An editorial by Clyde Warwick of the Canyon News, reprinted in the Amarillo News Globe, advises voters of this District that they should re-elect Senator Clint Small as often as he offered his name for office.

To justify this most emphatic statement Mr. Warwick questions the right of the voters to make changes when a legislator has proven his worth. The Record, (which our editorial friend fails to amplify, other than the general indication that it is perfect) is an argument set forth. The fact that Governor Moody, Ferguson, Searling and Allred called Mr. Small for advice was another argument set forth for his election.

In the mind of this writer, this last bit of logic is rather poor taste. When one makes an analysis of the situation. Anyone that could give good advice to the Sterling administration, and step out of that picture to offer satisfactory advice to the Ferguson administration. . . well they are certainly politicians. . . but they are either not sincere, or subject to constant change of mind.

The writer questions the great record of Senator Small, so far as this Senatorial district is concerned. We question whether or not

the Senator has lived up to the opportunities that were presented him by the voters of the entire Panhandle. Any man that has had the wonderful backing and constant encouragement that Senator Small has had during his political career, would have to make a splendid record. A legislator that had a reasonable amount of native ability, and good training would have duplicated the record of the Senator, in the opinion of the writer. But in the mind of the writer, the gentleman from Amarillo is getting too proficient in his ability to advise with contrary administrations. Perhaps this well developed ability to advise satisfactorily Sterling-Ferguson political regime, gave our Senator the training that enabled him to help write and enact our natural gas legislation, and then in the personnel of a private citizen (namely a lawyer), represent gas corporations to have the same legislation voided.

Mr. Warwick, I am not convinced that Mr. Small will complete this race for re-election. I have not seen his name appear in any of the political columns of the newspapers over the Panhandle as a candidate, and I would not be a bit surprised if he does not withdraw from the race at a reasonably early date.

of people, who imagine that taxes are paid only by the rich, to realize that they are carrying a tax burden even heavier in proportion to their means.

Taxes have a direct bearing on wages. The income of every employee depends basically on the earning power of the business that employs him, and on the ability of the employer to pay adequate real wages. "Real" wages are not measurable in dollars. When the prices of food, clothing, rent and the other necessities of life go up by reason of increased taxes, the effect is a reduction in the real wages of workers. The wage-earner pays taxes not alone in the prices of the things he buys, but in the reduced power of his employer to pay higher wages.

One of the big motor car companies reports that its taxes last year were 21 per cent of its payroll. A large railroad system figures that this year's taxes will come to 22 per cent of its payroll. Of course, somebody has to pay for the cost of government, local, county, state and national, but whether it is necessary to pay such a high price for government is a live question which more and more people are asking.

The realization that taxes come out of everybody's pockets, in higher prices and lower wages, is spreading. When every man comes to a full understanding that neither he nor anybody else escapes taxation, he is going to begin to find out just where the tax money goes, who spends it and how.

That's going to be embarrassing to politicians.—

CRIME AND POLITICS

The activities of the Governor of New Jersey in the case of Bruno Hauptmann did not prevent the execution of the death sentence upon the murderer of Chas. A. Lindbergh, Jr. They did have the effect, however,

of stirring the whole world to sneering and contemptuous comments upon the administration of Justice in America. The fair minded country.

Few fair-minded persons ever questioned the justice of Hauptmann's conviction. The evidence against him was over-whelming and the testimony on his behalf of the flimsiest character. The fairness of his trial was affirmed by the Supreme Court of the United States; the State Board of Pardons refused to intervene on his behalf. People may honestly differ as to whether the death penalty is ever justified, but it is difficult to imagine an honest difference of intelligent opinion. on the question of Hauptmann's guilt.

Why, then, did the Governor of New Jersey interfere in so many ways which kept Hauptmann from paying the wrong of his crime? One of the most often heard answers put forward is that Governor Hoffman was actuated by political motives, arising from factional quarrels in his own state.

The close relation between crime and politics has long been a national scandal. Crime can never be stamped out or controlled so long as politics and politicians have any thing to do with the administration of justice.

