## **Spray Propazine** to control weeds and grasses in sorghum.

One spray of Propazine® 80W herbicide controls most annual broadleaf weeds and grasses in sorghum for the entire season.

This can reduce or even eliminate the need for cultivating because Propazine takes care of problem weeds for you. Propazine is particularly effective on carelessweed (pigweed) and annual morning

Sprayed before weeds and sorghum are up and activated by moisture, Propazine gives your crop an entire season without weed competition for moisture and soil nutrients. The result? Higher yields and more profit for you.

# Time for a maintenance check of your electric air conditioning equipment

Your electric air conditioning equipment will soon be working extra long and hard to keep you cool. That's why it's a good idea to have it checked over now and put in tip-top shape by a qualified air conditioning serviceman. He'll make sure your equipment is properly lubricated and adjusted and has just the right amount of refrigerant. He'll clean clogged filters, too, to assure the free air flow needed for maximum operating efficiency. It's routine maintenance that pays off in greater cooling power at lower operating cost. Call a qualified serviceman soon. And, if you need additional cooling equipment, now's the time to have your air conditioning dealer install it.
