Child Welfare Work

At a meeting of the Home Mission Society held at the home of Mrs. G. P. Gibner, Wednesday afternoon, a letter from the State Board of Health to Mr. Clark, was brought to the attention of those present. In this letter, Dr. Downs, Director of the Bureau of Child Hygiene and Public Nursing, proposed to send an itinerant nurse to Hansford county for three months if the people here would provide for her maintenance while with us. The proposition was received with much enthusiasm and it was decided to accept it. Committees were appointed as follows: Home Committee: Mrs. J. R. Collard, Mrs. H. E. James and Mrs. P. M. Maize. Publicity Committee: Mrs. R. W. Morton, and Mrs. W. A. Clark.

The work of the nurse will be to give public health lectures at the school houses in the country, examine the children and discuss with the parents possible ways of improving any conditions that may be found that are not as they should be, and possibly to distribute public health literature. While in this county it is hoped that she will devote the greater

part of her time to child welfare work. The good will and cooperation of all the people of Hansford county is asked in this worthy undertaking.
MRS. A. F. BARKLEY,
President.

A Billion Dollar Garden

We count wheat and cotton as principle crops, and yet, in 1922, they both together were barely equal in value to the vegetables grown on the farms in the United States. If we add the truck grown on city and town lots to the "garden sass" grown on farms we find a total just about equal to that of the national corn crop. Not all of these vegetables were sold, of course, but perhaps as great a portion of them as of the corn produced found their way to a cash market. So far as that is concerned, the poultry products for the last census year—1919—were more than a billion dollars in value, and the dairy products nearly a billion and a half. Residents of Spearman and community will find these figures interesting, because they show how extremely important the garden and poultry yard are to all this nation, as well as to the rest of the world.

Only one more week and the agony will be over. What think ye of politics?

Too many men seem to think that the tree of liberty is a good place for them to feather their own nest.

After paying a garage bill in a city an autoist wonders why the papers devote so much space to ordinary holdups.

As an incentive to industry, enterprise and thrift a Spearman man that we know says there isn't anything that can befit twice.

D. Joseph C. Jones was called to Shattuck Monday morning, where the Chief Surgeon of the A. T. & S. F met with all the local Surgeons of the Railroad.

The campaign for county officers warmed up considerably in a place or two during the past week. This is better than to pay no attention to the election of county officers. The indifferent voter should not vote at all. Every voter should study the situation and the candidates and should vote for those whom he believes to be best fitted for the position.

MISSIONARY SOCIETY

The Womens Missionary Society met with Mrs. Gibner Wednesday, July 12. The afternoon was spent socially. Mrs. Bert Blake sang two selections which were greatly enjoyed by all. Mrs. Gibner read a letter from Mrs. E. E. Adams, the District Secretary, asking that we join with the other auxiliaries of the conference in giving a money shower to Miss Christine Allen of Crowell, Texas. Miss Allen goes from our own North West Texas Conference as a missionary to Africa, leaving for that field the first of August. Our offering for Miss Allen amounted to \$4.50. Mrs. Gibner, assisted by her daughter Miss Beatrice served a delightful two course luncheon. All went away feeling that they had spent a pleasant and profitable afternoon.

Born, on Wednesday evening, July 12, to Mr. and Mrs. S. H. Haile, of south Spearman, a fine daughter.

Home rendered lard, fresh and pure, 15 cents per pound at the Star Meat Market. 29tf

J. A. Holmes, candidate for district attorney, was interviewing the voters of the Spearman country the first of the week.

Joe Ownbey and son Bud and Lee Jenkins and son Wesley were in from north Hutchinson Saturday, looking after business matters.

Mrs. A. L. Anderson and baby who spent last week in Spearman as the guests of Mr. and Mrs. Chas. McCarter, left Monday for their home in Amarillo.

Frank L. Carson came from Wichita the first of the week to look after banking interests here and to visit with his brother Kit, of the First National.

John Bolin and wife and Jack Thomas came from Liberal Monday to look after business matters connected with the Bolin-Hall elevator at this place.

Tire and rim was picked up on road leading southwest of Spearman. Owner may recover same by calling at the Reporter office.

MOBIL-OIL—The best by test. Full line of these popular oils just received. All grades in stock now. HAGAN OIL COMPANY, Near the Spearman Equity.

H. E. Coate of the Spearman Lumber Company, was here from Texhoma the latter part of last week looking after business matters and visiting with his brother, Louie, who is the company's local manager.

A. G. Satrum and sons Oscar and Gilman, and Albert and Henry Moen were in from the Oslo settlement Sunday, looking for repairs for harvesting machinery. Mr. Satrum says his wheat will run around 20 bushels per acre and that harvest is in full swing in the Oslo settlement.

Jack Thomas came the first of the week to reopen the Bolin-Hall elevator at this place. The wheat is turning out so much better than was at first expected, this big firm decided that they could not allow their elevator to longer remain idle. Jack is a good grain man, a rustler and when he bids on a load of wheat he either gets it or makes the other fellow pay all it is worth.

H. E. James, cashier of the Guaranty State bank, made a trip to Des Moines, New Mexico, the past week, and returned with Mrs. James and the children, who have been visiting at home of T. O. James at that place for the past two weeks. They report a pleasant trip to the mountains, and Mr. James says he is going back out there this fall and make an effort to stretch the game laws to the very limit.

SING-SONG

Don't miss the Sing-Song at the Methodist church, Sunday night June 10th. Our regular night for the singing services is on the third Sunday of each month, although we have missed some lately. Bring your favorite songs and we'll sing them, whistle them, hum them, n'everything. Don't forget it. Come and let's have a good old fashioned sing-song. We need more singing. Come!! Come!! Come!! 30tlp

A RESOLUTION

The following resolution was adopted by the Democratic State Executive Committee in session at Austin on June 12, 1922.

Whereas, in the past history of the Democratic party a great deal of confusion has arisen and manifest injustice has been done growing out of the fact that there was not prescribed by the Democratic Executive Committees throughout the State uniform qualifications for voters to participate in primaries, and whereas, it is to the interest of the Democratic party as a whole to have uniform qualifications for participation in the primaries; therefore,

Be it resolved by the Democratic State Executive Committee of the State of Texas in regular meeting duly assembled according to law:

(A) That no person shall vote or participate in the general primary election of the Democratic party to be held in this State the fourth Saturday in July, A. D. 1922, or the general primary election of said party to be held in this State the fourth Saturday in August, A. D. 1922, unless such person shall at the time of such general primary election be a qualified elector and voter under the constitution and laws of this State, and any such person shall not vote or participate in either of such primary elections unless in addition to the qualifications under the constitution and laws aforesaid such person shall also possess the following additional qualifications, and the following shall constitute additional qualifications for voters in such general primary elections:

1. Such person shall be a white Democrat.

2. Such person shall take a pledge that he or she will support at all times and vote for in the general election all the nominees of the Democratic party in the general primary election, including nominees for national, state, district, county, precinct and all other offices.

3. Such person shall have supported and voted for in the last general election, if he or she voted at all, all nominees of the Democratic party, and no person shall vote in such general primary elections who, in the last general primary election voted for, gave aid, support or comfort to any political party or the nominees of any political party other than the Democratic party.

(B) That this resolution be certified to the several County Committees for observance.

To Hansford County Voters

Dalhart, Texas
S. H. Haile, Spearman, Texas

Dear Sir and Friend:—In reply to yours of recent date, as to whether your services were satisfactory while working as deputy under me, will say that they were very satisfactory to me and to all the citizens of Dallas county, or at least to all who wanted the law enforced.

As to your race in Hansford county I wish to say that I have no desire to take sides in politics outside of my own county, however, will say this to the voters of your county, unless they want the law enforced they had better not make you sheriff.

Wishing you success I am your friend,
PEM DENTON.

TRUTHS

The truth most required is the truth least liked.

A little commendation goes a long, long way.

The greatest wretchedness is to be guilty without repentance.

When you obey your superior you instruct your inferior in obedience.

The greatest wisdom is to leave unsaid the wrong thing at the tempting moment.

WISPS OF WISDOM

The stickler seldom gets stuck.

Charity begins at home, but don't let it end there.

Every man is the architect of his own fortune.

The biggest fool is the man who fools himself.

It's better to lose smilingly than to win whinily.

It is backbone that makes success, and not wishbone.

Building Your Character

The name of the bank with which you do business is one of the best references you can give.

A checking account stands for modern business methods, available liquid funds.

Not only does a bank account yield you monetary returns, but it returns also a dividend in good reputation.

MAKE THIS BANK YOUR BEST SERVANT

Guaranty State Bank SPEARMAN, TEX.

Child Swallowed Poison

Harlan, the little four-year-old son of Mr. and Mrs. H. H. Roper of the Grand Plains community, swallowed a quantity of bichloride solution on last Saturday, which gave the family quite a scare but fortunately the little fellow suffered no ill effects from the experience. The family was at the home of N. Ceiser, assisting with the work of harvesting. When it was known that the little boy had drank the poison he was immediately given a large portion of lard and was rushed to town by his father and F. A. Shapley. Dr. Gibner treated the little fellow and in a few moments he was playing about as if nothing had happened. Lard was the correct antidote for this poison.

