Farm labor is scarce and in ar effort to secure more help for the farmers in making crops I asked the War Department if it was not possible to release men for this work without injuring the

for this work without injuring the war effort. I was officially informed as follows:

"Military personnel are not of a more of farm work. However, commanding officers of all posts, camps, stations, divisions, and lower separate units have authority to permit soldiers to engage in farm work in nearby communities during normal off-duty periods or to grant passes for the purpose if, in the opinion of the commander concerned, an emegency exists in a nearby farm community due to the shortage of available farm to the shortage of available farm labor; the soldier concerned de-sires permission or a pass; such action will not interfere with the customary employment and regular engagement in farm work of local civilians, will not interfere seriously with training, and no expense to the Government is involved. But for sorvice analysis expense to the Government is in-volved. Pay for service rendered by the individual and all other conditions of his employment are left to the determination of the individual soldier and his farm employer so far as the Army is concerned."

### Wheat Yield To Be Lower Than In '42

Efforts Being Made To Provide Workers For County's Farms

Annual Hansford county wheat harvest is about ready to begin. It is probable that wheat will be cut from two or three fields by Saturday and a few more early in

the week.

Harvesting is not expected to harvesting is not expected to be under way to a great extent before June 25, according to County Agent Joe Hatton, Hansford county had a yield of more than 4,000,000 bushels in

Smaller Yield Forecast
Expectations are that the yield this year will be from 1,300,000 to 1,500,000 bushels this year. Best wheat will be in the west part of the county, although it is said there are some good fields south of Gruver toward Morse.

Greenbugs did terrific damage to wheat, far more than that of lack of moisture and cold weather. Some fields that did not pasture too heavily or have many greenbugs are going to have fair yields, it is believed.
