PRICE TEN CENTS

TRAIL DUST

By DOUGLAS MEADOR

Belated rains have left summer a wounded thing, floundering against the doorway of autumn, gasping for heat. The terror of hot, copper skies is gone and the winds have become docile in their affairs with the timid leaves. Warmth and moisture in the earth has stirred fresh life from baked soil, beneath loaded tanker clouds trailing each other in endless patrol. A blue quail calls softly somewhere in the valley haze.

Lethal Poison Is Spilled On Highway Here

A sudden stop at the intersection of US Highway 70 and State Highway 70, about noon Friday, dumped nine barrels of highly poisonous chemical onto the road. Six of the 55-gal. containers were broken.

Three barrels rolled across US 70, with one stopping almost at the north edge of El Matador Restaurant on State 70. The chemical is used to destroy boll weevils.

Roberto Valencia of Lubbock, driver of the truck, driving north on State 70 approached the intersection too rapidly, and to avoid hitting a car driven by Dale Reector, pulled to the side, throwing the barrels of lethal chemical off the truck, owned by Stomper Chemical Co. of Lubbock. Reector had stopped at the red light when the truck approached.

Members of Matador Volunteer Fire Department washed the poison down the incline in front of Bob's Oil Well, into Ballard Creek, where it was buried by a bulldozer.

Members of the chemical company warned that the liquid was very poisonous. Charges of running the light were filed on Valencia by the State Highway Patrol. No one was injured in the accident.

Memorial Service Honors 'Settlers'

Early settlers of Dickens and Motley counties were honored in one of the most impressive services in the history of the Old Settlers organization, Thursday morning following the parade which opened the 46th annual reunion at Roaring Springs.

Tribute was paid the pioneers in opening remarks by Rev. Victor Crabtree of Dickens, who read the list of deceased in both counties since last year's reunion. (Two names, Mrs. George S. Link and Olen Hagens, were added to the Dickens County list.)

Jeanette Day recited a reading, "Patriotism," with background music by Patty Edwards, Jan and Nancy Higginbotham and Debra James. Mrs. Vernon Higginbotham accompanied the group at the piano. All were dressed in pioneer costumes.

Following the invocation by Rev. H. T. Harris of Childress, Miss Nancy Higginbotham sang a solo.

'Impossible' Fire Burns Wet Prairie

"THE IMPOSSIBLE FIRE" burned approximately 125 acres of grass on the Bruce Marrs Ranch Thursday afternoon. When the fire alarm sounded most residents of this community were satisfied it could not be a prairie fire. It would be "impossible" after three inches of rainfall.

But it was a prairie fire. Grass fire trucks had difficulty in reaching the scene because of mud, as did volunteers. The fire was burning the tops of tall grass, weeds and light brush. It was moving north rapidly, driven by a brisk south wind, when the firefighters began to bring it under control.

A county grader, driven by Commissioner Clyde Gilbert plowed a fire guard around the area.

Presiding was Sam Ross, president of the organization, who introduced the speaker, District Attorney Tom Hamilton of Plainview. Mr. Hamilton is a third generation attorney, following his father, the late John Hamilton and his late grandfather, Judge G. E. Hamilton.

In his impressive address, Mr. Hamilton cited the undying faith which the early settlers had in the land, and which resulted in its ultimate development.

"It takes a lot of faith to live in this country," he declared. "The pioneers had to depend on each other . . . they established a way of life and left a heritage of hard work, integrity and faith." (Full text of his address is found elsewhere in the Tribune.)

Rev. Mrs. Ben Dillard pronounced the benediction.

Winners Announced

The parade awards went to Britt McDaniel, Old Time Cowboy; Sam Whitley, Most Modern Cowboy; John Douglas Russell, Junior Cowboy; Sally Legg, Junior Cowgirl; and Dorothy Parks, Modern Cowgirl. Ben Charles Grundy received the ribbon for his entry in the float division, a cart being pulled by a mule.

Mrs. Duff Green of Roaring Springs was recognized as the oldest "Old Settler" present during the afternoon business meeting. She was born May 12, 1890 and moved to Motley County in 1900.

Mrs. Fred Simpson was recognized as the person living the longest in the two counties. She was born in Matador 76 years ago.

Bruce Marrs of Matador and Mickey Blackwell of Dickens were named as new directors of the Dickens-Motley County Old Settlers Association, and it was decided that the slate of directors would select new officers for the coming year.

Despite thunderstorms which fell throughout the day, about 2,000 persons attended the reunion for the parade, rodeo and dances, and it was estimated that of this number approximately 250 would be considered as pioneers.

The fire was attributed to a short in the REA power line which set a post afire. The Marrs Ranch is about four miles north of Matador and was once the Matador Land & Cattle Co. "Shipping Pasture."

Mr. and Mrs. Marrs were out of town at the time the fire was discovered and did not return until Friday. An expression of appreciation to the Matador Volunteer Fire Department, county employees, neighbors and friends who extinguished the fire, appears elsewhere in this issue of the Tribune.

Faith of Pioneers Is Valued Heritage

by Tom Hamilton

The Old Settlers Reunion has always been a highlight for me each year, as I know it has for many of you.