The Strike

The strike of railway shop workers is not felt in Spearman. The Santa Fe has put on two guards to see that their property is not harmed during the strike, but otherwise you could not tell by a visit to the railway yards here that the strike was on. Santa Fe men at this point seem to be well pleased with their work and are going about their daily tasks as usual and will pull down their pay as usual.

The world owes us a living—but it pays on the installment plan.

The buyer is the one who demands C. O. D. now. And it stands for Come On Down.

The Spearman citizen who never was able to carry a tune can go right on singing now and explain it's jazz.

There will always be arguments and one of them will always be as to which is the hottest, a corset or a pair of trousers.

"What will become of the young people?" wails an Ohio editor. We suppose they'll grow old and worry about the young people, too.

After giving the subject thought we have reached the conclusion that the reason Eve didn't bob her hair was because she had no competition.

The average Spearman man can't understand why the neighbor women seem to think a mere man has no right to have a backache and some other things we might mention that he does have.

Will Hold Institutes

W. A. Clark Jr., Superintendent of schools of Spearman Independent school district, recently received the following letter from the state superintendent's office, which will be of interest to all school teachers.

"Dear Mr. Clark:—There is no change in the requirements of County Institutes for this year. The law allows the state superintendent to make such rulings as seems best for the schools. Miss Blanton has, therefore made a ruling that Institutes will be held and teachers will be paid as usual. This ruling will be in effect until the legislature meets and decides on the method of procedure."

Some Spearman men are judged by the company they keep, others by the kind of printed matter they use.

We don't care how short the women wear their skirts but we can lick the man who decreed that man should not eat in his shirt sleeves.

We agree with the Spearman man who declared in our presence yesterday that the worst thing about money is there isn't enough of it.

Fly Chaser and DIP

Working Hours

We don't like the constant effort on the part of the labor movements to seek five-day weeks and six-hour days. In the first place this is too short a time to get much accomplished. Nobody gets anything done without working long and hard at it. We have always felt, and we believe most people around Spearman will agree with us that working five days a week and loafing two days is a wrong proportion. It engenders too much laziness, and we see how a man working under such a program goes back to work half forgetting about the kind of job he had, and having to bring himself

down to work again like he does after a vacation.

We believe it takes at least six days a week for a man to handle any job well, and how a man can put in a day in six hours we never could understand. Eight hours work forms a proper division of the day, but even eight hours fit by very quickly to the person who is actually and vitally concerned about his work. So we believe that all workers should work full time and get the most out of it for themselves and for the ones for whom they are working.

Nobody works for himself. He is working for other folks. And unless a person is interested and doing service over a good many hours a day for at least six days a week, he can hardly expect to render enough service to the other people for them to pay him very well. Personally we think the movement for a five-day week and a six-hour day is all bunk, and we can't see any merit in it either for the workers or for the world in general.

Not content with taxing everything else, now comes the politician to tax our patience.

How He'll Spend It

Many Spearman people have imagined what they would do with a million dollars, or even half-million if they should suddenly come into possession of so much wealth. John Lindley, cook for 39 years at the Beckham hotel in Texas, is soon to become owner of a half-million for a piece of land somebody worked off on him during slavery days, on which oil has been found. This is what John is planning to do with the money: First, there is a second-hand Ford truck he had his eye on for some time. He will buy it. Then he is going to fix up his house, buy a new screen door as the old one is warped, put on some fresh paint and otherwise fix up the premises. Finally, John, in the bigness of his heart, is going to take care of all the kitchen help that need a friend. It isn't often that a sensible man gets hold of half-million.

Wrigley's Answer

William Wrigley, Jr., the chewing gum magnate, was talking to a little party of men in a smoking car the other day, and telling how much chicle is used each year for chewing gum. "But Mr. Wrigley," said one of his hearers, "you've spent millions of dollars and created a splendid demand now; everybody talks about and chews Spearmint; your demand is steady and growing; isn't it a waste to spend so many thousands of dollars advertising a product that is already so well known?"

And Mr. Wrigley, studying a moment, answered: "My friend, if I were to stop advertising, it would be just like taking the engine off of this train. It would slow down and after a little while it would stop. Advertising is the locomotive of business and if you don't keep it up business comes to a stop."

The average Spearman boy would not care to be president in the summer time, for if he was president he could not take off his shoes and go bare-footed.

It sure would be fine for mother if she could collect time and-a-half for overtime.

It would be nice to change places with a fish during these hot months, for no matter how fast he swims he never sweats.

It Can't Be Done

We had to smile the other day when we heard a Spearman man who ought to know better contending that he would get along alright if people would let him "do as he pleased." It struck us as being funny, because in this country no one is permitted to do exactly as he pleases, and they never will be allowed to. In the first place it would not be a wise thing either for the man or for the rest of us.

Shortly after hearing this remark we read where a man and his wife had decided to show that they could live without the rest of their fellow men and without the things produced by others. They decided to go far into the wilds of the Maine woods, and live a primitive life, just as Adam and Eve lived. They figured on two things—doing as they pleased and beating the high cost of living. So into the woods they went, garbed as nature garbed them, and without camp equipment or food. They fashioned rude clothing of leaves and grass, and with bows and arrows made with their own hands they killed game and ate it.

And then a game warden, scouring the Maine woods, came upon them. He took them to the nearest magistrate where they were fined for hunting without a license, for fishing without a license and for killing quail and deer in a closed season. Their fines amounted to \$354.

They didn't prove what they started out to prove but they did prove that which we are contending—that it is not always best for a man to be permitted to do as he pleases, neither is it good judgement to think you can beat the present cost of living.

RADIO

THIRD ELEMENT IN THE VACUUM TUBE

Grid Added to Fleming Valve by Dr. Lee DeForest Was a Big Improvement.

Any device which will pass electricity in one direction and will wholly or partially obstruct the flow in the opposite direction is termed a rectifier, because when connected in the path of an alternating current it will suppress one-half of each cycle and therefore the circuit will be traversed by pulsating direct current. A rectifier also is said to possess unidirectional conductivity, meaning, of course, that it will conduct electricity in one direction only. Its ability to rectify currents of extremely high frequency determines its application in radio.

Due to its ability to rectify high frequency alternating currents the two-element (filament and plate) vacuum tube can be used in a radio receiver as a detector.

Fig. VI is a simple radio receiving circuit employing this type of two-element vacuum tube in place of a crystal detector.

Dr. J. A. Fleming of London, England, was the first to use a two-element tube of the type just described as a medium of rectifying high frequency radio currents. Fleming called his product a valve because it would let current flow in one direction but not in the other direction. The Fleming valve as a forerunner of the vacuum tube of today marked a very important step in the progress of the radio art. The Fleming valve, however, in its original form was not much better than other forms of rectifiers then in use and, owing to the greater ruggedness and ease of manipulation of the latter, did not come into general use as a detector.

Dr. Lee DeForest, an American, greatly improved the Fleming valve by adding a third electrode called the grid, which served the function of a control element and thus made it possible to utilize the feeble incoming signal currents to control more powerful local currents. The three-electrode vacuum tube of DeForest is the tube used so extensively today.

The third element which is called a grid and from which the three-electrode vacuum tube derives its name was placed by DeForest between the filament and the plate in the path of the electrons. The grid is a perforated plate or mesh of fine wire through the openings of which the electrons must pass in their journey from the filament to the plate.

Fig. VII is a diagrammatic sketch of the circuit of a three-electrode vacuum tube and is identical to the same as the sketch in Fig. III for a two-element vacuum tube with the ad-

dition of the grid circuit I-J-K-L. The battery in the grid circuit is called the "C" battery.

As a start let us suppose that "C" battery voltage is zero. The operation of the three-electrode tube would then be exactly like that of a two-electrode tube, just as though there were no grid. Like a two-electrode tube when the filament C-D is brought to incandescence by the "A" battery a steady stream of electrons will be given off, which will be drawn over to the plate E. Plate E is maintained at a positive potential with respect to the filament by the "B" battery.

Now if the grid is made positive with respect to the filament, it is possible to accelerate the flow of the electron stream from the filament to the plate; if the grid is made negative with respect to the filament, the flow of the electron stream from the filament to the plate will be retarded. Or in other words, by making the grid positive or negative with respect to the filament, it is possible to increase or counteract the space charge. The third electrode or grid thus offers a means of controlling the current in the plate circuit without changing the plate potential or the filament temperature.

The characteristic curve of a three-electrode vacuum tube is shown in Fig. VIII. This diagram shows the relation of grid potential to plate current, assuming that the filament temperature and plate voltage remain constant.

