Injury-riddled Lynx fall to Stratford's Elks, 20-7

There was one minute left to play in the third quarter. The Spearman Lynx trailed 18-0, but had the ball on a third down and goal to go at the Stratford 9. Lynx quarterback Ross Donahue crouched, took the snap, then swiftly straightened and threw a lightning quick pass right over center.

Slicing across the field from his split end post, Mac McLain took the ball and without breaking stride crossed the goal for a touchdown. It was one of those perfectly executed plays just like the coaches drew on the chalkboard, and it was followed by a flawless extra point boot by Mark Guthrie. And with 58 seconds remaining in the third quarter the Elk lead was cut to 18-7.

But if this play worked out just according to plan, it was one of very few things that went right against the Elks in the season opener for both teams Friday night at Lynx stadium, won by Stratford 20-7.

The Lynx came into the game fired up to break the Elks' long standing jinx over them and avenge last year's last minute loss in Stratford, but it was not to be. Perhaps they were a little too anxious, jumping offside on several occasions and committing other offenses that cost them dearly in penalties.

Actually, the aggressive Elks drew more yardage in penalties, being penalized 145 yards to only 95 for Spearman. But-another of those things that just went wrong for the Lynx--an unbelievable number of their penalties came at the worst possible time, killing potential Spearman scoring marches, or setting up Elk scores.

Three bad snaps from center in punting situations led to Elk scores, one of them causing safety in the Lynx end zone for Stratford's final two points, and the earlier two giving the Elks the opportunity to score, which they did.

But the very worst thing that went wrong for the Lynx Friday night wore number 44 on his Elk uniform. Senior running back Sammy Gomez slashed around and through the Lynx defense for 166 yards in 15 carries, scoring the Elks three touchdowns, all three of the Elks' touchdowns, all of them in the first half.

In a way the Lynx-Elk contest was like two separate games. The first was all Elks as they rolled up 18 unanswered points, on runs by Gomez who had amassed almost 150 yards rushing by halftime.

By contrast, the second half was a hard-fought fairly even contest in which the Lynx contained the highly explosive Elk running game, and actually outpointed the visitors 7-2.

And while the Lynx slowed Gomez to 17 yards in seven carries in the last half, they were led on offense by number 44 of their own, tailback Julio Vasquez. Vasquez, who had rushed for 25 yards in the first half, toted the ball six times for 43 yards

and caught two passes for 19 yards in the Lynx' second half resurgence.

The Lynx received the opening kickoff, but could not generate much yardage and punted. From their own 45 the Elks moved the ball in for the score in seven plays with Gomez getting the TD on a three-yard, up-the-middle burst. The kick try for extra point was no good and with 6:53 left in the first quarter it was 6-0, Elks.

Ricky Lopez took the Elk after touchdown kickoff at about the 18 and returned it to the Lynx 34. Three running tries by Vasquez netted two yards and the Lynx punted.

The game settled briefly into a duel of three plays and a punt, three plays and a punt by both offenses, before the Elks generated a drive that was axed when Gomez fumbled away the ball to the Lynx at the tail end of a 31-yard run, and the Lynx took over on their own 15.

Vasquez broke loose for five yards, then Byron Sutterfield for 10 but the drive bogged down and once more the Lynx punted--or tried. The snap was off just enough to allow the punt to be blocked by Brent Spurlock, giving the Elks the ball at the Spearman 18. From there, the Elks worked their way to a second TD in four plays. Again the PAT try--this time a pass--was stopped by a strong Lynx rush that forced Holman to throw short and at 8:35 left in the second quarter it was 12-0, Elks.

Sutterfield gave the Lynx excellent field position by returning the kickoff to the Lynx 35. The Lynx could not gain a first down despite a seven yard pass play from Donahue to strong end Steve Burke, and disaster struck when the Lynx tried to punt. The snap was bad, forcing a fumble. The punter covered but it was the Elks ball at the Lynx 13. After gaining one yard, Gomez roared up the middle and dived across the goal for the TD at 6:20 left in the first half it was 18-0. It stayed that way as Jeff Laird made a diving knockdown of Holman's pass to David Naugle on the PAT attempt.

The Lynx came out fired up at halftime and greatly slowed the Elk running game. Early in the third quarter Spearman launched a drive on the hard running of Paul Lopez, Vasquez and Ricky Lopez, but the Elks finally stopped the drive at the Elk 23 when a screen pass play to Burke went for seven yards on a fourth and nine.

