

THE SPEARMAN REPORTER

Second Year

Spearman, Hansford County, Texas, Thursday, May 29, 1930

Number 25

SCHOOL CONTRACT LET TO PARR CONS. CO.

ALL BUSINESS HOUSES WILL CLOSE FRIDAY FOR DECORATION DAY

Contract for the construction of Spearman's new high school building was let to the Construction Company of Dallas.

As to exact cost of the building is not available at this time. The building will be completed by September 1, in time for the beginning of the next term.

Heating and plumbing contracts were let separately from the building contract, the latter being awarded to H. G. Pearson, Amarillo.

Cattlemen Display Great Bulls

Archer and Roy Wilmeth, boys in Spearman schools, today morning displayed two finest bulls that ever paraded Main street, Spearman, on the main street.

The bulls came from the "Anxiety" breed, handled by the fathers of these fine boys. Archer is a son of R. B. Archer; Roy Wilmeth is a son of W. W. Wilmeth, the most successful dealer in cattle in the great south.

The bulls were bought by Gene Hill Brothers Grocery and Spearman folks are proud of them this day. Dan Archer's bull weighed 1010 pounds and Roy's bull weighed 1020 pounds. They were twelve months old.

Boys were students under C. A. Robinson, teacher of Spearman Schools.

C. Had Interesting Meeting Wednesday

Very interesting meeting of the board of directors of the Chamber of Commerce held Wednesday in the offices of the Chamber of Commerce, C. A. Gibner presiding.

Readings were discussed. Mr. Homer Allen will charge of. Also plans for large signs on all roads entering Spearman decided upon which will be at an early date. Every member of the Board of Directors is now busy out a plan of work which will be of personal benefit to every citizen in this city and community.

Man and Gulf Camp Play Fast Game Sunday

One of the fastest and from the point of view of the fan, the most enjoyable ball game ever played in Spearman, was played between the Spearman team and the Gulf Camp boys, on last Sunday afternoon.

Visitors hail from the Gulf Camp, on last Sunday afternoon.

Visitors hail from the Gulf Camp, on last Sunday afternoon.

Plans For Golf Course Looking Favorable

Plans are now being made by twenty five of Spearman's business and professional men for establishing a golf course and landing field. An option has been taken on one hundred and sixty acres of land suitable for this purpose within a two mile limit of the city. Twenty five have already signed up and it is expected twice this number will pledge themselves for purchase of land suitable for this purpose.

Borger Trade-Trippers Coming to Spearman

Mr. Granville, secretary of the Borger chamber of commerce, notifies Mr. Rakein of the Spearman chamber of commerce that the Borger Good-Will Trade Trippers will be in Spearman at 1:30 o'clock, June 20.

Mr. and Mrs. Wm. Barber and daughter, Mrs. Grace McMillen of Anthony, Kansas, and Mr. and Mrs. Clyde Barber and daughter Mrs. Francis Stump of Waka, were visitors in the Carl Hutchison home last Friday.

The likeness of the Junior class of Spearman High. They are a bunch of students and are expected to make an enviable senior class next year. Watch them go.

Milking Shorthorn Cattle Raisers Will Organize

A number of persons responded to the call issued by Mr. Sheets, county agent of Ochiltree county, and met at Perryton Saturday, May 24, for the purpose of organizing a "Milking Shorthorn Association." The meeting was called to order by Edsel Rogers at 2 p. m. and it was found that sixteen men interested in milking shorthorn cattle were present. Plans for perfecting a permanent organization were formulated and June 4 at 2 p. m. was the date set to complete the organization. An invitation is extended to all farmers and dairymen, interested in a proposition of this kind north of the Canadian river in Texas and the strip of Oklahoma to meet with Mr. Sheets at his office in a court house at Perryton on June 4, and assist in completing the organization. In this locality there has long been the need of a high class dairy cow that also has sufficient qualities to satisfy the most skeptical of beef buyers. A number of people in this territory who are interested in this type of cattle have found from investigation that the milking shorthorn fills this need better than any other breed.

This association is being organized for the purpose of securing registered milking shorthorn cattle of merit and for the production and promotion of sales for the members. Further information may be obtained from Mr. Rogers at Farnsworth, Mr. Sheets at Perryton and R. V. Converse at Spearman.

Chamber of Commerce Will Put Up Signs

The Spearman Chamber of Commerce is having large road signs painted which will shortly be placed on all roads and highways entering Spearman to a distance of thirty to forty miles from the city. The signs will be very attractive and will announce the number of miles to the city. The Lions Club of Spearman is cooperating very closely with the Chamber of Commerce in this and all other undertakings for the civic welfare of Spearman and Hansford county. The Lions Club want to be useful as well as ornamental while they are maintaining a social get-together organization. They are surely appreciated by all.

Plans For Golf Course Looking Favorable

Plans are now being made by twenty five of Spearman's business and professional men for establishing a golf course and landing field. An option has been taken on one hundred and sixty acres of land suitable for this purpose within a two mile limit of the city. E. B. DODSON, Finance Off.
Dated this 15th day of May, 1930.

The committee reports notes in The First National Bank of Spearman, amounting to \$1,175.00 made payable to Legion Building fund, due on July 1st to 15th, 1930.

It Pays to Advertise. Just ask anyone to identify the first seventeen amendments. — Chicago Daily News.

If the naval conference humanized the submarine maybe it could, with a little more practice, succeed in humanizing a truck driver.—Macon Telegraph.

A motorist sees no reason why men should not give their cars appropriate names. People who buy second hand ones often do.—Punch.

June Crop of Graduates To Add \$195,000 To Payroll Of U. S.

Cashing in on a college education should net this year's crop of graduates about \$28 a week and they should be lucky to get that if they are headed in the right direction, according to Douglas Fosdick, one of the 134,000 college students who will be graduated in June. Fosdick is editor of the Bowdoin Quill. Fosdick's modest estimate adds more than \$195,000,000 annually to the country's payroll.

"I won't turn up my nose at \$28 a week," says the student in an article in The American Magazine, "even though boys who graduated from high school with me and didn't go to college are getting more than twice as much in factories and trades. Indeed, if I could take a job with complete assurance that I was headed in the direction in which I want to go, I should consider that I was getting the better part of the deal with my employer."

"One executive explained to me that he finds that collegemen consider their education completed with their graduation. The college man learns his job and does it well, but does not use his spare time to advantage. Success in business comes through growth, persistence and adaptability, but it comes slowly. College men are impatient to get ahead at first, and despairing, become lazy and forget to learn the job just ahead of them.

"Unquestionably the social development that comes from going to college is an asset which, although it might be acquired outside of college, would have to be acquired more slowly. It carries with it a tolerance for the views of others. The study of philosophy alone does that.

"But I wish there were some way to teach a boy just what he is best fitted to do at or he graduates and how to begin doing it. As it is we have to make the best decisions we can, and hope they are right. That, as I see it, is the weakness of college education.

"I am glad I went to college, nevertheless, I think that the college has lived up to the promise the President made me—that a liberal arts college does not teach you how to make a living primarily, but it does teach you how to live."

MODERN WOODMEN PLAN BIG TIME

Local Camp Preparing Large Class Of Candidates; Refreshments Will Be Served

The Modern Woodmen will not meet next Tuesday night, on account of the Lions Club banquet, but in the meantime they are preparing a large class of candidates for initiation and planning a big time for the next regular meeting night which will be Tuesday night, June 10. The district deputy John W. Apel will be invited to be present to inspect the work of our local team, which, by the way, is up and coming in a style that sure means business. Every member of the local camp, and all visitors who may be in the city are urged to attend and enjoy an evening of real initiatory work. Refreshments will be served at the hall.

Don't forget the date and be on hand.

Revival Meetings At Church of Christ Begin Sun., June 2

The Church of Christ, Spearman, is to begin a series of revival meetings on Monday, June 2. Evangelist C. McClung of Fort

EVANGELIST C. MCCLUNG

Worth will do the preaching and J. W. Dennis of Erick, Oklahoma, will direct the song service.

These men are at this time in a very fine meeting at Perryton, with large crowds attending and a splendid interest.

These men are both well known in Texas and Oklahoma and you will enjoy hearing them.

They come to Spearman Monday night, June 2, closing at Perryton on Sunday night.

TEXAS A TOURIST STATE

Travel agencies in Europe and elsewhere are complaining that American overseas tourists trade has fallen off to alarming extent. Editors point out two reasons for this condition: one, of course, is the business depression in this country; but the chief reason lies in the fact that American travelers are learning their own country offers a variety of attractions quite comparable to the best of old world lures.

In these travel trends, Texas editors see an opportunity to develop within the state a profitable industry which distributes cash in liberal quantities yet depletes none of the state's resources and competes with none of its established businesses.

Within the tremendous empire which is Texas are found a wealth and variety of travel attractions which are challenged by few, if any, of the American commonwealths. There is the wide plains country, upon which persists the picture of the last frontier; there are the mountains of West Texas, surrounded by a semi-arid region of unique beauty; there are the forests of East Texas, there are miles of coast with incomparable beaches and travel byways; and, finally, there is the Magic Valley with its semi-tropical vegetation and its warm winter skies. To all of these attractions, too, must be added the lure which attaches to historic shrines, the romance of old civilizations, and the thrill of traveling highways first marked by the conquistadors and later dotted with America's own covered wagon caravans.

Were this not enough, there remains the lure that other civilization, and those other customs, which beckon from across the Rio Grand.

With a climate which attracts year-round tourist trade, and with scenic granders to support the little appeal there seems to be little reason why Texas should not take rank in the forefront of the tourist states.—Quitaque Post

Lion-Legion Ball Game Will Be a Wolf

A powerful ball game will be played in Spearman tomorrow.

