A Second Glance

By Leon Watson

What are the words of wisdom this week? Confession is painful. Bragging is fun. Last week we goofed (pain). This week our paper looks great (fun).

I got the following from American Ag this week. You can make up your own mind

'Senator Bob Price, State Senator from District 31, went against the advice of the farmers and aligned himself with the insurance-oriented Farm Bureau and the powerful Texas Grain and Feed Dealers Association to help kill the American Agriculture and Farmers Union backed Interstate Grain Compace bill, in the Texas Senate Monday, Ted Godfrey of Spearman. Senators Ray Farabes and E.L. Short, from the two districts

joining Price's district, led the fight in support of the "The bill", said Godfrey, "would have allowed Texas to join with thirteen other grain producing states to look into marketing problems which have the effect of

artifically depressing grain prices to the producers. For instance, box-cars seem to disappear at critical times resulting in grain supplies backing up at county elevators and causing prices to drop. We also would like to know why wheat farmers are forced to sell American Wheat at \$3.00 per bushel," Godfrey continued.

We feel that representatives in the grain producing states should be much more interested in seeking answers to these problems than our urban controlled Federal government," Godfrey said.

Lobbying efforts by those in opposition to the bill delayed its movement through the legislature until it was necessary to suspend the rules of the Senate to take up consideration and debate. The Senate voted not to suspend the rules, having the effect of killing the bill until the next session.

However, the American Agriculture Movement was successful in leading the battle for Gasohol legislation which will legalize the manufacture of grain alcohol for use as a fuel, as well as helping pass the Farm Security Credit Act, which will help young people to enter the farming business.

"The delaying tactics by the Senators during the last few hours of the session were very disappointing," Godfrey said. "For instance, they spent much time discussing the removal of spitoons from rail cars, and establishing the lowly armadillo as the official state animal, then gave the excuse 'lack of time' for not considering the grain producers marketing problems."

Dale Rector of Albuquerque, N.M., was at the controls of the balloon which took to the Motley County skies that Mother's Day week end. Dale's only means of navigation was up and down controlled by the amount of hot air released

into the heart of the balloon.

The direction the balloon goes is which ever way the wind is drifting.

Dale and Carol Johnson brought the balloon to Matador from Albuquerque. Dale came to visit Lemma Rector here. He quickly enlisted the help of Joel Dean Spray, Max Barton, Kelly and Larry Keltz and Kennith Marshall

to help him. By sunup on that clear Saturday, April 26, Dale was already busy giving rides in the big "Bunky Number One."

Dale and Carol said they would be available with Bunky No. One, for promotions or special events, such as July 4th celebrations or Old Settlers.

Car Thieves Captured Here

Car thieves have not been fairing well in Motley have aided in the recovery to two stolen vehicles and June 1 -- 000} the arrest of four suspects. Motley County Sheriff Alton Marshall arrested three persons Monday June 2 -- 2.10} June 3 -- .05 June 4 -- 000 afternoon five miles east of Matador after he received a June 5 -- .26 report the suspects had left -- 2.41 Paducah without paying for a tank of gas. "We received the call at 4:10," Marshall told the Tribune. "I intercepted the red and white Mustang six miles east of town and turned around. I didn't think they were going to stop, but I pulled them over finally."

When Highway Patrol Trooper Neal Haralson Marshall had the prisoners out of the car and on the ground. The three (two white males and one white magazine editorial female) were from Okla-

homa and had stolen the car at the Bethany, Oklahoma police department car pound. They were armed with only a brick wrapped inside a cloth, which they confessed was used to break windows to steal items.

At the end of April another car theft suspect was arrested as he drove away from Cooper's station in Matador without paying for his gas. Local lawmen put out a bulletin and he was stopped and arrested by a Briscoe County deputy. Mrs. Jean Cooper had alertly wrote down the license number as the car fled. The fugitive was from south Texas and had stolen the car in Abilene.

"When a guy leaves without paying for gas you can bet he's wanted for something," Haralson said. "You have to watch them when you pull them over."

