

# The Spearman Reporter

THE SPEARMAN REPORTER, Hansford County, Thursday, JULY 7, 1955

## Producer Assured For H. L. No. 3 Humble Co. Well

A test has not been made on H. L. Wilbanks well, drilled by Humble Co. but we learn this well will prove outstanding producer area. The well shows that rich Marrow sand at feet was tested and a half acre on a drill well shows more than any well and bids fair to return the well at 7450 feet. The well is down and moving on location on completion unit before an official test.

## Work On New Office Bldg. Is Underway

Work is underway on the construction of a one-story concrete block and brick vaner office building for Dr. F. J. Daily. The new office building is located on the triangle lot just south of the Ford Company building just off Main street. The front of the building will be 30 feet wide and one side will extend 70 feet. The shape of the building will conform to the shape of the lot, which is more or less in a five sided shape. The building will house the offices and laboratory of Dr. Daily. Dr. Daily stated that there will be perhaps two office rooms available for rental when the building is completed.

## Cates Grocery Is Closing Out Stock

Lucian Cates announced this week that he had sold the building housing Cates Grocery and market, and that he plans to sell out his stock of merchandise as rapidly as possible and give possession of the building as soon as possible, perhaps by August 15th. Lucian said he would not make public at this time the party to whom he has sold his building. Cates says he plans to get out of the grocery business and buy a small place for cattle and wheat. Mr. and Mrs. Joe Dunn and children of El Reno, Okla. spent several days with Mrs. Dunn's brother, Joe Novak, last week. Ray Phelps, Joe Dan Bryan and Marcus Larson were business callers in Lubbock Tuesday.

## Farm to Market Road Contract Let In Hansford County

A contract for the construction of grading, structures, base, and surfacing on Farm to Market Road 1261 in Hansford County was awarded in Austin this week. James G. Lott, District Highway Engineer at Amarillo has announced. The firm of Cooper and Woodruff, Amarillo, submitted the low bid of \$57,381.22 on the project which runs from present end of F. M. 1261, east and north of Oklahoma State line. Resident Engineer V. J. McGee will be in charge of the project for the Highway Department, and it is estimated that the work will take 75 days to complete. For further information concerning this project, please contact V. J. McGee, Resident Engineer, Highway Department, Borger, Texas.

## Awol Soldier Returned To Sheppard Field

Reynolds Rhodes who was listed as AWOL from Sheppard Field, Wichita Falls, Texas was arrested by Deputy Orville Walker and returned to Military custody June 29th. Rhodes was arrested at Gruber.

## Rites Held For Drowning Victim

Funeral services for Sharon Jean Bell, 18 month old daughter of Mr. and Mrs. Floyd Dean Bell, formerly of Borger, was conducted at 2 p. m. Tuesday in the Church of the Nazarene, Borger. The Rev. Amos R. Meador, pastor officiated.

The Bell child drowned Saturday night in a stock pond on the Hansford ranch where the Bells now live. Bell recovered his daughter from the pond about 8:30 p. m. He said the child had wandered away while he was working and fell into the pond. She was pronounced dead on arrival at Gayton Municipal Hospital. Survivors besides the parents, are a sister, Linda Kathleen; a brother, Nickie Lee, her grandparents, A. E. Bell and Mrs. O. L. Nunley, Borger and Mr. and Mrs. C. S. Babb, Gleason, Tenn.

## Honored With Surprise Birthday Party

Gary Layne Ellsworth was honored on his birthday July 2, at 3:00 with a surprise birthday party, given by his mother, Mrs. Alton Ellsworth and assisted by Mrs. W. A. Ellsworth. Gary, Gary, Jerry Holton, Carl Kunselman, Brenton Hayworth, Bruce Bailey, Gayle Ellsworth and the honoree. Those unable to attend but sent gifts were: Ronnie Ellsworth and Manell Bryan. Refreshments of cake, ice cream and punch were served.

## Methodist Youth Attend Camp

Six intermediates are attending the Methodist Youth Camp at Cota Canyon this week. They are Bill Barkley, Don Mackie, Zack E. Fisher, Connie Day, Susan Sheets and Ann Reed. Mrs. Bruce Sheets is on the staff as a counselor.

## M. Y. F. Honors Judy & Johnny Buchanan

A going away party was given for Judy and Johnny Buchanan on Friday, July 1st and Sunday. The party was a swimming party, then the group went to the city. On behalf of the M. Y. F. Burton Schubert presented both Judy and Johnny with a Bible, stating that they were going to be missed a great deal and wishing them well in their new home. Mrs. William McClellan, Helen Fisher and Merle Washington were the adult sponsors. On Sunday evening prior to the party, the M. Y. F. elected Burton Schubert to succeed Judy as president. Wesley Watson was elected to be song leader to replace Burton.

## Patagonia is at the southern end of South America.

## Ralph Blodgett Sustains Injury In Accident

Ralph Blodgett, local business man, farmer and rancher sustained painful but not serious injuries last Friday afternoon, when his shirt caught in the shaft of one of his irrigation pumps. Mr. Blodgett was working near the pump placing additional gravel in the pump area and misjudged his distance from the shaft. The shaft caught his shirt and underrated twisted Mr. Blodgett around and badly wrenched his back. Ralph has a bad back as a result of an accident during college days and the new injury aggravated the old injury. Mr. Blodgett remained in bed at home until Monday of this week, and is only partly of the time.

## Commissioner Day Reports Spaying Of Grasshoppers

Commissioner Joe Day reported to us this week that the Santa Fe Railroad and the State Highway Department had both joined in with the county and individuals in spraying grasshoppers this year. A plane will fly the rails and spray for the Santa Fe, and the county will assist the state with their spraying equipment in an effort to control the hoppers. Combine men are reporting that as much as 50 per cent of some wheat is on the ground due to grasshopper damage in the county, and the range land is also being depleted where control measures have not been taken. Officials are hopeful that the spraying operations are used properly.

## Spice And Ice

The Christian Youth Fellowship of the First Christian Church will have an ice cream supper and talent show July 8 at 7:30 p. m. The talent show will consist of songs, instrument playing and several sketches, one of which is "William Tell". A free will offering will be taken after the talent show. All proceeds will go to help the local C. Y. F. and to missions. Everyone is invited to come and bring a friend.