It can be seen from the curve that by applying a negative potential of value E to the grid, the plate current can be reduced to zero. The negative charge on the grid will have the effect of a negative potential E with respect to the filament, making the negative charge so strong around the filament that the electrons cannot leave it. On the other hand, if a positive potential of value F be applied to the grid with respect to the filament, the maximum or saturation current will flow in the plate circuit. Applying a greater positive potential than F to the grid with respect to the filament will not cause an increase in the

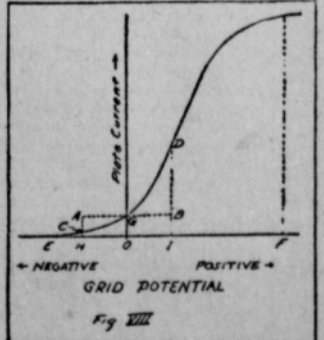

Fig. VIII

plate current because the electrons given off are being attracted to the plate and grid.

When the grid is maintained positive with respect to the filament a small current will flow in the grid circuit. Because of its being positive it will attract the electrons and have a charge given up to it by them.

MATERIAL SHORTAGE IN WOOL

Fleeces on Sheep's Backs Are Selling as High as 35 to 38 Cents Per Pound—Situation Attributed to Many Causes.

(Prepared by the United States Department of Agriculture.)
A material shortage in spring lambs is indicated in advices received by the United States Department of Agriculture from the western sheep country. Figures are not available, but trained observers say that the total lamb production in Montana, Wyoming, Washington, Oregon, Idaho and Nevada is only 70 per cent of a normal crop.

Smaller Supply of Wool.
This also means a small supply of wool. Contracting of both wool and lambs has reached large dimensions during recent weeks. Numerous large western operators are reported to be scouring the West for new crop lambs and many sales at 9 to 10 cents a pound are reported, with the latter price being generally refused in Idaho, Washington and Oregon. The price last year was 5 to 7 cents. Fleeces on sheep's backs are selling as high as 35 to 38 cents a pound, with some clips including the Jericho pool clip selling up to 40 cents.

The situation is attributed to a shortage of ewes, the over age of many breeding flocks, and losses of early spring lambs on account of cold weather and the backward spring season. A winter lamb and sheep market higher than the trade anticipated, a shortage in the visible supply, and the recent sharp upturn in wool values have created bullish sentiment in the markets.

Money, which was tight last fall and in the early winter, now appears abundant and large speculators and Western feeders are buying freely. This fact combined with the short crop leads many in the trade to believe that the coming summer and fall supply of both feeding and fat lambs at the large market centers will be far below normal. Present conditions indicate that many lambs will

Sheep Grazing on Western Range.

be held in the West for fattening for next winter's market.

Some reports indicate that large western speculators and feeders have already contracted approximately half the lamb crop in Idaho, Oregon, and Washington. According to the best information available, the summer market movement from these states will be late in getting under way, and will probably not reach sizable proportions before the last of July or early in August.

Lambs Had Poor Start.

Ewes wintered poorly and because of the backward spring were not only late getting on the range, but started the grazing season in poor flesh, with the result that February lambs, the crop of which was more nearly normal than that of later lambs, had a poor start.

The April lamb crop is very short, according to all reports. Many flockmasters tried to tough the April crop on the open range, but cold weather caused heavy losses. Breeding flocks are seriously over aged, but there is an acute shortage of young stock and it is believed that a very attractive market will be necessary to draw any large quantity of breeding flocks to the shambles. Young ewes are in strong demand all over the West and bids of \$8 to \$12 a head have not brought out many. It seems certain that very few young western ewes will reach market centers during the coming season.

CONTROL CUCUMBER BEETLES

Little Yellow and Black Pests Can Be Destroyed by Dusting Mixture of Arsenate.

Cucumber beetles, those little yellow and black striped pests which attack cucumbers and melons, can be controlled by the following mixture: One part powdered calcium arsenate and 20 parts gypsum or sand plaster by weight. Dust this on the plants, using a sack or metal duster so that the surface of the leaves and the ground around the plants are thoroughly coated. It is best to make the application early in the morning.

SUDAN GRASS GAINS AS EMERGENCY CROP

Grown With Success as Far North as Alberta.

Rapidly Supplanting Millet in Many States and Is Being Used Successfully by Farmers as Summer Stock Pasture.

(Prepared by the United States Department of Agriculture.)

From an eight-ounce package of seed, introduced from Africa in 1906 through the efforts of C. V. Piper of the United States Department of Agriculture, the growing of sudan grass has rapidly increased until in 1918 the value of the crop in the United States was estimated to be \$10,000,000, and its popularity is said to be greater here than in its native country. It is particularly well adapted to semi-tropical regions and the warmer parts of the temperate zones, but it has been grown with some success as far north as southern Alberta. Since its introduction by the department in this country it has been tried with good results in Australia, South America, the Philippine islands, Hawaii, Porto Rico and Cuba.

In a recent department bulletin, No. 981, "Sudan Grass and Related

This is the Way Sudan Grass Grows When Sown in Rows.

Plants," published by the Department of Agriculture, H. N. Vinal and R. E. Getty have given extensive information regarding the history, adaptation, growing, and utilization of this plant and some related grasses. Sudan, however, is far the most important, and the others are treated only briefly. This new grass has proved best adapted to the southern half of the Great Plains in the states of Texas, Oklahoma and Kansas. It does not succeed well at high altitudes nor within 200 miles of the northern boundary of the United States. It has a high-water requirement, but it withstands drought well and recovers quickly when rain comes.

Sudan grass is admirably adapted for use as an emergency hay crop, and is rapidly supplanting millet in many states. It is being used successfully by thousands of farmers as a summer pasture. For this purpose there are few crops that give better returns and serve so well to supplement the permanent pastures and the feed lot.

The bulletin outlines the results of numerous feeding experiments with sudan grass. In these experiments it was demonstrated that sudan grass hay compares very favorably with other well-known hays in feeding value, especially as a roughage for work horses and stock cattle.

At present, seed production is unprofitable on account of low yields and uncertain prices. Yields of seed are highest in western Texas and in the irrigated regions of New Mexico, Arizona and California. In growing the seed a great deal of care is necessary to prevent the hybridization with the sorghums. When intended for seed it should be at least 80 rods from any field of sorghum.

INSURE GRAIN FROM INSECTS

Thoroughly Clean Out Bins, Removing All Refuse Material—Use Carbon Bisulphide.

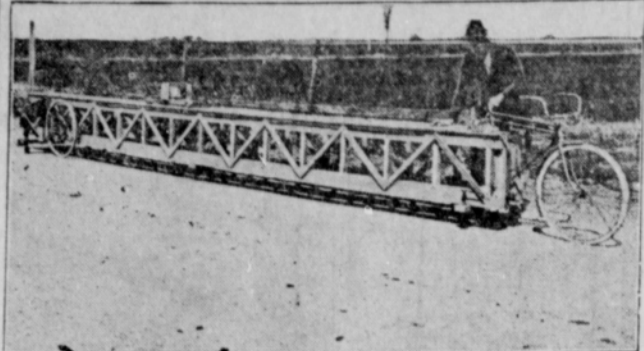

To insure seed grain free from weevils or other insects, inspect carefully before placing in storage. If you find it infested, use carbon bisulphide according to directions. Thoroughly clean out and disinfect the bins before storing. Refuse material, old sacking, screenings, heaps of dust and sweepings left in corners are ideal harbors for destructive insects. Instead of spreading the grain out thin, store compactly, thereby lessening the surface to be attacked. Ventilation is needed to prevent overheating, caused by excess moisture in the grain. Screen the windows and leave them open in good weather, thereby keeping out bugs and letting in air.

CUTWORMS DO MUCH DAMAGE

Quite Harmful to Tomatoes, Sweet Potatoes and Other Young and Tender Plants.

Cutworms working on small plants of tomato, sweet potato and other vegetables that are young and tender will soon destroy considerable. Many of them can be destroyed by placing boards or flat stones near the plants for the insects to hide under during the day. When these boards are turned over the worms are found and destroyed. A better way is to use poison bait.

EXPERIMENTAL HIGHWAY WORK AT ARLINGTON WILL BE CONTINUED

Device for Testing and Measuring the Smoothness of Roads.

(Prepared by the United States Department of Agriculture.)

A comprehensive program of road-building research and investigation during the coming season at the Arlington Experimental station near Washington, D. C., is announced by the bureau of public roads of the United States Department of Agriculture. Impact tests on pavements, subgrade studies and other experiments, which last year aroused much interest among engineers, will be continued as well as several other lines of work underway last year and new ones to be started.

Bituminous wearing surfaces are to be investigated to determine the reason for the formation of waves and irregularities and to settle mooted questions concerning the proper mixture and the proper mineral aggregates to be used in bituminous roads. More than 30 sections of different types of bituminous construction will be built. These will include mixtures of different mechanical grading and with different percentages of bitumen of several degrees of hardness. Sections are being constructed on a circular track about 600 feet in circumference, the roadway being 13 feet wide. On this roadway will be operated a 5-ton army truck equipped with solid tires. The truck will be operated in a varying path so as to cover practically the entire width of the roadway and will travel at a speed of from 12 to 15 miles an hour for five or six months, or until some results are obtained leading to the solution of the problems involved.

