Matadors Defeat Guthrie for 2-0 District Record

by Barbara Moore

The Motley County Matadors came The Motley County Matadors came out on top by one point in a very exciting contest with Guthrie. The game ended with the Matadors winning 55-54, giving them a 2-0 record thus far in District Competition. The Matadors experienced Friday night, but were defeated by 1 point in the other direction. The final score of that game was Jayton 63-Matadors 62.

High point scorer for the Guthrie game was Tony Gonzales with a total of 16 points. Next in line was David Alexander with 14 points, and Chris Campbell with 13. Also adding points were Clay Ewing with 8 and Matt Washington with 4. Also

In the Jayton game, David Alexander came in as high point man with 19 points, being followed closely by Tony Gonzales with a total of 18. Matt Washington was successful in scoring 11 points and Chris Campbell put in another 10. Adding 2

more apiece for the Mats, was Clay Ewing and Roy Estrada. Burr Barton, Jimmy Cummings, Jarrett Jameson and Billy Lefevre were also available to add encouragement and assistance.

The Lady Matadors are now 2-0 in District play. They defeated a very aggressive and scrappy Guthrie team on Tuesday, Jan. 9, by a score of 52-44. According to Coach Ewing, the girls are doing a fine job in lots of areas, but if we are going to win a District Championship, we are going to have to start hitting our free shots, and get more scoring from more girls, especially from the inside girls. We will also have to cut down on our turnovers. Spur and Paducah both have very strong teams and will be out to knock us off the winning side of District

Woman Awaits Liver Doner In Dallas

EDITOR'S NOTE: Glendell and Nan Smith are former residents of Matador and were teachers in the Matador School System. Glendell Smith is the son of Beatrice Smith of Matador.

Each day is a waiting game for Nan Smith, wife of the Rev. Glendell Smith, pastor of First Baptist Church in Olton. In Dallas to be near Baylor University Medical Center, the Webb Elementary teacher is awaiting word that someone's "gift of life" is to become her new liver.

Waiting is not a new game for Mrs. Smith. Early in December, she was waiting for a phone call from Dallas telling her she had been approved as a candidate for transplantation. That call, instead, brought the message that she must undergo yet more tests to determine if she were to be accepted for the Baylor University in the property of the property were to be accepted for the Baylor University Medical Center transplant list.

Just before Christmas, Nan received the glad news that she had been approved and the sought-for "beeper" was issued. Candidates for transplantation are issued radio receivers so they might be alerted at the first word that an organ is available...anywhere in the U.S. or Canada.

Transplant approval is given only af-

Transplant approval is given only after much testing and evaluation of the individual patient. "They want to make sure of everything," says Nan. "The team includes doctors of various specialities including three surgeons."

"When they learn there is a type A blood, medium build donor available, one of the tranplant surgeons will leave immediately to retrieve the liver. "The hospital will beep me so I may go immediately to the hospital for them to begin to prepare me for the surgery," explains. Nan.

"Til get my first injection of anti-rejection of anti-rejection of specific products of the surgery in the hospital path of the surgery," explains. The team includes doctors of various specialities including three surgery in the priority because mine is a life or death situation."

Although she was not told until 1988, Nan says she was diagnosed in 1972 as of the liver.

"I became very ill in 1988 and while we were trying to find out what was wrong, they obtained my records from a 1972 stay in the hospital. PBC was on those records," she says.

Southwest Organ Bank Agency works with Baylor University Medical Center in assisting with medical management, recovery and transportation of donated organs. The surgeon from the transplant team who is sent to retrieve the donated organ will carefully check all conditions.

"If he should think there is enabled."

"If he should think there is anything suspicious, that the organ is not for me, he'll cancel the call and we'll start to wait

again," Nan explains.

Recent breakthroughs make it possible to preserve donated organs for a longer period before the tranplantation must be made.

On her first trip to Dallas, Nan was

issued a patient manual filled with "everything you need to know." Both Nan and Glendell have become very knowledgeable on what is in store for her.

"The surgery requires 12 hours," says Nan. Following surgery, she is expected to be in ICU for three days to a week. Average hospital stays for liver transplantation are 30 days.

"Then I must stay in Dallas two months after my release from the hospital." she

Nan suffered such a rupture Nov. 19
and was critically ill for several hours
before doctors were able to stop the bleeding. Another rupture, Nan explains, could be fatal. While the Smiths remain in Dallas,

they are staying in a hospital-owned apartment connected to the hospital by a walkway. Provided for transplant families, the apartment rents for \$450 per

More than three out of four who undergo successful liver transplants will return home to live normal productive lives" states the patient manual given Nan. She is also encouraged by statistics which place Baylor University Medical Center as "one of the best" transplant hospitals in the U.S.

"The national success rate is 70 to 85 percent," says Glendell. "Dallas has a success rate of 90 percent. Initially, the success for liver transplants was 25 to 30

percent!"
Liver transplants are the most difficult

of all organ tranplants, he adds. One out of three persons dies while waiting for a donated liver. Because the liver transplant incision,

an inverted Y, resembles the hood cm-blem of a Mercedes-Benz automobile, it piem of a Mercedes-Benz automobile, it has been informally dubbed as a Mercedes. Prior to her departure for Dallas, Nan laughingly tested, "All I want for Christmas is a Mercedes." It didn't come for Christmas. But for the eternally optimistic preacher's wife, whenever she gets her Mercedes, it will be just as wonderful as Christmas. as Christmas.