Fortenberry Case Delayed, **Hearing Set For Friday**

A pretrial hearing for Larry Carnell Fortenberry, once convicted in the slaying of Motley County Sheriff Jalmar "Jinks" Wilson, has been moved from Hale County to Floyd County and delayed from Tuesday until Friday.

The hearing, originally set for Tuesday morning has been posponed until 10 a.m. Friday in the Floyd County Courthouse because the defence attorneys were tied up in court earlier this Week. The district attorney was also involved in a car accident and was not able to be present Tuesday.

The hearing was moved from Hale to Floyd county because of remodling in the Hale County courthouse.

The prosecutors are expected to request a change of venue from Motley County.

A Hale County jury

sentenced Fortenberry, 30, of Mounty Herman, La., to death in 1977.

The conviction was overturned in march by the Texas Court of Criminal Appeals, which ordered the case retried because District Judge George Miller failed to istruct jurors properly on the corroboration needed to convict a suspect on the

basis of an accomplice's testimony

That ruling was made in reference to testimony against Fortenberry by Stacy Albert Carter, who was Fortenberry's alleged companion when Wilson was killed. Carter testified that Fortenberry knew Wilson was a sheriff when the defendant produced a shotgun and shot the sheriff

The higher court ruled the district judge should have told the jurors that Carter's testimony was not sufficient evidence to prove that Fortenberry knew

Marilee Martin Wins Honors In Dallas Fashion Design

Over 1,800 students from eight states attended the recent Fashion Field Day held in Dallas that was sponsored by the Fashion Group, Inc., of Dallas and Marilee Martin of Flomot, representing Texas Tech University in Lubbock, was one of the four winners with her fashion design. Her cranberry, corduroy playsuit of windbreaker and pants, worn by a professional model, was judged exceptional for its combination of pin wale and wider wale corduroy to accentuate a shoulder voke.

To qualify, Marilee drew her design, made the pattern and constructed the garment in a Flat Pattern Design Class at Texas Tech. The event was a presentation of student designs sponsored by the Natural Fibers Food and Protein Commission of Texas.

Miss Martin, daughter of Mr. and Mrs. Wilburn Martin of Flomot, was to receive summer internship provided by Fortune Design, Inc., Howard Wolf, Sunny South and Neiman-Marcus. Mrs.

Chamber Idea Gets Black Eye In Recent Tribune Survey

Only 20 per cent of the Matador businessmen contacted last weekend in a general survey said they would join a Chamber of Commerce here, if one was organized. But the low percentage did not mean 80 per cent were against the idea of a chamber.

Most of the businessmen contacted were in favor of some sort of organization that would promote the growth and development of Motley County, but also were leery of a Chamber because of past failures of such organizations here. These people were listed as undesided in the survey.

'If it was an organization with a purpose and not one just to belong to I would be interested," one merchant said. "We have had this type of group before but a lot of people were dragging their feet."

Some of those contacted said they wanted to discuss the idea with other merchants before deciding and others just flat said no, that it was not needed here.

"If we had an organization of merchants here which would keep the people informed on how to keep the community from further sliding downhill, then I would join," another questioned merchant replied. "We know it is to our best interest to shop in 1979.

the community where we organized merchants who worked toward keeping business here and who all thought on and worked along the same line, then I would join."

Several of undesided merchants hinted they would join if someone else did the work of setting up thing."

only if it looked as if it would remain active.

According to the survey not enough merchants are behind the idea for it to be successful at this time. But as one merchant said, "We need to talk about it and keep thinking. Maybe we can come up with some-

News About Local People

To Four Countries Dr. and Mrs. A.C. Traweek Jr., returned home last week from a tour in Europe with their daughter, Mrs. Stanley Hanesworth of Houston, the former Dorothy Traweek.

Making the air trip from Houston, the group toured Holland, Germany, Switzerland and Italy.