"The eight or ten candidates for Governor seem to be having a hard time making headway against the soundest and sanest chief executive Texas has had in many, many years. Jimmy Allred has been a quiet efficient and practical Governor and the people of Texas have been afflicted with far too many frosts to turn him out, even were he asking for a third term, and surely no headway will be made against his re-election to the second term.

There has been some criticism of Governor Allred for his steadfast refusal to summon the Texas Legislature into a special session to enact more taxes for financing

to multiply this cost in a and laudible stand. The efficient revenue in the treasury from the liquor and immediate pensions. The amount necessary to discharge the obligation of the old-age pension is determined, it will be summoned the legislature until then.
—Chicago Daily Press

CHRISTIAN SCIENCE

"Doctrine of Allred" subject of the Lesson which will be read in the of Christ, Scientist, on April 19.

The Golden Text is preaching of the cross that perish foolishness to us which are saved by the power of God."

Among the citations to be used in the Lesson-Sermon following from the 20th before we are always knowing that, while at home in the body, we are from the body, and to be with the Lord."

The Lesson-Sermon also the following passage: "The people from the Christian Science textbook, Science and Health, a Key to the Scriptures, Baker Eddy, 'Become for a single moment for intelligence are partly, neither in nor of matter. If suffering from a sickness, you will find suddenly well. Like we must depart from sense into the spiritual being."

EVERYBODY PAYS TAXES

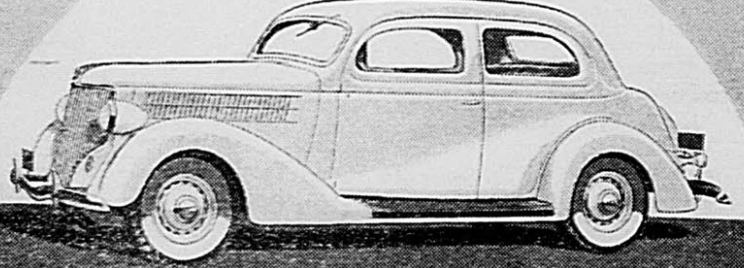

How many folks know how much they contribute toward the cost of government? It is a safe bet that few, if any, can give the right answer. But it is certain that everybody does pay directly or indirectly.

If every commodity purchased, and every bill received for anything, could bear on its face a note stating the amount of the total charge representing taxes, paid at one point or another in the process of production, distribution, it would not take long for the general run

Ford - FOR ECONOMY

"The Ford V-8 uses less fuel and oil for the power it gives than any other car we have ever made

AND ITS UP-KEEP COST IS THE LOWEST"

ENTHUSIASTIC sales talk often begins and ends with gasoline mileage. Some salesmen would like you to believe it is the whole story of automobile economy. But drivers ought to know better. For, the fact is, it's way down the list.