Resistance to Wear.

There is considerable discussion as to what is the proper criterion to be used in selecting and judging concrete aggregates that will offer the greatest amount of resistance to wear. At the present time judgment is based on wear tests made in the laboratory and upon the compressive strength of concrete, also upon the structural strength of concrete beams constructed and broken in the laboratory. The comparison of the wear of concrete in actual use on road surfaces with the indications obtained in laboratory experiments is not wholly satisfactory.

To throw more light on this subject a wear test is to be made with the conditions approximating those actually found on the road. This test will include about 65 sections of concrete wearing surface, each section being of a different quality of concrete, the qualities being varied by virtue of the different aggregates used, different proportions in the mixture and amount of mixing water. These sections are to be constructed on a circular runway about 650 feet in circumference, the runway being 4 feet wide.

On this runway will be operated a specially constructed car with two truck wheels equipped with solid rubber tires and loaded to represent a truck. The car will be guided by small railroad rails to hold it in position, the power being applied by means of an electric motor to the rear wheel. This apparatus will be operated around the circular runway at a speed of probably 20 miles an hour. The test will involve the use of truck wheels equipped with different kinds of tires and will include the use of non-skid chains. A steel-tired wheel will probably also be used to get the effect of an accelerated wear test.

The object of this experiment is to determine the relative wear of the

different concrete sections when subjected to traffic equipped with different types of wheel, also to furnish a comparison between actual service conditions and laboratory tests. This test will be in operation continuously beginning some time in June.

Impact on Roads Studied.

In a rather elaborate series of experiments, the bureau has studied impact of trucks on roads, and has determined approximately the magnitude of impact force under different truck and road conditions. The effect of such impact on concrete pavements and several types of road on concrete base was studied and reported on last year. This series of experiments is to be continued and enlarged. Over 120 road sections or slabs have been constructed in duplicate series. One series is on a carefully drained dry subgrade; the other series is on the same kind of subgrade except that it is kept wet and as nearly saturated as possible by means of an underlying drain tile and side ditches filled with water.

The testing of these slabs will begin some time during the month of May and will be by means of a new impact machine now being constructed which simulates the action of the rear wheel of a truck. On this machine may be mounted truck wheels of different sizes and weights carrying different kinds of truck tires. This apparatus may be so operated as to reproduce the different loading and equipment conditions of a large variety of trucks. The slabs will be hammered by means of this machine in the center, on the corners, and on the sides so as to obtain the relative strength under these different conditions.

Subsoil investigations are being continued for the purpose of studying and investigating relative stability, moisture condition, and supporting value. Different methods of determining the bearing value of soils are also being studied, that is, as to whether small or large areas should be used in determining the relative bearing value.

The warping effect of temperature and moisture conditions on concrete pavements is also being investigated. Temperatures and movement are being recorded graphically on continuous charts. In addition to these temperature and movement measurements the pressures on the subgrade under the concrete slab are obtained by means of soil pressure cells. This investigation will give some definite information concerning the support offered by subgrades to rigid concrete roads. This investigation has been under way for some time and will continue probably for a year or more.

The transmission of loads through different types of pavements to the subgrade is being investigated by means of soil pressure cells placed on the subgrade under the pavements. This test will also serve to show the relative support offered to brick and other types of block pavement by concrete bases and broken stone bases. This investigation has been under way for about one year and will continue for some time to come.

A large number of prominent engineers and others interested in road work have visited the Arlington Experimental station to witness the preparation and conduct of these experiments. It is intended to have all these projects in full operation by the middle of June. Visitors are always welcome and those in charge of the work are always glad to give any information desired about the experiments.

RAT PEST IS MOST SERIOUS

Cause of Considerable Loss to Farmer and Poultryman—Plan to Eradicate Them.

Rats are multiplying in numbers every year in spite of all of our rat-killing campaigns and propaganda. This pest is one of the most serious sources of loss to the farmer and poultryman. Every effort should be made to free the premises of them, and the fact that they seem to hold their own should only be the signal for redoubling our efforts against them.

SHADE NEEDED FOR POULTRY

Old Burlap Bags Stretched on Wire Netting Will Afford Satisfactory Protection.

They all need it—chicks, ducks, geese, poult, everything in the poultry line from old hens to old turkey gobblers need some shade. The shade of bushes and shrubs, of orchard and grove, is the most attractive, but the shade of old burlap bags stretched on poultry netting tacked across a frame is a pleasant shelter from the intense rays of the sun to the feathered flock. Fresh water is another essential. Sun-warmed water is a breeder of cholera.

GREAT VALUE OF BUCKWHEAT

Excellent as Chicken Feed and May Be Fed to Hogs and Other Stock to Advantage.

Buckwheat is an excellent chicken feed. Small patches may be sown to buckwheat and poultry allowed to harvest it. It may also be fed to hogs and other live stock to good advantage. The straw is about equal to oat straw. Another important use for buckwheat is for improving the land. It grows readily on poor land and adds a great deal of humus if plowed under.

REMEDY FOR SUCKING PESTS

Nicotine Sulphate Taking Place of Kerosene Emulsion in Destroying Many Insects.

Kerosene emulsion is a remedy for most sucking insects, but nicotine sulphate has largely taken its place in fighting the melon louse and squash bug. Both are contact poisons and must actually touch the body of the insect in order to destroy it. For that reason it is best applied with a spray of some style so that both sides of the leaves are touched. These solutions are not poisonous when taken into the stomach.

IMPROVED UNIFORM INTERNATIONAL

Sunday School Lesson

(By REV. P. B. FITZWATER, D. D., Teacher of English Bible in the Moody Bible Institute of Chicago.)
Copyright, 1922, Western Newspaper Union

LESSON FOR JULY 16

THE HANDWRITING ON THE WALL.

LESSON TEXT—Dan. 5:1-31.
GOLDEN TEXT—God will bring every work into judgment, with every secret thing, whether it be good, or whether it be evil.—Ecc. 12:14.

REFERENCE MATERIAL—Gen. 19:1-28; Exod. 14:21-31; Ezek. 11:1-14; Acts 12:1-23.

PRIMARY TOPIC—Daniel Tells the King of His Wrong-Doing.

JUNIOR TOPIC—Belshazzar's Feast and Fate.

INTERMEDIATE AND SENIOR TOPIC—Judgment Against King Alcohol.

YOUNG PEOPLE AND ADULT TOPIC—How to Enforce the Judgment Against Strong Drink.

I. Belshazzar's Impious Feast (vv. 1-4).

1. Who attended (vv. 1, 2). Belshazzar, his wife and concubines and a thousand of his lords.

2. Behavior thereof (vv. 3, 4). (1) They drank wine; they engaged in revelry. (2) They committed sacrilege. In their drunken revelry they drank wine out of the sacred vessels which had been taken out of the temple, of the house of God, which was at Jerusalem. When men are under the influence of intoxicating liquors they lose all regard for sacred things. (3) They worshiped idols. They prayed to gods of gold and of silver, of brass, of iron, wood and stone.

II. The Handwriting on the Wall (vv. 5-16).

1. The time of (v. 5). It occurred in the same hour in which they were engaged in their drunken revelry.

2. The effect upon the king (v. 6). He was greatly disturbed; he was seized with consternation. "The joints of his loins were loosed, and his knees smote one against another."

3. The king's behavior (vv. 7-16). (1) He called forth astrologers and soothsayers, offering rewards of gold and position (v. 7-9). Their utter inability to interpret the writing left the king even worse perplexed. (2) Daniel brought to the suggestion of the queen (vv. 10-16). The queen here was perhaps the wife of Nebuchadnezzar who remembered Daniel's service in interpreting his dream. For that reason he was sent for and promised great reward.

III. Daniel Interprets the Writing (vv. 17-28).

1. Daniel's address to the king (vv. 17-24). He brushes aside his promised gifts (v. 17). He would not have his speech limited by the king's gifts.

2. The interpretation of the writing (vv. 25-28). (1) "Mene" means "numbered" (v. 25). "God hath numbered thy kingdom and finished it." (2) "Tekel" means "weighed" (v. 27). "Thou art weighed in the balances, and art found wanting." (3) "Peres" means "divided" (v. 28). "Thy kingdom is divided, and given to the Medes and Persians."

IV. The Judgment Executed (vv. 29-31).

In that night was Belshazzar slain and Darius the Median took the kingdom.

The Chaldean dynasty ended with Belshazzar. So we may interpret this whole scene as pointing to the conditions at the close of the times of the Gentiles and as adumbrating the prevailing conditions. Let us note:

1. The stupidity of men. They, like people today, would not learn by example. Nebuchadnezzar's fate should have deterred Belshazzar from such frivolity.

2. The magnificent splendor. This great feast was characterized by pomp, display, parade. How characteristic of this age!

