaciers. Patti and I went to Homer to eat on the Spit at "Lands End." We also went to see two artists' studios. One sells for \$20,000.00 a painting! Lots of fish and no sleep. I probably can't play golf anymore. Hope you are having fun. Earthquakes feel funny. Love, Fran."

A most colorful card... snow-covered trapper's cabin and food cache alongside, deep in the land of big game and furs. So good to hear from our golfing pal and hear of her interesting experiences!

Local News

Visiting Mr. and Mrs. Algie Groves Thursday night were his sister, Avis Dooley of Arlington and Mrs. Zena Mae Groves. Mrs. Groves also visited her sister-in-law, Velma Fulfer.

Mrs. Ruby Nichols and daughter, Rita of Lubbock were guests in the home of Mr. and Mrs. Algie Groves Friday night.

Mr. and Mrs. Don Pitts, and Donna of Lovington, N.M. were guests of Mrs. D. E. Pitts from Friday to Thursday of last week. Sunday they all drove to Flomot where they were joined by Mr. and Mrs. Kenneth Pitts, Kellie and Kerrie at the home of Mr. and Mrs. Donnie Cruse.

Mr. and Mrs. Algie Groves visited in Plainview Sunday

with her sister, Mrs. Madge Renfro.

Week end guests of Mr. and Mrs. Kim Wilkinson were their daughters and husbands, Mr. and Mrs. Rolland Hurt of Lubbock and Mr. and Mrs. C. O. Strickland of Abilene.

Mr. and Mrs. Terry Keltz, Mr. and Mrs. Larry Keltz and Mr. and Mrs. Brent Hall of Plainview were week end guests of Mr. and Mrs. Bennie Keltz. Mr. and Mrs. Kelly Keltz, local residents, joined the group.

Mr. and Mrs. James Earl Jackson, Jami and Darrne from Davis, Okla., and Gerald Jackson of Luling were week end guests of Mr. and Mrs. Johnnie Jackson. They were here to attend the wedding of their brother, Donnie Jackson.

Good Nutrition by

Parshly M. Rathmann, Ph.D.

Decreasing LDL's

For several years, you've been hearing that you should alter your life-style in order to lower your serum cholesterol level. In coming months, you can expect a somewhat different suggestion: Alter your life-style to lower your LDL-cholesterol level.

The changes in diet, exercise and habits are identical. However, the chain of events is a little different.

These days when an alert physician tests the blood, in addition to testing for total cholesterol, he also tests for HDL's and LDL's. These are two important carriers of cholesterol. Their initials stand for high density lipoproteins and low density lipoproteins.

Cholesterol in LDL promotes damage to blood vessel walls (atherosclerosis). This, in turn, increases risk of heart disease. HDL, by contrast, seems to be protective. The proportion of cholesterol in LDL and HDL is a better indicator than is total cholesterol alone.

Women before the menopause, animals resistant to atherosclerosis, men who take vigorous exercise regularly and vegetarians are more likely to show less LDL-cholesterol in relation to HDL-cholesterol than average individuals. In contrast, sedentary men, particularly if they eat

diets rich in saturated fats, show a much higher proportion of LDL's than average. This agrees with the well-known fact that American men are more susceptible to coronary heart disease than are young women.

How can you lower your LDL-cholesterol level?

- By exercising to keep physically fit.
- By avoiding or correcting obesity.
- By reducing total fat intake.

- By replacing some red meats with poultry, fish and plant sources of protein.
- By replacing whole milk with skim milk.
- By replacing butter with Mazola margarine, and using Mazola corn oil in your daily meal preparation.

- And when you go for your annual physical, ask your doctor to test for LDL-HDL level. It's a good way to understand your own body more fully.

Festive meals can fit this pattern, too. To help in planning these special occasion meals, send for Mazola corn oil's booklet "Let's Be Sociable," from Dept. LBS-GN, Box 307, Coventry, CT 06238.

Dr. Dorothy M. Rathmann is Director of Nutrition for Best Foods, a Division of CPC International Inc.

Roaring Springs News

By Odessa Mullins

Mr. and Mrs. B. L. Peacock visited in Santa Fe and Albuquerque, N.M. over the week end where they met Mr. and Mrs. Mike Peacock, Jon Mike and Michelle. Mrs. Mike Peacock, Jon and Michelle came home with them for a weeks visit.

Mrs. Glen Bird (Mae) and her son, Charles (Mann) visited relatives in Matador and Roaring Springs Monday through Friday. Mrs. Bird was a house guest of her niece, Mrs. Ora Stonecipher.

Mr. and Mrs. Teddy Sedgwick spent last week end vacation at Blue Lake and Bear Lake, Colorado.

Mr. and Mrs. Gordon McGee of Chickasha, Okla., spent Thursday and Friday visiting her parents, Mr. and Mrs. Teddy Sedgwick. Their children, Audie and Kathie, had been visiting their grandparents in Roaring Springs and at Spur and returned home with their parents.

Page, Justin and Jason McInroe of Slaton have been visiting their grandparents, Mr. and Mrs. Dean McInroe.

Mrs. Jack Davis spent a week recently visiting and helping her mother, Mrs. Jim Stanley, in Hearne. Mrs. Stanley has been ill.

Mr. and Mrs. John Thacker, Amy and Melney of Ft. Worth visited last week end with his parents, Mr. and Mrs. Buzz Thacker and her parents, Mr. and Mrs. Bill Jones and Jade at Matador.

Miss Lula Swim returned home on Sunday night after a two weeks tour of the following states: Ark., Tenn., Penn., N.Y., Ohio, Ind., Missouri, Michigan, Illinois, West Virginia, Okla., and Niagara Falls, Canada. She visited the Longwood gardens at Denneth Square, Pa., the Hershey Gardens at Hershey, Pa., the Taff Museum and Conservatory at Cincinnati, Ohio, the Corning Ware plant at Corning, N.Y., Niagara Falls in Canada, the Ford Museum at Dearborn, Mich., the Amish country in Penn. She attended a Lily Flower Convention in Pittsburg, Penn., and a pottery plant in

Hot Springs, Ark.

Mr. and Mrs. Jim McCleskey spent from Tuesday until Friday visiting in Hereford with their son and family, Mr. and Mrs. Herman McCleskey and with Mrs. Bessie Saulcy.

Mr. and Mrs. Harold Rivenbark of Lubbock visited Sunday afternoon with her sons, Ross and Kelly Odell and Mr. and Mrs. L. A. Mullins.

