New Organization Formed for Study On Brush Control

A new organization has been formed to provide funds for increased research on range improvement and brush invasion of

The organization, called the Brush Control and Range Improvement Foundation, hopes to obtain 1 cent per acre from each cooper ating landower each year for five years. Money collected will permit more basic research and education on brush control.

Foundation funds will suppor basic experiments and field trials on the various methods of control. There also will be follow-up studies on range improvement. All such activities will supplement intensive studies already underway at Texas A&M University, Texas Technological College and the U.S. Department of Agriculture.

John Matthews, prominent Abiene area rancher, is foundation chairman. Bill Donnell of Marathon is vice chairman and Robb Brown of Throckmorton is secretary. The group already is selecting district chairmen and county leaders eventually will be named to organize local efforts.

Director, The National Foundation-March of Dimes Rubella Birth Defects Evaluation Project

One of this nation's worst German measles epidemics struck with devastating effect several years ago, and today we are experiencing aftereffects that might be equally disastrous.

Our study of 500 children to determine their medical problems also brought to light their long-term non-medical needs. The study was financed by The National Foundation-March of Dimes in cooperation with New York Univer-sity Medical Center at Bellevue Hospital.

Most of these children were born with one or more defects involving either sight, hearing. heart or brain caused when their mothers contracted Ger man measles (rubella) while pregnant during the 1964-65 epidemic of that disease.

number of school districts from 1,218 to 354. All but 19 of 662 districts which now have less than 500 pupils would be eliminated. There would be 35 multi-district counties (those of larger pepulation) with from two to 13 districts. All of the latter would have fewer districts than they now have.

Committee's proposals for figuring local districts' adjusted share of a basic foundation school program will also prove controversial. particularly in rural areas. Local share is calculated on the actual property taxpaying ability in each district.

In many counties the number of districts would be reduced drastically. They include the following:

Bowie from 14 to two; Cameron 14 to three; McLennan 20 to four; Williamson 12 to two; Grayson 14 to two; Collin 16 to three; Denton 11 to two; Tom Green nine to one; Hunt, Taylor, Henderson, Cherokee and Nacogdoches 10 to one; Rusk nine to one; El Paso nine to three; Nueces 17 to four; Hidalgo 19 to eight; Fannin and Lamar 11 to one; Cameron 14 to three; Johnson 12 to two; and Ellis 11 to two.

ATTORNEY GENERAL RULES - Omission of a paragraph in a 1968 tax bill eliminated the exemption of non-profit corporations providing homes for elderly from franchise tax on debt, Atty. Gen. Crawford C. Martin said in a new opinion.

In other opinions, Martin concluded that:
