## Wheat Yield **Helps Harvest**

Rainfall that measured 0.41 inches of moisture in Spearman Friday evening stopped the 1965 harvest activities in much of the county and area. However, some sections only received a trace of in Spearman was not brought to moisture and the wheat harvest a standstill. A trace of moisture Monday evening did not close harvest activities

In a check with elevator oper ators Tuesday morning the stall of the elevators seemed to think the harvest was about over, some estimating 10 per cent and allowing 3 more days for heavy activities to wind up the 1965 harvest. Of course there will be isolated fields of irrigated wheat that they can be harvested.

A check with all the elevators Spearman brought out the this year had already exceeded last years yield The irrigated wheat is still averaging 60 bushels an acre and the dry land wheat fell a lace cloth and centered with off considerably after the rains. Weeds and bleach hampered the dry land vield.