The game is scheduled nicely and will begin at 4:00 p. m. Managers of the teams are: Walter Beck for the Lions and Marvin Lee for the Legionaires.

The line-up for this game will probably be:

Lions
Clogston, ss.; Pope Gibner, 2b.; Duncan, c; Russell 1b.; Holland 3b.; Wilmeth, p; Higgs, rf; Gibner, lf; Schneider, cf; Burns, Green, Davis, Chambers, utility.

Legion
Dixon, c; Lackey, 1b; Gerber, 2b; Richardson, ss; Rafferty, 3b; Thompson, rf; Lee, cf; Russell, lf; Foote, p; Dodson Mural Beck, utility.

Umpire:—Earl Pittman.

SILENCE OF THE GRAVE

Before Harry Houdini died, that greatest of magicians agreed with his wife that he would try to communicate with her from the spirit world, although he had long scoffed at spiritualism. Ever since his death in 1926 his widow has watched and waited for a message.

A few days ago Mrs. Houdini confessed that she had abandoned hope of ever having a communication from beyond the grave, and said: "The silence is impenetrable; there is only a void."

On the same day that she made this statement, Sir Arthur Conan Doyle, one of the most eminent of living spiritualists, resigned from the Society of Physical Research because the learned members of that body refused to accept as authentic any of the many reported messages from the "other world."

After 48 years of painstaking investigation of thousands of alleged communications through mediums and relatives of deceased persons, the society has not found a single one which has stood the test of scientific examination.

Very many sincere persons believe that they have had such communications, and no one could convince them to the contrary, so strong is the power to believe and imagination.

BOOZE ALWAYS A LAWBREAKER

It is argued that the eighteenth amendment is a failure because the anti-liquor laws are frequently violated. It is impossible to abolish drinking places by law, people say; every city has its illegal speakeasies.

That is true. Kansas City has them. Two years ago under a lax police administration it was reputed to have 1,000. The number now has been greatly reduced. But very likely there still are several hundred; 300 was a recent estimate.

That sounds bad, doesn't it? Perhaps 300 places selling liquor in violation of the law. But people who are shocked at these figures have short memories. They have forgotten the lawbreaking that went on under the old saloon regime.

Nearly twenty-five years ago, when the city was only half as large as it is now, the Beardsley administration made a survey. It found 600 saloons operating legally and about 2,100 operating illegally without paying the city license. There were three and one-half times as many lawbreaking joints as there were saloons that observed the law.

There were many times as many lawbreaking places in Kansas City under legalized liquor as there are now that the traffic is outlawed, although the size of the city has doubled. Booze has a long history of defying any regulation. It is much less successful in defying the law under constitutional prohibition than it was when the federal government kept out.—Kansas City Star.

WOULD YOU GIVE UP YOUR BATH TUB?

"How often," asked Ray Keith, local plumbing and heating contractor, "do we stop to think of the things we have in this modern and civilized country to make life more pleasant, comfortable and helpful? Think of the poor savage who has only a rude hut, made of mud and clay, without windows and with the rough ground for a floor with not even a comprehension of running water, bath tubs or kitchen sinks. Put yourself in his place for a moment and think how much you would enjoy living for a month under such circumstances. How soon would you be longing for a comfortable and clean home again, with both tubs and warm water?"

This year's girls basketball team of Spearman high boast of the fact that they lost but two games this past season, and won from Perryton high for the first time in five seasons.

International Sunday School Lesson

By DR. J. E. NUNN

FOR JUNE 1, 1930

General Topic:—Contrast Between Faithfulness and Slothfulness.
 Scripture Lesson: Matt. 25:14-30.
 14. For it is as when a man, going into another country, called his own servants and delivered unto them his goods.
 15. And unto one he gave five talents, to another two, to another one; to each according to his several ability; and he went on his journey.
 16. Straightway he that received the five talents went and traded with them, and made other five talents.
 17. In like manner he also that received the two gained other two.
 18. But he that received the one went away and digged in the earth and hid his lord's money.
 19. Now after a long time the lord of those servants cometh, and maketh a reckoning with them.
 20. And he that received the five talents came and brought other five talents, saying Lord, thou deliveredst unto me five talents; I have gained other five talents.
 21. His lord said unto him, Well done, good and faithful ser-

eral ability." People have different capacities, they vary greatly in mental ability, in physical beauty and strength, in social charm, in business skill, in spiritual insight. God would have every person giving in work according to his powers, but the world often places "square pegs in round holes." "Solomon's proverb, so often mistranslated and misapplied, 'Train up a child according to his way (to his bent)', and when he is old he will not depart from it," furnishes a true principle of education; and in the future we may hope that our youth shall be clearly taught the real basis of all true division of labor, as grounded in capacity and circumstances."—Rev. Daniel Shephardson, Ph. D. "And he went on his journey." There is deep pathos in this, for Christ knew that he was to take the journey from earth to heaven and leave men to labor without his visible presence.

The Talent
 The word talent meant originally a pair of scales; then the thing weighed; and so it was used for a unit of weight and money. Among the Phoenicians the weight talent was approximately ninety-six pounds. The monetary-talent had various values. It was never a single coin. A talent of gold was in some cases as much as \$60,000 of our money. The talent referred to here was perhaps the Syrian silver denarius, equivalent to about \$260. From its derivative use by Jesus in this parable talent has passed into nearly all languages as the word for natural endowments or gifts, faculty, capacity or ability.

Praise Worth More Than Blame
 "His lord said unto him, Well done, good and faithful servant." "There is a homely proverb that an ounce of praise is worth a ton of blame. Nothing helps people along the hard road of life, and the uphill road to heaven, like encouragement. At a hot race, the spectators on shore shout to the rowers, 'Well rowed! You're gaining, and every muscle is strained, and every effort made in response. Once at a great fire one of the firemen tried to reach a window and save the inmates, but the flames and smoke poured fourth and drove him back; he tried again, and failed. Then someone in the crowd cried, 'Give him a cheer!' and as it rang forth the fireman dashed forward through the fire and entered the room."—Rev. H. J. Wilmot Buxton.

Faithful Service Rewarded
 "Enter thou into the joy of thy Lord." The commendation given to the two-talent man was exactly the same, word for word, as the praise and the reward bestowed on the five-talent man. "The parable affirms that our term of service is to be followed by a day of judgment, in which every man's work will be tried, and either approved or condemned. The reports of the first two servants are strikingly similar: 'Lord, thou deliveredst unto me five talents; lo, I have gained other five talents.' 'Lord, thou deliveredst unto me two talents; lo, I have gained other two talents.' The words of the master's reply are particularly significant, for in them is conveyed the central truth of this parable: 'Well done, good and faithful servant; thou hast been faithful over a few things, I will set thee over many things; enter thou into the joy of thy lord.' He spoke precisely the same words to both. What matter if one had made five talents while the other had made only two? Both had doubled the money entrusted

to him. Both had been equally faithful. Both were worthy, therefore, of the same high commendation. For the principle upon which the rewards of the kingdom of heaven are apportioned is not care about quantity, but about quality and motive. Christ rewards no actions, but the graces that are made visible in action; and these can be as well seen in the tiniest as in the largest deeds. The light that streams through a pin-prick is the same that pours through the widest window."—Maclaren.

The Penalty of Idleness and Neglect, vs. 28-30
 The condemnation of this servant's idleness was severe. "Thou wicked and slothful servant, thou knowest that I reap where I did not sow, and gather where I did not scatter." Granting the truth of the servant's charge, it was no excuse for his neglect. The master is, of course, merely "answering a fool according to his folly;" he does not mean that the charge was actually true, but that if true, the servant was inexcusable. "Take ye away, therefore, the talent from him." The penalty of the failure to serve is the loss of the opportunity to serve. A few days before this Jesus had said to the barren fig tree, "Let there be no fruit from thee henceforward forever." The curse of fruitlessness is the perpetuation of that fruitlessness. "And cast ye out the unprofitable servant into the outer darkness: there shall be the weeping and gnashing of teeth." What a solemn and dreadful doom! The climax of the punishment of those who neglect to serve God in banishment from the presence of God.

Introduction
 The parable of the Talents is in many respects similar to that of the Pounds (Luke 19:11-27), and a great many people confuse them. The differences are much greater than the similarities. The Parable of the Pounds was spoken at Jericho as Jesus was going to Jerusalem; that of the Talents, on the Mount of Olives three days after his triumphant entry. The former was addressed to the promiscuous multitude; the latter was meant more particularly for the Twelve. In the former, the same sum of one pound is given to each servant; in the latter, one receives five talents, another two, and another one. The former illustrates different degrees of improvement of the same opportunity, with corresponding gradations of reward; the latter illustrates equal proportionate improvements of different opportunities, with equal proportionate reward. The former was designed to correct the error of those who were looking for the immediate coming of the kingdom of God; the latter was intended in conjunction with the story of the ten virgins, to teach that the right attitude of the disciples of Jesus toward his second coming is one of combined readiness and activity; while in both the episode of the unprofitable servant was meant as a warning to all. In view of these differences why should the two parables ever be confused?

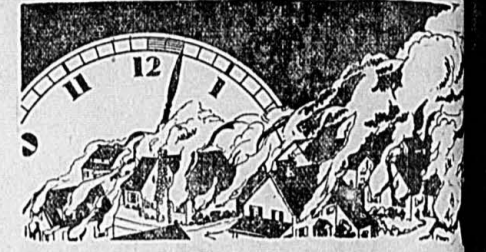

According to His Several Ability.
 "To each according to his sev-

Since that time it yields double as much."—C. W. Bibb.
GOOD GROWING MASH NECESSARY FOR CHICKS
 With growing chicks on range, the consumption of relatively large quantities of a good growing mash is essential to rapid growth. Recent studies of range conditions have shown that the average poultryman does not have sufficient hopper-feeding space or proper distribution of hoppers. Use a good commercial growing mash, preferably one containing buttermilk. The troughs should be sufficient in number and provide sufficient feeding space so that practically all the youngsters can get at the mash at one time.
 Through hoppers which hold a substantial volume of feed, have projecting roofs to keep the mash dry, and are so constructed as to keep the chicks out of the feed area. The best type to use. Hoppers five or six feet long are easy to move, provide feeding surface on both sides, and will take care of 75 to 100 birds to the hopper. These hoppers should be located fairly close to the water fountains, as birds eat more when allowed to drink between mouthfuls. The hoppers should be moved at least once a day, if only a few feet, to keep them on clean ground.—The Country Gentleman.