Vasquez intercepted a third down Holman pass and returned it to the Elk 28 to renew the Spearman momentum.

Gallops of six and 4 yards by Paul Lopez aided the drive, but two consecutive penalties against the Lynx slowed it. Then a two yard gain by Vasquez set up a second and 17 at the Elk 25, and the Lynx executed a beautiful reverse, with Ricky Lopez carrying to the Elk 16.

Another 15 yard penalty broke the forward momentum of the Lynx, but

Lynx set sights on Eagles for Friday contest in Fritch

Coach Larry Lanier has his problems for this week's Lynx game with Sanford-Fritch.

The biggest problem, he--and the Lynx--are confronting is the injury jinx. Pre-season speculation by experts have pegged the Lynx monster line, one of the biggest in the Panhandle, as the team's greatest asset.

But by kickoff time against Stratford last Friday night, the Lynx were in trouble in this "strong point."

Two of the Lynx key linemen, 225 pound senior David Turner and 209 pound center Billy Ray Haden were out with injuries and did not see action in the 20-7 loss to the Elks. With the experienced Haden out at offensive center, the Lynx suffered on punt snaps against Stratford, two punts were blocked, setting up Elk TDs, and another snap was high, turning a punting situation into a safety for 2 Elk points.

Both Turner and Haden will be out of action, for the Sanford-Fritch game, Lanier said, along with 203 pound tackle Kevin Slaten who suffered an injury mid-way through the second quarter of the Elks game.

"We'll have to make a few adjustments as a result of these injuries," Coach Lanier commented. Another problem for the Lynx in preparing for the game with the S-F Eagles is in scouting. It's hard to tell a team's strengths when they are walloped 41-0 as the Eagles were by Panhandle, top rated Class AA team in the state.

Lanier is cautioning his team against over confidence as a result of

only temporarily. They were not to be denied. Vasquez gained to the nine on a screen pass to the 27, followed by an 18 yard second and third effort run.

Donahue capped the drive with the up the middle throw to McLain, and Guthrie booted the PAT bringing the Lynx closer at 18-7, Stratford.

In the middle of the fourth quarter, the Lynx ran into a series of penalties that blunted their offensive efforts and set up the last Stratford score a safety. The two points for the Elks came when the snap from center was again high on a fourth and 19 situation at the Lynx 14. The ball sailed over the head of Sutterfield, back to punt, and into the end zone. Seeing a big Elk rush, Sutterfield kicked the rolling ball across the back line of the end zone to avoid a possible Elk touchdown, adding instead just two points to the Elk score.

The Lynx punted for a kickoff following the safety, and the Lynx were again on the defensive after an Elk drive to the Spearman five when the game ended.

the lopsided Panhandle victory over Fritch.

"I anticipate they'll make a lot of improvement," he remarked. "They have a lot of ability we didn't see in the Panhandle game. In their scrimmage against River Road, they looked pretty sharp."

He said the Eagles are basically a running game, although they can--and will pass. They run the Veer on offense and a 52 (5-2) defense, he said.

The Sanford-Fritch squad also has a midlin' big line, but will sorely miss highly touted Ed "Too Tall" Cunningham, a 6-8, 260-pound junior tackle who earned honorable mention all-district both ways last year.

Cunningham was out for the Panhandle game with a knee injury and Lanier said the latest word was that the star tackle had to have blood clots removed from the leg and would be out for awhile.

The Lynx, who played much better against the Elks than the score indicated despite a patchwork lineup, turned in a good second half after a slow start. They hope to smooth out trouble spots on the punting unit, adjust the line to compensate for injuries, and eliminate mistakes that brought costly penalties, and bring home a victory against the Eagles. Kickoff time is 8 p.m. in Fritch.

David and Toni Pond announce the birth of their son, Chad Wayne, born July 1, 1983, weighing 8 lbs. and 15 1/2 oz. Chad arrived home September 2nd weighing 12 lbs. 3/4 oz.

Paternal grandparents are Mr. and Mrs. J.L. Pond of Spearman.

Maternal grandparents are Mr. and Mrs. Buss Maxwell of Perryton.

Maternal great-grandmother is Rosa Ellis of Foster, Missouri.