Some of the new books on the shelve are the first twenty-five in a series on the presidents of the United States. These ooks are supposed to be written for the lder elementary and junior high students, but they are written in such a manner that they will be appealing to the adult reader as well. Also, they are written so that it is not strictly dry historical facts.

The presidents that are included are: Washington, John Adams, Jefferson, Madison, Monroe, Jackson, Van Buren, Polk, Taylor, Pierce and Lincoln. Also included are: Andrew Johnson, Grant,

Hayes, Arthur, Cleveland, Benjamin Harrison, Theodore Roosevelt, Woodrow Wilson, Franklin D. Roosevelt, Truman, Eisenhower, Kennedy, Lyndon B. Johnson and Carter. The rest of the presidents will also have books when they are printed and we plan to purchase these as soon as they are available.

Recent donations of books to the Li-

brary include 1990-91 Texas Almanac, presented by Jesse Turner and West Texas Utilities. We have also received some ordinics. We have also received soline new donations to our genealogy section and they include the following: <u>Character Certificates in the General Land Office of Texas</u> by Gifford White, <u>Arthur Henry Vollentine of Zaraca County, Texas</u>

and Many of His Descendants, 1834-1984 and a supplement by Jacqueline L. McClinton and these three were also donated by Mrs. McClinton. Eastland County History was donated by Ron and Kay Bailey in memory of Frank Price. These donations are gratefully accepted and we say "Thank You" to all of the generous donors.

If you're age 65 or older, or blind, or disabled with limited income and resources, or if you know someone who is, this column may help. It describes a pro-gram administered by the Social Security administration called supplemental secu-

rity income, or SSI for short.

SSI pays monthly checks to people who are aged, blind, or disabled, including children, and who have limited income and resources. And being eligible for SSI means more than just receiving monthly checks. SSI recipients are usunor this past receiving monthly checks. SSI recipients are usually eligible for medicaid, which can help pay health care expenses. They also may be eligible for food stamps, and other social services offered in their State.

In addition to our daily telecast, we produce three daily broadcasts. When I tape, I go into the sound-proof studio, and my dog sits at the door.

One day a visitor asked, "Why does the dog sit there?"
"Because," answered my wife,
"his master's inside."

When the taping's over and the door opens, in runs my dog to be with me.

I don't know much about heaven, but I know my Master's inside. There's a street of gold there, but I just want to see the One who gave Himself for me. There's a mansion there, but I just want to see my Master and be with Him. Don't you?

"The situation has not improved since that study was completed. Children today are fatter than children in past decades," said Darra Bullard, a fitness specialist at Methodist Hospital's Centre for Cardiac Rehabilitation and Fitness. "Recent estimates indicate that 15 to 25 percent of American school children are obese."

In addition, obese children often become obese adults. If obesity remains untreated in childhood, only one in 28 overweight children will maintain normal weight as adults, Bullard said.

TIME TO PLANT

PRUNE TREES

Now is the time to plant and prune trees. Established pecan trees need a good deep watering. If you are planting pecan trees, purchase trees that are 4 to 6 feet

tall. Smaller trees are likely to have a weak root system while larger ones are usually less likely to transplant well.

Try to plant your new trees as soon as you get them, in a sunny well drained spot. The hole should be dug slightly larger than the tree's rootball and deep enough so that the tree can be set at the same depth it grew in the nursery. To determine how deep that was look for a

dark-brown soil line in the trunk. The hole should be refilled with the same soil that was taken out. The use of potting soil may cause the tree to become water logged in wet weather.

Cut one half of the tree off at planning.

Wean the lower 18 inches of the trunk.

Wrap the lower 18 inches of the trunk with aluminum foil to prevent shoot growth, sun scald and rabbit damage. On large plantings, use white latex paint and water. A 1:3 ration of paint to water is

GARDEN CHECK LIST FOR JANUARY

1. Plant a tree on Arbor Day. Texas Arbor Day is always the third Friday in January. This year it falls on January 19.
2. Now is an excellent time to transplant mature or established trees and shurbs while they are dormant.
3. Make your flower and vegetable garden plans now before the rush of spring planting. Time spent in armchair gardening before the fireplace will pay off in dening before the fireplace will pay off in improved plant selection. Besides, it is

fun to page through the garden catalogs.

4. Sow seeds in flats or containers to get a jump on plant growth before hot weather arrives. Petunias, begonias and the slow growing transplants should be sown in early January. Warm temperature plants such as tomatoes, peppers, marigolds and periwinkles should be sown later this month.

5. Apply a light application of fertilizer to established pansy plantings. Use 1/2 pound of ammonium sulfate per 100 square feet of bed area. Repeat the application every 4-6 weeks depending on rainfall. Dried blood meal is also an excellent source of fertilizer for pansies.

6. Prepare beds and garden area for

ing the potential damage next spring.

8. The life of the flower pot plant received as a Christmas gift can be prolonged with proper care. Keep the soil moist but provide drainage so excess moisture can flow from the pot. Keep the plant out of range of heating ducts and away from heating units. Keep in a cool room at night, preferably at 60-65 de-

10. When buying plants, the biggest is not always the best, especially when dealing with bare-rooted plants. The medium to small sizes (4-6 foot) usually becomes established faster and will be come effective in the landscape much quicker than the large sizes.

For what glory is it, if, when ye be buffeted for your faults, ye shall take it patiently? but if, when ye do well, and suffer for it, ye take it patiently, this is acceptable with God.