"THE LOVE PARADE" IS COSMOPOLITAN
 "The Love Parade," the screen's first original talking-musical romance is an international affair. The story is by an Hungarian. The libretto is by an American. The lyrics are by an Englishman. A Frenchman is starred. A German is director.
 The cast includes an Italian, a Welshman, a Czechoslovakian, a daughter of Spain and a Canadian. "The Love Parade," is a modern musical extravaganza, coming to the Lyric Theatre for 2 days starting Friday, includes in the cast fourteen American-born players in leading supporting roles.
 Thus, the talent of the world is assembled by Paramount to make "The Love Parade" one of the outstanding successes of the current season.

Illustration
 "An eminent merchant of St. Petersburg supported, at his own expense, a number of missionaries in India. Some one asked him how he could afford to do so, to which he replied, 'Before my conversion, when I served the world and self, I did it on a grand scale and at the most lavish expense; and when Christ called me out of darkness, I resolved that he should have more than I had ever given the world. At my conversion I promised I would give a certain per cent of what my business brought me.

Buying in your home town won't hurt anybody.
 The best way to solve the parking trouble is to walk.

The entire series will appear in this paper. Our readers are urged to read them carefully and clip them out for future reference.

KEEPING GOOD EGGS GOOD IN THE "GOOD OLD SUMMER TIME"

Observance of a Few Simple Rules Insures Keeping Qualities in Summer Eggs; Reduces Losses From Eggs Spoiled Before Marketing.

With an audible "Whew!" a perspiring old fellow deposited his week's "catch" of eggs on the store counter. "By golly!" he exclaimed, "it may be the good old summer time for some folks, but it sure don't do the egg business a mite of good!"

"Why, what's the trouble, Mr. Withers?" inquired the white-aproned clerk.

"Well," growled the older man, "I've got just 15 dozen for you today and by rights it ought to be 20, but the darned weather just ruins 'em."

"Let your roosters run with the hens, Mr. Withers?" asked the clerk.

"Sure," was the reply. "What else are you going to do with them?"

Then the young man who happened to be recently graduated from the state agricultural college, explained to his rather incredulous one-man audience that by allowing eggs to become fertilized he reduced their keeping qualities to an almost unbelievable extent. He concluded his impromptu lesson with this good advice: "If

your roosters are of no special value, kill them and eat them. If you don't want to do that, pen them up until you need eggs for hatching. A rooster does more harm than good any time outside the breeding season if allowed to run with the hens."

I think most people realize the correctness of the young clerk's statement, but his advice is not followed as generally as it should be. Hens will continue to lay eggs if there isn't even a rooster in the same county. What is more, eggs produced under such conditions will keep much longer and at considerably higher temperatures than the fertile eggs that result from permitting male birds to run with the flock at all times.

A fertile egg will soon begin to show chick development if exposed to a temperature of over 70 degrees. Higher temperatures cause faster development and any egg will become absolutely unfit for human food within four or five days after development starts. Since temperatures even higher than those mentioned are not uncommon during the summer months the desirability of "swatting the rooster" at that time is very important.

By keeping eggs infertile, the difficulty of handling them is greatly reduced. Another of the rules for producing good summer eggs is to keep them clean. A dirty egg has usually been wet and wetting destroys the natural film which protects an egg against the entry of the spores of decay. Keeping eggs from getting dirty is not nearly as difficult as it sounds. Provide plenty of clean nests; and clean them frequently. It is also advisable to keep hens indoors when the runs are wet and muddy. Should some eggs become soiled in spite of all precautions, keep them for home consumption. Do not wash them as washed eggs spoil quickly. Gather eggs at least once or twice each day.

A cool clean place is another essential factor in keeping eggs fresh and marketable during the warm days of summer. A basement is usually cool enough but should be dry and free from objectionable odors. No matter how good your storage facilities may be, however, market your eggs often in hot weather and the hotter the weather the oftener they should be gotten out of your hands.

Bad flavors in eggs are usually more common during hot weather than at other times. They may result from mold, absorption of odors or feeding of certain materials. Eggs held in a damp musty place will develop a mold which causes an unpleasant flavor, or storing eggs near onions, cabbage, kerosene or any other substance with a strong penetrating odor may cause bad flavors.

Most of the suggestions given above might well be kept in force the entire year round. The high temperature of summer months creates special conditions, however which make it doubly desirable to strictly fresh and palatable. Producers who are known to deliver only the best of high grade eggs can always command a higher price and can find a ready market for their output even when others are bewailing the fact that overproduction or some other ever present bugaboo has beaten their prices down.—Copyright, 1929, by Dr. L. D. LeGear, V. S.

COLOR RULING MODERN LIFE
 Rainbow Hues Tone-up Sales and Psychologists Say They Brighten Life

The riot of color which seems to have been on such a rampage for the past ten years apparently had all but run the gamut when there comes an announcement out of New York City—Where the unexpected is the most commonplace—to the effect that a skyscraper soon to be erected there is to be dressed up in all the shades of the rainbow.

Color has a wonderful effect on the mental attitude of the average citizen and perhaps it was the color riot which brought about the jazzers in music. Anyway for the past ten years color has been put into everything except the widow's veil.

Time was when a visitor at any of the mercantile establishments in Spearman did not expect and did not find an unusual array of colors save in the prints offered for mid-lady's dress, or in the toy shops where the kiddies playthings were gayly illuminated with all shades and hues.

That's all gone now and no longer is it proper to use the expression of the kettle calling the pot black. The pot is no longer black and neither is the kettle. Not only have these utensils donned gay colors, but nearly everything else in the kitchen has been dipped into some hue of the colorful rainbow.

If an article isn't dressed up with color nowadays, it does not secure much attention from the buying public. The manufacturers have discovered this fact and the demand for colored pigments has been enormous within the past decade. Just plain old black, white or gray has long since been taboo, and the manufacture of lamplblack has almost ceased to be an industry at all.

Anything you want can be had in any color you want it. Bath room fixtures, linen for the table, the bed room, furniture for every part of the house, wall paper, glass ware, enamelware, stoves, china-ware, woodware, your automobile, your fountain pen, the typewriter for your office—anything—it makes no difference—it can be had in any of the leading shades, and the demand in shades for one season differs entirely for another season.

Ten years ago—well, not so long as that—a man would have run out of a gent's furnishing establishment, if the clerk should have placed before him a suit of underwear in anything except white. Now look at him. The most colorful gown of a Japanese Miss does not stand a chance beside the gay undergarments that the men folks are now wearing. Funny thing about it, too, quite the unexpected, he likes the blooming things and the stores just as well not stock the old-style plain white garment. They will rot on the shelves. The Old Dears must have their little fling in this color rage just like the rest of the folks.

The sombre hues which one once found at the undertaking parlors have vanished. They have put color into the funeral in other ways than just the flowers. One can now pick himself out a casket in rose, violet or any other color his fancy runs in and the undertaker will be able to satisfy his whim.

This age of color has had a wonderful effect on the old order of things. In the old days when black and white and gray were the predominating lack of color in garments and what not, the mind reacted to them very clearly. A fellow had little thought for other than the daily routine of his business. He had little, if any, amusement. There was an occasional vacation or recreational trip, but there was not the fullest enjoyment in any of them.

Then this variety of color swept the country and what has happened. Folks move about in a livelier spirit. They take more interest in what is going on around them. They have ceased to pat their feet when they hear music, but bust right out in full fledged dancing—old and young alike. They just can't keep still. They find time they never dreamed they could spare from their business for a trip in search of pleasure of one kind or another. They have found that life is really worth living about by this color craze, as some call it.

But the skyscraper which is to be dressed up in all kinds of colors, just how is it going to stack up after its walls have been buffeted by factory smoke, rain, dust, snow and the attack of the elements in all kinds of weather? That is something which remains to be seen. It may have its psychological effect on the mind also and further develop our appreciation of the beauty of color, and then it may become such a smeary mass of discoloration that the excess of colors will disgust all and in that case—well something else will have to be tried.

through more of the right kind of farm storage. The only safe place to store combine wheat is in properly ventilated bins or in storage units that are equipped to cool and dry the grain, in case it begins to heat, by moving it from one bin to another."

Personally, we have our idea of the folks who play pinochle.

Girls, as we see 'em are wearing 'em longer, but no thicker.

Well, as far as we can make out they are still trying to decide the prohibition wrangle with hot air

NOT THE FIRST TIME
 Americans are apt to place undue importance on happenings in which their own country has been interested, just as the citizens of other nations do mainly because of a lack of familiarity with the accomplishments of foreign countries. In this connection it is interesting to note that when the United States took the lead in 1922 to limit navies, it was only following a precedent set by two South American nations.

Secretary of State Stimson pointed this out in a speech at a recent meeting of the directors of the Pan-American Union. He referred to the agreement by Argentina and Chile, entered into during the year 1902, in which he said "Chile and Argentina showed the world the importance and the great success which could be derived from a treaty of naval limitation." He frankly declared that he had been in ignorance of this fact until he began to prepare himself to take part in the recent London Conference.