3. Luxury. The famous hanging gardens of Babylon were a noteworthy example. Signs of luxury today are on every hand.

4. Licentiousness. The king with his wives and concubines. This is notoriously prevalent today.

5. Blasphemous sacrilege. And may not the sacrilege of today be in excess of theirs, expressing itself in (1) a profession of religion for pecuniary gain, social and political preferment; (2) use of the pulpit and of the ministry for display and notoriety, even for the propagation of false doctrine; (3) uniting with the church, attending the communion, so as to cover up secret sins; (4) the use of the Word of God to give point to a joke; (5) denying that the Bible is God's Word, making it a book of errors, myths and legends; (6) sneering at the Virgin birth, repudiating Christ's deity and setting aside His vicarious atonement. 6. Drunken carousals. The handwriting is on the wall. God will not endure this forever; His judgment shall fall. Conditions in the world indicate that the time is drawing near. Are you ready?

Aspiration.

What we truly aspire to be, that in some sense we are. The mere aspiration, by changing the frame and spirit of the mind, for the moment realizes itself.—Mrs. Jameson.

Binds Volume of the Week.

Sunday is the golden clasp that binds together the volume of the week.—Longfellow.

Injuries.

Slight small injuries and they be some none at all.—Fuller.

WOMAN COULD NOT WORK

Made Strong and Well by Lydia E. Pinkham's Vegetable Compound

St. Paul, Minn.—"I took Lydia E. Pinkham's Vegetable Compound for a

tired, worn-out feeling and painful periods. I used to get up with a pain in my head and pains in my lower parts and back. Often I was not able to do my work. I read in your little book about Lydia E. Pinkham's Vegetable Compound and I have taken it. I feel so well and strong and can do every bit of my work and not a pain in my back now. I recommend your medicine and you can use this letter as a testimonial."—Mrs. PHIL. MASER, 801 Winslow St., St. Paul, Minn.

Just another case where a woman found relief by taking Lydia E. Pinkham's Vegetable Compound. Many times these tired, worn-out feelings and pains about the body are from troubles only women have. The Vegetable Compound is especially adapted for just this condition. The good results are noted by the disagreeable symptoms passing away—one after another.

Lydia E. Pinkham's Vegetable Compound is a Woman's Medicine for Women's Ailments. Always reliable.

Sufficient Excuse.

Cop—You're pinched for speeding. Copped—What's the big idea? Doesn't that sign say "Fine for speeding?"

Red Cross Ball Blue should be used in every home. It makes clothes white as snow and never injures the fabric. All good grocers.—Advertisement.

A Dove of a Girl.

"Has your typewriter a billing attachment?" "No, but she has a cooing attachment."

USEFUL for all the little ailments—bumps, bruises, sores, sunburn and chafing. Keep a bottle in the house. It's safe and pure. It costs very little. CHESEBROUGH MFG. CO. (Consolidated) State Street New York

Piles

are usually due to straining when constipated.

Nujol being a lubricant keeps the food waste soft and therefore prevents straining. Doctors prescribe Nujol because it not only soothes the suffering of piles but relieves the irritation, brings comfort and helps to remove them.

Nujol is a lubricant—not a medicine or laxative—so cannot gripe. Try it today.

Nujol

For Constipation

Comfort Your Skin With Cuticura Soap and Fragrant Talcum Soap 25c, Ointment 25 and 50c, Talcum 25c.

SQUEEZED TO DEATH

When the body begins to stiffen and movement becomes painful it is usually an indication that the kidneys are out of order. Keep these organs healthy by taking

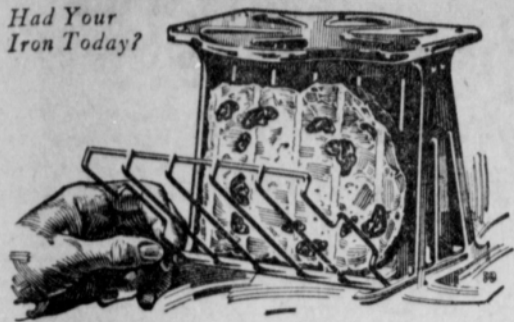

GOLD MEDAL BARLEM OIL CAPSULES

The world's standard remedy for kidney, liver, bladder and uric acid troubles. Famous since 1695. Take regularly and keep in good health. In three sizes, all druggists. Guaranteed as represented. Look for the name Gold Medal on every box and accept no imitation.

YOU CAN

color your hair easily, quickly and safely by using G. H. H. Hair Color Remover. Safe to use as water. Makes you look young again. At all good druggists. 25 cents, or direct from MESSIG-ELLIS, Chemists, Memphis, Tenn.

Had Your Iron Today?

Toast It— Delicious Raisin Bread

DO this some morning and surprise the family: Serve hot raisin toast at breakfast, made from full-fruited, luscious raisin bread. Let your husband try it with his coffee. Hear what he says.

Your grocer or bake shop can supply the proper bread. No need to bake at home.

Made with big, plump, tender, seeded Sun-Maid Raisins, and if you get the right kind there's a generous supply of these delicious fruit-meats in it.

Insist on this full-fruited bread and you'll have luscious toast.

Rich in energizing nutriment and iron—great food for business men.

Make most attractive bread pudding with left-over slices. There's real economy in bread like this.

Try tomorrow morning. A real surprise. Telephone your dealer to send a loaf today.

Sun-Maid Seeded Raisins

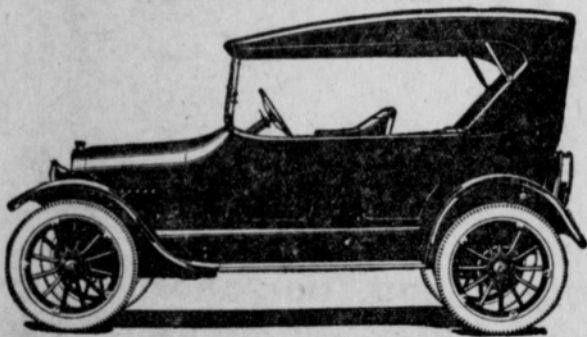

Make delicious bread, pies, puddings, cakes, etc. Ask your grocer for them. Send for free book of tested recipes.

THE MAN WITH DOUBLE BRAIN

Hayward Thompson, Memory Shocked During World War, Writes With Both Hands.

The majority of us do well to write legibly with either of our hands, but when a man is found who can write with both hands simultaneously, and more than that—when he can write forward with one hand and backward with the other, it is evident that he has a perfect right to the title of "Mystery Man." Hayward Thompson, an ex-service man in Denver, Colo., is just such a man. Due to a severe injury to his head, received during the war, he has what is known as a "double brain." One side of this brain directs the writing of one hand while the other side governs the other hand.

Thompson's memory reaches back only to the time when he left a hospital some months ago. He remembers nothing of his life before that time. It was through the veterans' bureau that he established his identity as Hayward Thompson. Of his family, former friends, his work and home before the war and his activities during the war, he has been able to learn nothing. The veterans' bureau and the Colorado department of the American Legion have been making every effort to help Thompson learn of his past.

THE REAL UNKNOWN SOLDIER

Child of Streets, Picked Up by Kind-hearted Brothers, Never Knew Who He Was.

Tragic though the story is of a soldier whose identity was lost after his life had gone out on the field of battle and whose cross in Flanders simply says, "Unknown Soldier," his story is not shot through with such pathetic glory as is the story of a lad who never knew who he was and who gave his life for a country in which he had never known a mother's love or a father's pride. Every mother who does not know just where her son is buried, weeps over the grave of the unknown soldier, thinking that perhaps he is her son. Over the grave of the boy who has always been unknown there are no mourners.

A tiny bundle of humanity was picked up in a Baltimore street some twenty years ago; it was a baby boy. When after a thorough search, no one was found who would claim him, he was taken to be reared by two brothers, who gave him the name of Edward John Evangelist Smith. When he was old enough, they sent him to Mount Saint Mary's school to be educated. In 1917, before the boy's education was finished, a Marine recruiting officer visited Mount Saint Mary's. His story of the country's need for men caused "Smith," as he had come to be known, to enlist. He went overseas and took part in every engagement in which the Fifth regiment of marines participated. On the morning on which the armistice was signed, one of the last German bullets flying claimed "Smithy" as its victim.

Wells Hawkes, "Smithy's" captain, has started a fund to erect a monument to "Smithy"; a child of the street, an unknown lad in school, the real unknown soldier!

WOUNDED ON ARMISTICE DAY

Buckeye Naval Officer Holds Distinction of Being Injured in Action, After Close of War.

O. O. Rolf of Toledo, O., holds the unique distinction of being a United States naval officer wounded in action after the signing of the armistice which closed the World war. As a naval lieutenant and executive officer of a merchant ship, Rolf was severely wounded when his ship was fired on by a German submarine as it left La Palis, France, on the afternoon of November 11, 1918.