Mr. and Mrs. Jim McCleskey visited Sunday with their son and family, Mr. and Mrs. Elgie McCleskey, James, Willie and Elwyn at the Pitchfork Ranch in Dumont.

Mrs. Joe Gibson has returned home from Crosbyton Hospital.

Mrs. Harold Bell is a patient in Crosbyton Hospital.

Grady Webb was admitted to Methodist Hospital Sunday of last week for minor surgery. He was dismissed on Thursday.

MATADOR TRIBUNE

Flomot News

By Mrs. Earlyne Jameson

A bridal shower honoring Miss Marsha Yancy of Silverton, bride-elect of Steve Green was held Friday, July 28 at the Flomot Community Center. Guests called from 6:00 to 8:00 p.m. and were registered by Mrs. Hal Martin of Whiteflat.

Hostesses for the courtesies were Mrs. Jack Pigg of Quitaque, Mesdames Wayne Hunter, L. E. Shorter, L. D. Bilberry, Clois Shorter, Ray Cruse, Rex Johnson, Billy Roys, Dan Kingston, Herb Martin, Orville Lee, Charlie Lummis and Joe Ike Clay.

The hostesses alternated at the red amethyst punch service. The table and decorations featured the honoree's chosen colors of red and white. The table was laid with a white lace cloth over red centered with a lovely flower arrangement of white silk roses, dark red and white dried flowers in a white grater with an attached red polka dot bow. Cake squares, mints and nuts were served with a fruit punch.

Complimenting the registration table was a Sweetheart Tree with red hearts and white flowers topped red and white pipe cleaners, encircled with sweetheart ivy and a red polka dot bow. Corsages of red roses were presented to Miss Yancy, her mother, Mrs. Willard Bardell of Silverton and Mrs. Art Green.

Guests from out of town were Mrs. Dorothy Martin and daughter, Cammie of Silverton, Mrs. Reese Timmons and Mrs. Dean Turner of Matador, Mrs. Billy Pinkerton of Turkey and Mrs. Hoss Hamilton of Quitaque.

Mr. and Mrs. Elmer Jones of Paducah and Mary Ellen Barton and Viola Stinson met Mr. and Mrs. Tom Chayn of Lubbock and Mr. and Mrs. Jimmy Dale Jones and daughter, Amber of Amarillo at McKenzie Lake near Silverton, Sunday and enjoyed boating and fishing.

Mrs. Don Ewing, Donna, Jolie and Clay of Vega were guests this week in the home of Mr. and Mrs. Joe Ike Clay and children. They also visited Mr. and Mrs. Herb Martin and other relatives and friends. Mr. Ewing was attending a coaching seminar in Houston.

Mrs. Larry Bynum, Kani and Bart visited Monday night and Tuesday in Roaring Springs with her parents, Mr. and Mrs. Foy Moore.

Mr. and Mrs. James Monk and Mr. and Mrs. Lewis Cannon of Tulla visited last week end in Strawn with Mrs. Monk's uncles, Murry and Charlie Myers.

Mrs. Lillie Tanner and granddaughter, Jamie Tanner of Tulla visited this week with Mrs. Harley Gunn, Mr. and Mrs. Herb Martin and Mr. and Mrs. Joe Ike Clay and children.

Mr. and Mrs. Burl Hollar, Mindy and Monte of Clarendon visited Viola Stinson and Mary Ellen Barton, Thursday. Visiting with them Wednesday was Mrs. Elmer Jones of Paducah.

Mr. and Mrs. Larry Bynum and children were in Plainview, Thursday and attended the movie, Star Wars and enjoyed other family entertainment.

Week end guests of Mr. and Mrs. Jack Starkey and Marvin were Mr. and Mrs. Gene Davis and son, Warren of Wellington and Michael Starkey of Amarillo.

Mrs. Kirby Hatley, Jeff and Jennifer of Brice visited Mr. and Mrs. Doyle Calvert, Gwen and Glen and Mr. and Mrs. Clois Shorter and daughters, Wednesday.

Visiting Rev. and Mrs. Charlie Lummis and Lori Saturday night and Sunday were Mr. and Mrs. Tom Landers and son of Anton. Mr. and Mrs. Clois Shorter,

Christi, Cindy and Keri enjoyed the Ranch Heritage Museum and other tourist attractions and entertainment in Lubbock, Saturday.

Luther Bilberry of Post and Mrs. Jean McDonald of Odessa visited their uncle and wife, Mr. and Mrs. L. D. Bilberry, Tuesday.

Mrs. Lennie Gilbert returned home Wednesday from Plainview where she was a patient in the Central Plains Hospital following a recent accident. Her granddaughter, Gwen Lane, daughter of Mr. and Mrs. Bob Lane of Lockney, is staying with her during her recuperation.

Dena Williams of Seattle, Washington is visiting Mr. and Mrs. Bly Shannon.

WEEK END GUESTS

Guests in the home of Mr. and Mrs. James Monk during the week end were Mr. and Mrs. Bill Suddeth and family of Hugoton, Kan.; Mr. and Mrs. Buddy Croelin and Susan of Rio Hondo; Mr. and Mrs. Cecil Suddeth and family of Fort Worth; Mr. and Mrs. Jean Pope and Mr. and Mrs. Lewis Cannon of Tulla; Mr. and Mrs. Monte Cannon and Tay of Dress; Mr. and Mrs. Randy Monk of Amarillo; T. N. Monk of Plains; Mrs. Millie Maupin of Adrain; Johnny Monk of Quitaque and Mr. and Mrs. Bob Suddeth and Jeff of Manhattan, Kansas.

HAS ACCIDENT

Miss Karen Martin, daughter of Mr. and Mrs. Donnie Martin of Silverton, is a patient in St. Anthony's Hospital in Amarillo following a boat accident last Monday at Lake McKenzie. She suffered a back injury. Her grandparents, Mr. and Mrs. Bly Shannon, have been with her during her hospitalization.

HONORED ON BIRTHDAY

Bart Bynum, son of Mr. and Mrs. Larry Bynum, celebrated his seventh birthday at the Flomot Community Center, Monday afternoon, July 24. The table was laid with a yellow cloth and napkins and orange and yellow crepe streamers and balloons added to the festive decorations. Games were enjoyed and he blew out his candles on a colorful birthday cake displaying a tractor.