## Social Security News

Many farmers in the Golden Spread are asking why they must file a quarterly social security report on their hired laborers and other employees for the first quarter of 1955. John R. Sanderson, Amarillo District Manager for the Social Security Administration has answered some of the most frequent questions along those lines as follows. Only certain farmers will be required to file any kind of quarterly returns. They are required only if the farm employer's total social security tax liability from January 1 to the end of any one of the first three calendar quarters of the year amounts to \$100 or more. Thus the farmer would file a quarterly report only if by April 1, July 1, or October 1, he has paid taxable wages of \$2,500 or more. A farm employee's wages become taxable for social security purposes as soon as he is paid \$100 or more in cash during a year. Every farmer who will have one or more employees covered by the law in a calendar year is required to file a quarterly return. The following table shows the yearly return or report will list the names, social security numbers, and individual amounts of wages for covered employees.

## Reward Offered

Lost two gold rings in the city park. One was a agate with the design of a bush in it—the other a chip diamond set in a black onyx. Anyone finding them please call 5482 or inquire at the Reporter's Office.

## State Penitentiary at Huntville, Texas, was built in 1849.

The State of Liberty was made in France.

## Sheriff Department Locate Stolen Car Awol Air Force Man

Sheriff J. B. Cooke and Deputy Orville Walker are credited with the arrest of Donald Slater, at Gruber, and the return of a stolen 1955 Ford car to an Insurance Company. In routine check of stolen cars, Mr. Walker and J. B. located the stolen car. Seems that Donald Slater, 18 year old A. W. O. L. airman from the Wichita, Kansas field was a jail guest of the Newton, Kansas jail. He became a trusty at the jail and is alleged to have absconded with the jailer's 1955 Ford car near the middle of May. He was working as a farm hand for the Cooper Brothers near Gruber when arrested. The Sheriff from Newton, Kansas came for the prisoner early last week. The stolen car had a stolen license plate and was registered at Pampa, Slater, who goes by the alias of Pete Lopez, gave his home address as Hartford, Conn.

## Check Artists At Work In This County

Merchants are warned that check artists are at work in this area from some samples are rather vicious. P. H. Westerfield Dry Goods Company of Gruber was presented a \$120.00 check in payment of some merchandise, and received mostly cash for the remainder of the check. The check was made out to Mrs. Henry Porter and was signed by Mrs. Bert Jackson. It was made out on a Spearman check and Sheriff J. B. Cooke was unable to find the account at Spearman. Mrs. Porter is unknown in this area. The check showed that it was in payment for a Used Television set.

## Rock Island R. R. Refuses To Spray R. R. Right-Of-Way

County officials who have secured the cooperation of the State Highway department and the Santa Fe R. R. in a county-wide and area-wide spraying program to eliminate grasshoppers were considerably disappointed Tuesday of this week. The officials received a telegram from B. R. Dew, Superintendent of the Rock Island as follows: "We quote" "Rock Island cannot spray Right of Way for grasshoppers at this time. Perhaps the R. R. officials do not realize that the producers and the folk who use their transportation have suffered a severe loss this year as result of hoppers. Farmers, ranchers and virtually all land owners in this area have cooperated to eliminate this destructive pest. To be successful the program must be almost 90 percent cooperation, or the hoppers will find a place to live and grow."

## Dr. Kleeberger On Vacation

Dr. R. L. Kleeberger left Thursday (Today) via plane for San Diego, California. Dr. Kleeberger is taking his first vacation in two years, and plans to visit in Southern California for a week or ten days. Mrs. Fran Caldwell, an out-of-county subscriber wired the Reporter that the Mystery home belonged to Mr. and Mrs. W. B. Greener. This proved erroneous, and we regret that Mrs. Caldwell went to the expense of sending us a wire and failed to earn the chance at the free subscription.

Zack B. Fisher was burned and cut somewhat when a pocket full of fire crackers exploded in his shirt pocket. His chest was cut, burned and blistered before he could remove his shirt, but it is not considered serious.

There were two railroads in Texas at the beginning of the Civil War.

## Local Men In Plane Crash Landing Here

Frank Defoe and Lee May sustained rather severe shock and quite a scare Monday July 4th, when Defoe crash landed his small 2 seater plane in the plowed field North East of the local airport. The two men had taken off, but failed to gain altitude and the crash landing was necessary. The plane was badly damaged, virtually demolished the landing gear and shattered the propeller of the plane. Neither of the men were injured.

## Dotie Jones Given Years Subscription

Only three people correctly identified the Mystery home of the county last week. We attribute this to the fact that the office was closed Monday July 4th, when we naturally receive most phone calls identifying the home. The home was the lovely three bed room country home of Mr. and Mrs. Don Hart. Those identifying the home correctly were Dotie Jones, Winata Pierce and E. D. Mundy. Dotie Jones was the name drawn out of the hat to receive the one year subscription. This gives the management of the Mystery a problem. We had not planned to ever change Doc Jones for reading the Reporter. He gives the country editor fishing privileges, and they are worth considerably more than the Reporter subscription. However, since Dotie has won the year's subscription, I suggest she send a statement to Doc Jones collect her \$2.50 and we will just continue the paper to the same address.

Rev. and Mrs. Aubrey Haynes returned Saturday from Oklahoma City, where Mrs. Haynes had a medical check up.

## Something To Think About

(Published weekly by the Spearman Church of Christ)

A prominent banker tells of the time that he was one of a large number of bankers who were called to Washington for an intensive training on how to detect counterfeit money. "How many counterfeit coins do you suppose I examined in the study?" His hearers imagined that they were shown many counterfeit coins of all kinds, but the banker said, "No, we did not see a single counterfeit coin. We studied the genuine. The way to detect counterfeit money is to be so familiar with the genuine that you will notice any deviation from it."

There is nothing of any real material value that doesn't have a counterfeit, and the thing that makes the above observation so vastly important is this: the nearer perfect the counterfeit is, the harder it is to detect. This same thing is true insofar as Christianity is concerned. The world has created counterfeit Gods, counterfeit Christ and a counterfeit gospel. As a result of these counterfeiters we have counterfeit faith, teachers, Christians, peace, happiness and security. And in many cases they are so near the genuine that they are seldom detected. Others are possessed of such glaring defects...

THE GREATEST HIGHWAY OF LIFE

THUS SAITH THE LORD, STAND YE IN THE WAYS AND SEE, AND ASK FOR THE OLD PATHS, WHERE IS THE GOOD WAY, AND WALK THEREIN, AND YE SHALL FIND REST FOR YOUR SOULS.