"The experience of those two countries," continued the Secretary "also has shown us the importance of the results that kind of a treaty; and the extent of that method of allaying possible mutual alienation, and of laying the foundation for growth in international good will, was shown there just as later it was shown by the Washington Treaty."

IMPROVED SPECIFICATIONS
 Manager (to applicant for office boy vacancy): "Aren't you the boy who applied for this position a fortnight along?"
 Boy: "Yes, sir."
 Manager: "And didn't I say I wanted an older boy?"
 "Yes, sir. That's why I'm here now!"

THE SEEING EYE
 How do you visualize your job? The story of the three stonecutters leaves nothing of wisdom to be said. They were working on a stone. A stranger asked the first what he was doing. "I'm working for \$7.50 a day," he replied. "And you?" the stranger asked the second. "I'm cutting this stone," growled the laborer. When the question was put to the third stone-cutter, he answered, "I'm building a cathedral."

As one of the admirers of the so-called weaker sex, we rise to remark that it has acquired equality plus.

Those whose names appear below have authorized the Spearman Reporter to announce their candidacy for the nomination for the offices under which their names appear, subject to the action of the Democratic Primary elections of July 26, 1930.

NEW ICE REFRIGERATOR
 Keeps food absolutely safe!

Has 6 practical advantages which end odor taint, ice waste, and provide sufficient ice always.

- The food in your refrigerator may look safe but — is it? This new type refrigerator keeps food and milk safe beyond any question of doubt. Positively maintains a colder temperature than specified by the Bureau of Home Economics, U. S. Department of Agriculture. Thus meat always retains its natural, inviting appearance. No excessive drying up or shriveling. Other foods kept equally safe and appetizing both in appearance and flavor.
- Ice in this refrigerator keeps inside air pure and sweet. Mixed odors condense on the melting ice surface to be carried out.
- Ice in this refrigerator provides clean, safe, care-free refrigeration and preserves food beyond any question of a doubt.
- Low cost. Every home can afford the luxury of this type of refrigerator as they are made in all sizes suitable to every requirement.
- This refrigerator always provides a sufficient quantity of clear, pure ice for all home uses.
- A few cents per day assures this perfect refrigeration and a constant supply of ice at all times.

Combine Wheat Harvesting Problems

"The combine has not only cheapened the cost of harvesting but it has brought about beneficial changes in wheat production and along with these economic advantages is forcing radical changes in storage and marketing methods," says H. M. Bajner, Director Southwestern Wheat Improvement Association. Continuing he says "The combine saves labor, reduces grain losses, avoids long delays in threshing and leaves the straw on the fields. It clears the fields quickly, making early seedbed preparation possible for the next crop—killing weeds and saving moisture—thereby insuring better yields.

Combine Wheat Too Moist
 The combine is responsible for an immense amount of heat damaged and musty wheat. This is due to too much moisture in the wheat at the time it is harvested. The best way to insure dry combine wheat is to wait until the crop is thoroughly mature before beginning to harvest it, or else cut it with a binder or swather. Dew and rain should be permitted to dry off before going ahead with the cutting for best results, green patches as well as weedy wheat should be cut with a binder or swather and should be cured before threshing. Damp wheat should not be mixed with dry wheat. One load of wet wheat will lower the grade and quality of a bin full of dry wheat.

Must Store More Wheat on Farms
 With the present method of harvesting, as much wheat is made available for the markets in three weeks as was formerly available in two months. This is too much wheat to handle in such a short time. No marketing system can move it fast enough. Piling wheat on the ground provides temporary relief but it is wasteful and unsatisfactory. The only satisfactory solution, therefore, must come

**GET MORE IN LIFE,
ADVISES DR. CADMAN**

Many people are not asking
enough from life, for there is more
to be had if one will go at it
scientifically, declares Dr. S. Park-
es Cadman, famous preacher, in an
article in the American Magazine.
Dr. Cadman has formulated ten
questions and if the reader must
admit any of the accusations, he

"needs an earthquake to awaken
him," he says. The list is as fol-
lows:

1. Have you enough knowledge of yourself to understand what you can accomplish?
2. Are you standing still, or are you progressing?
3. Do you ever use your imagination to picture yourself in advance of where you are?
4. Do you focus your aims?
5. Do you see the relation between self-denial and self-expansion?
6. Do you wait for others to pull you along?
7. Do you strive constantly to raise the standard of your tastes and qualifications?
8. Do you mark time instead of marching?
9. Do you ask too little of religion, or morals, of marriage, or of any other factors or facts of life?

"Jot down on a sheet of paper three squares," Dr. Cadman recom-
mends further. "Let the first
stand for emotions, the second for
brain force, the third for will pow-
er. Then trace your actions, mental
and moral. Which of the squares
will contain the largest number of
motivations for these actions?"

There is but one answer, that rep-
resenting emotions. Far too many
of these are random outbreaks of
feeling, unrestricted impulses,
hunches that do not hunch."

CITATION BY PUBLICATION

The State of Texas,
To the Sheriff or any Constable of
Hansford County, Greeting:
You are hereby commanded that
you summon, by making publica-
tion of this Citation in some new-
spaper published in the County of
Hansford, Texas, if there be a
newspaper published therein, but

if not, then in the nearest county
in which a newspaper is published,
once in each week for four consecu-
tive weeks previous to the return
day hereof, Peter Scheffler, Jr.,
Peter Scheffler, Sr., and Peter
Scheffler, whose respective places
of residence are unknown, and the
unknown heirs, their heirs and
legal representatives of Peter
Scheffler, Jr., deceased, Peter
Scheffler, Sr., deceased, and Peter
Scheffler, deceased, respectively,
to be and appear before the
honorable district court of Hans-
ford County, of Hansford, Texas,
at the courthouse thereof, in the

town of Spearman, Texas, on the
25th day of August, 1930, then
and there to answer a petition filed
in said court on the 28th day of
May, 1930, in a suit numbered 78
on the docket of said court, where-
in E. M. McClellan is plaintiff, and
Peter Scheffler, Jr., Peter Scheff-
ler, Sr., Peter Scheffler, and legal
representatives of Peter Scheff-
ler, Jr., deceased, Peter Scheff-
ler, Sr., deceased, and Peter
Scheffler, deceased, respectively,
are defendants.

The nature of the plaintiff's
cause of action, is in substance, as
follows:

A suit intrapass to try title, for
rents, damages, costs of suit, re-
moval of cloud, and to quiet title,
to the following lands and premis-
es: Section or Survey 273, Block
2, Cert. 33-524, G. H. & H. R.R.
Co. Land, containing 640 acres
patented to Fred P. James on Mar.
5, 1875 by patent 595 in volume
1; plaintiff alleging that he was
damaged in the sum of \$25000;
that the reasonable annual rental
value of said land is the sum of
\$5000. Plaintiff pleads his chain
of title from the State of Texas,
and title by limitation of three,
five and ten years, and seeks gen-
eral and special relief, in law and
in equity.

Herein fall not, and have you
before the said court, on the said
first day of the next term thereof,
this writ, with your endorsement
thereon, showing how you have
executed the same.

Given under my hand and seal
of office, at office in Spearman,
Texas, this 28th day of May,
1930.

(Seal) J. E. WOMBLE,
Clerk District Court, Hansford.
2514 County, Texas.

The radio may have replaced
the cradle in many a home, but
the results so far as the neighbors
are concerned are no different.

Don't fool too much with

SPEARMAN, TEXAS

**Jazz Is Red-Headed, Says
Titian-Tressed Drummer**

BOBBY GRICE

**Who Also Adds That
Waltzes Are
Brunette!**

New York City.—When the
boys in the neighborhood yelled,
"Red Head, Red Head, ginger-
bread" at the sight of Bobbie
Grice's red pig-tails, Bobbie used
to shake her little flats, stamp
her feet and weep, though never
until she got home where the
boys couldn't see her.

This wasn't so long ago, be-
cause Bobbie is only twenty-one
now. But she is still stamping
her feet. That's because as leader
of the Parisian Red Heads, the
highest paid girls' band in the
country, no part of her small
body can keep still as she directs
one of the newest jazz hits.

Still Stamps
She no longer stamps in anger
or cries in sadness over her red
hair. In fact, she gives to her
titian tresses much of the credit
for her astonishing musical suc-
cess.

"Red heads make the best jazz
musicians, and I've got fourteen
other red heads in my band, so
don't consider this unduly per-
sonal," declares Bobbie. "Some-
how, the ginger-breads seem to
have the temperament that goes
with our modern music. In choos-

ing the members of my band,
and I've listened to hundreds of
girl musicians, I found that the
dark-haired girls could play the
soft moon-light type of rhythm,
but for the snappy jazz tunes,
the carrot-tops are best.

"Take the foxtrot 'What A
Girl! What A Night!' No brun-
nette could get as much out of
that tune as a red head. Jazz is
really a red head's music. Its
very tempo is red."

Well-Paid
The members of Miss Grice's
band get from sixty to one hun-
dred and fifty dollars a week, and
their leader urges more women to
enter the musical profession.

"It pays higher salaries than
almost any other profession open
to women," says Bobbie. "The idea
that women can play only the
piano and violin is absurd. If they
are talented they can learn to play
any instrument. There is a great
demand right now for cornet and
trumpet players, in fact, there
is a scarcity of all wind instru-
ment musicians."

Miss Grice, herself, is one of
the head-line drummers in the
country.

"And if a woman can play the
drums, and still please her audi-
ence, she can play anything, even
the mouth-organ," declares this
famous red-head.

**Why Citizens and Business Men
Should Belong to the C. of C.**

Because the Chamber of Com-
merce is the only agency equipped
to analyze and supply the com-
munity's needs.

Because, it is engaged in a con-
structive program for the best in-
terests of the community agricul-
turally, industrially and civically.