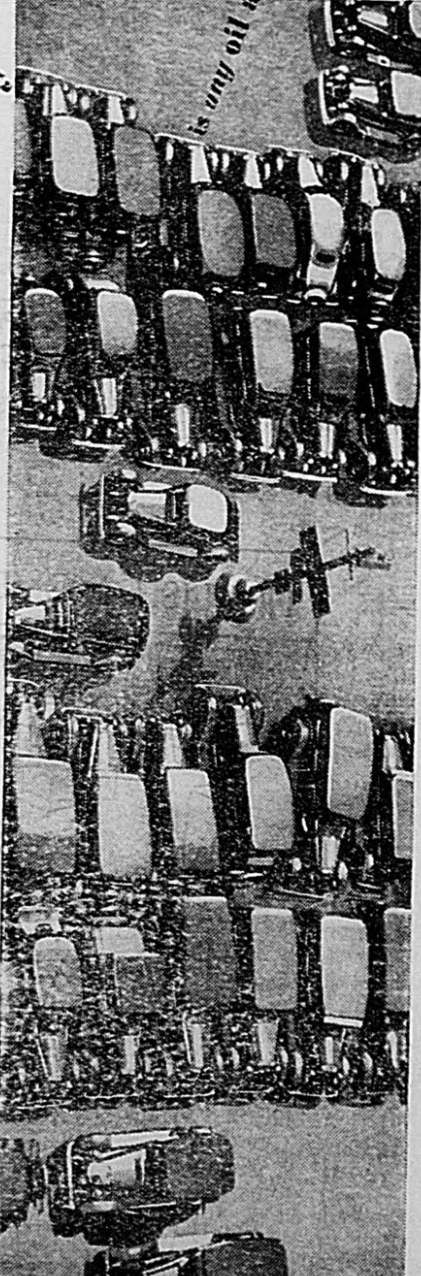

The big items of car economy are low first cost, low up-keep cost and low depreciation. Savings here can make a great deal of difference in cost per mile. Gasoline mileage is more of a talking point than an economy factor.

Check up and you will find that the difference between 17 and 19 miles a

gallon is less than \$10 for a whole year's average driving (8400 miles at 18 cents a gallon). Here are the big items that make the Ford the most economical car:

- More value for every dollar you pay.
- Lower cost for repairs and service.
- Long life. Slow depreciation.
- Quality means economy and the 1936 Ford V-8 gives you more real quality than any other low-price car. No other car under \$1645 has a V-8 engine. No other low-price car has Center-Poise Riding, safe, sure mechanical brakes and Safety Glass all around at no extra cost.

Is any oil any different?
Is any oil any different?
Is any oil any different?

Change to the different oil... alloyed
and be kind to your wallet

We'd rather see you change to any fresh oil. We'd have you risk watery Winter dregs in your case any longer. Any fresh oil is better for you than old.

But when you change to Germ Processed, do it just to change your brand of oil, do it to change whole brand of lubrication!

That's how different this alloyed oil is. And why: the patented Germ Process of alloying it an "affinity" for metals . . . not only for steel, iron, but for every type of bearing metal now in no matter how carefully it must be lubricated.

With alloyed oil actually merging into every engine surface, and with the high-durability Germ Processed oil-film also in between the moving parts, your engine is doubly summer-safe. You can run along on days that shimmy with heat. But your indicator needn't jump, and your oil level needn't slump. Not with this different, alloyed oil. It's time for you to say "Drain," but be selfish—say "Germ Processed." Continental Oil Company.

NORTH TEXANS, GO SOUTH SOUTH TEXANS, GO NORTH

Travel Texas, Know Your State during CENTENNIAL YEAR

Centennial year is travel year in Texas.

An opportunity for every Texan to know his own state; its scenic beauties, historical background and amazing resources!

The month of April is especially eventful. Houston, San Antonio, Kilgore, Taft-Sinton, Victoria and other communities invite you to interesting historical celebrations; observances that will be cherished and long remembered by patriotic Texans.

Make your plans to attend these celebrations and other observances to be held throughout the year. Pack the family into the car, go by train or bus—really SEE Texas. You'll find Texas offers every vacation pleasure—and it's all right here in your own state.

See the calendar at the right. Write the Chamber of Commerce at the various cities for detailed information on events you are interested in.

Meet the Driver Who's a Mind Reader

PROF. KNOWALL - THE MINDREADER - THOUGHT HE KNEW WHAT THE OTHER DRIVER WAS GOING TO DO - (OH YEAH!)

Travelers Ins. Co. Safety Service.

Meet Prof. Knowall—the mind-reader. This is the person who thought he knew what the other driver was going to do. In the words of the young, "Oh yeah!" This illustration is reminiscent of a bit of advice that is always worth following. Never be surprised at what the other person does. Always expect the unexpected. Any driver who follows this advice will always be ready for practically any emergency in traffic.

A lot of drivers who thought the other fellow would grant them the right-of-way found out differently. Others thought there wouldn't be anybody coming over the top of the hill, but there was. Still others thought they could pass on a curve because surely no one would be coming from the other direction. But there was. The list of examples could go on and on. The essential point to remember in driving is, don't take anything for granted.