HOSPITAL

Patients in Hansford Hospital are Debra Soapes, Maria Ortiz and son, Grace M. Kirk, Robert Thompson, Faye Lynch and Josephine Gruver.

Dismissed were J.W. Jenkins, Clyde Soapes, Brett Hobbs, Elizabeth Spivey, Abbe Steger, Leo Frazier, Connie Gammill, Patricia Conners, Bonnie Lakey, Angie Lopez, Bill Hand, Mindy Patterson, Wayne Moore, Debby Herrington and Barbara Cook.

SPORTS BULLETIN: Fans from the Spearman area can park their cars southeast of Greyhound stadium when the Greyhounds and Lynx play in Gruver Sept. 16.

New parking is also available on the home side.

This is homecoming for the Greyhounds.

Man receives prison sentence in court here

A 24-year old Big Spring man was sentenced to three years in the state penitentiary in district court in Spearman Tuesday morning, according to Hansford County Sheriff, R.L. McFarlin.

District Judge J.E. Blackburn meted out the prison sentence to Joseph Long, Long was brought before the judge on charges of probation violation. He had previously been convicted of auto theft and received a probated sentence. The probated sentence was revoked Tuesday by the judge.

Denny Ray Brewer, 19, originally from Waka, received a two-year probated sentence from Judge Blackburn. Brewer had just been returned here after being picked up in Gainesville on a Hansford County warrant for jumping bail.

Once he was returned to the custody of Hansford County Sheriff's Department, the bail jumping charge was dropped and the original charge of burglary was reinstated before he was taken to court, Sheriff McFarlin said.

According to the sheriff, James Wyrick, 28, of Spearman was picked up Aug. 30 and turned over to the Sheriff's office in Altus, Okla. where he allegedly charged with fraud. Wyrick had recently been arrested

in Spearman, but had been freed when he made restitution for the local charge.

And also on Aug. 30, Mike Alaway, 23, of Stratford was arrested here and returned to Sherman County Sheriff Clois Vaughn who had a warrant for Alaway on an alleged forgery charge, McFarlin said.

Look out for a fraudulent roofing scam, Sheriff R.L. McFarlin has cautioned Hansford County residents.

Sheriff McFarlin said a team is making rounds throughout the area, working a fraudulent roofing scheme.

"They're claiming to be out of the Houston-area most of the time, but actually they're from the Dallas-Ft. Worth area, he said.

"People ought to be awfully careful about strangers approaching them about roofing," McFarlin said.

If there's any doubt about a person or persons trying to sell roofing, then the person being solicited should call the Sheriff's Department, he said.

"Remember, if in doubt, call us," McFarlin said.

Something Proud is Happening

The First National Bank, Perryton, Texas, is sponsoring its second Area Art Show on September 8, 9, and 10th. The response given to the 1982 Art Show was so favorable that the bank is again sponsoring this show, to be held in the Community Room of the Bank.

This will again be an Open Show. All amateur and professional artist (including photographers), as well as artists in other fields of wall hangings, are invited to submit entries for this show. Works previously displayed at other art shows may be submitted. There is no specific item for this show.

The Ochiltree County Art Association is again participating in the show. It will coordinate the displays of the works in the exhibition. Mrs. Jim (Nancy) Lamb, Perryton,

is the new president of the organization.

Invitations have been mailed to all Ochiltree County Art Association members, and all 1982 entrants from the area. All interested persons who would like to participate in the show may contact Mrs. Juanita Brillhart, First National Bank, Perryton, Texas, for further information and entry forms. Applications should be received for registration by September 2nd.

As in the 1982 show, there is no age limit, and the only stipulation is that the entrant lives within a 100-mile radius of Perryton. The artwork should be delivered on Thursday, September 8th.

Judges from outside the immediate area will select the best artworks in the major media categories. Cash prizes

will be given for the 1st through 5th places in each category. Ribbons will be awarded to all entries. The overall "Best of Show Award" will be \$100.00 cash.

Judging of the entries will be held on Friday morning, September 9th, from 9:00 A.M. until 12:00 noon. The doors will then be opened to the public for the remainder of that afternoon (until 4:00 P.M.) and will again open on Saturday September 10th, from 10:00 A.M. until 4:00 P.M. The artists works will be on display for potential art purchasers during these hours.