Because, it unifies the public
spirit of the city and breaks down
sectional selfishness.

Because, it helps create and ex-
press sound opinions on questions
affecting the welfare of Spearman
and its communities.

Because, the Chamber of Com-
merce is the logical organization to
lead in city and county develop-
ment.

Because, it links the city with
others in great patriotic move-
ments.

Because, it holds up an ideal of
civic development that tends to
the encouragement of what is
helpful and elimination of what
is harmful.

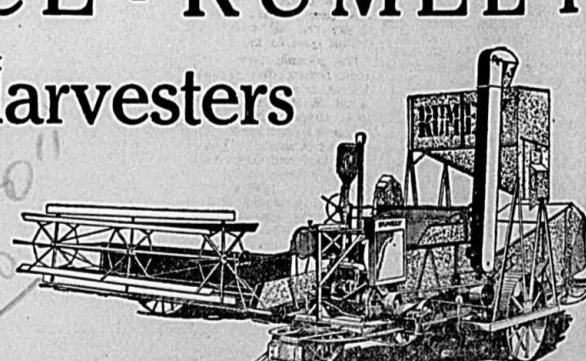

Because, it is the gauge of the
city's and county's enterprise,
prosperity and ambition, and re-
flects accordingly on every citizen.

Because, there is need of con-
centrated effort and unified action,
in civic betterment that demands
the vigorous support of every in-
telligent citizen.

PRINGLE ITEMS

Pringle Parent Teacher Assn will sponsor a candidate... June 13. The program will consist entirely of speeches by dis-

day. Sunday morning the children gave a general review.

Friday at eleven o'clock a number of the parents visited the school and all brought a picnic lunch, consisting of sandwiches, cake and ice cream.

This school was well attended and the children derived much benefit from the work.

Mrs. Mary Chastells and daughter Mildred returned from Kim Colorado with Mrs. A. E. Henderson to spend the summer.

William Parks has recently purchased a new Chevrolet coupe.

Mr. and Mrs. Richard Groves are also driving a new Ford coach.

C. E. Lieb and son Chesta made a business trip to Spearman Monday.

Phyllis Geoffrey is visiting her sister, Mrs. Argus Parks this week.

W. M. Lieb is on the sick list this week. He has an infection on his hand which turned into blood poison, but he was much better Wednesday.

Several of the farmers of this community attended the Spearman Equity Exchange meeting Tuesday afternoon.

Mr. and Mrs. D. A. Catchart visited with C. E. Lieb and family and W. M. Lieb Monday and Tuesday.

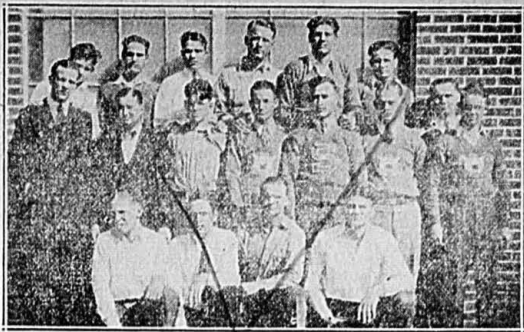

M. W. McCloy and son Willard went to Sterling, Kansas, after Marjorie, who is a graduate of the University there. They intend to return Thursday.

Mr. and Mrs. Jim Gibblin, Ruby and Robin Gibblin and Mr. Gibblin's mother are visiting with Mr. and Mrs. W. C. Womble and other relatives.

A number of the young folks were Berger visitors Sunday evening.

Henry Lane has his building almost completed and expects to be ready to go to work soon. Mr. Lane will do general blacksmith work and also run a garage. We welcome him to Pringle for this community is in need of a blacksmith shop.

There is being forty car loads of pipe unloaded in Pringle for the

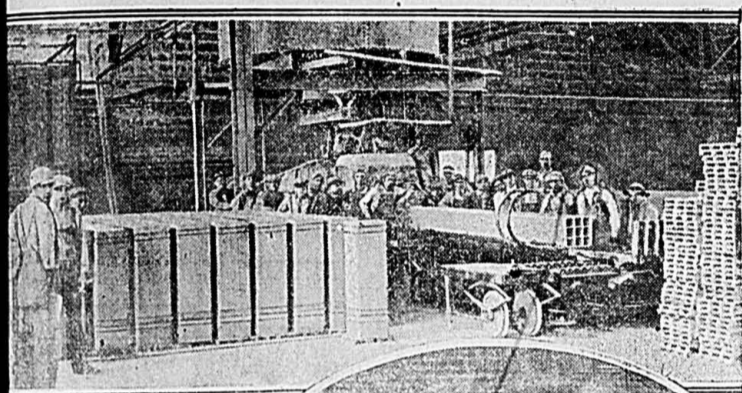

Lynx Club, Letter Organization, S. H. S.

The above picture does not represent the full membership of the club, but they are, from left to right: Upper row: Frances Reed, John Schubert, Cloyd "Tip" Windom, Orville Rippey, "Big" John Walker, W. R. Greever, R. L. Snider; middle row, Bill Burran, A. H. "Doc" Word, Jarvis Witt, W. A. Gillispie, Coach Billy Jarvis

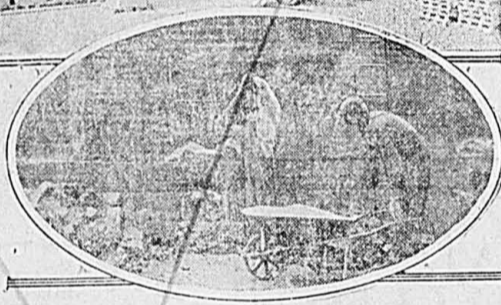

Garland "Tubby" Thorne, Ikey Vernon; lower row, R. B. Archer, C. A. Robinson, Carl Owen, and Walter Broadhurst. The Lynx Club has set as its goal for next year, the improvement of the grounds in front of both school buildings by planting lawn grass and providing means for watering it.

Common Clod Lends Aid In Beautifying American Cities

Conduit Made From Humblest Mineral Clears Streets of Unsightly Wires

the conduit is extruded from steam pressure it is cut to the proper length. The pieces standing on the left have been scarified on ends.

Salt glazing the conduit. The wheelbarrow contains salt and the workman with the shovel is putting a charge of salt into one of the fire boxes of the kiln to impart the glaze to the conduit.

processes of the "City Beautiful" movement, the later part of the last century and against the disfiguring effects of an increasing network of wires across the principal streets. But at that time there was no other known method of distributing electric current or running telephone and telegraph wires. It was until 1885 that engineers evolved the idea of underground conduits, and in the same year, 325,000 feet of single-conduit were installed, says the Western Electric News.

The clay is ladled out of the pan onto an elevator which carries it to a huge steam press or conduit-forming machine. The clay is extruded from large dies in the desired shape and then cut to the proper length, an allowance of about 10 per cent being made for shrinkage due to drying and burning. This "green" conduit is scarified on the outside of each end, the ends beveled, the dowel pin holes reamed and the ducts swabbed to insure smooth surfaces.

The conduit is now ready for the kiln. There are several types of kilns in use. Some plants use the dry floor method in which the conduit is placed on its end in a huge shed that is heated by steam. When drying the conduit in this manner, it is necessary to turn the conduit, when the drying process is the moisture settles to the bottom of the piece and the top dries more quickly.

heavy rains, snow and ice are apt to interfere with the mining operations, large stocks of the clay are stored on the surface. When the clay is hauled or carried on belt conveyors to the crusher where it is broken into small pieces, the largest about the size of a baseball. After passing through the sizer, it is conveyed to another place, where it is deposited in large bins, at the bottom of which are small openings through which the clay is conveyed to the dry pan or "grinding pan."

Other plants employ tunnel type dryers. The conduit is placed in large dryers on trucks or skids. Some are heated by steam and others draw the heat from kilns that have been "burnt off" and are cooling. In the latter method, the heat from the kilns is dry and readily absorbs the moisture in the conduit. The drying process must be gradual so as not to warp or crack the conduit and at the same time it must be thorough so as to dry out all moisture before the conduit goes to the kiln.

The kilns are now permitted to cool and this cooling process must be gradual, lasting from two to six days. If cooled too rapidly the conduit is likely to crack causing heavy losses to the manufacturer. At the end of the cooling period, the conduit is brought into the yard for the removal of any traces of salt drip and for approval of the manufacturer's representative. The conduit next receives its final inspection for this Company by the Sales, Inspection Department, and is placed in "accepted stock" or loaded in box cars for shipment.

The interior of the kiln is heavily glazed, the result of many "bakes." There is an opening in the kiln for fire boxes, loading and unloading. Fire boxes, usually ten, are set at regular intervals around the kiln. Some plants vials around the kiln while others fire their kilns with oil while others employ coal or gas. When conveying conduit to and from the kilns (or from one operation to another) the greatest care is taken to prevent breakage. Rubber tired trucks with heavy springs are employed for this work.

When the conduit is placed in the kiln for baking, it is set on "rings" in a vertical position in columns two, three or four high. These rings are narrow sections of conduit, the exact

FUTURE FARMERS CLUB

Top row left to right: C. A. Robinson, instructor; Pat Bennett, Robert Newcomb, Garland Thorne, Eddie McCauley, Homer Beck, Gilbert Donovan. Bottom row: Milton Neilson, Freeman Barkley, Henry Davis, Amrine Easley, Buster Kirk, Roy Wilmet, Albert Thorne, Elbert Kessler, Fendorf Schubert.

The Future Farmers of Texas have this year been partly responsible for a number of school improvements, such as construction of the tennis backstop, playground swings and football machines for our Lynx squad.