**Emergency Reinforcement Plan Effective July 1**

The Department of the Army has announced that its new emergency reinforcement plan, whereby officers and enlisted personnel released from active duty with eight-year obligations are designated for specific assignments in the event of mobilization, will be initiated in continental U. S. Army areas starting July 1.

The plan is designed to assure the prompt filling of recall quotas for active duty during early phases of mobilization, as well as to encourage voluntary participation in National Guard and Reserve training programs. Men selected for emergency reinforcement designations will be participating as members of reserve component units. These reservists will be designated for three-year periods as reinforcements to active Army units or installations and to National Guard and Army Reserve units located as near their homes as practicable. However, the reinforcement designations can be terminated by Army or a National Guard unit, or those who volunteer for assignment to an Army Reserve unit with the objective of full and active participation.

The plan will not be applied to obligated reservists who have undergone hardships and suffering in, or as a result of, combat. The reinforcement designations are not "assignments" in the ordinary sense. The men will not become organic parts of their respective organizations, merely being pre-selected for assignment on or after M-Day when the unit and individuals are ordered to active duty. In all cases the designations will be limited so as not to cause any unit or installation to exceed 115 per cent of its authorized strength plus emergency reinforcements.

Obligated reservists who have had prior National Guard or Army Reserve service will generally be designated to National Guard or Army Reserve units, respectively. The Federal Narcotics Commissioner, putting the number of drug addicts at 60,000 in New York State.

#### Tornado Warning

... re co-sponsored an  
 ch would provide  
 ar stations thro-  
 for the pur-  
 detection and fore-  
 rican and torna-  
 in our memory is  
 at Waro in 1933  
 devastating tornado,  
 ould establish thro-  
 ntry 55 long-range  
 to track hurricanes,  
 iber severe storms  
 equate preparation  
 nment reduction in  
 number of stations  
 in Texas is still  
 formation. However,  
 led that the system  
 quate to prevent at  
 the past damage  
 many lives.  
 The arguments in favor of subscrip-  
 tion television are most  
 interesting. Subscription television  
 will enable viewers to bring  
 entertainment into their own  
 homes which advertisers cannot af-  
 ford. Such programs would in-  
 clude the Metropolitan Opera,  
 multi-million dollar movies, Broad-  
 way plays, and possibly even pro-  
 grams originating abroad, in time.

#### Moreover, proponents of subscrip- tion television believe that this system would slow indepen- dent television stations to ac- tually be independent, in that they will not be solely dependent upon several major networks for their top quality programs.

There is no denying the fact  
 that many theater owners are  
 wary of the prospects of subscrip-  
 tion television, feeling that if  
 viewers could see the new movies  
 in their homes, it might seriously  
 affect the theater business. Added  
 to this possible objection is the  
 possible objection that sponsors  
 may eventually be able to bring  
 all desirable programs to the pub-  
 lic — when television sets are in  
 the hands of practically every  
 family and we do not think it a  
 healthy situation when several  
 large networks have so much con-  
 trol over independent television  
 stations. If the Federal Commu-  
 nications Commission set up an  
 impartial subscription television  
 central office, which would insure  
 that all citizens would have a  
 right to buy whatever entertain-  
 ment and programming they chose,  
 subscription television might be  
 an added advantage in the  
 industry.

However, if advertisers would  
 eventually provide these pro-  
 grams free, we would prefer that  
 in the poorest citizens would  
 have access — if he had a televi-  
 sion set — to the finest cultural  
 and entertainment programming  
 available, just as his rich neigh-  
 bor.

The proper solution is proba-  
 bly for subscription television to  
 be made available so that it can  
 be utilized for programs which do  
 not capture the public's fancy  
 but which are highly desirable  
 for a small minority of viewers.  
 Such programming would include  
 for example, the Metropolitan  
 Opera's programs, which the gen-  
 eral public is not likely to ap-  
 preciate widely enough to warrant  
 a sponsor's interest.

#### WITCH DOCTOR HELD.

Los Angeles, Calif. — Police  
 recently held a man who they say  
 claims to be a witch doctor. Fleck  
 in the Meredes, 54, has been treat-  
 ing sick local residents with an  
 assortment of equipment including  
 black candles, effigy dolls,  
 black silver scarves and plated  
 hair switches.

#### BOY 3 LIVES SNAKES.

Washington, D.C. — Receiving  
 an urgent radio message, "Investi-  
 gate a snake in a house," Police-  
 man Adam J. Ekes and his part-  
 ner, Elton L. Sieh, found the cul-  
 prit behind the screen door. It  
 was a brown garter snake just  
 about a foot long. Ekes put the  
 snake in his patrol car and took  
 it to his three-year-old son, who  
 likes snakes as playmates.

The "Great Plague of London"  
 in 1665 caused 65,596 deaths.

July 1, 1955  
 TO THE PEOPLE OF THE 18TH  
 DISTRICT:

### INTERNATIONAL BLACKMAIL

"Blackmail" is a bad word and  
 is no doubt deeply frowned upon  
 in diplomatic circles. However, if  
 we are to follow the logic that  
 was advanced in arguing for pas-  
 sage of the foreign aid bill to the  
 tune of 3 thousand million dollars  
 (20 from every man, woman and  
 child in the U. S.), we must reach  
 the inevitable conclusion that  
 Uncle Sam is being taken.

The bill provides for expendi-  
 tures of 3-13 billion dollars to go  
 to foreign countries. It is termed  
 the "Mutual Security Act". But  
 when one member tried to have  
 some of his unemployed constitu-  
 ents included in the benefits, the  
 amendment was ruled out of or-  
 der because the constituents were  
 United States citizens and the bill  
 was confined to foreign aid. Many  
 of us wonder why it is called the  
 "MUTUAL Security Act".

This expenditure is approxi-  
 mately the difference between a  
 balanced budget and deficit spend-  
 ing. Only a few days ago, Treas-  
 ury Secretary Humphrey asked  
 for and received an extension of  
 the debt limit ceiling for another  
 year. The ceiling was formerly  
 275 billion dollars. Last year the  
 administration asked for a 6 bil-  
 lion dollar temporary increase  
 for one year, which was granted.  
 This temporary increase was ex-  
 tended for another year just the  
 other day. Like most temporary  
 government matters, it appears  
 that this increase will be with us  
 for a long time. We have several  
 temporary agencies that have been  
 in existence for a number of  
 years. In fact, the foreign aid  
 program was supposed to be tem-  
 porary. The only thing temporary  
 has been the name. The name of  
 the program and the name of the  
 agency handling it have been  
 changed several times, but the  
 expenditures go on and on.