Refreshments of cake, ice cream and fruit punch were served to his sister, Kani; Kim Moore of Matador, Shawna and Shay Degan, Celeste and Will Sperry, Eric and Mandy Farley, Cindy, Christi and Keri Shorter, Cary, Cory and Cara Franks, Tim and Cory Kendall, Regina, Brand, Chancy and Rogan Cruse, Lori, Tina and Julie Clay, and Benji and Ricky Hughes. The favors were sacks of assorted toys decorated with the name of the guest.

Special guests were his grandmothers, Mrs. Durze Markham of New Deal and Mrs. Foy Moore of Roaring Springs; Mesdames Harrison George, Darrell Cruse, Bill Dean Washington and D. M. "Tike" Gilbert.

BIRTHDAYS CELEBRATED

Wade Martin and his granddaughter, Debbie Clay were honored on the occasion of their birthdays, Monday night, July 24 in the home of Mr. and Mrs. Wade Martin with an Ice Cream Supper.

Those attending and enjoying the beautiful red velvet decorated birthday cake and freezer ice cream besides the honorees and Mrs. Wade Martin were Mrs. Treva Criswell and Mrs. Ervin Merritt of Plainview, Marilee Martin and Killi Youngblood, Texas Tech students in Lubbock, Mr. and Mrs. Herb Martin, Wilburn Martin, Mr. and Mrs. Ronald Clay and Mr. and Mrs. Clois Shorter, Cindy, Christi and Keri, local residents.

Local News

HERE FROM DALLAS

Mrs. George Masterton of Dallas, is visiting this week in the home of her brother-in-law, Judge Forrest Campbell, with her nephew, Gary Campbell and his daughter, Jerri Ann, while Gary is recovering from recent surgery in St. Mary's Hospital, Lubbock.

HOME FROM GERMANY

Mrs. B. H. Hobbs has returned home from a recent visit in Frankfurt, Germany with her daughter and family, T-Sgt. and Mrs. David A. Brown and daughters, Kayla and Kimber. She left July 11, from Houston and returned there the 26th. Mr. Hobbs and son and family, Mr. and Mrs. Ronald Hobbs met her plane, and after an overnight visit with the latter at their home in Cleveland, Mr. and Mrs. Hobbs arrived home Friday night.

TRANSFERRED

Major Arvin Ellithorp has been transferred from Fort Hood near Killeen, to Fort Lee, Virginia. Major and Mrs. Ellithorp and children, Rochelle and Scott, have been visiting here the past week with his parents, Mr. and Mrs. Herman Ellithorp, as they prepare to leave for their new location.

HOW CHILDREN SEE THINGS

The work of eleven budding young artists enrolled in Fruehauf-Y.M.C.A. recreational programs went into the corporation's annual report cover.

When a group of children were recently asked for their views by a major corporation, they gave the company some pretty interesting pictures of itself.

The corporation, Fruehauf, headquartered in Detroit's East side, has long been recognized as a company that looks to the future, and it wanted to know how the bearers of that future—today's youth—saw Fruehauf. At a picnic at the company play fields, participants in Fruehauf-Y.M.C.A. recreational programs were invited to show how they viewed their corporate neighbor.

Youngsters of grade, junior high and high school age depicted their ideas of this company that deals in truck trailers, automotive equipment, finance, and maritime and aerospace materials and services around the world.

Eleven of the aspiring artists were awarded prizes, and their drawings were used to make up the cover of the company's annual report.

Presentations were made at a Y.M.C.A. board meeting where the young people were honored. The company also felt honored by the clever and colorful ways it was depicted.

NOTICE OF INTENT TO ABANDON

AB-109 (Sub-No. 1F)

Quana, Acme and Pacific Railway Company hereby gives notice that on or about August 2, 1978, it intends to file with the Interstate Commerce Commission, Washington, D. C. 20423, an application for a Certificate of Public Convenience and Necessity, permitting the abandonment of a line of railroad extending from Railroad Mile Post G-728, plus 10 poles plus 700 feet, near Acme, Texas, to Railroad Mile Post G-833.2 near Floydada, Texas, a distance of approximately 104 miles, in Hardeman, Cottle, Motley, and Floyd Counties, Texas. The line for which the abandonment application will be filed includes the stations of Paducah, Texas at Mile Post G-766.1 and Floydada, Texas at Mile Post G-833.2.

The reasons for the proposed abandonment are the public convenience and necessity no longer require the continued operation of the line and the continued operation of the line would be a burden upon applicant.

The line of railroad has appeared on the System Diagram Map in Category 1 (§ 1121.20) (b) (1) since February 28, 1978.

The interests of railroad employees will be protected by appropriate conditions as set forth in Chicago, B. & O. R. Co., Abandonment, 257 I.C.C. 700 and the applicable provisions of the Rail Passenger Service Act.

Any interested person, in response to this notice, is entitled to take either of the following actions:

1. File with the Interstate Commerce Commission written comments containing:

- exact name and address of the commenting party;
- brief statement of interest in the abandonment or discontinuance proceeding;
- specific statement of position and summary of evidence with regard to any or all of the following:
 - intent to offer financial assistance;
 - environmental impact;
 - impact on rural and community development;
 - suitability of the properties for other public purposes; and
 - recommended provisions for protection of the interests of employees.

Written comments will be considered by the Commission in all proceedings in developing conditions and in determining whether to conduct an investigation on its own motion. In the event an investigation is conducted, then the commenting party may participate in the proceeding as its interests may appear.

2. File with the Interstate Commerce Commission a petition requesting that the application and proposed abandonment be investigated.

The petition to investigate shall be in the form of a verified statement, and at minimum, contain:

- identification of petitioner including its name, address and business;
- statement of petitioner's interest in the abandonment or discontinuance proceeding; whether petitioner uses the involved service; and if it does not, information with respect to the group or public interest it represents;
- specific reason(s) for requesting the institution of an investigation, including information with respect to petitioner's reliance on the involved service, with allegations of fact supported by an affidavit of personal knowledge of the facts;
- any rebuttal of information or material submitted by applicant; and
- request for oral hearing and reasons therefor if desired.