We sent our representatives to Lubbock to enter the dairy judging contest, a trip which proved educational as well as recreational. We plan more teams next year and expect to win something. Officers for this year are Freeman Barkley, President; Buster Kirk, secretary-treasurer; and Ikey Vernon, reporter.

new gas line. They intend to finish unloading this week.

Mr. and Mrs. Jeff Webb and Ross Chisum left for Knox city, Texas Friday. They are moving Mrs. Webb's father and mother to Pringle.

Virgie Mae Parks is at home now and is slowly recovering. H. B. Parks is on the sick list this week. We sincerely hope that Virgie Mae and H. B. recover speedily.

Merle Groves is visiting with Virgie Mae Parks this week.

MEDLIN NEWS

Mrs. E. J. Seitz visited in Amarillo last week. Her niece, Mrs. M. R. Hooper and small daughter, Delores returned with her to spend the week.

Mr. and Mrs. W. G. Gillispie came from Hooker Sunday to spend the day with Mr. and Mrs. Walter Gillispie.

Mr. and Mrs. James McNulty and family spent a week in Breen Colorado. Miss Lyndall Wiley, a friend of theirs came home with them to spend several weeks.

Mr. and Mrs. Buck Seitz have been moving from the Medlin place to the old Edwards place.

Mr. and Mrs. Jess Edwards have been building them a double garage the past week.

J. H. Gray has been bed fast for the past two weeks, with intestinal flu. He is up at this writing.

The Medlin school will be out this Wednesday. Miss Embry, the teacher has taught a very successful school. She has taken special interest in the beginners and all have done excellent work in their grades. As far as we know Miss Embry will teach our next term of school.

Mrs. Lucile Knudsen from Texline visited her parents Sunday, Mr. and Mrs. James McNulty.

Mr. and Mrs. Lon Noel, from Pampa and Mr. and Mrs. Bear, visited in the home of James McNulty Saturday and Sunday.

Mr. and Mrs. J. G. Noel and family, Mrs. B. J. George, Mrs. Sarah Beebe of Pampa visited and spent the day with them.

O. L. Williams' mother from Pampa has been with them the past three weeks.

Sunday afternoon the Medlin district neighbors and friends all met and spent the afternoon on the Palo Duro creek in honor of the last day of school. Plenty of dinner and ice cream were on hand. Those present were Mr. and Mrs. O. V. Baston, with three of their nieces, Miss Irene McNulty, Miss Diley, Burnus Hanson, Mr. and Mrs. Carruth and children, Mrs. Kate Gray, Mr. and Mrs. O. L. Williams, Mrs. Ora Schroder and boys, Mr. and Mrs. Walter

Memorial Day

WITH heads bowed, we recall tales of courage and sacrifice, accounts of battles won and lost by a nation that has ever upheld humanity's highest ideals.

We place wreaths of homage at warrior graves, and salute the heroes who live. May our ritual be more than a gesture. May it be a prayer for peace—today and tomorrow.

Twenty Second Year

STRAINS OF HIS SONGS TOO MUCH FOR SON

Yonkers, N. Y.—Singing in the bathtub, yodeling in the rain, crooning in the kitchen, Edward Wiley probably was the happiest man in the world. But his relatives and friends couldn't stand the strain, and his son, Edward, Jr., had him arraigned on a charge of disorderly conduct. The son wants him legally gagged.

With all the controversy over the worth of straw votes it seems to be about time for a straw vote to determine their value.

A FAMILY AFFAIR

"Did you give the penny to the monkey, dear?" "Yes, maama." "And what did the monkey do with it?" "He gave it to his father who played the organ."

It is remarkable how peace conference stimulates the building of battle ships.

A psychologist asserts that half a peanut provides enough energy for a half hour's hard thinking. Now we know the source of the term peanut head.

MR. AVERAGE FARMER BROADCASTS

Well folks, I'm back at STATION YFBL—Yours for Better Livestock—after a long trip last week.

While I was on my trip I visited a large list of my farmer friends, and learned some things which rather surprised me. I found some farmers who really have made a success of dairying but who have about decided not to give their cows any grain this summer.

One thing I noticed in particular on this trip, though, was the fact that in nearly every case the most prosperous farmer, the one who is out of debt and has a nice car and keeps his buildings in good condition, is the one who is paying most attention to his feeding—his is the one who says, "You bet I'm going to feed my cows this summer. I'm going to feed a balanced ration, too."

The farmer who has fed during past summers and has learned that it pays knows better than to quit feeding, just because prices are not quite what they might be. He's not going to let his cows starve and run down, and then have to give enough milk in the fall. He's going to cut down on the grain, to be sure, but he's going to see that his cows don't go hungry.

The farmer who keeps his cows producing at their highest, with some protein concentrate like linseed meal, or high quality dairy feed is the one who will get the biggest profits next fall. A good ration which has been recommended for high producing cows while they are on abundant pasture is as follows: ground corn, hominy, or barley, 300 pounds; ground oats, 400 pounds, and a good 20 per cent dairy feed, 300 pounds. About one pound of this mixture should be fed for each six pounds of milk produced.

Just remember, a cow gets hungry for something besides grass.

See you again soon, Station YFBL—Yours for Better Livestock.

THE FARMER'S DIFFICULTIES

Business is uncertain in these days. Changing public taste, new inventions and developments, are playing havoc with many an old and well established industry. To enter business is to gamble against a thousand and one uncertainties.

But we doubt if any business is faced by more uncertainty, greater danger of loss over which the owner can have no control, than farming.

When the crop is good there is apt to be a surplus with a chaotic market and low prices to the producer. Then the farmer works hard and gets little for his effort.

When the season looks promising and he begins to plan on some nice income from his fruit or grain, along comes a killing frost, or a drought, or a new pest that cuts his production to a fraction of what he naturally expected and then though the market may be good he has nothing to sell.

It is easy to offer advice to the farmer when one knows little about the realities of farm life. It is easy to tell why many farmers fail and how all could succeed, but it is vastly different to do it. As yet no individual or group has been able to help him remove these great uncertainties that may set him back a year or more in his financial progress.

When it comes to gambling in business, we've got to concede that the farmer takes the biggest chance of any business group. He is constantly threatened with literally thousands of dangers that undermine or menace his prosperity. Is it any wonder that at times he does have a kick about hard luck?

INTOLERANCE

An ugly aspect of human nature is shown in waves of religious prejudice and intolerance. Occasionally this feeling breaks out in isolated communities. At other times it spreads over great areas. All one can do is to condemn it continually, in the effort to make people see the error of their thinking.

How foolish religious intolerance and prejudice really are. One's religion, as the writer has heard it put, is largely a matter of birth. Childhood training and impressions determine one's religious views in the vast majority of cases. Most of the members of any faith would have belonged to a different sect had they been brought up from childhood under different religious training.

For this reason prejudice toward another because of the way in which he chooses to worship God is founded on blind passion and not enlightened reason.

To get a view of what religious intolerance has meant in times past, the writer would merely refer one to an account of the thirty years war, and other conflicts that arose before men learned that it was their duty to kill those who held different beliefs from their own.

HORRORS OF DISARMAMENT

First Sailor (searching vainly for his ship after a few hours' leave): "But she was 'ere when we went ashore, wasn't she?" Second Sailor: "It's them blokes at Washington. They've started scrappin' the Fleet, an' begun on us."

The pedestrian has the right of way, when he's tiding in the ambulance.

HE KNOWS

Fihu Mink of Long Island learned to make it from an advertised recipe and will not have any trouble making it any more. The funeral was held from the house.

LIVING VS. MONEY

Go up and down the streets of Spearman and you can, without difficulty, pick out a dozen men whose earnings might be greater if they were engaged in business in a large city. They are capable, adaptable to different conditions, and well grounded in the details of their own trades. Many of them are aware of this fact, but they choose to remain here in Spearman with a much more modest income than they might enjoy.

What's the reason for this? Because these men are too intelligent to accept money as a substitute for good living, is the writer's opinion.

While the great city may be the ideal place in which to make money the small community is the ideal place in which to live. Here one is an individual, not merely an atom in a crowd of a million or more strangers. Here one can drive out of town, without crowding out of congested highways, can enjoy nature and solitude with a minimum of effort. Here business is made pleasant with friendly, personal human contacts. Here the comforts of a fine home with spacious lawns and gardens are yours without the enormous financial outlay necessary for such luxury in or near a great city.

True one might make more money by working or conducting a business in Chicago, New York, or Detroit, but one would not escape the pressure of congested population, one would not be able to enjoy a home surrounded by trees and lawns, one would not be able to drive into the country frequently and enjoy the thousand and one forms of recreation that nature offers.

After all most of us are here to enjoy life and not merely to accumulate wealth. It is the intelligent man who selects that which means most in the way of comfort and happiness.

ATTITUDE

One's success is determined largely by attitude—toward one's fellow citizen and toward the community. Approach people with a hostile attitude and you will usually be met with opposition. Approach them in a friendly way and you find them receptive to your proposition.

Treat a community as a good, live town and you will find it to be exactly what you imagine. Treat it as a dead town with no spirit, and again you will see and find just about what you are expecting.

It is too bad that the assessor doesn't value your old car at as low a figure as the garage man when you are seeking to make a trade.

PUBLIC IMPROVEMENTS

There seems to be a rising tide of public sentiment opposed to the extensive program of public improvements that is being carried on throughout the country. Taxpayers feel that our various governments, state and local particularly, are living beyond their means.

The property owner struggles to meet special assessments and high taxes to pay for these vast works, including larger and better schools, finer public buildings, better streets and highways, elaborate systems of street lighting. So much of his opposition is justified. With the present inequitable method of charging the public for these notable works, the land and property owner is overburdened.

But looking at the matter from a broad, economic basis, it appears that these public improvements are justified. In every department of business we are confronted with a great surplus of merchandise and goods. The machine has to produce. This has led to economic difficulty with extensive unemployment as a result.