It was repeatedly argued that  
 the measure was a defense meas-  
 ure and could not be justified on  
 any other ground; that it was  
 a defense measure against Rus-  
 sia and communism, and that if  
 it was not for the threat of com-  
 munist, the expenditures could  
 not, under any circumstances, be  
 justified. In other words, the pro-  
 ponents were saying that so long  
 as Russia was a threat to this  
 country, we should continue to  
 pay money to the several coun-  
 tries mentioned in the foreign aid  
 bill. It would logically follow  
 that if Russia ceased to be a  
 threat to this country, then these  
 payments should cease. As all of  
 you know, Nehru, India, has  
 frequently expressed contempt  
 for our government and has recently  
 completed a visit to Moscow and  
 Bulgaria. Tito, dictator of Yugo-  
 slavina, openly and flagrantly  
 brags that he has a communist  
 country.

#### The Vaccine Mess

The Public Health Service, per-  
 haps understaffed and possibly  
 even unprepared, financially, to  
 escape criticism for its policy of  
 letting individual laboratories  
 check their own polio vaccine pro-  
 ducts for safety.

In 1954 there were several  
 checks made on vaccines before  
 they were used. This year the lab-  
 oratories were supposed to do  
 their own investigating. The fact  
 that at least one manufacturer  
 sent out faulty vaccine has result-  
 ed in a tragic number of ill-  
 nesses, which were preventable.

We regret very much that this  
 happened and that it provokes  
 criticism of the Public Health  
 Office and the Department of  
 Health, Education and Welfare.  
 Nevertheless, in our form of  
 government those who have the  
 responsibility must accept the  
 blame.

The blame, as we see it, should  
 be finally determined by a real  
 investigation into the cause of  
 the mix-up. Congress has not yet  
 really delved into the release of  
 faulty vaccine by forcing witness-  
 es to appear and by questioning  
 those connected with the trouble  
 to testify under oath.

There is much undercover talk  
 in Washington that this is the  
 business will be cleared up. The  
 rumors that certain highly placed  
 government officials had a hand  
 in getting the approval of the  
 government for the manufacturer  
 whose vaccine turned out to be  
 faulty, in some cases, is also a  
 question which should be investi-  
 gated fully and completely.

The American people are en-  
 titled to the answers and they  
 have not yet been forthcoming.  
 It is up to Congress to search  
 out the answers and get the facts  
 in behalf of the people. This is  
 an investigation which would not  
 be a publicity-seeking, vote-get-  
 ting effort. As of now, there has  
 been a strange reluctance on the  
 part of congressional committees  
 to get into the question from the  
 bottom up.

And the facts are still obscure.  
 We hope something will be done  
 and soon, to bring to light the  
 full story of the tragedy which  
 has occurred, in an otherwise  
 bright development.

Nixon regards the Big Four  
 talks as a crossroad.

The Senate passed the Ad-  
 ministration's \$3,330,000,000 for-  
 eign aid program after rejecting  
 a series of restrictive amend-  
 ments.

The House Post Office and  
 Civil Service Committee  
 unanimously passed the Senate  
 approved bill providing an average  
 8 percent pay raise for 500,000 pos-  
 tal workers.

Lung cancer is declared to have  
 become epidemic.

### TEASING FATAL

New York. — Friends teased William Oliver, 17, who said that his qualifications to becoming a paratrooper that, as they were crossing Harlem Bridge, the boy, 4-foot tall, removed his shirt and shoes and plunged 180 feet to the river below. It took an hour to recover his body.

### INELIGIBLE

Wichita, Kan. — Answering the summons to jury service, Finnis C. Morris, of Capron, Okla., from 130 miles to Wichita, only to be declared ineligible for Kansas jury duty. Morris, a former Kansas resident, had moved to Oklahoma two years before. He was paid 7 cents a mile for his trouble.

### TREES ACCUMULATE ALUMINUM

Canberra, Australia. Researchers here have discovered that certain trees in rain-forest areas of Australia and New Guinea accumulate aluminum in the form of compounds, hard white masses in the timber and in the leaves, apparently absorbing it from the soil. Trees in the dry inland areas do not contain these compounds.

### HOBBY HORSE RUSTLERS

Charleston, N. C. — Providing that there are all kinds of rustlers in the world—this time they preyed on a pay-as-you-ride hobby horse in a local store and stole \$150 in dimes.

### U. S. CHECK BOUNCED

Los Angeles. Edward Saver was greatly surprised when a Government check for \$37.50 he had received bounced. It seems somebody in the U. S. Treasury Department had neglected to sign it.

### CONSCIENCE MONEY

Charleston, N. C. — The Internal Revenue Office here recently received a letter which read: "I owe you \$300 and I haven't been able to sleep. I am enclosing \$100. If I can't get any sleep after this, I'll pay the balance next week."

### SAVED FROM 'CHICKEN' DEATH

Washington, D. C. — Joe King 8, who hanged himself from a tree to prove to a playmate that he wasn't "chicken" is alive because of the efforts of two servicemen. The two boys tied a 2-foot length of clothesline to 7 feet from the ground and tied the other end around Joe's neck. Joe let himself down the tree trunk and then swung free, suspended by the neck. Then, when he tried to get back to the tree trunk, he couldn't reach it. His companion tried to reach him but couldn't. A neighbor called Joe's mother, whose screams attracted a Marine, who cut the boy down. Another serviceman, Leon A. Diggs, 22, colored, applied artificial respiration to the boy for fifteen minutes before he revived.

### Dairymen Should Go Forward With Brucellosis Program

College Station, June.—Texas dairymen have the "green light" for putting into operation Plan B for the eradication of brucellosis. The signing by Governor Shivers of recently passed legislation, says Dr. C. M. Patterson, extension veterinarian, removes all obstacles to a dairymen using Plan B.

Patterson suggests a 500-step program for carrying out the objective—all grade A dairy herds in the participating in a brucellosis eradication program by September 1, 1958—as required by the Texas milk specifications and requirements.

First, he says, protect the herd's water supply from contamination by body discharges from the animals. Stock ponds, marshes and stagnant streams should be fenced. Contaminated water next to direct contact with carrier animals, is a most frequent source of new infection, points out the veterinarian.

Secondly, protect feed from body discharge of animals. Feed hay from racks and other feeds from troughs.