But as I heard the names called of those who have passed on this year, this Old Settlers has become of special significance to me . . . because my father and Mr. Harry Campbell, two people who were very close to me, were with the group who have gone on. I know there were other names called here today that bring back fond memories to you of many days gone by.

As we think back over the years and events in the lives of these pioneers and those who have gone on before them . . . regardless of their shortcomings and faults . . . there was one characteristic which was always present.

This characteristic could be seen in the genuine concern which they had for their fellowman: in bringing food and sitting up with a sick neighbor; in helping a neighbor plow his field or brand his cattle when he was injured; in helping each other during droughts, winter blizzards and in fighting grass fires. This characteristic was displayed in their hard work, honesty and integrity . . . where a man's "word" was his bond, and where a man's worth was measured by

his quality and not his quantity or economic wealth.

This characteristic was exemplified in their tenacity as they strived to tame the land and build a community in which to live.

This characteristic was the UNDYING FAITH of the pioneer . . . faith in himself, his wife and his family . . . faith in his fellowman and faith in his God.

It takes a lot of faith to live in this country, where floods, hail, drouth and blizzards play havoc with a man's livelihood.

As Uncle Billy Moore used to say, "This is the NEXT YEAR-INGEST country in the world." Next year was always going to be a good crop year and next year cattle prices would be higher. But somehow they always raised enough crops and cattle to make it through.

This shows one of their characteristics of faith.

Yes, it took faith to live in this country. The pioneers had to depend upon each other to survive. Through the individual acts of many pioneers . . . through their faith in themselves and each other . . . they established a way of life; a philosophy, an institution which was carried forward into their communities and has become a part of our heritage.

This Pioneer Heritage of hard

work, honesty, integrity, God-fearing and God-loving people who had a genuine concern for their fellowman is rapidly becoming a thing of the past in the United States today.

We are the greatest technological nation in the world.

We have more than doubled the knowledge of all mankind in the past ten years . . . we have sent men to the moon . . . yet many of the people in our nation are unable to cope with everyday trials of life.

Because of this vast technology many of the people in our nation have changed their sense of values. They have lost their pioneer spirit.

Now, a man works all day in a factory turning a bolt on an assembly line. When his day is done he has no sense of accomplishment. His worth is measured in terms of money, or how much he can make. His values are changed . . . he has lost his pioneer heritage.

The worth of this man is measured in terms of what he can produce and not in terms of the quality of the man himself.

History of nations has proven that when the quality of its citizens deteriorates, the nation itself crumbles.

The foothills of West Texas is one of the few areas in the United States where the Pioneer Heritage has been retained!

This pioneer spirit is known all over the nation as the friendly people of West Texas . . . where a person never meets a stranger.

My idea of the Pioneer Spirit which you have preserved reminds me of an old colonial home with great white pillars or columns surrounding the house. The house is the pioneer heritage which we all cherish . . . the great white columns are the pioneers who, by their quality of character, support their philosophy of life.

As each pioneer passes on, someone else must take his place, becoming the column to support our heritage.

But the quality of the house is only as good as the quality of the columns which support it . . . if the columns crumble, the house falls, and the heritage is forever lost.

OPEN ALL DAY SATURDAY

In Appreciation . . .

I would like to thank my friends and neighbors, the Fire Department and County employees, who in my absence did such an excellent job of putting out the fire and getting the R.E.A. lines repaired in the "Shipping" pasture last Thursday.

It is comforting to know that good people, such as these will take care of your interest when you are out of town.

This kindness will always be remembered with gratitude.

IT IS YOUR MONEY

You have a right to know these facts

You spend a lot of money for auto insurance. You have read wild statements about insurance costs and companies. If you would like some plain talk, here it is.

They say . . . Auto insurance companies are guaranteed a profit.

FACT: Before insurance companies can make a profit they have to first pay to have wrecked cars repaired or replaced, pay hospital and doctor bills for folks injured in auto accidents, pay for stolen or stripped cars, pay for cars damaged by hail, fire, wind or flood waters, pay wages or commissions to 95,400 Texans who give service to policy holders in every county in the state, pay taxes and operate their companies. If there is anything left after all these payments have been made, it is profit.

They say . . . Texas auto insurance rates need to go up 11.4 percent.

FACT: The evidence is very clear. Accidents are up. Medical costs are up. Repair costs are up. Auto thefts and vandalism are both up. All this forces rates upward. Facts and figures prove that a 17 percent increase is needed now.

They say . . . There is nothing you can do to lower your auto insurance costs.

FACT: You can't lower labor and medical costs. You can't lower automobile and parts costs. You can help reduce the number of traffic accidents and crimes against automobiles. The accident that doesn't happen does not boost the cost of auto insurance. The car that isn't stripped or stolen does not increase the cost of your auto insurance.

Let Governor Smith, your Mayor and your County Officials know that you want a stop put to Texas' growing traffic accident and crime tolls . . . that you want the law enforced. Good law enforcement can reduce accidents and crimes against cars.

Lower accidents and crime rates can mean lower auto insurance rates for you. *Isn't this worth a little effort on your part?*

They say . . . Labor costs are a small part of auto insurance costs.

FACT: Labor costs make up the major part of auto repair bills and in some parts of Texas labor costs for auto repairs have increased in recent time by an amazing 40 percent.

They say . . . Auto insurance companies make too much money.