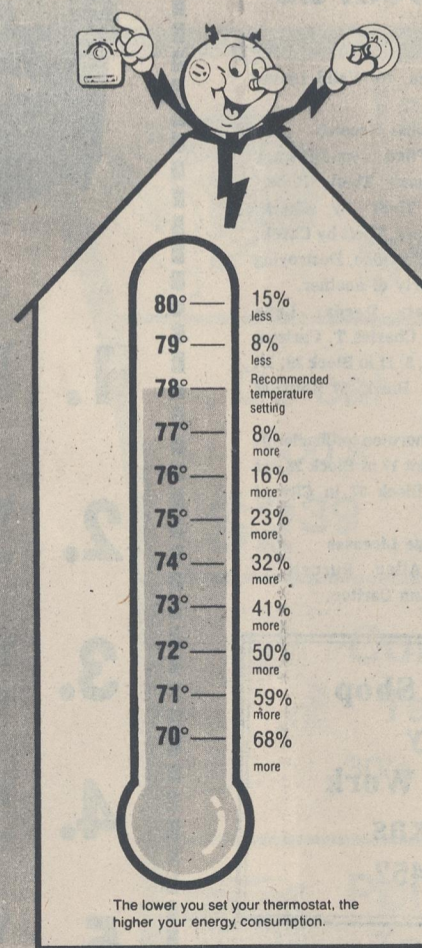

Upon receipt of a petition to investigate, the Commission shall determine the extent of the investigation to be instituted. Those parties filing petitions to investigate should be prepared to participate actively in either oral hearings or via the submission of additional material in the form of verified statements. Parties seeking information concerning the filing of petitions should refer to 49 CFR 1121.36.

Petitions to investigate and written comments should indicate the proceeding designation No. AB-109 (Sub-No. 1F) and should be filed with the Interstate Commerce Commission, Washington, D. C. 20423 no later than Sept. 6, 1978. Interested persons may file either a written comment or a petition to investigate with the Commission to become a party to this abandonment proceeding. A copy of each petition to investigate or written comment shall be served upon the representative of the applicant, D. E. Engle, Vice-President-General Counsel, St. Louis-San Francisco Railway Company, 906 Olive Street - Suite 1023, St. Louis, Missouri 63101. Replies to comments or petitions, the latter shall be in the form of a verified statement, shall be filed with the Commission no later than Sept. 16, 1978 and shall be served on all commenting parties and petitioners. The original and two copies of all petitions, comments and replies shall be filed with the Commission together with a certificate of service.

In the event a petition to investigate prepared in accordance with the above instructions is filed, then the Commission will conduct an investigation of the abandonment. Written comments filed with the Commission will be considered by the Commission in all proceedings in developing conditions and in determining whether the Commission should conduct an investigation on its own motion in the event no petition to investigate is filed. Additionally, if an investigation is conducted then parties filing comments may participate in the investigation as their interests may appear.

Persons desiring further information concerning abandonment procedures may contact the Interstate Commerce Commission's Section of Finance, Office of Proceedings or refer to the full abandonment and discontinuance regulations at 49 CFR Part 1121. Persons desiring information concerning financial assistance for the continued operation or acquisition of the involved line should contact the Commission's Rail Services Planning Office. The carrier's representative to whom inquiries may be made is D. E. Engle, Vice-President-General Counsel, St. Louis-San Francisco Railway Company, 906 Olive Street - Suite 1023, St. Louis, Missouri 63101. A copy of the application will be available for public inspection on or after August 2, 1978 at each agency station or terminal on the line proposed to be abandoned or discontinued. The addresses of those agencies are: CA&P Depot, Box 517, Floydada, Texas 79235 and QA&P Depot, Box 476, Paducah, Texas 79248. The Floydada station is open 8:00 A.M. to 5:00 P.M., Tuesday through Saturday, and the Paducah station is open 9:00 A.M. to 6:00 P.M., Monday through Friday. The carrier shall furnish a copy of the application to any interested person proposing to file a written comment or petition to investigate, upon request.

**U. S. Representative
Bob Krueger**
FULL DISCLOSURE
NECESSARY

WASHINGTON—Trust between elected officials and the people they represent is the foundation of American Democracy. When it is lacking, our economy suffers, our people suffer and our nation becomes confused and directionless.

The scandals of recent years in Washington have eroded many Americans' faith in the honesty and integrity of their elected officials, and this country has suffered from it.

Inflation has hit double-digit figures, interest rates have climbed, pay checks are being whittled away by climbing prices. And in many states, a disillusioned electorate is trying to reclaim its decision-making powers through tax reform referendums and movements.

If trust is to be restored, if our economic problems are to be combated, if we are to work together effectively instead of divisively, the voters must retain their faith in the honesty and integrity of the people they have placed in public office. They must be assured that their representatives are not only capable of making wise decisions, but are making those decisions not for personal gain, but in the best interests of this country.

It is absolutely essential that each person who holds or wishes to hold public office make himself, his background and all his affairs open to public scrutiny so that there can be no question of either his motives or fitness for public trust.

That means he must disclose fully his tax returns, personal holdings and any other records of financial interests from which he might benefit.

If he is not willing to do so, he should not run for public office.

In my judgement, the day a person stands before the people and asks for their confidence and trust as an elected official is the day that person should be willing to give up many of the privileges private citizens enjoy.

That is why I have released my complete tax return records each year I have been in office, and have made my tax returns for the past seven years available to the press. That is why, when filing personal property disclosure statements, I have gone beyond the letter of the law and submitted not only those records required, but also those not mandated by law.

It is time that all elected officials take renewed note of the responsibilities which elected posts carry, and of the meaning of the words, "public servant." For that is what we elect our representatives to do—serve, as well as lead.

A recent study of American opinion conducted by U.S. News and World Report indicates that less than 10 per cent of those questioned give any group of elected federal officials a "good" rating on honesty, dependability and integrity.

No one citizen, congressman or even a President can change that attitude. Trust in government is slow in building.

But every person can contribute to rebuilding the shores of confidence that sustain this great nation. With careful attention to prosperity, ethics and the intent of the law, by all those in or seeking public office, this country's foundation of trust can be made strong again and our democracy will stand strong.

Refineries Handling Foreign Oil

Marking a change from past years when Texas refineries handled mostly Texas oil, 41.5 percent of current crude runs is foreign oil and only about half is from Texas wells, according to "78 Facts About Texas Oil and Gas."

Newest in the annual series of highlight facts and figures on the Texas petroleum industry, 78 Facts is published for free distribution to the public by Texas Mid-Continent Oil & Gas Assn.

Nearly 9 percent of the crude oil refined in Texas comes from other states and one out of every four gallons of major U.S. oil products is refined in Texas, so says Facts.

Featuring the operations and performance of the Texas petroleum industry, 78 Facts reveals key statistics in eight industry categories: general, offshore, drilling, production, refining-processing, employment, economics, and taxation.

Contrasting with the state's first well, which was 106 feet deep, Texas now has the nation's deepest producing well, a 26,518-foot gas well in Wheeler County, 78 Facts reports.

Copies of 78 Facts may be obtained on request to the Association, 1341 W. Mockingbird Lane, Suite 100, Dallas 75247.