Making Amsterdam their "home base," they toured the city with canals and famous Keukennof, the estate where the bulb gardens and exhibitions rank among the world's most beautiful. They also visited Het Loo, home of former Dutch royalty.

The tour in Germany included a cruise down the Rhine River, viewing many ancient castle ruins, vineyards and other scenic vistas. A highlight of their tour here included a visit to Rothenburg ob der Tauber, an ancient walled city which the Encyclopedia Britannica describes as "the best preserved medieval city in the world." They were also able to travel through Wurzburg, Germany where their son and brother, Frank Traweek was stationed in the U.S. Army while doing duty after graduating from dental school.

Switzerland sights visited included Lucerne, with a cruise around Lake Lucerne, a visit to St. Moritz area where winter Olympic games are held, and a tour of the base of the Eiger mountain and the Jungfraujoch mountain, where their daughter and sister Frances, (Mrs. Ned Morris of Houston) climbed on a mountain expedition several years ago.

They then went to Venice, Italy for a tour of St. Mark's Basilica, and a moonlight gondola ride through the canals of the city. Traveling through Luxembourg they returned to Amsterdam for their departure home, concluding a three-weeks trip.

RETURNS HOME

Mrs. Velma Fulfer returned home recently from California, where she spent three months with her sons, Rev. Norris Fulfer of West Covina, and Retired Navy Chaplain G.W. Fulfer of San Diego, and their families. She flew to Lubbock and was accompanied here by another son and his wife, Mr. and Mrs. Elwyn Fulfer.

Between The Lines

Salt II By Elvin Dick

The Salt II agreement on arms between our mortal enemy, Russia, is just another step to weaken us for conquest and enslavement.

Congressmen should be notified by their constituants of its faults:

1. Our B-1 bomber has been scrapped, wheras their Backfire bomber has not been.

2. Their SS-20 nuclear warhead missle launchers will be unlimited.

3. Our Cruise Missile's development will be restricted as will certain types of information to our NATO allies.

4. They will have superheavy intercontinental missiles, we won't.

5. They will be enabled to catch up to us in our supply of MIRVS (milti-headed missiles)

6. We won't be able to overcome their big advatage in destructive capability of intercontinental ballistic missiles.

7. They can check us, but we won't be able to check them.

Majority should Object! What it amounts to is arms control to the advantage of Russia. With Mr. Carter at its forefront, we should especially be against it as he has proven himself a "wrecker" of everything the United States has built up, like the Panama Canal giveaway to pro-communist leaders, withdrawal of American support to our allies who are anti-communist like Free China, Iran, Rhodesia, South Africa and Niceragua; for abortion, ERA, weakening the CIA and FBI and threatening our right to keep and bear arms guaranteed by the Consti-

If ratified by Congress, we will be locked into strtegic inferiority which is unmistakably symbolic of a phase of surrender, making our people hostages and inviting isolation, blackmail and being cut off from raw materials the world over. Disaster!

The first modern submarine was developed by John Holland in 1900.

Johnny Roys Honored

The Rev. and Mrs. Charlie Lummus of Flomot honored Motley County senior student, Johnny Roys, with a reception, Saturday, May 12 at 7:30 p.m. in the Fellowship Hall of the Flomot Baptist Church.

Mrs. Lummus and Mrs. Clois Shorter presided at the crystal punch service. The table was laid with a white cloth with red and black streamers and centered with a beautifully designed candle made by Mrs. Shorter, displaying a MCHS graduation invitation. A decorative cake with a boy in a cap and gown and the inscription, "This Is To Certify That Johnny Roys 'Has Satisfactorily Completed His Studies" was served with fruit punch.

Special guests were his parents, Mr. and Mrs. Billy Roys.

If you're a new mother, let me tell you an amazing fact: During its first year your baby's weight will nearly triple. It's the fastest growing in the baby's lifetime, and

you have to help.
You'll get off to a good start if you remember that the baby needs a balanced diet just as much as you do.
An infant's daily feeding program should include all of the essential nutrients: protein, carbohydrates, fats, vitamins, minerals and water.