In other words we have a surplus. We are using it in the clumsy and uneconomic method of putting men out of work and creating widespread hardship. If this surplus of man power can be devoted to improvements that will make our communities better places in which to live, that will help to develop a higher and finer civilization than the advocates of community progress and expansion of our various programs of public improvement, have an excellent opportunity to justify their position.

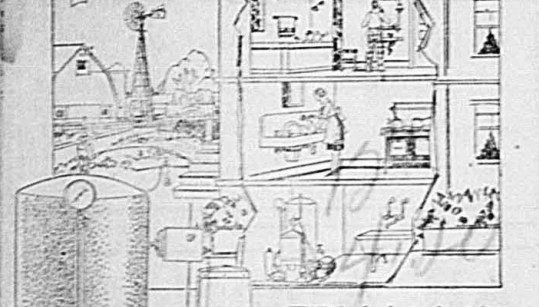

JUST FOOLISHNESS, THAT'S ALL

Every once in a while something bobs up to show just exactly how foolish governments can be. The unrestricted, and practically unlimited sale of submachine guns to criminals, gangsters and desperadoes illustrates the observation.

Who doesn't remember the valentine day massacre in Chicago, where seven men were lined up against a garage wall and shot to pieces. One example of that kind should have been enough to secure the passage of any needed legislation to regulate the sale of submachine guns.

However, the market is still open. Any dealer who wishes to may sell these murderous weapons to anybody who buys them. Investigations around Chicago revealed that one dealer sold eight death dealers to fictitious persons in Wisconsin, and it doesn't take an active imagination to know where they went. Why arm men who kill officers?

RUNNING WATER in Your Home

END the drudgery of carrying water. Modernize! Install a Dempster Running Water System and enjoy real comfort and convenience in your home or on your farm. Made for farm and suburban homes. It's economical to buy and run. Investigate this modern water system. Dempster Water Systems are built for windmill, gas engine or electric power. See your Dempster dealer or write us for complete information.

Miss Katrina Van Televox Mechanical Servant, Coming

Miss Katrina Van Televox, Mechanical Servant, developed by the Westinghouse Electric and Manufacturing Co., will appear in person at McLain on Friday, June 6, at 2:30 and 7:30 p. m. Katrina will be brought to Spearman by the Texas Louisiana Power Company.

There is a real opportunity for citizens of this community to witness the race of electrically actuated dummies performing their startling feats. With no assistance than a command from her master, Mr. Miles, who accompanies her here, she automatically turns on an electric vacuum cleaner, runs a vacuum cleaner, fans and lights, and in general makes herself useful as a household servant.

Miss Katrina is a sister of Herbert Televox, who, if you remember, started two years ago with his accomplishments as an electrical robot servant, and is now taking the place of the robot in the operation and control of power plants and light stations. Miss Katrina, how-

ever, confines herself to domestic duties and will in person demonstrate the Westinghouse Flavor Zone Range. She will talk, run a sweeper, operate lights, turn on a fan and do other unbelievable feats. Mr. Miles, representative of the Westinghouse Electric and Manufacturing Company, and also Katrina's boys friend, says that she is less than a year old and cannot walk yet, but he expects to have her running around in a few years.

Katrina unlike most women, responds to a low crooning whistle, the more you whistle the more she does, but says Mr. Miles, "If you don't get the right tune, she is liable to play the victrola when you want her to open the garage doors."

The Televox mechanism is considered to be one of the most remarkable electrical or mechanical inventions of the last ten years, and is perhaps the nearest thing to a human being that has ever been created. Herbert and Katrina, members of the Televox family, answer the telephone, respond

to commands given them over the phone, tell what they are doing and when you say good-bye to them, hang up the receiver. They are the result of six years' study and research and are the culmination of the efforts of some of the most brilliant engineers in the country.

Roy Wensley, Westinghouse Electric Engineer, is the man from whose head sprang the idea of a race of automans to do actual work; this differs from Karl Kapeck, Author of R.R.U. in that Wensley's family of robots actually does work formerly done by human beings.

In practical use, robots are not clothed in the body of a dummy, but are intricate machines constructed to perform certain functions in the operation and control of sub-station, power plants, airport lights and water reservoirs. Three such automans are now watching three reservoirs in Washington, D. C., and when called by telephone from the War Department, make accurate reports as to the height of the water.

Miss Katrina Van Televox will appear here in guise of a demure Dutch lass, symbolic of Flavor Zone cooking with the Modern Westinghouse Electric Range. She has been for some time on a National tour, which has taken her to

most of the largest cities in the United States and hundreds of thousands of people have witnessed and marveled at her performances. She is said to represent a cost of \$22,000, and is a sister to Herbert Televox, a metal man who has been shown before many scientific gatherings. The original Televox which toured the country under the auspices of the Westinghouse Company receive more publicity than did Lindbergh's Paris Flight.

The Texas-Louisiana Power Company have secured this marvel of the age for a limited time and the citizens of this community are exceedingly fortunate to have the opportunity of witnessing this demonstration free of charge, as guests of C. E. Whippo, division manager of this, our power company. There will be held both afternoon and evening performances, so as to insure every individual an opportunity to attend. Come early and secure a seat. There will be put forth every effort possible to have seats for all, but such a remarkable occurrence will in all probability, draw a record-breaking crowd. Never before have these robots been shown in as small a community as this, and only through the courtesy of the Texas-Louisiana Power Company in cooperation with the Westinghouse Electric and Manufacturing Company has it been made possible for you to have this great opportunity absolutely free of charge.

Demonstrations will begin at 2:30 and 7:30 p. m.

"THE LOVE PARADE" HAS RICH SETTINGS

Settings rich beyond the dreams of the most visionary of interior decorators have been provided for the talking screen's first original musical romance, "The Love Parade," showing at the Lyric theatre Thursday and Friday.

"The Love Parade" is a tuneful extravaganza of the intimacies and intrigues about the throne of a very modern mythical kingdom, or rather queendom, with Jeanette MacDonald playing the queen and Maurice Chevalier starred as her military attaché, who is recalled from a foreign capital for having been involved in numerous scandalous affairs with the lovely ladies of the diplomatic circle.

Victor Schertzinger wrote the ten big hit songs and Ernest Lubitsch directed this highly musical and sophisticated comedy.

---TO--- WHEAT GROWERS NORTH OF THE CANADIAN RIVER

The North Plains Mutual Hail Insurance Association is following in the footsteps of the Pampa Mutual, which has paid its losses during the last 12 years at a cost to its members for actual hail loss and overhead expenses of 4.3 per cent. An additional 2 per cent has enabled the company to create and maintain a reserve fund of approximately \$162,000. Thus the total amount required for this company to meet its obligations and place the necessary reserve, that makes it a solvent institution in the banks of Roberts, Gray and Carson Counties is 6.3 per cent of the risk assumed.

Insurance costs back to those financial centers in New York and New England?"

We are mutually interested in association welfare, therefore in placing your insurance let us scatter the risk as much as possible and avoid heavy risk in dangerous territory. When we have built up sufficient reserve, we can with safety chance greater risks or underwrite heavy risks, but at this time reduce the risk to the minimum. At present give us that 2 1/2 percent that you lose to the Old Line insurance before you begin to collect your losses, and if you then have a 20 percent loss, that, returned to you by your mutual will enable you to pay your Old Line premium.

There is no deductible clause in our contract. The Old Line rate in Lipscomb, Ochiltree, Hansford, Sherman, Dallam and Hutchinson Counties is 11 percent cash, note 11.55 per cent; Deductible clause 10 per cent.

Now if we measure our mutual relationship that should be founded on brother love, by the sordid dollar, and sad to state it is too often true, this fair daughter of the North Plains is entitled to three embraces from you and an additional approach for every single embrace given those old sisters back in New York and Boston. Make your own figures and then ask yourself the question, "Why are we sending three times as much as this hail in-

Let us bear in mind the slogan: "True co-operatives will co-operate with each other." Again, there is such a thing as business courtesy even among business rivals. They may pour it on us, and as long as we can return the compliment in an honest and honorable sort of way we may pour it on them. We may even be found at luncheon with these Old Line insurance agents, because we propose that they write our insurance and by way of mutual return we propose to write theirs. Even yet there are some farmers who must have Old Line Hail insurance, and they are cordially invited to consult our directors, or come to the home office for dependable and reliable information.

BY ORDER OF THE BOARD.

Geo. M. Whitson Geo. T. Leatherman
SECRETARY-TREASURER PRESIDENT

the mechanical girl!
No brains, but — ?
She'll be here - - -
at the

McLain BUILDING
Spearman, Texas
Friday, June 6, 2:30 and 7:30 p. m.

Katrina is devoted to her master. He'll come along, too. You'll like him. He's almost as pleasant as Katrina. She always does exactly as he tells her—and she never talks back!

She's a marvelous girl. In fact, she's a marvel! She's one of the most remarkable mechanical inventions of the last ten years. The result of many years' study and research. You won't believe your eyes—or your ears!

Postpone the lodge, or the jury, or anything else to see Katrina. The whole world is admiring her. She'll be the best show in town. You'll miss something if you fail to see her! Come early!

In person! Not a movie!
Katrina is the nearest thing to a human being that has ever been created. She's touring the country in the guise of a demure Dutch lass. And she'll startle you with the things she does.