After several months in hospitals in England and on the continent, Rolf returned to America and resumed the practice of law in Toledo.

Soldiers Glazed With Idiots.

Soldiers and sailors, along with felons, idiots and insane people are denied the right of suffrage in certain states of the Union, it is pointed out by a writer in the American Legion Weekly. He quotes from the World Almanac, which says that because of their occupation, soldiers and sailors are not allowed to vote in the following states: Indiana, Missouri, Nebraska, North Dakota, Ohio, Oregon, Texas and West Virginia.

WHO FOUND HER PHOTO?

Picture of Indiana Beauty, Lost on Battle Fields, Badly Wanted by the Owner.

What member of the army, navy or the dusty engineers, or the quartermaster corps, marine corps, tank corps, medics or balloon corps, etc., etc., who served overseas during the World War ever found a photograph similar to the one reproduced here? If that member of the etc., etc., will surrender it to its owner, who prizes it most highly for sentimental reasons, naturally, two hearts will beat violently as one.

The photograph is that of Miss Harriet Flinn of Indiana. It was carried next his heart by her soldier sweetheart, and in the well-known tumult and confusion of a battle around Chateau Thierry, or at St. Mihiel, or in the Argonne, or while his baggage was being very considerably cared for some place far back of the lines, the photograph was lost. Men who went through the same mill will know that neglect didn't lose the photo, but, as some one has so well said, but few girls got into those battles.

The photograph shown here was made from the same plate as the battle-scarred one that is being sought. The gentleman who found it, if any, may communicate with the Legion's headquarters at Indianapolis, Ind.

EIGHTEEN HOURS IN WATER

Philip Burger, Legion Man of Troy, Wears Decoration From Portuguese Government.

Spending eighteen hours holding to the edge of a life raft in icy water after saving a shipmate's life, made Philip J. Burger eligible for the unusual honor of a decoration from the Portuguese government and the American Distinguished Service medal. Burger was a second class gunner's mate on the American destroyer Jacob Jones, when she was torpedoed by a German submarine off Lands End, England, in December, 1917. Burger and the shipmate whose life he saved were among the few survivors picked up by a British warship after eighteen hours in the water.

He is now receiving vocational training in his home city, Troy, N. Y., and is a mainstay in the Noble Callahan post of the American Legion at Troy.

NO JOB, GIVES HIS BLOOD

Former Service Man of Omaha Aids Sufferer and His Own Family at Same Time.

The heroic spirit of man has not always been born under the shadow of awe-inspiring mountains, on the rock-bound coast of the sea or in the busy, crowded ways of a great city. Fred W. Smith of Omaha has never lived in the presence of those magnificent and noble works of God or man. In fact, his days have been spent on an unromantic Nebraska farm, in an Omaha packing plant and in the kitchen of a base hospital in France.

But these things have not kept him from being the true hero. Not long ago, when a man was dying in an Omaha hospital, and the doctors believed that a pint of human blood might save his life, Fred Smith went immediately to the hospital and offered to let as much blood as was needed be taken from his body. "I was strong and a little blood didn't mean much to me if it would save the other fellow's life," he said.

His act gained all the more commendation because he had a wife and two small children to support and was out of a job.

Carrying On With the American Legion

A tourist park for tired Fordsters is projected by the American Legion post of Tracy, Minn.

To give the town a thorough cleaning and brightening up for the summer, each member of the Legion post of Villard, Minn., donated a day's work.

A new definition of the well-known army phrase "S. O. L." has been evolved by the Douglas county Legionnaires of Omaha, Neb. It is "Staying Outta Legion."

At Grant's Tomb in New York a tree has been transplanted from the dooryard of the General's old home in Missouri by the Legion and the American Forestry association.

BOWRON SOUGHT RELIEF 40 YEARS

Tanlac Restores Los Angeles Man to Splendid Health After Everything Else Had Failed.

"Tanlac has done me more good than all other medicines and treatments combined, and that's saying a great deal, for I was a sufferer from indigestion forty years and have tried every kind of medicine that came my way," said R. H. Bowron, 1635 W. 17th St., Los Angeles, Cal.

"I could hardly stand the bad spells I frequently had with my stomach. I was weak and nervous, had no appetite, and I felt miserable generally. Nothing I took gave me more than temporary relief and I gradually grew worse.

"About two years ago Tanlac put me in splendid condition and it has been my standby ever since. Whenever I get to feeling a little off, a bottle or two puts me in fine shape. I eat heartily now, sleep fine, have no distress after meals, and, in fact, am enjoying splendid health. Tanlac is just the thing for those who suffer as I did."

Tanlac is sold by all good druggists.

Elaborate Responsibility.

"It's a busy life," remarked the man who was waving a palm leaf fan. "How have you been occupying yourself?"

"Voting. It's everybody's duty to vote. In addition to voting for state, county and town officers, I voted in the primaries, got elected as a delegate and voted over and over in the convention. Of course, I'm going to vote in the fall election, and I only hope they'll let me round out my record by putting me in the electoral college."—Detroit News.

Don't Forget Cuticura Talcum

When adding to your toilet requisites. An exquisite face, skin, baby and dusting powder and perfume, rendering other perfumes superfluous. You may rely on it because one of the Cuticura Trio (Soap, Ointment and Talcum), 25c each everywhere.—Advertisement.

Australian Cotton.

An exhibition of Australian-grown cotton which was opened in Sydney draws attention to a new movement to cultivate cotton on a large scale in various parts of Australia. The Australian Cotton Growers' association is actively engaged in placing the industry on a stable basis, especially in Queensland and northern parts of New South Wales.

For your daughter's sake, use Red Cross Ball Blue in the laundry.

She will then have that dainty, well-groomed appearance that girls admire.—Advertisement.

Mean.

"Blank is so mean he'd dispose of his family tree for firewood."

"Mean! Why that fellow would churn the milk of human kindness and sell it for butter."

SAW OPPORTUNITY TO SAVE

If Tale Is True, Peking Merchant Was More Than Ordinary "Child-like and Bland."

Dr. Wellington Koo, the brilliant young Chinese diplomat, said at a dinner party in New York: "Some men seem to think that we Chinese are a very childlike and very innocent people. They think we all exactly resemble the Peking merchant of the story.

"According to this story—and it is a gem—a Peking merchant took a rather notorious foreigner to board with him at a rate of \$20 a week. Six months passed, and the rather notorious foreigner had not yet let his host once see the color of his money.

"So, at the end of the six months, the Peking merchant thought the matter over very thoughtfully and reduced the foreigner's board from \$20 to \$10. He explained that thus, if the foreigner never paid him, he would not lose so much money."

Sensitive Cripples.

"Cripples are more touchy about their vanity than other people," observed a local manufacturer whose partner has only one leg. "They have more will-power than the rest of us and are often more cheerful. But they are always imagining nonexistent slights."

The speaker refused to be quoted for an interview unless his partner was also mentioned. "In fact," leave me out of it altogether," he said. "Give me the glory. When I was married, the paper had a long story about the affair. My business was incidentally mentioned. My partner quarreled violently with me for two days because his name did not also appear."—Detroit News.

The Way of Today.

"Hubby, baby wants a bedtime story." "Aw, call radio."—Louisville Courier-Journal.

SPEARMAN

Her Opinion of Chinamen

By JUSTIN WENTWOOD

Copyright, 1922, Western Newspaper Union

"Of course there's no law to stop a Chinaman from coming to this hotel," said Miss Charteris, "but I've seen enough Chinamen to last me as long as I live."

"Oh, how interesting!" said one of the feminine group which had gathered about her on the hotel stoop. Do tell us. Were you in the interior?"

"Interior? No, thank heaven! Only at Tsun-Yang, one of the treaty ports. You see, my brother insisted so long on my paying him a visit that at last I yielded. Oh, there he goes!"

All eyes were turned on the somewhat debonaire figure of the slim young Celestial who, after a smiling glance about him, strolled down the steps and made his way toward the rivulet at the bottom of the grounds.

"Mr. Wing's attached to the Chinese embassy, I understand," said Mrs. Bates. "I was talking to him last night. He seems such an interesting man and speaks English fluently."

"Oh, yes, they're clever at picking up languages," said Miss Charteris, "but they're no good. You can never trust a Chinaman. You see, their minds work quite differently from ours."

"For instance, a missionary was telling me that the hardest part of their task is to convince the natives that the missionaries don't really take out the children's eyes for charms. Yes, honestly, that's what the Chinese believe. They've hardly any human feeling at all, and they're a mass of superstition under their yellow skins."

"You can do anything you like in the way of kindness for a Chinaman, but he'll never repay you. And they're so distrustful. The simplest act is misunderstood. You see, they can't understand that a person can be actuated by genuine selfishness."

"That's why they say it doesn't pay to have anything to do with them. Gratitude's unknown to them. You can save a Chinaman's life, and he'll go racking his brains wondering what you're up to. It's all self with them—self, self, self all the time."