I've discovered that most doctors and nutritionists agree that a daily caloric balance of 15 percent protein, 35 percent fats and 50 percent carbohydrates is just about right. If you choose foods from the Basic Four Food groups (all available from Gerber)—dairy products, meats, fruit and vegetables, cereals—you'll be providing a good balance.

Deluxe John Deere 21-inch Mowers

John Deere 21-inch Deluxe Mowers are available in two models — push-type and self-propelled. Side discharge is standard on both. An optional 2½-bushel rear bagger can be added to collect clippings in those hard-to-reach areas.

The push-type mower has a $3\frac{1}{2}$ -hp engine. The self-propelled has a 4-hp engine and a rear-wheel gear drive for excellent traction in all mowing conditions. Both models feature steel wheels with ball bearings. Aluminum die-cast deck. And two cutting-height adjustment levers that let you set the mower in any of six positions — $\frac{7}{8}$ to $2\frac{3}{4}$ inches above ground. See us for a demonstration today.

DEAR EDITOR:

In 1982 the Republican candidate for President will be John Connally. He will have more campaign funds-declared and concealed-than any candidate in all history. He will project the image of leadership - of a man who has few doubts and knows what he is doing and where he is leading this Country. He will cut taxes. He will reduce Government spending. He will increase Defense spending so that we will have the B-1 Bomber, the nuclear Air-Craft Carrier and improved conventional forces. He will eliminate Government waste, corruption, paperwork and inefficiency. He has the best political techniques of any man since Lyndon Johnson. He is a handsome man with flowing white hair, a friendly smile and an attractive, devoted wife, Nellie. He will be hard to beat!

Why will he have more campaign funds that ANY candidate in ALL history? Because he is the fairhaired boy of the monopolized conglomerate corporations that have escaped the traditional American market and are able to set their own prices because they have no competition. These monopolized conglomerate corporations have been able to grant major labor unions their excessive, inflationary demands. They have been able to pay dividends to their stockholders

'24.6%" higher than one year ago. These items are merely added to the price of their product, and we the people pay. These monopolized conglomerate corporations and the monopolized OPEC cartel are the cause of INFLA-TION.

Most people think that INFLATION is caused by excessive Government spending and they think INFLATION would be controlled by reducing Government spending and by "cooling off the economy" by high interest rates by the Federal Reserve Board. Not so. These measures have not made any dent in INFLATION.

There is a principle in government that when any product or service becomes monopolized a government agency sets the price-as in utilities. It will be necessary for the Government to do this in order to control INFLA-TION. But-wait a minute-EVERY member of Congress owes a debt for campaign assistance to the monopolized conglomerate corporations! How about that? And who owns the press and the other media?

President Carter in a second, final term would be best able as the Chief Executive to lead Congress in controlling these monopolized conglomerate corporations. They were supposed to have been controlled by antitrust laws-prevent "restraint of trade"-but this was neglected, and the situation is out of hand. Candidate Carter will NOT be favored by the monopolized conglomerate corporations during the campaign, and he is no political match for

Candidate John Connally! Most Texans will vote for John Connally. Most will think they are voting for "leadership" and with the same understanding that a high school class votes for the "most popular boy". Look what unlimited campaign funds did for Governor Cleme-

It is a critical moment for Texas and I need your help more than ever.

The Legislature is playing dangerous games in recommending a budget that eats up the state's billion dollar surplus and gives taxpayers only a small amount of tax relief or none

I proposed a \$19.7 billion budget for the next two years. That budget is austere, but caring both about the people who really need help and the taxpayers who are too often negelec-

It allows for øver a billion dollars in tax relief, welcome help for Texans suffering from rising inflation. It slows state spending's growth and there's no room in it for more bureaucrats.

My budget also takes care of the state's real needs. There is over a billion dollars more for education; \$308 million more for highways; \$22.2 million more for law enforcement and the war against drugs; and \$141 million more for nursing home care.

