To The Editor

Dear Sir:
For the past week all we've heard on TV were lies and denials by the Russians on the execution style killing of the 269 people on board the Korean air liner.

There is little doubt in a lot of minds that the communists, both in Moscow and their branch office on the Potomac, were after Rep. Larry McDonald (Dem. Ga.).

Rep. McDonald was pres. of the John Birch Society, described by the Liberal TV as an Ultra Conservative, Pro-American, Anti-communist group. He was also Pres. of another anti-communist organization, Western Goals. These two facts, plus the fact that he always opposed any aid or trade to communist regimes, made him the no. 1 anti-communist in the world.

So when his plane got within shooting distance of Russia, it was just too good a chance for them to let go by.

The fact that they had to kill 268 innocent people to get "their man" wouldn't bother

their conscience one little bit. Ever since "Puddin' Head Wilson" poured \$11 billion of our tax dollars into commie coffers in 1920, the communists have killed over 144 million people, so 268 more meant nothing to that pack of murdering louts.

Now they are within 40 miles of our borders in Alaska, 90 miles from Florida on the south east corner of our country. Just south of us with only the Rio Grande to stop them, they've got millions of aliens who will be tickled to death to fall in with Russia against us. And all with our help in the shape of technology, grain, factories and hundreds of billions of our tax dollars.

Treason like the Panama Canal Pay away, and the sell out of El Salvador and Nicaragua, make it all so easy. Saved their gun powder and cannon fodder for the real enemy - the U.S.

Rep. Larry McDonald several times stood all by himself when it came to voting for pork barrel projects for any

Social Security In Motley County

By Terry J. Clements

The Social Security Amendments of 1983 were the result of a national dialogue that extended into the past decade. The provisions reflect an effort to reconcile Social Security to emerging changes in society and to assure that benefits will be apid when due under any circumstances.

Two provisions included in the amendments deserve special note as examples of national determination that benefits will be paid. One is considered a "stabilizing" mechanism and the other, a "fallsafe" mechanism. Both are designed to assure the payment of Social Security benefits on a timely basis under adverse economic conditions.

The stabilizing mechanism provides that, beginning with the cost-of-living increase in January 1985, if the Social Security trust fund balance falls below 15 percent of estimated benefit payments for the coming year, the benefit increase for that year will be based on the lower of the increase in the cost of living or in average wages. This level increased to 20 percent beginning in 1989.

When the trust fund balance reaches 32 percent of the estimated annual outgo -- benefits and administrative expenses -- catchup benefits will be paid to make up for any previous benefits that were less than the cost of living to the extent that funds are available.

In recent years increases in wages have generally lagged behind increases in prices. Basing the annual benefit adjustment on the lower of the two assures a lesser impact on the trust funds. At the same time,

recognizing that the cost of living for beneficiaries is more accurately reflected by increased prices for the goods and services they purchase, the law mandates the "catching up" of benefits mentioned above.

The fallsafe mechanism includes several provisions designed to anticipate a sort of "worst-case" scenario in which poor performance by the Nation's economy would reduce income to the trust funds below that needed to pay benefits on time. The major provision authorizes borrowing among three of the Social Security trust funds to pay benefits as needed. The funds -- Retirement Survivors Insurance, Disability Insurance and Medicare hospital insurance are maintained separately, each designed to support a specific program. This is not a new concept. In 1981, for the first time the Board of Trustees was given the authority to borrow between the trust funds without further Congressional action. The authority ended in December 1982.

With the economy improving it is unlikely that we will ever need to use these measures. But the important point is that they exist as part of the law if they are ever needed. People who count on Social Security benefits as their primary source of income as well as workers who have worried about the payment of benefits in the distant future may take heart. Benefits will be paid on time under any foreseeable circumstances.

Instant Household Hints

By Catherine Henderson

1. Egg cartons are very useful. Use them for fruits, cookies, nuts and deviled eggs while on a short trip.

2. Herpes is an ancient disease. When a person acquires herpes, there is usually a sore around the mouth or nose and genital area. Proper diet with probably vitamin B will help this person. See doctor. Herpes leaves no scars, unlike AIDS. AIDS is very dangerous. You catch AIDS through contact, needles if you are an addict, also from liquids off this person's

body. All openings of the body give liquids, also saliva. AIDS usually causes Kaposi, then it goes into sarcoma, a skin-cancer. Death occurs quite often.

3. If you can't remove a jar lid, try a rubber glove. Or put a piece of tape around the lid and turn.

4. If people have children, the mother should keep the telephone number of the family doctor, dentist and eye specialist in her purse or posted near the telephone. This could save their lives.