Thirdly, isolate in a "hospital" pen all animals showing indications of illness or impending abortion. Keep them away from the herd until they are normal. Add only animals to the herd which have a negative blood test and isolate them for 30 days and their rest before turning them with the herd.

Fourthly, says Patterson, put heavy springing cows in a maternity pen 10 days prior to calving and keep them there until all discharges have ceased. All membranes and stillborn calves should be immediately buried.

And last, he says, contact the local veterinarian who will do the testing and vaccinating. He has the Plan B agreement forms which must be sent to the Live-stock Sanitary Commission. Patterson believes much good can come from dairymen, veterinarians and county agents working together on the program and that many other problems can be solved by this joint effort, thus reducing the expense of the eradication program.

### What does the American Flag mean to the world!

By J. H. NICHOLS

When I look upon the American flag I think of for what it stands for. The principal that has been incorporated in the flag is symbolic of the cross and what it stands for. The blue represents that Christ was true blue. The white represents that Christ was without sin. The red represents the blood of Christ dying for the sins of the world. The innocent dying for the guilty. Betsy Ross had these thoughts in mind when she made the first flag. Those who have given their lives on a battlefield for freedom and his old earth has been soaked with the blood, is a testimony of the love for freedom of our country. When an American sees the flag floating with breezes, we want to take off our hats and salute it. Three cheers for the red, white, and blue, will bring any red blooded American to attention.

The Constitution of the United States is one of the greatest documents ever written for the protection of the American people. For the people, by the people, the land of the free will float over the land of the free and the home of the brave.

When we read of great and good men who were fearless, that wrote the constitution, at the risk of their lives, they knew it was better to give their lives to protect the American flag than it was to be a slave for the mother country and be ruled under a king.

The Constitution of the United States was framed to make us a united people in strength and loyalty to the principal of those who fearless men with the spirit of Patrick Henry, "Give me liberty or give me death!"

As it was our privilege to visit Monte Celler mountain and through Thomas Jefferson's old home and see the wisdom of an architecture and a builder that he put in over thirty years to protect the American flag, than stand how a man who thought things out for the future could write the greatest piece of literature in the world, the loyal American and closer to his heart than any history on record. Looking upon his monument with the epigraph written by his own hand. He said, "I helped to

frame the Constitution of the United States." Not one word did he say about being president. When we celebrate the fourth of July, for what this protection meant to us and American people. We must not ever look the fact that Jefferson died in the morning and John Quincy Adams died that afternoon. Their lives had prepared them for this hour and they both went to their rewards the same day Jefferson in his eighties and Adams in his nineties.

We as American people who were born under the stars and stripes have more to be thankful for than any people on the globe. How we should give thanks unto God for Columbus going west and discovering the greatest continent on the globe. How we should thank God for our forefathers who came to a new country so they could worship God according to the dictates of their own conscience. The Constitution guarantees us free speech, free press and equal rights and makes toward none. When the hand begins to play our National anthem it will bring every red blooded American to his feet. This is a living testimony to the dead who have died to protect our flag, that they have not died in vain. I am a Loyal American 100% plus.

J. H. NICHOLS

AGRICULTURAL FILLS — Texas dairymen have the go ahead for putting into operation Plan B for the eradication of brucellosis. The signing of recently passed legislation by Governor Shivers removes all obstacles to the use of the plan.

The Texas ASC Committee urges every eligible wheat producer—in Texas includes wives—to vote in the June 25 wheat marketing referendum. The question—quotas or not—is an important one and all growers should have a voice in the final answer.

Real estate taxes on Texas farms and ranches rose in 1954 for the eight straight year. The average tax per acre for the state in 1954 was 28.8 cents compared with 27.8 cents in 1953 and 17.3 cents an acre in 1946.

Potatoes and ice cream top USDA's plentiful foods list for July. Fresh fruits and vegetables, beef, frozen halibut, broilers and fryers and milk and related dairy products as well as rice and cooking fats continue plentiful.

Slavery was introduced into American Colonies at Jamestown, Va. in 1619, and abolished by the 13th Amendment in 1865.

The first Tenement house was in New York City in 1833.

The first Vaudeville theater was the Gaiety Museum, Boston, 1883.

Eight per cent of the fur seals in the world are found on the Pribilof Islands off the coast of Alaska.

### The Bums Are Gone

It appears pretty obvious that the Brooklyn Dodgers have just about run away with the National League pennant race. Of course, nothing is a certainty in baseball until a team has mathematically cinched the flag.

However, the Dodgers have gotten away so quickly, and the Giants and Braves have floundered so badly, it appears they are almost a shoo-in for the National League flag in 1955.

This brings up the prospect of a World Series involving the Brooklyn Dodgers and either the New York Yankees or Cleveland Indians. Or, it could be between the Brooklyn Dodgers and the Chicago White Sox. Certainly, the White Sox do not lie down and play dead when they meet the Yankees, nor do the Cleveland Indians.

But it does not appear that 1955 will witness another all-New York World Series. We are not saying it is not possible, but that is our prediction. It also would appear at this time, that our guess that the Milwaukee Braves would win the National League pennant is not going to pan out.

### C. Of C. Dinner

The regular 1st and 3rd Wednesday dinner of the Chamber of Commerce officials of Spearman was held yesterday at the steak house.

Those present were: Jimmie Hester, Olin Chambers, Claude Owens, J. C. Cates, and Dr. R. L. Kleesinger, all officials of the Chamber.

Current business was the topic of discussion.

### Life At Ninety-Four

Dr. J. R. Hullinger has practiced medicine for over sixty years. Dr. Hullinger is still practicing in Clinton, Iowa, and is now ninety-four years old.

Recently, he delivered his 3,209th baby. But there was something unusual about this baby, which made the 94-year-old doctor a news topic.

This baby was Dr. Hullinger's own, his second son in the last two years. The previous son born to him by his wife arrived when the doctor was 92. This should be something of an encouragement for those gentlemen who think they are over the hill at such young age.

### Te Busy Bees Entertained Morse Maidens

The Busy Bees 4-H Clubs had a joint meeting at the lovely F. B. Schubert farm home Thursday June 30.

This meeting was really enjoyed by all as it was outdoor cookery given by Miss June Gibbs. The girls can now help Mother these hot busy days by cooking hamburgers outdoors.