Concluding the Art Show, artists may pickup their work after 4:00 P.M. on Saturday, September 10th, or on the following Monday, during banking hours.

Dr. McClellan brings program at Lions Club

"You've probably heard the saying, 'You're responsible for your health,' or 'You are what you eat.' Well, those sayings are true. Unfortunately, most people don't take these statements seriously until a bad health habit causes a physical problem that requires medical care.

Certainly, your doctor has a responsibility to you when it comes to health care. He or she will advise you on how to maintain good health, diagnose your problem and treat you, give you sympathetic care when you're sick, and refer you to specialists when necessary. But your doctor has no control over whether you practice good health habits, such as regular exercise and not smoking. And since these kinds of habits are the foundation of good health, being healthy is mostly up to you!

Practicing good health habits has two important benefits:

- you may save money on doctor's bills and home remedies, and
- you will feel better and will have taken an important first step towards a longer, healthier life.

Six Health Habits

As we've said, bad health habits hurt you and your pocketbook. Here are six health habits that can lead to a healthier you:

Alcohol If you drink, use alcohol moderately (no more than two drinks a day). Over indulgence can lead to alcoholism, cirrhosis of the liver, and auto accidents (estimates are that half the traffic fatalities in Texas each year are related to driving while intoxicated).

Smoking Ideally, no one should smoke. On an average, 80 percent of all deaths from lung cancer are caused by smoking. Smoking has also been linked to circulatory diseases, increased risk of heart attack, and cancer of the bladder, mouth, and throat.

Curiously, most persons who smoke would rather not! Giving up may not be easy. (30 million Americans have since 1964), but it's proven that success pays off: ten years after quitting your death rate from lung cancer and other smoking related diseases returns approximately to those of non-smokers.

"The hospitals and doctors' charges for patients with smoker-related diseases is \$20.3 billion a year. With our system of third-party payment for health problems, all of us pick up their bill through monthly payroll deductions for health insurance, through taxes or through direct payments to Blue Cross and private insurers. Each adult American is paying \$174.65 a year in added insurance payments, doctors' fees and related costs because of smokers."

The *Chicago Tribune*, February 16, 1982

Obesity Many persons weigh more than is healthy because their eating is triggered by being angry or anxious. If you can identify the times your resistance to overeating is greatest, then you have accomplished the first step in changing your eating habits.

Being overweight can lead to heart attack, diabetes, and high blood pressure. *Remember:* No one said losing weight doesn't take a lot of effort. But everyone who has lost weight says it's worth it!

Exercise Regular exercise is a must to keep your heart muscles and lungs in shape, as well as to supply your body with the blood it needs. How much and what kinds of exercise you should do depends on your age and physical condition. Additional benefits of staying fit are an improved appearance and a sense of well being.

Sleep The amount of sleep needed varies from person to person. Eight hours a night is the general rule. However, what's important is that you find out how many hours are right for you.

Three Nutritious Meals a Day Something as simple as eating breakfast may increase the quality and length of your life. Have lunch and dinner at roughly the same time each day. Avoid snacks. They are a dieter's enemy and can ruin your appetite for a regular nutritious meal.

Eat a balanced diet. Excess sugar,

salt, and fats (in whole milk and fatty meat products) are empty calories and do not contribute to your good health. They can contribute, however, to clogging of your arteries, heart disease, and high blood pressure.

Health Care Costs and You

In 1980, the average cost for personal health care in the U.S. was \$941 for each person. This includes all health services and supply costs. It does not include costs for insurance prepayment and administration or government public health activities. Almost 33¢ of each dollar was paid directly by you, the public. A major portion of the remaining 67¢ is paid indirectly by you in the form of taxes and insurance premiums.

Take an active part in maintaining your health to help keep your costs down.

Follow the six health habits described here. Pick the health insurance plan that best meets your needs, and use the emergency room only when there is a true emergency.

Health Care Costs and Others

No matter how healthy you are, there may be times when you need to see a doctor or go to the hospital. You may have a baby, develop appendicitis, or you may break an arm. The cost of your health care is then influenced by many other people and institutions. They are all aware of health care's high price tag and also are making efforts to control any future increases.

Doctors are helping by performing in their office those procedures that can be performed safely and at less expense than in the hospital. Many also provide brochures like this one in their office, in addition to other activities.