Coach Williams Reports On Team At Lions Club Meeting

A report on the progress of the Motley County Matadors football team was made by Coach Danny Williams last Tuesday, at first monthly meeting of the Matador Lions Club, at the fellowship hall of First United Methodist Church. The program followed an enjoyable meal prepared and served by Lion Walter Jones, who was extended an expression of appreciation by the club.

After announcements by Boss Lion Gerald Pipkin, Lion Frank Pohl filled in as recorder for Lion Bill McCoghren and welcomed as guests, Scotty Abbott and Ralph C. Bryant in addition to Coach Williams, who was introduced by Lion Larry Bell, program chairman.

Although the season started off on a dismal note, with a defeat by class 2-A Paducah Dragons, the coach was optimistic of his team's progress and expressed appreciation for the Lions Club's support of the school's athletic

program.

"With 22 boys doing the best they can, we are going to have a good year," he declared. "We have an excellent chance to be in district play-off again. We were using young inexperienced men against the Dragons, due to lack of our older players who were unable to play because of illness and injuries." Only three of the seven seniors were playing, he said. In addition to the seniors, there are four juniors, six sophomores and five freshmen.

One pre-district game remains to be played, with the Matadors going to Claude this Friday, having played Valley last week. September 23 will be an open date, with district play starting Sept. 30 against Crowell, here.

Lions District 2T-2 Governor Gerald Devault of Lubbock will be program speaker for the club's meeting next week, Sept. 20, and Lion Pipkin urged all members to be present.

FOR MOST BOGEYS
 Out for play Thursday were Loys, Pennie, Polly, Leona, Olivia, Dorothy D., Dorothy C., Geneva, Louise, La Voe and Winifred.

Dorothy D. was winner with 13 bogeys. Louise and Pennie each had 9 bogeys. Louise

shot 36 on the back nine.

ERRATUM - Your reporter "goofed" again, a week or so ago -- in reporting low putts play -- Dorothy D. had 34 rather than Loys for low putts, and Loys had 35. Sorry about the goof.

Letter To Editor

Dear Friends,
 Thanks for renewing my Tribune. Each week it is like getting a letter from home. Matador will always be home to me. They are a special kind of people. **My People.**

My husband Glen and I are leaving on a tour around the world with O.M.I. International Missions. The foreign missionaries will meet us in each country and act as our guide.

Sincerely,
 Lillian (Steen) Shupe

Dear Editor:
 I would like to acknowledge my thanks and appreciation for the nice write up about

my late and great, grandfather, Charlie D. Bird, and grandmother, Daise. I was named for her, but spell it "Daisy". I am the daughter of Glen and Mae Bird. My mother is residing at Brookside Manor, here in Madill, Okla., where I live. Dad passed away in 1972.

Mrs. White did a fine job writing the story about Grandada. She was living in Alaska the last time I remember hearing from her.

Anyway, I just wanted you to know that I appreciated the article, and how very proud I am of my heritage.

Sincerely,
 Sue Courtney

County Agent's Corner

By Terry J. Clements

This is an opportune time of year to watch trees and shrubs around town and the country. You can determine which types and varieties will do well under our climate and insect conditions. Those landscape plants that are adapted to this area will still look healthy and green. In late summer and late in the growing season when insects have done most of their damage, the poorer plants and trees will show up. Extra care will aid some of the less adaptable plants but is often costly and requires more labor.

Some trees you may notice showing the "late season blues" will be Siberian or what is sometimes called Chinese Elms. These elms are very susceptible to elm leaf beetle damage. Silver maples, if not watered heavily, will show dry or wilted leaves. Lilac bushes will be dry and drouthy if

not watered generously.

Watch for those trees and shrubs that have had little care and are full grown at vacant houses and old farms. These locations will show you what will survive well over a long period of time with minimum care.

When planning landscapes for new homes or adding to present ones it is important to select plants that are adapted to this area and to know how large they will be at maturity. The future appearance is to be considered more heavily than the present.

Too many times we see trees that are planted too close together or to the other structures or that obstruct view or visibility of intersections. These problems can be avoided with proper planning and knowledge of what size

shrubs or trees will be several years from planting.

Landscapes may at times double the value of homes if they are properly designed and cared for. Another benefit of landscape can be energy conservation and street noise control. Watch future columns and call the Extension office for more information.

Extension Service programs are available to people of all ages regardless of socio-economic levels, race, color, sex, religion, national origin, or handicap.

Coming Events:
 Sept. 19 - Boll weevil spraying begins; Sept. 29 - Chillicothe Experiment Station Field Day; October 13 - Motley County Crops Tour; October 19 - Range and Pasture Seeding Symposium in Vernon; December 6 - Area Cotton Show and Poster Contest, Abilene.