Besides delicious hamburger watermelon was enjoyed by the following Sue Leverton, Jeanie Womble, and Linda Gillispie with their leader Mrs. Moodie Womble from Morse, Diana Renner, Peggy Scroggs, Mary Katherine Jones, Pauline McLain, Maud Washington, Connie Anthony, Paton Archer, Marilyn Schubert, Cynthia McWhirter, Sharon, Mary Ellen, and Pat Novak with their leaders Mrs. Robert Novak and Mrs. F. B. Schubert and Burton and Buddy, Bob Novak, Perry and Merle Washington.

### Historic Judicial Decision

A U. S. Court of Appeals recently ruled that the State Department did not have exclusive control over the issuance of passports. In a decision which marks a milestone in judicial evolution in this country, the court decided that the right to travel was a natural one, subject only to reasonable regulation under the laws.

Heretofore, the State Department had maintained considerable control over the issuance of passports and refused to issue them on various occasions for different reasons.

The court recently found, however, that to deny a citizen a passport was depriving him of liberty and the judges said that any restraints imposed upon a citizen's liberty must conform to constitutional guarantees, which include the guarantee of no such deprivation except through the operation of due process of law.

This is a long-awaited ruling. The right of every American to travel, so long as there is no valid reason for confining his travel, should not be subject to the interpretation of some official in the State Department, or any other department. The decision is long overdue.

### A Word To Our Graduates

In recent days, high schools in this area have graduated hundreds of students, many of whom are preparing to enter college this fall. Others are going into the services, or into private employment. Some will be going to college.

To all of these students, we would like to express a few thoughts. The graduate of 1955, and we include college graduates in this thought, is finishing school at a time when his country is at its peak and is recognized as the most powerful nation on the face of the earth.

Until World War II, Great Britain was probably the world's dominant power. This was true because Great Britain had tremendous colonial assets, the greatest navy in the world and had—in World War I—played a more prominent role than had the United States. So had France.

However, in World War II, the tremendous might of the United States was demonstrated to all the world and the United States was unquestionably a decisive influence.

It can be said that today's graduate graduates into a country which is still expanding, still booming and still operating under the free enterprise system. In our country, too, we still maintain freedom of religion, freedom of the press and freedom of expression. It is a great age for the modern graduate and opportunities are unlimited.

Application, honesty, sincerity, and the will to achieve will carry almost any 1955 graduate to success. The opportunity, business conditions and the freedom is already there.

### Electric Empire

Something new has been added. An electronic empire has been tested in the Pacific Coast League and it can even throw a ball player out of the game.

The electronic Empire is actually a robot, which is actuated by the same kind of controls that are used in the aircraft industry. It has two legs and stands somewhat like a human being, although the dome-like head is mainly composed of electronic devices.

We think an electronic empire might be an improvement in some sense and an electronic empire behind the plate might be able to more accurately call balls and strikes than his human counterpart.

### Summer Television

The custom which is growing up in U. S. television circles, on the pattern of Broadway entertainment, is that the big shows and big personalities, discontinue their shows during the Summer months. In other words, in coming days, many television viewers will note that some of the biggest personalities have ended their shows for several months, until the Fall season begins. This pattern follows that established long ago on Broadway for several reasons—few of them not being applicable to the television industry.

We do not understand why television shows—if they are successful should not be year-around affairs. We believe, of course, that the personnel involved should have vacations, but we do not think so much of the best entertainment should be taken off the air in the Summer.

John Doe continues at his job Summer Fall, Winter, and Spring, and advertisers might keep in mind the fact that he would appreciate good entertainment as much in June as he would in December.

As far as these entertainers themselves are concerned, they should welcome a continuation of normal programming throughout the summer, in view of the oversized pay checks most of the stars receive.

### JELLY TRAPS BURGLAR.

Los Angeles — Frank Spicker, 39, broke into a market and, being hungry, proceeded to make himself a jelly sandwich from the market's stocks. Then he dropped the jelly glass. In the dark, he stepped on it, slipped, fell and knocked himself out. Joe Benish, market manager, found him, out cold, and called police.

### SIXTH TORNADO IN UTAH.

Fayette, Utah — A tornado, the sixth ever reported in Utah's history, hit Fayette recently, leaving damages estimated at more than \$1,000,000. No one was reported injured, however.

### DOG GUARDS HURT MASTER.

Covington, Ky. — When neighbors reported Louis Keen, who lives alone, missing for several days, police went to Keen's home to investigate. There they found Keen, partially paralyzed, crumpled in a corner of a locked room with his dog guarding him. Efforts to move the hungry dog from his vigil failed and it became necessary for the police to kill the dog in order to remove the injured man to a hospital.

### WATCH THEIR PLANT BURN.

Cornith, Miss. — While Mr. and Mrs. Douglas Cochran were attending a drive-in movie, they saw flames shoot across the sky and, for nearly a half hour, they divided their attention between the screen and the distant fire. When they left the movie, they found that the fire was their woodworking plant—the Douglas Cochran Co. Damages were estimated at \$25,000.

### BEES BUZZ IN BOX.

Washington, D. C. — For some reason, a swarm of bees like the call-box on McKinley street near Broad Branch road. Again this year, police have been informed that "about 500 bees were on the outside of the box, and probably 500 inside." Authorities had to call on someone who could handle bees to remove the insects from the box—just like they had to do last year.

### LEGAL LIQUOR.

Consumption of legal liquor in this country will run between 1954 and 1955, according to the Agriculture Department. There were 176,881 fires in that period, damaging more than 8,800,000 acres of forest resources—timber, water forage, wildlife and recreational facilities. This was an increase of 12 per cent in fires over those reported during 1953.

### VEHICLE REGISTRATION.

A total of 58,589,963 motor vehicle registrations were issued in 1954—a gain of 4.1 per cent over 1953—according to the Bureau of Public Roads. Florida showed the greatest rise with 8.2 per cent.

### PLANE USE.

Commercial air transport in the United States uses about 1,400 planes, compared with 20,000 operated by business corporations and executives, and 10,000 used by farmers and ranchers.

### PERSONAL INCOME.

Aggregate personal income in April rose to a new record estimated high of \$295,000,000,000 per annum. The "take-home" part of this record personal income—what's left after taxes—was at the rate of \$260,000,000,000 for the year. Aggregate personal income in April ran a million dollars higher than in March, which had set the previous record.

Black Friday was Sept. 24, 1869.

COMBINE YOUR NEW CHEVROLET PURCHASE WITH YOUR VACATION PLANS!

Order a new Chevrolet through us, then pick it up at the plant in Flint, Michigan, see Chevrolet built, if you like, and drive your home. Chances are, you'll save a substantial share of your vacation travel cost!