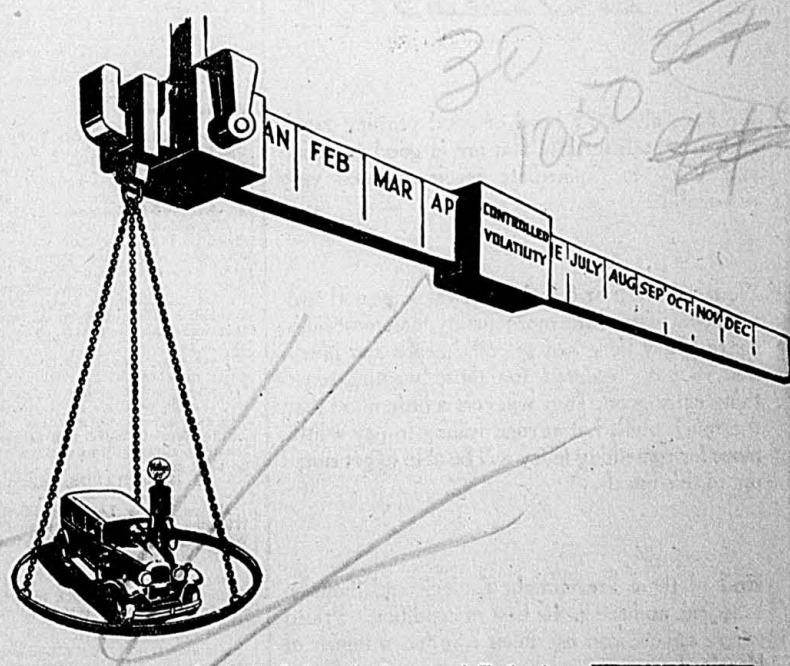

She'll turn on the vacuum cleaner, for instance. Make a percolator of hot coffee. Turn on the lights. Toast slices of golden brown toast. Answer the telephone—take the message—and hang up the receiver.

And all the time she wears a smile! She loves work. Of course, being a woman, she likes domestic work best. But she might be persuaded to open the garage doors. Honk the automobile horn. Or play the victrola.

And how she loves to cook! Believe it or not, she's a mighty good cook at that. She has a string of satisfied admirers to vouch for that.

And if you're careful how you ask her—she might even talk. As to what she'll say—well, you never can tell about a woman.

CONTROLLED VOLATILITY BALANCES GASOLINE TO FIT EACH SEASON

Seasons change. So do the fuel needs of your car! That's why Phillips developed controlled volatility—the principle that balances gasoline to fit each season. Miss Etna Sue Lusk Entertains With Party
 Little Miss Etna Sue, daughter of Mr. and Mrs. Fred Lusk, was the charming hostess to twenty-nine little friends last Friday afternoon from three to five o'clock at a party in celebration of her fifth birthday. The little folks played a number of games in the house and on the lawn and were then called in for the birthday feast which consisted of a beautiful birthday cake, ice cream and iced grape juice, served by Mrs. Lusk assisted by Mrs. Pope. Little Miss Louise Pope of McLain, Texas, was an out of town guest at the party. Etna Sue received many birthday remembrances from her friends.

Mr. and Mrs. Marion Close are the proud parents of a 9½ pound boy born Monday, May 26. The young man has been named Willie Pierce.

Live Wire Sunday School Class
 Lend me your ear! The best thing I can possibly tell you about is our splendid Sunday school class of fine young people, the live wire class. But say, come around next Sunday and let us show you. MRS. W. J. BLACK, Teacher.

Methodist Church
 Services are as follows: Sunday school at ten a. m., P. A. Lyon Superintendent. Morning worship at eleven o'clock. Evening worship at eight thirty. We extend to you a hearty welcome to all these services. Many strangers are here and we welcome them to our church.
 H. A. NICHOLS, Pastor.

Mrs. D. B. Kirk Entertained Senior Class With Farewell Party

Mrs. D. B. Kirk entertained the members of the Senior class and the high school faculty with a farewell party at her home in the Reeves Addition. Several hours were spent playing games. An enjoyable evening was spent in spite of the fact that this was the last party at which this group of young

people will all be present. Dainty refreshments were served at the close of the evening. Mrs. Kirk is the room mother of the Senior class.

Missionary Society
 The Missionary Society of the Methodist church met at the home of Mrs. L. W. Mathews Wednesday afternoon. Seventeen members were present. A missionary voice lesson was given by Mrs. Delon Kirk. On next Tuesday at eight p. m. the society will serve a banquet for the Lions Club. The meeting next Wednesday will be at the parsonage.

W. M. U.
 The Woman's Missionary Union of the Baptist church met with Mrs. J. E. Gower Wednesday afternoon with thirteen members present. We were glad to have Mrs. Collins join us and were also glad to have Mrs. Powell as a visitor. The study of the manual was completed at this meeting and the examinations will probably be taken some time next week. Mrs. J. H. Richards, our pastor's wife, who attended the Southern Baptist Convention at New Orleans gave a report of the women's work in Texas. The W. M. U. members have raised for home and foreign missions, training schools etc., \$497,458.98. The entire south has raised \$2,693,741.67. We are also glad to report that our local organization is one of the fourteen to attain the A-1 standard. We also have 69,472 tithers in W. M. U. This is only a part of the things the ladies have accomplished the past year, and with the help and cooperation of each member our president Mrs. E. L. Bailey, plans to accomplish many worth while things the coming year. We wish to thank Mr. Holland and the Parhandle Lumber Company for the liberal donations they gave on the paint for the parsonage. The ladies will meet with Mrs. J. H. Richards next Wednesday afternoon in a bible lesson. Everyone is welcome to attend.

P. T. A. Hold Final Meeting For This Term
 The Parent-Teachers Association met in the Home Economics department of the school building last Thursday afternoon in the last meeting that will be held for this school term. A large crowd was in attendance. Final reports were given by the chairmen of all the committees and by the secretary and the treasurer. Interesting talks were given by Supt. Snider and by the president elect, Mrs. J. E. Womble, on the betterment of the school and the P. T. A. for next year. At this meeting a life membership to the Parent-Teachers Association was presented to Miss Ethel Deakn. The cost of this membership which is twenty-five dollars was given by the Junior class and by members of the local P. T. A. The meeting closed a very successful year for the organization but much greater things are planned for next year. The service of appetizing refreshments was the final number of the program.

First Christian Church Will Hold Pentecost Services June 1 to 8

Preaching both Sundays at 11, Sunday school at 10 and Christian Endeavor at 7:30.
 Preaching each night, except Saturday, June 1 to 8 inclusive. Topics appropriate to the season. Come!
 JASPER BOGUE, Minister.

Baptist Church

Last Sunday was a good day at the Baptist church. There was no preaching service at the morning hour because of the service at the school building, yet we had one hundred and ten in Sunday school. We had a great trip to New Orleans. The convention was well attended, more than three thousand messengers being there, and not one low note was sounded. On our way down we had to drive through 5 miles of water at times that was high enough to come up in the car.
 Now since school is out let every member put his shoulder to the wheel, pull together and make the church work go as it should. There is a welcome awaiting you at the Baptist church and Sunday school so come with us and we will do thee good.
 J. H. RICHARDS, Pastor.

Misses Nettie Lee and Lucille Williams came from Amarillo Wednesday for a few days visit in the D. W. Hazelwood home.

Wednesday in the home of Mr. and Mrs. Ralph Trower. Mr. and Mrs. Meshler are the parents of Mrs. Trower and the Thomases are cousins.

Eastern Star Notice

There will be a special meeting of the Eastern Star on Tuesday night, June 3. The district ground deputy will be here and all members are urged to attend.
 MRS. J. H. BUCHANAN, W. M.

Cleverness and Eloquence Promised The May-Born

By PAULINE

"Who first beholds the light of day in Spring's sweet flowering month of May
 And wears an Emerald all her life
 Shall be a loved and happy wife."

ALTHOUGH you might not realize it by her hair, Queen Mary of England is an extremely clever woman. Her father-in-law, the late King Edward, discovered the fact to his own chagrin when she was only a little girl who did not want to do what he commanded, and since then it has been evident in numerous ways as everybody who has followed the Queen's life knows.

Astronomers would say it is because she was born under Gemini, that airy, intellectual sign of the zodiac ruled by the planet Mercury, whose influence begins on May 22nd and lasts until June 22. For persons born under this sign, according to astrology, are always very clever, with extraordinary keenness of perception and versatility of talent.
 Their minds work swiftly and adroitly in handling situations and people, so that they usually excel as politicians or diplomats or lawyers. Indeed, they exhibit remarkable facility in almost anything they attempt. In an argument their thrusts are rapier-like, and being naturally very witty, their wit is sometimes reckless. A clever man is apt to mean more to them at the moment than a friendship of long standing, though, as a rule, they seem to know intuitively just how far they can risk hurting a person's feelings.

The emerald is the birthstone for the month of May, and its flower is the hawthorn. As a talismanic stone the emerald was highly regarded by the Magi of the Middle Ages, who claimed that it helped them to foretell events. It became known as the Gem of Intuition, and also enjoyed a reputation for inspiring eloquence.

As long ago as Cleopatra's time, emeralds were worn as charms by the Egyptian nobility, and the Queen whenever she wished to do special honor to any of her nobles presented him with an emerald engraved with her own likeness. The ancients believed that the emerald had power to confer favors, sharpen the wit, strengthen the memory and insure martial happiness. In more recent times it has become known as the emblem of true love and happiness, as well as the symbol of eternal spring.

Registered HEREFORD BULLS

We have about 75 head of good yearling ranch and farm bulls for sale that are in good condition and ready for immediate service, priced very reasonably.

We also have 6 or 8 high class yearlings and two-year-olds with a little more quality than most bulls. Extra heavy bone and splendid heads and horns, that we have reserved for those wanting something extra good. They will cost a little more than the ranch bulls, but anyone willing to pay a little more for something fancy will be able to get suited out of this bunch.

Most of these are straight Gudgell and Simpson breeding, and are in the best of condition. Priced where anyone can use them who has a bunch of Hereford cows.

Write us for full particulars and prices.