Prepared by the American Society of Chartered Life Underwriters, the national society of life insurance professionals who have earned the CLU designation by meeting high educational, ethical and experience requirements.

Q. I'm not only getting a new wife (my first) I'm also getting a new insurance policy, also my first. How do I tell the difference between the various kinds of insurance policies?

A. Good question. Actually, there are only three basic kinds of premium paying policies—term, whole life and endowment. Policies with such names as "family income," "family plan," "retirement income," are variations or combinations of the basic policies that have been developed to fit special family needs.

Term insurance protects you for a limited period of time, say five years or until age 65.

While whole life insurance, as the name suggests, protects for as long as you live—the whole of life.

Endowment insurance pays you a specified amount at a certain number of years and then the insurance ends. But if you were to die before the policy matures, the sum would immediately go to your beneficiary.

Ribbons and rosettes were furnished by the Foothill Cowbells, and James Bear-den, Matador, served as Ring Steward. H. A. Stephens and Don Warren served as timers and Boyce Hart was announcer. The PA System was furnished by the Matador Volunteer Fire Department, and Secretaries were Dell Bearden, Vicky Halford and Rebeca Finch. Parents and leaders assisted with the operation of the Playday.

The 2nd annual 4-H Playday was held at the Old Settlers arena in Roaring Springs on July 22nd, with John Stotts, Matador, serving as judge. Placings in the event sponsored by the Motley County 4-H Rodeo Assn. were as follows:

MARES: 1 yr. old; Derinda Cruse, Flomot, 1st; Susannah Woodruff, Matador, 2nd, 2 yr. old; Dee Leatherwood, Crosbyton, 1st, 3 yr. old; Vicky Halford, Matador, 1st; Dee Leatherwood, 2nd. Aged; Sandy Byars, Lakeview, 1st; Susannah Woodruff, 2nd; Dana Dillard, Roaring Springs, 3rd; and Jeff Braselton, Matador, 4th. Grand Champion, Sandy Byars; Reserve Champion, Susannah Woodruff.

GELDINGS: 2 yr. old; Dusty Byars, Lakeview, 1st; Aged, Devin Fisher, Lakeview, 1st; Greg Parr, Memphis, 2nd; Kristy Stone, Gail, 3rd; Mike Ferrel, Memphis, 4th; Aletha Bumpus, North-

field, 5th. Dusty Byars, 6th. Other entries; Craig Turner, Jan Hart & Princess Skaggs, Matador; and Rebeca Finch, Roaring Springs. Grand Champion, Dusty Byars; Reserve Champion, Kevin Fisher.

WESTERN PLEASURE, Pee Wee Division: Greg Parr, 1st; Kristy Stone, 2nd; Cody Stone, Gail, 3rd; and Misti Ozborn, Afton, 4th. Junior: Kevin Fisher, 1st; Dee Leatherwood, 2nd; Mike Ferrel, 3rd; and Susannah Woodruff, 4th. Senior: Dana Dillard, 1st; Aletha Bumpus, 2nd; and Sandy Byars, 3rd.

REINING: Pee: Greg Parr, 1st; Kristy Stone, 2nd; Wayne Daugherty, Fluvana, 3rd; and Cody Stone, 4th. Junior: Jan Hart, 1st; Mike Ferrel, 2nd; Dusty Byars, 3rd; Kevin Fisher, 4th; and Dee Leatherwood, 5th.

POLE BENDING: Pee Wee: Carl Daugherty, Fluvana, 1st; Kristy Stone, 2nd; Greg Parr, 3rd; Misti Ozborn,

Social Security Tips

By Janis Sherrod
S.S. Representative

Question: A friend of mine told me that the premium for Medicare medical insurance may go up this month. Has it?

Answer: Yes. The basic medical insurance premium increased from \$7.70 to \$8.20 a month for the 12-month period starting July 1, 1978. The increase is necessary because medical insurance costs have risen as a result of higher charges for medical services. By law, however, the premium increase cannot be more than the percentage increase in social security cash benefits during the previous year. For further information regarding Social Security benefits please contact the Social Security office, 1401-B West 5th Street, Plainview, Telephone 293-4371.

Accent On Health

Texas Department of Health
Fratris L. Duff, M.D., Commissioner

There's a new word in the vocabulary of public health personnel: it's "PID," which stands for Pelvic Inflammatory Disease, and for women it can spell severe trouble and pain.

PID is a serious infection and inflammation of the organs in a woman's pelvic cavity. While this disease may be associated with a number of organisms, PID is observed as a late complication of gonorrhea in women.

According to Charles R. Webb Jr., M.D., Chief, Bureau of Communicable Disease Services, Texas Department of Health, "Gonococcal PID has predictably severe consequences, and I consider it the most important infectious disease problem in Texas today."

Approximately 9 to 15 percent of all women with untreated gonorrhea later have a severe case of acute pelvic inflammatory disease. The predictable consequences of PID are painful inflammation, sterility, tubal pregnancy, pelvic abscesses, and the erosion and destruction of otherwise healthy ovaries.

PID-induced sterility (the inability to conceive) is caused by scarring of tissue in the Fallopian tube. This scarring may partially or completely block the travel of an egg (ovum) from the ovary through the Fallopian tube to the uterus where it would, otherwise, be fertilized and normally develop. If the scarring allows partial travel of the ovum, it may become fertilized and grow in the tube. As the ovum develops in that location, it eventually bursts the Fallopian tube, causing immediate massive bleeding. Tubal pregnancies cause more than 12 percent of the deaths now occurring during pregnancy and childbirth.

Scandinavian studies show that damage to the Fallopian tubes from a single episode of even adequately treated PID results in infertility in 15 to 40 percent of the cases. Equally disturbing is the fact that in about 4.5 percent of all cases of chronic PID, surgical removal of the reproductive organs is an unavoidable result. "Our concern," continues Dr. Webb, "is to prevent damage caused by gonorrhea."

Once damage to the Fallopian tubes is done, the specific bacteria infecting the area seem no longer to be of significance.

Women who lose their pelvic health to pain and chronic misery frequently lose sexual compatibility with their partners and marriages become endangered. Loss of ovarian tissue due to scarring, premature losses of estrogen, and premature menopause are now common among women under 30 with PID.

The problem is not going away. From one study, it was estimated that PID is the diagnosis in 15 to 16 percent of all gynecologic admissions to city, county and university hospitals.