The Legislature disagrees with my budget. The Senate voted to spend \$20.8 billionabout \$1.1 billion more. The House passed a \$20.3 billion budget--about \$600 million more than my budget.

My realistic suggestions to restrain spending come from the Texas philosophy that government should take in taxes only what it needs to provide essential services. It is taxpayers' money, not government's.

That's always been our state's philosophy. Most legislators probably share it. But that philosophy won't get put into action unless the legislature knows Texans want tax relief, spending restraint, and a reduction in government's

Here's how you can help. First, write your legislators. Let them know what you think about the state budget. I hope you share my view Texas needs a billion dollars' worth of tax relief. But even if you don't agree, it is important that they hear from you.

Second, will you join my political committee by becoming a Sustaining

This committee takes care of political travel, opinion polls, questionnaires, newsletters and activities like letters to people around the state explaining my proposals. It will also balance the books on the campaign.

I know I wrote you about this before, but you are really wanted as a Sustaining Member. Over 5,200 other Texans have already joined.

Your service as a Sustaining Member and your writing your legislators would be of special help to me. I hope I can call on you soon as a member of my committee.

Sincerely, Bill Clements

One key factor in the past growth of synthetics is the aggressive promotion by synthetic manufacturers of their product. Dupont alone is reported as spending three times as much for advertising as does cotton, and 10 times as much for research as cotton.

Does this mean that cotton will be forced into a smaller and smaller role in the world apparel market?

Not necessarily. Continued support by cotton growers of Cotton Incorporated, which conducts research and promotion on behalf of producers, has been instrumental in helping cotton overcome the overwhelming odds in favor of synthetics in the marketplace.

"In 1960, cotton enjoyed a two-thirds share of the U.S. fiber Spur: Dickens Electric Co-op, Spur Veterinary Hospital, Dickens County market," said Hal Brockmann, vice president for textile research and development for Telephone Co., and Star Cotton Incorporated. "In just 13 years, by 1973, we Paducah: First National were down to only a 29%

research and marketing program. Another reason was that there was nobody on the other side. There was no competitive force on behalf of cotton for most of those years.

And when did this begin to change in cotton's favor?

"Cotton Incorporated made the difference," said Brockmann. "In 1974 when the Cotton Seal was introduced as the seal of the U.S. cotton producers and when our advertising campaign began to be implemented on a national scale on network TV, we began to see a dramatic and immediate change. The payoff to cotton producers has been a stablized market share since that

"In the apparel market, cotton has now regained about a 40% share," he added. "We have seen a dramatic return to cotton at the retail level, and this is in part due to the successful promotion of cotton by Cotton Incorporated."

There is one thing cotton producers can be sure of. Millions of dollars will be spent by synthetics companies to promote their product. The most effective counter-punch to their tactics is to pledge support of cotton research and promotion through the grower organization, Cotton Incorporated.

Kleingrass: Winter Damage

By Kurt Presley

Range Conservationist The past severe winter has had a devastating effect on most all stands of Kleingrass. Death losses have been reported as far south as Abilene.

Motley County is on the northern fringe area of adaptation. If you think your Kleingrass stand has incurred winter kill damage call 347-2263 or come by the Soil Conservation Service Office and we will be glad to come out and look at your grass with you.

Emergence of seedlings has been good in most all stands examined. Recent rains have provided adequate moisture with time still left to receive more rain during the critical part of early spring growth. Reducing moistture consuption of invading broadleaf weeds and annual "junk" grasses is of extreme importance. In a matter of a few days following rainfall, control of dense weedy growth can make the difference in whether or not the stand becomes-established. Weed control is the secret

to stand establishment. The Soil Conservation Service provides technical assistance to land owners and operators regardless of religion, race, sex, or national origin.

"It's 2 A.M. and I feel rotten. Who has time to read medicine labels?"

Sorry, there is no excuse for not reading the medicine label. The label tells you what it's for, how much to take and how often to take it. It's important information. Before you take any medicine, read the label. Medicines can't help you if you don't take them right.