Hospitals are helping by stressing more efficient management and by matching their services and facilities to the actual needs of the community.

Government could help by avoiding unnecessary regulations. These rules often create inefficient procedures and expensive paperwork, the cost for which is passed on to you, the public.

Insurance companies should also cut back on paperwork and change some payment procedures.

If you have any questions about the health habits described here or about health care costs, ask your doctor.

F.F.A. Fair Results

The Spearman FFA chapter trailed to the Tri-State Fair in Amarillo, Texas Sept. 3 through the 5 to exhibit some of their steer feeding projects. The exhibitors from Spearman FFA were Lee Schubert, Larry Hagerman, Stephanie Friemel and Karla Latta. These four exhibited 7 head of steers.

Stephanie Friemel was the big winner. This Spearman FFA exhibitor won two of the four English or English Cross classes. Stephanie went on to exhibit the champion of this division.

Larry Hagerman exhibited a third place steer, Lee Schubert exhibited a 4th place steer, Karla Latta exhibited a 4th and 12th place steer, and Stephanie had an 8th place steer in addition to her two 1st place steers and breed champion.

Five of these seven steers that were shown by the Spearman FFA members were bred by three former FFA members, Ronnie Clark, Scott Strawn and Tracy Vernon.

Stephanie Friemel, Karla Latta, Lee Schubert and Larry Hagerman thank their parents and Ronnie Clark, Scott Strawn and Tracy Vernon for helping each to exhibit their steers and to make this show a success.

70 attend Martin Reunion this year!

Representatives of seven children of former Hansford County Bob and Sophia Martin's children were present at the 9th annual Martin family reunion held in Los Animas, Colo., over the weekend. The reunion was held at the John Martin Reservoir.

Those attending from Spearman were: Chip and Will Ella Martin and Eddie; Bill Martin; Mr. and Mrs. Elvin Martin; Ray and Judy Martin; Jerry "Tooter" Bowling and family; Ray and Sylvia Robertson; and Billy and Sybil Miller.

A total of 70 attended. The reunion will be held in Spearman next year.

Two families from Spearman unable to attend the reunion this year were R.E. "Hoots" and Ina Martin, and Charles Lynn Martin and his family.

4-H Fair Results

Several Hansford County 4-H'ers exhibited animals at the Tri-State Fair in Amarillo over the holiday weekend.

Hansford 4-H members exhibiting sheep were Lynette Williams who showed two seventh place animals; Mike Whitefield with an 8th place, Heather McRee with a 7th, Heidi McRee with an 8th and Karla Latta. Exhibiting swine were Lynette Williams, 7th and Kevin Williams, 8th.

Showing steers were Kyla Nelson, Kevin Nelson, 15th, Leslie Latta, 9th, and Chris Strawn, 6th.

Gift Ideas

Holidays, birthdays, weddings—when the occasion calls for a special gift, do you spend hours searching for just the right present? Simplify the selection process by giving an instant camera. It will add fun to the moment and keep memories fresh over the years.

An instant camera goes to work the minute it's unwrapped. Today's models are equipped with advanced electronic systems for aim-and-shoot simplicity. This means that the very first pictures will be bright and clear, providing a lasting record of the occasion. Family and friends will be able to share in the pleasure and excitement, and take home an instant souvenir of the event.

Now, there's an instant camera to fit every need and pocketbook. Polaroid's economical, new OneStep 600 and Sun 600 LMS are easy to use, with infrared exposure sensing for better flash pictures. Youngsters (and oldsters!) are delighted with no-fuss color pictures. The Sun 600 Autofocus delivers sharp pictures as close as two feet—automatically—and the folding SLR 680, for the serious photographer, provides pictures from ten and a half inches to infinity at the touch of the shutter button.

Just about everyone on your gift list will appreciate a present that's guaranteed to give pleasure now, as well as instant memories later.

Use Energy Wisely . . .

Insulate Your Water Heating System

One of the simplest ways of using energy wisely is to install an insulation blanket around your water heater. Also insulate hot water pipes, particularly if they are in the attic or basement. Check your water heater thermostat to be sure it is operating properly and reduce the setting to 140° (110° if you do not use an automatic dishwasher). Also check the heating elements and drain the water heater yearly. For more energy-saving tips ask for our free booklet, "A Guide To Better Home Energy Management."