Prevention of PID may be accomplished by preventing the damage done by gonorrhea. Once PID has developed the consequences already described are quite predictable. Since gonorrhea in females usually produces no early symptoms, the Texas Department of Health strongly

recommends that sexually active young women request gonococcal cultures during routine pelvic examinations.

Male partners of PID patients must be referred to medical personnel for tests and treatment. Many male partners of these patients will have no symptoms, even though they are infected with gonorrhea.

Mechanical prophylactics for men, and to a lesser degree, vaginal contraceptive creams or foams for women, have been shown to help prevent infection from gonorrhea. These methods should be seriously considered by sexually active females, particularly those in the younger age groups who may not be using these contraceptives.

Texas continues to see increases in venereal diseases among most age groups. For 1977, there was a four percent increase in gonorrhea in the 20-24-year-old age group, a 17 percent increase in the 30-34 age group, and an 11 percent increase in the 35-39 age group.

There is one bright spot. There was a six percent decrease in the number of gonorrhea cases among young people age 15-19. The Texas Department of Health attributes this decrease to school education programs about venereal disease and to gonorrhea screening of young, at-risk women (15-24) as factors for the decline.

Last year nearly half a million females were screened for gonorrhea—an eight percent increase over 1976. Of that number, 6.6 percent were found to be infected, with 90 percent of these located and treated for the disease.

Last year's figures also show a three percent increase in primary and secondary cases of infectious syphilis, compared to a 14 percent drop nationwide.

By state law, all information about venereal disease cases is confidential. Minors are allowed to consent to their own confidential examination and treatment. If you would like more information about venereal disease and preventive methods, you may write to the Texas Department of Health, Infectious Disease Control Division, 1100 W. 49th Street, Austin, Texas 78756, or call the toll-free "Venus Hotline," 1-800-523-1885.

People Should Act Before Reaching 65

People nearing 65 who are not already receiving social security benefits should contact any social security office 2 or 3 months before their birthday, a spokesperson said today.

These people should do so in order to be sure that they have full Medicare protection the month they reach 65. This is true even though they have no retirement plans.

People not already getting monthly benefits have a limited time to act to be sure their full Medicare protection begins at 65. If they don't act within the 3 month period before the month

they reach 65, their Medicare medical insurance protection can be delayed from 1 to 3 months. Medical insurance may be delayed for a year or more if a person fails to act within the 3 months after their 65th birthday month and the monthly premium may be increased.

People should have certain evidence available when they contact the office. This includes their social security card or a record of the number, proof of age, preferably a birth or baptism record made shortly after birth; and a W-2 (Wage and Tax Statement) or self-employment

tax return for the previous year.

The representative said that people who don't have this information should not delay contacting social security. The people at any office can suggest other evidence which can be used.

Full information about Medicare and social security monthly benefits can be obtained at any social security office. The address and telephone number of the nearest social security office can be found in the telephone directory under "Social Security Administration."

Safest In The Seventies

For the fifth time in the last six years Santa Fe Railway has won the coveted Harriman Award for its record as the safest railroad in the United States. The award is based on the frequency and severity of employee accidents measured against the number of employee-hours worked. Shown with the award are five Santa Fe employees who have a combined personal total of 187 accident-free years. They include (L-R) Wayne C. Peak, extra gang foreman (38 years); James H. Bridgeman, engineer (41 years); Boyd M. Betty, conductor (37 years); Mac E. Nellans, laborer (32 years); and John W. Stanley, Jr., signal maintainer (39 years).

PROTECTING AMERICAN JOBS

First Year Of 200-Mile Limit A Success

The chances have increased this year that the next fish you and your family eat will have been caught by an American fishing vessel.

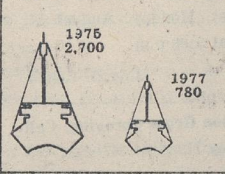

Much of the reason for this is because the first year of America's 200-mile fishing zone which went into effect March 1, 1977, is now considered a success.

Overall, the domestic catch equaled the 1976 level, while foreign fishing declined dramatically giving depleted stocks of fish an opportunity to begin rebuilding. In addition, an increase in the U.S. catch, consistent with conservation and management requirements, is expected during 1978.

"The Fishery Conservation and Management Act of 1976 is beginning to work," points out Richard A. Frank, head of the National Oceanic and Atmospheric Administration (NOAA). It effectively reserves the allowable catch off our coasts to U.S. fishermen, permitting foreign vessels to catch only amounts in excess of the U.S. catch. This assures that vital resources are conserved and that depleted stocks can be rebuilt to be available in the future.

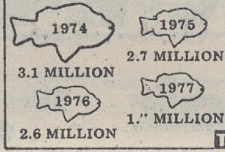

Interestingly, the Act, which established the 200-mile fishing zone, also established regional Fishery Management Councils. These Councils develop fishery management plans for the stocks of fish off our coast, subject to the approval of the Department of Commerce. The plans establish quotas for foreign and U.S. fishing. "The Councils are a new and interesting

Foreign Fishing Vessels In U.S. 200-Mile Fishery Zone

FAR FEWER FISH are being caught by foreign fishing vessels since the 200-mile limit went into effect in 1976.

Foreign Catch In U.S. 200-Mile Fishery Zone (In Metric Tons)

THE FOREIGN FISHING CATCH within the 200-mile limit, decreased by nearly 50 percent between 1974 and 1977.

experiment in government," Frank said. "They prepare Fishery Management Plans to cover specific fisheries and the federal government provides the clout to enforce these plans." Since their formation, the Councils have moved vigorously to prepare these plans so that NOAA can regulate U.S. and foreign fishing in the conservation zone.

With this help, American fish lovers will not only be assured of fish on their table now, but they'll also be assured that an adequate fish supply will be available in the future.

The Scientists Tell Me... Hold Water Where It Falls To Boost Crop Yields

By Robert L. Haney
TAES Science Writer

Grain sorghum yields have been increased as much as 12 percent and cotton as much as 25 percent by basin tillage used in dryland farming on the Texas High Plains.

Basin tillage uses mounds of soil, mechanically placed across the furrow, to form small basins. When rain falls it is held in the basin long enough to soak in rather than run off the land.

This is of special importance in many semi-arid regions where the growing-season rainfall is often of high intensity and short duration.

Research was initiated in the Texas High Plains in 1975 at Bushland and Lubbock using basin tillage, or blocked furrows as they're sometimes called, on dryland cotton and grain sorghum. Worthwhile gains of both grain sorghum and cotton have been observed over the past 3 years.