"Good gracious, what's that?" cried

CARDUI HELPED REGAIN STRENGTH

Alabama Lady Was Sick For Three Years, Suffering Pain, Nervous and Depressed—Read Her Own Story of Recovery.

Paint Rock, Ala.—Mrs. C. M. Stegall, of near here, recently related the following interesting account of her recovery: "I was in a weakened condition. I was sick three years in bed, suffering a great deal of pain, weak, nervous, depressed. I was so weak, I couldn't walk across the floor; just had to lay and my little ones do the work. I was almost dead. I tried everything I heard of, and a number of doctors. Still I didn't get any relief. I couldn't eat, and slept poorly. I believe if I hadn't heard of and taken Cardui I would have died. I bought six bottles, after a neighbor told me what it did for her.

"I began to eat and sleep, began to gain my strength and am now well and strong. I haven't had any trouble since. . . I am sure can testify to the good that Cardui did me. I don't think there is a better tonic made and I believe it saved my life."

For over 40 years, thousands of women have used Cardui successfully, in the treatment of many womanly ailments.

If you suffer as these women did, take Cardui. It may help you, too. At all druggists. E 55

Old Aunt Mary's Romance

By ELLA SAUNDERS

Copyright, 1922, Western Newspaper Union

Aunt Mary Sykes had been buried three days, and that forbidding presence would never dominate the little house again. That was Della's chief thought as she sat by the window, staring out into the driving rain.

She was too honest to pretend sorrow for the crabbled old woman's death. Aunt Mary had written offering her a home after her father's death, and she had given up her post as stenographer in town, thinking it her duty to help with her aunt's house, as her cousin, Miriam, was an invalid. But she had soon found that Miriam's invalidism was an excuse for lying in bed till ten in the morning and lounging all day in her chair on the porch, and being waited on.

Della had known little of Aunt Mary before she came to live with her. She knew that she had made a runaway match long before, had disappeared for a dozen years and returned, with her ungainly daughter, to take possession of the house her father left her. Nothing more, and, during her years of service, Aunt Mary had not been communicative.

Service? Drudgery! Della had stayed year after year, seeing her beauty fade, because Miriam was too selfish or incompetent to care for the old woman, especially after her aunt became bedridden. And now Aunt Mary was dead, and she had left no will. Della was to receive nothing for all her years of work.

More than that, Miriam was to be married to an elderly farmer of the district. It was not even in pretense of a love match. But Della had to go.

"I'm sorry, Della," Miriam had said. "Stay a week or two and look round. But, you understand, Tom and I intend to rent the place. So, take your time, but keep looking out for something."

Well, she could go back to her old position. Rogers & Sons had offered it to her again. But—Della was six years older!

And Miriam, inheriting a property worth five thousand, had not offered her a penny. That was almost unbelievable. It had not occurred to her cousin that she had any claims on her at all.

Della packed, turning out drawers that had remained unsorted all those years. She was going on the morrow. She had no regrets, no shadow of sentimental feeling for the old place.

A drawer wedged. She pulled hard; it came out suddenly and fell with a crash to the floor. Della heard Miriam's petulant voice on the stairs.

"I wish you wouldn't make so much noise, Della!"

Della went back. Behind the drawer she saw a package of old letters without the envelopes, folded double, the ink yellow and faint with age. They were in an unknown writing. She glanced at them indifferently. They were addressed to her aunt. She must give them to Miriam.

Suddenly she perceived one among them in her aunt's writing. It had been penned, but never sent. And she breathed quickly as she read.

It was a pitiful appeal of a young girl to the unknown writer, unlike anything that she had ever known in Aunt Mary.

"I have been true to you," it ran, "and you deceived me. You went through the ceremony of marriage with me, and for five years I thought myself your legal wife. Now I find that I have been tricked."

"Oh, if you had told me that your first wife was living, and hopelessly insane, I would have come to meet you at the ends of the earth. My love for you was like that. It was eternal, so long as I believed that you were true."

"But now—now that I find you have deceived me, and that my little girl has not even the right to bear her father's name, I have finished with you. I shall never return to you, and you will never hear from me or see either of us again."

Della put back the letter among the rest and sat with her hands folded in her lap, thinking. She realized now that her aunt's hardness had been the hammering of fate, not her natural character. It was dear to think that even crabbled old Aunt Mary had had her romance, pitiful though it was.

But then a sudden thought came to her that made her gasp. Her cousin Miriam was illegitimate and never suspected it. She had believed her father dead those many years. Under the law Miriam got nothing; Della, as the niece, all. The place was hers, and it was Miriam who would have to go if Della revealed her aunt's secret.

Della sat long in thought till the day died. Then, quietly she slipped the letters into her trunk, to be destroyed.

She went downstairs. Miriam looked up from the sofa, where she was reading a novel.

"If you've finished packing you'd better get supper," she said. "When have you decided to go?"

"Oh, tomorrow, I suppose," said Della, indifferently.

Always Timely.

"I haven't written a sermon for next Sunday," said Dr. Fourthly, "and I'm afraid it's too late now. What shall I do?"

"I remember you preached one of your best sermons about twenty years ago on the way the younger generation was going to wrack and ruin," said his good wife. "Fish it out of the barrel, put in some modern slang and it will do very well."—Birmingham Age-Herald.

Mrs. Bates.

"Listen! Oh, my Emmeline! She's fallen into the mill-rind!"

She leaped to her feet and ran down the grounds, screaming. The others followed her, panic-stricken. The danger was very real, for next door to the hotel was an old disused mill, and the little stream, which had been dammed to make a pond, raced like a torrent over the stones.

And at the lower end there was an artificial descent of a dozen feet, made to turn the rusty wheel, which still revolved, grinding the air, with all the force of its five tons of metal.

Another scream followed the first. Then came a splash. And when the women reached the bank of the stream they saw a sight that sent them cold with horror.

Hard up against the heavy wheel was the little girl's fair hair. And, supporting her round the body, was Mr. Wing, struggling desperately against the torrent.

The struggle seemed interminable. The race of the stream beat furiously about them. The Chinaman, gripping a projecting branch with one hand, was striving frantically to pull himself and his helpless burden to the safety of the shore. The screams from the bank deepened even the rush of the waters.

It was touch and go. No sooner had Mr. Wing planted his feet firmly upon the gravel than they were swept away by the force of the torrent. At last, however, with a supreme effort, he succeeded in pulling himself and his burden to the bank, where a dozen pairs of arms snatched at the little girl.

Her eyes opened; she sobbed, gasped. Her mother clasped her in her arms. Nobody thought of Mr. Wing, who was lying panting on the bank. But as he staggered toward the group Mrs. Bates turned toward him and clasped his hand impulsively.

"You've saved my child's life, and I shall always be grateful to you," she sobbed.

Mr. Wing, raising an imaginary hat which had long since disappeared, betook himself toward the hotel.

Miss Charteris knelt beside the child. "Did that bad man push you in?" she asked her.

"No. I tumbled in," said Emmeline. Miss Charteris shook her head doubtfully.

"I wouldn't trust her alone with him," she said. "You never can tell. It isn't like a Chinaman to risk his life for nothing. Most likely he intended to sacrifice her to his heathen gods."

"Oh, I'd hate to think that," protested Mrs. Bates warmly. "He saved her life."

"My dear, if he did, depend on it that he was up to something. I never saw a Chinaman do an unselfish action yet, and I don't believe anyone ever has."

About Gelatin.

Gelatin is an animal product. "It is," says the Standard dictionary, "a hard, transparent, tasteless substance obtained from connective animal tissue, as skin, hoof, horn. It swells to a jelly-like mass in cold water, but dissolves in hot water. Gelatin does not exist free in animal tissues, but is formed by the action of hot water. It is used in various forms as glue, size and isinglass, also as a food, but is not a perfect dietary substitute for proteins. It forms the base of various bacteriological cultures, and is employed in different photographic processes, etc."

Notice to Creditors of Estate

Notice to Creditors of the Estate of Sallie Clark, deceased:

Notice is hereby given that original letters of administration upon the estate of Sallie Clark, deceased, were granted to me, the undersigned, on the 12th day of June, a. d., 1922, by the County Court of Hansford county. All persons having claims against said estate are hereby required to present same to me within the time prescribed by law. My residence and postoffice address is Spearman, Hansford county, Texas.

The *New & Better* USCO Tire
with many improvements

The price remains the same

\$10.90
for the
30 x
3½

WHEN "USCO" announced its new low price of \$10.90 last Fall, the makers were already busy developing a still greater "USCO" value.

The new and better "USCO" as you see it today—with no change in price—and tax absorbed by the manufacturer.

You'll note in the new and better "USCO" these features—

Thicker tread, giving greater non-skid protection. Stouter sidewalls.

Altogether a handsomer tire that will take longer wear both inside and out.

The greatest money's worth of fabric tire in the history of pneumatics.