Twin Pipes that play sweet music!

## Chevrolet's "Super Turbo-Fire V8" with 180 hp.

Can spot this one by the twin tail. No matter what you drive, you're going to see twin-exhaust Chevrolets going away—in traffic, on the toughest on the long straightaways.

Unless you have a "Super Turbo-Fire V8" of your own. And then you'll want it's like to pilot the car that sets the pace for everything else—and that makes the Super set? Chevrolet's superb valve-in-head V8, with shortest stroke in the industry, the power per pound, and the only 12-volt electrical system in its field—all this plus a four-barrel carburetor and free-breathing twin exhausts.

Want to sample this silk-lined cyclone? Just give us a call, any day this week, and we'll be proud to show you just how hot a V8 can be.

\*Optional at extra cost.  
†Station wagon models have single exhaust pipes.

Mystery Home, That Of Mr. And Mrs. Don Hart.

The Mystery home, the picture which was printed on the front page last week and is printed above, is the three bed room modern comfortable home of Mr. and Mrs. Don Hart, near Gruver.

Mr. and Mrs. Hart have been married five years,

and have two lovely children, a son, Leslie 4 years old and a daughter, Amanda Jane, 20 months old.

Don is the son of Mr. and Mrs. Hayden Hart, and in addition to operating his own farm gives some assistance to his father.

Don, like most of the land owners mixes wheat production with cattle. He, like many other of this area includes granaries for storage of snail grain and efficient shop facilities.

## Print In Washington Senator Price Daniel

fighting wars in the future, there will be victories to be won in peaceful pursuits. The Communists will continue their propaganda of political and social revolution. It will be up to us who believe in Christianity and Democracy to reach the minds, hearts and souls of men and women and boys and girls throughout the world. We have principles, ideals, and ideas which are far more appealing than atheistic Communists toward selling our principles and philosophy to people of other nations. If they know more about us, they would understand us and know that our way of life with all of its moral and spiritual ideals is far better than the materialistic precepts of the Communists.

The late Amon G. Carter, Publisher of the Fort Worth Star-Telegram and known variously as "Mr. Fort Worth" and "Mr. Texas," had many friends in Washington. We were grieved last week to learn of his death, and appropriate tributes were paid both in the House and the Senate.

In the passing of Amon G. Carter, Texas and the nation have lost one of the most able and patriotic citizens of our generation. Amon G. Carter's patriotism and good citizenship began with his home town of Fort Worth. No man ever loved his city more. Few men have ever accomplished more for their city and its people than did Amon G. Carter.

I first knew Mr. Carter when I was a high school student in Fort Worth. He helped promote Boys' Week, during which Fort Worth boys were elected to and served in every city and county office. My first view of public service was as Boys' Week city manager. Mr. Carter gave a banquet for us at the Fort Worth

Club and encouraged us to take a keen interest in the processes of self-government. Later I served as a string reporter on his Fort Worth Star-Telegram. Throughout the years he inspired boys and girls to love their city and led men and women to work for it.

### A GREAT AMERICAN

Typical of men with love and loyalty for their home town, Amon G. Carter had the same love and patriotic zeal for his state and nation. He was generous with his time and money in many efforts to promote better government and a stronger national security.

The larly life of this great American is ended, but his memories will continue to remind others of the opportunities which this country affords and the responsibilities which we owe to our communities, our country, and our fellow-men.

### Independent Indian Tribes

The Alabama-Coushatta tribes have been granted their independence from Federal supervision in accordance with legislation passed by Congress last year. All that remained was for Secretary of Interior Douglas McKay to issue his proclamation, and that terminated the supervision formerly exercised by the Bureau of Indian Affairs and transferred trusteeship of 3100 acres of lands belonging to the tribes.

For the first time since 1909, the bureau said, full independence from Federal supervision is being extended to an Indian tribal group. In that year, two Wisconsin tribes, the Sockbridge Muncie group, received fee patents for all their land holdings. Later they accepted the Indian Reorganization Act of 1934, which reinstated certain tribal relations with the Federal Government.

### Tribute to Texas Tribes

This decision by the Secretary of the Interior is something of which the Texas Indian tribes near Livingston can be proud. Such independence will be granted

only to those tribes which have made progress along the road to self-sufficiency.

### Oslo News

Mr. and Mrs. Billy Hill and children of Amarillo came by here and got Miss Luanna Olsen to go with them for a few vacation days in Colorado last week. Sunday dinner guests in the Pete Dahl home were Mr. and Mrs. Benny Graham of Amarillo and Mr. and Mrs. Joe Walker and children.

Mr. and Mrs. E. David Knutson and daughter spent the week-end with his folks here, Mr. and Mrs. Emil Knutson. They are temporarily living in Wichita, Kansas.

We had a wonderful wedding in our church on Saturday afternoon. Miss Bonnie McFadin and Tom Sheaf of Canadian, Texas, were joined in marriage. You will read about it elsewhere.

The Terry Huse family had Sunday dinner in the Jodie Knutson home on Wednesday evening were Mr. and Mrs. Bob Jackson and Mrs. Coy Gibson of Guymon

and the sisters of these two ladies, Mrs. Max Anderson, and son, Mikel, of Grand Forks, No. Dak., and Mrs. John Lundseth and son, Mark, of St. Paul, Minn.

Our sympathy goes out to Mr. and Mrs. Bell who have recently had a child drown in the stock tank. This family moved recently into one of the Rob Alexander houses.

Mr. and Mrs. Archie Nelson and children of Amarillo spent the week-end here in the Clarence Johnson home.

A sister-in-law of Mrs. Clara Steje, Mrs. John Lunn of Denver, died in that city last Tuesday at the age of 84. Some in this community will remember her visits here.

Mr. and Mrs. Bob Anderson visited her aunt here. Mrs. Clara Steje, on Saturday. They were on their way to Loveland from where they will continue their journey to California.

The Clifford Hill family are having a week of vacation in Colorado.

First balloon flight in America was made by Jean Pierre Blanchard, a French pilot in 1793.

The Island of Bali is in Java in the Dutch East Indies.

receive a greater supply of natural gas at reasonable rates. We hope that the bill will be passed before Congress adjourns.

### Service

The kind of service you get on something you buy is important and often measures its value to you.

There is much to be considered about the Services rendered on "Land Bank Loans" such as lending abstracts, releasing parts of the security, and agreeing to oil and gas leases. These services and many others to member borrowers of our association have proved most important.