As an example of the potential for water conservation using basin tillage, in July 1976 a total of 3.9 inches of rain fell in 8 days. Of this amount 1.1 inches were added to the soil profile in the conventional field but 3.2 inches were added to the soil in the basin-tilled field.

This is of great significance in areas such as Lubbock that

have 80 percent of the annual rainfall during the cotton-growing season.

Basin tillage can also be used with sprinkler irrigation systems and is extremely adaptable to center-pivot, low-pressure models.

For example, a single-tower center-pivot sprinkler system was modified with flexible drop tubes on 40-inch centers. Spray nozzles were installed to discharge water at a height of about one foot above the furrow. A 93.4-percent distribution efficiency was obtained with the unit operating at only 5 psi (pounds per square inch) at the pivot.

If a quarter-mile, center-pivot system was modified or replaced with this type system, the operating pressure could be reduced by 55 to 70 psi, according to Dr. William M. Lyle, irrigation engineer with the Texas Agricultural Experiment Station in Halfway.

If you assume that the irrigation pump supplying this water is operating at 60 percent efficiency, a savings of about \$92.00 per inch of water applied by the pivot could result from the savings in energy cost. Therefore, if 12 inches of water were applied each year, the yearly savings would amount to \$1104 due to the lower operating pressure of the system. This figure does not in-

clude the savings from decreased evaporation, according to Lyle, who modified the irrigation system as well as designed the tripping-shovel, basin-tillage unit.

Lyle will be the first to tell you the concept of basin tillage is not new. Versions of it have been around nearly as long as the hoe.

But this is the first unit that seems to really work right, with previous drawbacks overcome. The unit Lyle constructed and successfully used in 1977 trials will pay for itself in one year with increased yields from about 75 acres of cotton.

Lyle, in designing the basin-tillage unit, had five guidelines: 1) it must be capable of essentially trouble-free operation, 2) it must be attachable to equipment currently being used in crop production such as bedders, planters, and cultivators, to avoid a separate operation, 3) it must be capable of relatively high-speed operation, 4) it must provide for adjustment of dam spacing and height to regulate basin size, and 5) it must be simple in design and construction.

One problem with previous units was the extremely rough ride in subsequent tillage operations. This has been overcome by a hydraulic-lift, front-end plow-out attachment that removes dams in

front of tractor tires. Sweeps are also necessary in front of the gage wheels.

An alternative method to plow out is an alternative-furrow, basin-tillage system. In subsequent operations, wheels run in undiked furrows and rainfall can be captured in one-half the furrows during the production season. Lyle points out that dikes can be reformed behind any unit used in the field, if desired.

In the evaluation of equipment and its effect on crops, Lyle gives much credit for the help of E. B. Hudspeth, USDA agricultural engineer, and J. D. Bilbro, USDA cotton agronomist at Lubbock, as well as Nolan Clark, ARS agricultural engineer. He also praises Station Technician D. R. Dixon for help with the equipment research.

As water tables go down and energy costs go up, lots of farmers are likely to be looking at this Experiment Station machine. Although 16 separate parts in this machine require fabrication, Lyle stresses that the unit can be built with readily available materials and with equipment found in most farm shops.

The significant gains in yields attributable to basin tillage are enough to attract, and merit, the attention of both dryland and irrigation farmers.

Editor's Note - Any questions regarding this column should be addressed to Science Writer, Dept. of Agricultural Communications, Texas A&M University, College Station, Texas 77843.

Rabies in Animals Is a Threat to Man

Man is doing much to protect himself and his pets from rabies, but there is much yet to be done as evidenced by increases in rabies this year.

While local leash laws, pickup of strays and increased emphasis on pet vaccinations have improved the situation, continued high numbers of cases in wild animals pose a threat to pets and humans, said Foy V. McCasland, D.V.M., chief of the Bureau of Veterinary Public Health of the Texas Department of Health.

Twenty-five years ago, in 1953, said Dr. McCasland, 1,000 dogs and 68 cats were diagnosed as rabid in Texas. The number decreased to 45 dogs and 13 cats in 1977. However, of the 389 confirmed cases of rabies last year, 311 rabies cases were reported in wildlife including 256 cases in skunks. "In rural areas, especially," said Dr. McCasland, "it is easy to see how rabies can

cross over from wildlife into the pet population."

Human rabies is rare in Texas today. The last case of human rabies in Texas due to natural exposure within the state occurred in 1962. Two human deaths from rabies acquired from animals in Mexico have occurred in Texas, however, one in 1977 and one this year.

Rabies in humans reached a peak in Texas during the 12-year period from 1946 through 1957. In that 12-year span, 29 cases of human rabies deaths were documented by laboratory findings.

In addition to vaccinating their pets, Texans can help prevent rabies exposure by avoiding strange-acting wild animals. Rabid animals sometimes lose their fear of humans and will even attack them.

Skunks, which normally roam around at night, often are seen during daylight hours if they are rabid.

Minimum Tillage Equals Increased Income

By Charles S. Brown
Range Conservationist

One of the worst problems facing Motley County farmers is wind erosion. Many hours and large sums of money are spent each year on this problem. One effective method of controlling wind erosion, recommended by the Soil Conservation Service is Minimum Tillage.

Minimum Tillage is a system of farming in which cultivation is limited to those operations essential to produce a crop. In effect, it uses herbicides instead of mechanical methods to control competition. Seeding is done right into the stubble of the last crop. This can be done

with specially designed equipment or with conventional equipment such as a grain drill.

The advantages of Minimum Tillage are numerous. It is a big time saver. Usually only 2 to 4 trips across the field are required from harvest to harvest. Compared with 6 to 20 trips using conventional methods. Fewer trips means less wear on equipment, less fuel and, thus more money for the farmer.

Minimum Tillage is good for conserving moisture. The stubble of high residue crops keeps the soil cooler in the summer and warmer in the winter. Evaporation of soil

moisture is reduced. There is less runoff and therefore more moisture in the soil for the crop to use.

Seedling survival is better under this system. The protective cover can keep dislodged soil from burying seedlings during a heavy rain. This is especially true for cotton. The cover prevents surface crusting which retards emergence of young plants. Residues also keep seedlings from being damaged by blowing sand.

Minimum Tillage improves soil structure by reducing the number of tillage operations. Compaction with heavy equipment is greatly reduced. Soil porosity and tilth are im-

proved. This increases the soils ability to control and store moisture for future crops.

Again, probably the most important benefit from Minimum Tillage is reduced wind erosion. Blowing dust is our states worst air pollutant. Wind erosion is hard on the land, crops, and people. Leaving crop residues on the soil surface is THE best way to control wind erosion.