DON'T NAME IT

By HONEST BILL

Newspaper men all over the Panhandle devoted a bit of their time and newspaper space to wisecracking about the weather the past week. That used to be funny and it shore has developed more among newspaper men than other individual current event.

As a matter of record we give you the following official information about the weather. This year appears to be like 1933 and 35 so far as the spring weather is concerned, with the exception of the moisture we received in January. The record shows we received the following moisture in 1933 for January, 0.00, Feb. 0.00, March, .11, April 0.96, For 1935, January 0.25, Feb., 0.35, March, 0.72, April, 0.00. This year we had the moisture in January that is holding up our early wheat the official record showing, 1.70 inches moisture in Feb., we received 0.05, and March oh, oh, oh, zero. However we still have sufficient moisture to last until June first and make plenty of wheat. That's my story and I will stay with it. Last year on June 4 we had a snow flurry, and on June 13 we had 1.06 inches rainfall, and from here out we went to town with a total of 4.85 inches rainfall in June.

Attended a sort of pre-view to the official opening game of the new Pampa Daily news radio station KPND (Keep Pampa Money Nunn). The occasion was a chicken dinner to newspaper writers as a compliment of the manager of the Roadrunner baseball team. It was quite a compliment to some of us country editors to get to hob-nob with the talented writers of the Pampa and Amarillo and Borger Daily Papers, and to have an opportunity to talk at the mike.

To Gilmore Nunn, who is the manager and guiding star of the new station will say that the programs are coming in just fine over here in Spearman. Just confidentially, Gilmore, we can hear your programs 70 per cent clearer than the Amarillo News Globe station, and that ought not to you feel too bad. And what's here are a lot of people who listen for Pampa programs. I had three different people at the dinner and one at Spearman they heard my talk over the air. After that I began to hear down the street Saturday night. I who hear the news, but seems to be sixteen miles away. The air is so good and soon

NEW TEXAS ALMANAC

The book of 100,000 facts—the 1936 edition of the Texas Almanac—is just off the press. It is the largest volume in the history of this publication—a total of 512 pages, on better grade paper and more profusely illustrated. The 1936 book, although designated as the Centennial Edition, and compiled in Texas this year, misses only twenty one years of reaching its own centennial year, having first been issued in 1857 by the Galveston News, the parent organization of the Dallas News, its present publishers.

While much new material of historical nature is included in the new issue, none of the chapters that has made the Texas Almanac the standard reference book of Texas in the past has been omitted. The names of several thousand individuals appear in its pages.

Features of the current issue include an extensive description of the Texas Centennial including celebrations at Dallas and other points in the State, an outline of the history of Texas from its beginnings to the present an illustrated chapter on the wild flowers of Texas, lists of the different kinds of trees and wild animals found in Texas, extensive lists of historic old towns and origin of names of Texas towns, a text of the state Constitution with all its amendments and a brief account of submission of all adopted amendments since adoption of the Constitution and the new farm census figures of 1935. There is much of interest for the coming political campaign including the current poll tax payments by counties. All figures are brought up to date. There are several chapters devoted to points of interest for the Centennial tourist in Texas, and a new map for this edition entitled Texas for Tourists is folded between the leaves of each volume.

There are more than 100,000 facts about the history, natural resources, crops, livestock, industries, commerce, transportation, finance, government, politics and other phases of Texas economic and social developments.

The Texas Almanac, always in demand by business and professional men and women and students in the Lone Star State will be more in demand this year than ever before. Texas history is more glamorous and richly appealing on the State's 100th birthday. Thousands of out-of-state visitors will visit the Centennial celebration at

to be a Pampa edition, here's a bit more of information about our good neighbors. Pampa is planning an outstanding Centennial Celebration this year. The event will be staged June 2, 3, 4. Pampa business men have contributed ten thousand dollars to make the celebration a success. A race track, is being built and a real racing program will be staged. Pioneer day with representatives from every Panhandle city is planned. Boy Scout day with 1,200 scouts of the Panhandle is another feature. Pampa is stressing the fact that this is not a Pampa celebration but a PANHANDLE event. They are in hopes of getting President Roosevelt to come to Pampa for one day during the big Panhandle event. Our President will open the Centennial at Dallas on June 6 and Pampa feels that he can and will stop at their city enroute to Dallas.

