Officers Think Chapman May Have Received Fatal Wounds

PHILADELPHIA, Nov. 1 (AP)-Major Murphy Roden of the Louisiana state police said today he believed Charley Chapman, notorious southwest desperado, who exchanged gunfire with officers here late yesterday and escaped, would be found dead in the woods.

Charges Filed Major Roden said Chapman's companion, who he believed to be Dave Graves, a Mid-Western bank bandit, was captured and was being held in an unannounced jail.

"I believe Chapman was mortally wounded," Major Roden told the Associated Press today, "as he fled, and it is my opinion that he will he found somewhere in the woods near here dead. However, he might have escaped and is being hidden out by some of his many friends

SEATTLE, Nov. 1 (12)-Middleweight Champion Al Hostak, whose last 17 opponents have averaged only three rounds against him before being out to sleep, risks his title tonight against Solly

Krieger, Brooklyn Jewish boy who never has been knocked off his feet.

With that "irresistable force, immovable object" motif, Promoter Nate Druxman said he expected a humper crowd of about 9,500 to watch the scheduled 15-rounder. The fight will start about 12 p. m.

It will be Hostak's first title defense since he won the crown by knocking out Freddie Steele of Tacoma, in the first round here last July.

As she herself says, she always fought, but only to get a hearing for herself on the most advantage ous terms-never to keep a rival out or a place. She and her mother tto whom she gives major credit for her success) were shrewd bar-gainers. Miss Farrar got what she needed, and once before the public she took care of herself well

She makes very little of the rrowa prince episode—confesses no linison of the sort she was accused of, though she frankly admits she metimes used her fictitious position to advance her career. She skims the Tellegen "sequence," too, while allowing herself a little bitterness. Scotti she barely mentions except as a colleague,

SHORT TALKS ON ADVERTISING

Prepared by the

Bureau of Research and Education, Advertising Federation of America

Your Wages and Advertising

Number 1

There is a lot of advertising in this country and it has a definite purpose. It is there because somebody wants to sell us Jello, Ford Automobiles, Spearmint Chewing Gum, Pepsodent Toothpaste, Frigidaires, and Sunkist Oranges. We know that advertising helps to sell these things and thousands of others, and we know that it provides a valuable information service to

That much is plain, but did you ever stop to consider that advertising affects your personal income? No matter what your occupation, the amount of your salary or wages is affected by the total volume of advertising on the part of all manufacturers and storekeepers everywhere. This statement is worth examining.

In this country, we produce and consume more than twice as much goods for every man, woman, and child as is produced and used in other principal countries of the world. Why is this? Not merely because we have vast natural resources. Not just because we are better at inventing and organizing. It is mostly because we all want so much to have the good things in life and because we have the individual ambition and energy to get them. The purchasing power of American people is used all the time and it revolves very fast.

This is where advertising comes in. It creates desires for new things and encourages ambition for higher standards of living. Suggestions from advertising are often responsible for the purchase of a new livingroom rug, an automobile, better clothes, or a new kind of breakfast food.

Millions of purchases are inspired by advertising. When the volume of buying is high, business is good and there are many jobs. It is not only the ability of consumers to buy goods but also their desire to buy that makes factories run at full speed. Advertising is one of the greatest stimulators of buying desire that has ever been known.

New industries depend on advertising to get started. A factory is built to manufacture a clever electric razor. No one ever heard of such a thing before. Hardly any-body wants to buy the device until the manufacturer explains its advantages in a national advertising campaign. Almost immediately, thousands of men buy these machines and the company increases production. The result is lots of new jobs for factory workers and traveling salesmen.

Advertising has built many other new industries, big ones and little ones. Similarly, advertising has expanded countless old industries. Raw material and other related industries are directly benefited. In every case it means more employment, more wages. Our whole economic life is speeded up, the national purchasing power is enlarged, and everybody's income goes up.

The merchandising force of advertising is very important among the various factors responsible for our having the highest wage level in the world, with a buying power nearly twice that in Great Britain, two and one-half times as great as in Germany, and more than ten times as high as wages in Russia. In more ways than one, advertising gives a lift to the pay envelope.

- won't flow freely enough in cold temperatures to protect moving parts.

 CHASSIS PROTECTED. WHY: Under ordinary driving conditions winter Mobilgrease Won't Squeeze Out—Wash Dut—or Conged—stops squeaks and makes your car run smoother.

 TRANSMISSION PROTECTED, WHY: Your gear-shift lever answers this when it sticks and is hard to move. Winter Mobil Gear Oil makes shifting easy.

 DIFFERENTIAL PROTECTED. WHY: There are two types of differential gears, and each needs a special winter Mobil Graz Oil to prevent dragging and wear.

 RADIATOR PROTECTED. WHY: Mobil Radiator Flush loosens rout and acuse and re-opens clogged passages. It prepares your radiator for Mobil Precesses.

 BATTERY PROTECTED. WHY: Cold weather reduces battery efficiency: Clean and grease terminals; regular servicing speeds cold starts.

More motor wear occurs in the first two minutes or slow, cold starts than in two hours of high-speed driving. If an X-ray were possible you could easily see why.

On cold starts a lapse of several seconds often occurs before thickened summer oil will reach moving parts. During those seconds your motor makes many revolutions under the strain of imperfect lubrication.

Winter Mobiloil, flowing freely even in sub-zero weather, quickly reaches and lubricates those vital working parts. A complete Winter Proof job will protect your car against frictional wear, and assure quick starts on coldest mornings.

Don't take chances! Get your Winter Proof Ticket at the sign of the Flying Red Horse, and avoid expensive repair bills.