For additional information on Minimum Tillage please contact your Soil Conservation Service office located in the Motley County courthouse. Technical service is provided to all interested persons.

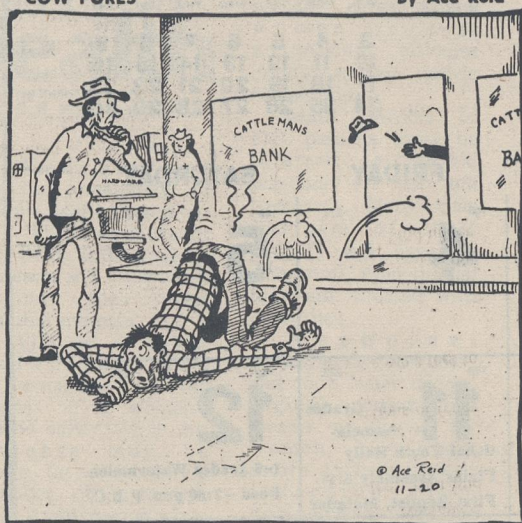

SOME QUESTIONS TO ASK THE PRINTING AND OFFICE SUPPLIES PEDDLER

When the person selling printing, office supplies and advertising solicits your business, here are some questions he should be willing to answer to YOUR SATISFACTION:

1. Is he a taxpayer in your community or county?
2. Does he donate space in the newspaper to local and county projects and enterprises?
3. Does he pay wages to employees who live and do business in your community?
4. Does he grant favors that you would ask of your local newspaper?
5. Does he donate newspaper space to promote you and your neighbor's business?
6. Does his price include freight, postage and insurance?
7. Does he support your civic organizations, schools and churches with free publicity?

We sincerely believe that these questions should be considered when you purchase printing and office supplies—a question of whether you should support those who help support you!

**THE STATE OF TEXAS
TO ANY SHERIFF OR CONSTABLE WITHIN
THE STATE OF TEXAS -- GREETING:**

You are commanded to cause to be published once each week for four consecutive weeks, the first publication to be at least twenty-eight (28) days before the return date thereof, in a newspaper printed in Motley County, Texas, the accompanying citation, of which the hereinbelow following is a true copy:

THE STATE OF TEXAS

TO: B. Edward Arnold;—Arnold, wife of the said B. Edward Arnold, her given name being unknown;

AND ALSO TO: All of the unknown heirs of each Mexie J. Arnold, deceased; B. Edward Arnold, deceased, if he be deceased;—Arnold, deceased, wife of said B. Edward Arnold, her given name being unknown, if she be deceased;

GREETING:
You are commanded to appear and answer the Plaintiff's First Amended Petition at or before 10:00 a.m. of the 1st Monday after the expiration of forty-two (42) days from the date of issuance of this citation, the same being Monday, the 18th day of September, 1978, at or before 10:00 a.m. before the Honorable District Court of Motley County, Texas, at the Courthouse in Matador, Texas.

Said Plaintiff's First Amended Petition was filed on the 19th day of July, 1978.

Said file number of said suit being no. 1882.

The names of the parties in said suit are: Levi Wilkinson as Plaintiff and all of the unknown heirs of Mexie J. Arnold, deceased; B. Edward Arnold;—Arnold, wife of the said B. Edward Arnold, her given name being unknown; and all of the unknown heirs of each B. Edward Arnold, deceased, if he be deceased;—Arnold, deceased, wife of the said B. Edward Arnold, her given name being unknown, if she be deceased, as Defendants.

The nature of said suit being substantially as follows, to-wit: A suit to recover title and possession of the following described real property located in Motley County, Texas:

A 69.64 acre tract out of the Southwest part of Section 1, Block 0-4, Motley County, Texas:

BEGINNING at a 1 1/4" pipe at the Southwest corner of Section 1, Block 0-4, W.T.R.R. Co., Motley County, Texas;
THENCE South 89 degrees 59' East, along the South line of Section 1, 478.74 feet to a 1 1/4" Iron pipe, the center line of abandoned railroad bears Southeast 50 feet and a trail road bears South 45 feet;
THENCE North 26 degrees 58' East, along the Northwest right-of-way line of abandoned railroad, being 50 feet from and parallel to the center line, 2,967.5 feet to a 1 1/4" angle iron, a corner post bears East 46 feet;
THENCE South 89 degrees 51' 38" West, along portions of fence line, 1,818.29 feet to an iron stake in fence line;
THENCE South 0 degrees 08' West along fence line 2,640.3 feet to the place of beginning and containing 69.64 acres.

Said suit being in the usual form of trespass to try title and containing further allegations to the effect that Plaintiff owns the record title to said land and further owns title to said land under the five, ten and twenty-five year statutes of limitation, and that title is presumed to be in Plaintiff, as a result of peaceable and adverse possession under duly recorded deeds and claim of right and payment of taxes on said property.

If this citation is not served within ninety (90) days after the date of its issuance, it shall be returned unserved.

ISSUED this 31st day of July, 1978
GIVEN UNDER MY HAND AND SEAL OF SAID COURT at office in Matador, Texas, this the 31st day of July, 1978.

Lucretia Campbell
Clerk, District Court,
Motley County, Texas

SAFETY DO'S AND DON'TS

It should be easy for America's five million motorcycle riders to see why it's so important to be seen. Casting an eye over these do's and don'ts from the experts at the Motorcycle Safety Foundation may help.

DO make yourself more visible with brightly colored clothing.

DON'T delay too long before you use your turn and brake signals. The sooner you get them on, the more chance you have of letting others on the road know what you're going to do.

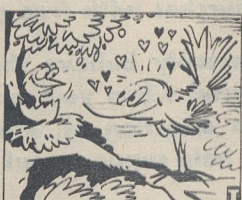

DO use your headlight at all times. Even in daylight, it can help you be seen.

DON'T position your motorcycle in the blind spot of the driver ahead. This is usually on the left and fairly close in.

DO try to make eye contact with automobile drivers to help you make sure they know you are there.

DON'T forget to wear reflective items, especially at night. Put some on your helmet's back and sides, on your cycle and on your clothing.

DO get a free reflective decal, available from the Motorcycle Safety Foundation, Department NA, 6755 Elkridge Landing Road, Linthicum, Maryland 21090.

Most baby birds have a hard little knob at the end of their beaks called an egg tooth, according to *The World Book Encyclopedia*. They use the knob to crack the shell of the egg so they can wriggle out.