McCORMICK-DEERING WK-40

—International Harvester's New 6-Cylinder, 4-Plow Tractor—Designed to Operate on Gasoline, Kerosene, or No. 1 Furnace Distillate.

The new Model WK-40 fits in toward the top in the modern McCormick-Deering line of 12 farm tractors, supplying smooth, 6-cylinder power for the operation of 4-furrow plows and other large farm tools. It offers an unusual combination of flexibility, ease of handling, efficient operation, and long life. It operates successfully on low-priced fuels, such as kerosene and No. 1 furnace distillate. In its design use has been made of new-type oil seals and efficient air cleaner, oil filter, and fuel strainer to guard against grit, dust, and water.

We invite our customers to visit our store and inspect this new tractor. You will find many interesting features of design in this latest product of International Harvester engineering and manufacture.

Hardware

Child Health Day In May

Call has gone out from the State Department of Health to county Health officers to act as chairman and organize committees for observance of Child Health Day during May. Dr. Beck, field director of the maternal and child health division is State chairman by designation of Dr. John W. Brown, State Health Officer.

Although May Day is Child Health Day by act of Congress communities are free to choose any day for the observance. This slogan has been officially adopted for Texas Child Health Day: "Annual physical examination by your physician and dentist. Immunization against diphtheria, typhoid fever, and small pox. Safe water and proper sanitary equipment for home and school."

These suggestions are set forth in Dr. Beck's letter to county health officers. "May Day—Child Health Day is a challenge to all parents to take stock of the health needs of their children, with special reference to immunization of those of pre-school-age. The records of this office reveal the fact that during 1935, 64 per cent of the deaths caused by diphtheria occurred before the child reached 5 years of age, 23 per cent between the

Dallas this year, and at other places in Texas having Centennial celebrations.

No individual or organization is so thoroughly equipped to present in a book form a compendium of Texas data. Facts and figures come from all parts of the State to find in well edited form their niche in this widely demanded handbook on Texas—its past present and future.

These books may be purchased direct from the Dallas News, Dallas, Texas, Almanac Department.

Flick your finger

...gears shift

Shift with both hands on the wheel... with the Electric Hand

COME in for a "Discovery Drive" in a Hudson or Terraplane with the Electric Hand. See what it means to shift gears at a finger flick... smoothly and surely... with both hands on the wheel and both eyes on the road.

Then let us show you FOUR MORE ways in which the Electric Hand makes driving almost magically simpler, easier and safer.

No Levers to Stumble Over

Now you can enjoy a front seat ride with no gear or brake lever in the way... with the floor all clear. A front seat, at last, in which three can stretch in comfort. That's another Electric Hand advantage.

At the wheel of a 1936 Hudson or Terraplane, you'll soon find many other reasons why these cars are growing so fast in popularity.

You'll discover more power, and smoother power, than you find in cars priced hundreds of dollars higher. More room, too... in the biggest cars ever priced so low. With the newest, most advanced style of the year and many new comfort and safety features found on no other 1936 cars.

Then let us show you what others have discovered about the amazing economy and long life of Hudsons and Terraplanes. The proof is waiting... come and see.

ages of 5 to 9, and 6 per cent between 10 and 14 and 7 per cent were over 15 years of age. Therefore it is imperative that you have your children immunized against diphtheria during the first year of age.

"We recommend an examination for each child, by your family physician and dentist now, and hereafter this annual examination should precede the opening of your fall school term. Your physician and dentist may find some serious defects. If so, they are in position to advise the parents of the proper treatment and by doing so serious illnesses will be prevented.

"We strongly urge that provisions be made throughout the State for suitable places where children may have proper exercises, sanitary swimming pools, and places for play and pleasure.

Joanna, small daughter of Mr. and Mrs. Fred Mizar is quite ill with tonsillitis.