*We would like to tell you more about them.*

The Spearman Reporter
Successor to the Hansford Headlight, Published Thursday of each week in Hansford County, at Spearman, Texas.
WILL J. MILLER, Editor and Publisher
Entered as second class matter Nov. 21, 1919 at the Post Office at Spearman, Texas under the Act of March 3, 1879.

Don't Name It

We enjoyed a grand and glorious FOURTH for the second time in three years. The holiday in the field helping to harvest wheat and at the same time watering land already harvested. It gives us thought to remember that the American Farmer is called the GREAT INDEPENDENT American. Independent of WHAT? He ain't independent of the pesky grass hoppers that eat up a crop while he is fighting to save it. He ain't independent of drought which causes him to mortgage his farm as a living expense while he waits for a favorable year to make back what he loses in the bad years.

Washington News Letter From Your Congressman Walter Rogers

June 17, 1965
To The People Of The 18th District:
Washington was completely wiped off the map last Wednesday. This should have stopped some of the confusion, but according to the newspaper reports, it merely added to it. The trouble lay in the fact that many in the Capitol City refused to admit that they had been completely obliterated. Generally speaking, they went blithely on their way and treated the whole proposition in a more or less jocular vein. The news stories were serious to a degree, but most of the writers couldn't withstand the temptation of threading humor through them. One good example was a news story in a local paper that drew a verbal picture of how the long black Cadillac used by the Attorney General "ZOOMED" out of the underground garage below the Justice Department, "ZOOM-

The country Editor acknowledges a splendid gift from Mr. and Mrs. J. L. Bryan. These fine folk brought a nice glass and pitcher glassware set as a gift to the editors family. THANKS.
Learn that the wheat is not turning out nearly as well as this writer had anticipated. Fact is that the winds the past five days have taken a terrible toll. Wheat we expected to put up to 25 bushels per acre is turning out 15 bushels, and the dry land wheat that looked promising is hardly worth cutting according to information we are receiving.

For the first time in so long I hardly remember when we do not have a single new location for drilling in this county. That is, we do not have one to write up, perhaps we have overlooked a bump somewhere, but so far as we know there have been 3 drilling crews moved out of the county the past three weeks, and they have not been replaced. However, as this is written we just received a telephone call from Mr. R. L. Porter. He informs us that the Honolua Oil Company is planning to drill in the county.

Our biggest objection to the evacuation was that every time we tried to get information from the department, it seemed that the boys with the knowledge had been evacuated. This even included some witnesses who were supposed to appear on my subcommittee on Mins and Mining.
Actually, a great deal more attention should be paid to Civil Defense, especially in the metropolitan areas of the East and Middle West. The problem, however, does not lie in the realm of trying to evacuate people from these cities. If any foreign power decided to get off a devastating bomb of our metropolitan areas, they wouldn't do it by airplane. The citizens in those areas would have little, if any notice. In Washington, for instance, there are a number of embassies that are foreign soil insofar as our government is concerned. Any one of these could be employed as a situs to assemble an explosive agent that could practically wipe Washington off the map. No notices of any kind would precede such a catastrophe.

ADJOURNMENT
Everyone is trying to pick a date for adjournment. It ranges from July 15th to October 1st. Present indications are that we will get out sometime during the middle or latter part of August. We hope it is soon. The kids are anxious to get home and so are their mother and father.
Walter Rogers,
Member of Congress,
18th District of Texas.

Major companies, plus the fact that all the oil fraternity await the decision of what the government plans about setting the price of gas. If this price setting is changed so that land owners are given a reasonable price for natural gas, then the drilling will begin and a rapid pace will be set.

Why Is Everyone Giving Farmers Kick in Pants?

We had just finished reading the Hoover Commission Report on REA the other night and our blood was still boiling over the statement made that REA Co-operatives do not pay interest for the first five years and that the interest rate should be increased to REA co-ops, when the news came over television that Mr. Benson had announced that the 1956

what crop would be supported by 76 per cent of parity price. Then too, the labor unions had won their battle for a wage increase and a guaranteed yearly income which means that another price increase is due on cars and trucks and of course farm machinery will follow.
Why is everyone these days wanting to give the farmer a kick in the seat of his pants?
Anyone who says that REA Co-operatives do not pay interest for the first five years is either ignorant of the facts or deliberately lying. Interest is paid on funds borrowed from REA on the date of disbursement from their office (not from the time we receive it) until all funds are repaid. Interest payments are deferred for the first five years but are added to the later interest payments. We even pay interest on it before we get it, as it takes several days for the check to

reach us after it is written in Washington.
The only way increased interest rates can be paid is for the rates to be raised and the members pay for it. Farmers in this area are having enough trouble paying as it is, and if prices are forced down on farm products and the price increased on everything else, buy, something is going to happen.
One of our members came into the office recently and was boiling mad because he had just come from an implement dealers business and had tried to purchase a set of one-way plow bearings for a popular make of plow. He had bought some in 1954 for \$10.45 each but now the dealer quoted a price of \$18.00 for the same bearings. Just a 50 per cent increase in one year. Farmers in this area are forced to reduce their wheat acreage about 30 per cent which leaves

The makers of Super-Refined No-Nox, the clean-burning gas... now bring you a new super-refined motor oil...

New Gulfpride H.D. Select

Available in 3 grades—SAE 10W, SAE 20/20W, SAE 30. Lets you follow your car manufacturer's recommendation for each season.

...the only motor oil in the super-refined by the Alcholor process for modern high-compression engines.

Not a compromise, multi-tries to be an "all-season," "in-one" oil. Contains no artificial thickeners that break down in your engine and increase oil consumption.

- This completely new kind of motor oil by Gulf's exclusive Alcholor Process...
• Controls carbon—cause of ignition, valve failure and loss of power.
• Combats corrosive acids...
• Assures lower oil consumption...
• Provides the toughest protection...

Now! For the ultimate in working octane performance and engine protection, always use Gulf's super-refined gas oil team...

New Gulf No-Nox Gasoline
New Gulfpride H.D. Select Motor Oil

"Coked" valve "A" is from engine using a so-called "all-season," multi-grade oil. Carbon deposit is a cause of sluggish performance and ultimate valve failure. Clean valve "B" is from engine using new Gulfpride.

See how Gulfpride H.D. Select "body" (viscosity). This new artificial thickeners that break down under pressure. But note how new multi-viscosity 10W-30 oil maintains