T. H. TAYLOR, Prop. REASONABLE RATES
MAIN STREET

3 REASONS WHY THE OIL PULL TRACTOR IS THE CHEAPEST FARM POWER

- ① Low Fuel Cost
- ② Low Upkeep Cost
- ③ Long Life

Three things are necessary to produce cheap tractor power. (1) A cheap but powerful fuel. (2) A tractor not liable to delays and breakdowns. (3) A tractor that will last many years, thus reducing cost per year.

Actual records prove that the Oil Pull meets the requirements in all three. That is why it will do your plowing, discing, dragging, seeding, threshing, and belt work cheaper than any other power.

Triple Heat Control Is the Reason

Oil Pull economy is due to Triple Heat Control. This system of oil cooling has solved the problem of burning kerosene successfully under all conditions. The Oil Pull is the only tractor sold with a bona fide written guarantee to that effect. There is a size that will make money for you. Come in and see it. Prices are right.

W. A. JOHNSON, Spearman or Texhoma, or Spearman Equity.

Following is the official ballot to be used in the Democratic Primary election to be held on July 22, 1922, for the purpose of nominating candidates for state, county and precinct offices: Be careful in the preparation of your ballot. Do not touch the name of the candidate for whom you wish to vote. Draw a line through the names of the candidates whom you wish to vote against.

Official Ballot

Candidate for State Representative ..

Will address the voters of the Spearman country at Spearman, on

MONDAY, JULY 17

8:30 P. M.

An invitation is extended to all candidates to be present on this occasion and address the voters.

Correll stands for:

State School money apportioned to maintain uniform length of term in all schools throughout the state.

The complete emancipation of married women.

A curfew law for adoption by cities and towns under general law.

A State Tax Board to equalize tax values over the state.

An A. and M. College for the Panhandle.

Hear the Speeches Monday Night

An Involuntary Bridegroom

By AUSTIN FLEET

Copyright, 1922, Western Newspaper Union.

"Skinner," said Larry the Blood, "I've got a deal on that's going to bring us in more mazuma than we've ever handled."

"It's at Old Man Jones, the parson's. You know my side-kick, Minnie Frogsham, what's been wanting me to hitch up with her these two years past? Well, I've sort of strung her along, thinking a good side-kick's better than a wife. Well, Minnie's been snooping round Old Man Jones' place, and she's found he's got about a ton of ancestral silver, what his grandfather brought from Wales, and Isaacs says he'll pay me a good price on it, because it's heirlooms."

"Old Jones is an unsuspecting sort of guy, and nearly blind, and he puts it out every night on a bureau in his dining room. Tempting Providence, I call it."

"Now, here's your lay, Skinner. You'll be waiting with Isaacs' van round the corner about eleven o'clock tomorrow night. Minnie knows where the spare house key hangs, which you can reach just inside the scullery window. She'll be there and have the

back door open, and I'll see to the rest. Are you wise, Skinner?"

Skinner said he was, and the details of the plan were soon arranged. The following night—not too late, because Old Man Jones believed in early to bed—Larry the Blood found himself outside the Jones house, on the outskirts of the town.

It was past Old Man Jones' bedtime, however, and Larry, lurking in the shadows of the fowlhouse, cursed the nipping wind, and cursed Old Man Jones for not having gone to bed. The windows of the living room were brilliantly illuminated behind the shades. Larry kicked his feet until nearly midnight, growing more and more nervous, and approaching closer and closer to the scullery door. Had Old Man Jones gone up to bed and left the lights on?

Suddenly he saw a slim figure flit from the scullery and peer anxiously into the darkness.

"Is that you, Larry?" came the whisper.

"Minnie! Say, what's the matter?"

"Matter? Nothin'. Old Man Jones has been in bed an hour past and I've been waiting for you. Left the lights on—I reckon the old man's growin' forgetful."

Larry entered the scullery in Minnie's wake.

"You sure it's all right, Minnie?" he asked.

"Sure it is! What'd you s'pose I'm

doing here if it ain't. Come on, don't get cold feet, Larry!"

She turned the handle of the living-room door, and Larry followed her—into a blaze of light, in the midst of which Old Man Jones sat at his ancestral mahogany table, with an open book before him.

Old Man Jones might have been seventy, his beard, which was snow-white, flowed down to his waist, and his hair was down about his ears; but he was six feet four if he was an inch, he was built like a barrel, and his arm, which lay upon the table, looked like a leg of mutton.

The little city rat, five feet four, cowered before the patriarch in speechless terror. Larry never carried a gat, trusting rather to his instinct, but a single blow from Old Man Jones' fist would have knocked him senseless.

And, turning his eyes in despair about the room, Larry saw Old Man Jones' ancestral silver displayed upon the bureau. Ten thousand dollars, if it was worth a penny.

He glanced at Minnie with the vindictive look of a trapped rat. But the next moment Old Man Jones had arisen, strode toward Larry and clasped him warmly by the hand.

"Well, well, well!" he said, squeezing Larry's hand till it was like a limp rag. "In my young days the young men didn't keep their young ladies

Home Building Wood

Own your own home. To have and to hold is the ambition of every red-blooded young man. To care for a home is the desire of every forward-looking young wife.

When thinking of your home, remember that it is almost as easy to build as to buy ready-built, and always more satisfying.

You can design your home to suit yourself, and can select the materials, inside and outside.

COULD HARDLY RAISE HER HAND TO HER HEAD

St. Louis Woman Says She Can Now Do All Her Housework With Little Trouble Since Taking Tanlac.

"By the help of Tanlac," said Mrs. Mary Tenhibben, 3159 North 13th St., St. Louis, Mo., "I am fast getting rid of a case of rheumatism that had followed me for seven years."

"My arms and shoulders pained me so bad I could hardly raise my hands to my head. I also had backache and many a night I was too miserable to sleep at all. I was troubled with indigestion, too, and at times my burden of distress became so heavy that I would almost break down."

"What three bottles of Tanlac has done for me is astonishing. I have gained nine pounds and my rheumatism and backache are so much better that I can do my housework, washing and ironing thrown in, and hardly feel a pain. My appetite is fine, my digestion perfect, and my sleep sound and restful every night. Tanlac is so wonderful that I cannot help praising it."

Tanlac is sold by all good druggists.

waiting for an hour or more—eh, Miss Frogsham? Never mind, never mind. I guess you got cold feet at the last moment, eh?"

"But—but—" Larry began to stammer; and then the full realization of his awful situation came upon him, and he grew mute and helpless.

And in another moment Larry found himself standing up before the patriarch beside Minnie, and Old Man Jones was reading the most dread words that had ever fallen upon Larry's ears. Then Larry felt Minnie slipping something smooth and round into his hand.

"What's this?" he croaked.

"The ring, the ring, darling," whispered Minnie.

"Come, come, put it on her finger like a man!" said Old Man Jones.

Larry, hypnotized into obedience, did so, and a moment later he heard Old Man Jones saying, "I pronounce you man and wife." And an instant later he had imprinted a smacking kiss on Minnie's lips.

"Five dollars, please, Mr. Larrigan," said Old Man Jones. "You've got the sweetest bride I've ever married, and you're a darned lucky young feller. And now I'll leave you to do your love-making on your homeward way, as it's past my bedtime. God bless you. Treat her fair, and you'll have no kick coming!"

Larry staggered to the front door. Outside he turned and scowled at Minnie. "You—" he began.

"Don't be cross, darling," said Minnie affectionately.

"And four miles home," growled Larry. "Where's Isaacs' van?"

NOT THE REASON

Stubby—I think you married me because I had a little money.

Wife—You know that isn't true. I'd have married you if you'd had twice as much.

We have 100 per cent pure paints and oils. Let us prove it. Panhandle Lumber Company.

To the Voters of Hansford County

Although I have no opponent, I wish to assure you that your vote will be appreciated in the primary the same as if I had one, and take this method to thank you in advance for your kindly consideration of my candidacy.

Respectfully,
MRS. J. H. BUCHANAN

Wheat Farmers

We have one 22-45 horse power engine and a 32 inch Altman-Taylor separator, which we will trade or will sell on easy terms. This rig has been used only 22 days and is as good as new. Also, one brand new 24 inch Wallace separator.

Fordson

THE UNIVERSAL TRACTOR

\$395
F.O.B. DETROIT

Reduce Your Production Costs

Farming, like every other business, must cut down the overhead.

It is not a question of being able to afford a Fordson; it is a question of being able to continue farming on the old too-costly basis.

The farmer's problem is not all a sales problem; it is also a production problem. He must cut down the cost of production.

The Fordson does more work at a lower cost and in less time than the old hand methods.

Let us give you the proof. Write, phone or call today.

Don't Lie to Yourself ..

That is what the man does who practices false economy—lies himself into believing that he is going to save some money.

True economy is not how little you pay for an article, but how much value you may get out of it.

A good, substantial implement shed will last a lifetime. Implements left unpainted and exposed to the weather will last from one to three years, while implements that are cared for will last from five to fifteen years. Why buy new implements every year when you can buy a good, substantial implement shed for the price of one implement. LET US HELP YOU.