REFRIGERATORS
Shopping for a new
appliance can be a time-
consuming project. Accord-
ing to home economists
from Whirlpool Corpora-
tion, before selecting any
appliance, be aware that it
has three major costs:
Purchase cost--the price
paid to buy and install it.
The energy cost--the price
paid for energy to operate
it. The service cost--the
price paid to maintain and
repair it. The appliance with
the lowest purchase cost
may, or may not be, the
best one for your family.

The home economists
suggest that before you buy
any appliance, small or
large, make a checklist of
your most important needs.
Then, comparison shop and
ask questions about its
capacity, design and fea-
tures. Important selection
considerations also include:
* Warranty Terms--Read,
understand, question and
compare warranty coverage
before you make your final
buying decision.
* Energy Cost--Check the
bright yellow EnergyGuide
label on each appliance
which shows annual operat-
ing cost for the appliance
and for all its competing
models in the same size
category.
* Service--What after the
sale services are offered
(delivery, installation, toll-
free numbers for answering
questions or providing ser-
vice assistance, consumer
information services).

Review your checklist
and select the best appliance
for your needs at a price
you can afford. Appliances
last a long time... be sure
the one you select has the
quality, performance, con-
venience, warranty and
after-the-sale services to
meet your future needs.

Playing cards were used as
money by early Canadian
colonists. The back of each
card was signed by the
French colonial governor.

**WINNERS
& LOSERS**

The U.S. is really a winner
when it comes to the
Olympics. Since the inaugu-
ration of the modern Games
in 1896, the United States
has produced 998 gold
medalists who have earned
1,278 gold medals in the
games. No other country
has earned as many coveted
Olympic gold medals as has
the U.S.

Now, any American can
hold Olympic gold. For the
first time, the U.S. Mint
is issuing Olympic com-
memorative coins--and for
the first time in over 50
years, one of those coins
will be of gold. The coins
are being sold to raise mon-
ey to support our Olympic
teams to help add to our
gold medal collection at the
1984 Olympiad in Los
Angeles.

Not to worry' 'Hounds face gruesome Guymon

"Not to worry." That's the word Gruber Head Coach Barry Haenisch is putting out to the varsity Greyhounds as they prepare for Friday night's game with the awesome Guymon Tigers in Guymon.

"I'm telling them not to worry about how tough Guymon is supposed to be—to just go out there and play the best they can, that good things happen to those who do their best."

The best will have to be super if the 'Hounds are to pull off what would be the area upset of the year and defeat the bigger school Tigers.

Solid favorites to win the 1-3A district in Oklahoma, the Tigers have 16 lettermen returning from last year's 5-5 team. Chris Purdy, a 5-11, 162 pound senior passing whiz who also runs the keeper well, leads the offense at quarterback, and senior running back Mike Garcia, 5-9, 162, is a constant threat.

The Tigers have a lot of depth, something Gruber does not, and an

exceptionally heavy line, in contrast to the Greyhounds' "middle-weights."

In their first scrimmage against Spearman, the Tigers rolled up an impressive victory over the Lynx. Their second scrimmage, Canadian, surprised them and the scrimmage ended "about even," but in their first regular season opener against the highly regarded Dalhart Wolves, the Tigers were overpowering.

They racked up a 41-6 win over the Wolves, who had scored a 4-0 margin over Gruber in scrimmage the previous week.

On the positive side, Haenisch said he expects the 'Hounds to be in the best shape they've been in for some time physically.

"We're healthier than we've been—a couple of key starters that didn't play last Friday will be back in line up against Guymon."

And against the best team his team has faced this year—and perhaps will face—this year, Haenisch simply expects of the Greyhounds their very best.

Washington wants to know

Your legislators in Washington like to know what their constituents think about an issue before they make up their own minds. One issue many constituents and congressmen are thinking about these days is one that's been called a matter of "exporting American jobs."

An arrangement has been proposed between the United States Steel Corporation and the British Steel Corporation. Under it, millions of tons of steel slabs would be imported from Scotland to be processed at U.S. Steel's

Fairless Hills plant near Philadelphia, Pennsylvania.

According to the president of the United Steelworkers of America, Lloyd McBride, this deal will open the door for similar action by other steel companies. It would represent a giant step toward reducing the ability of the American steel industry to supply its own home markets, it would encourage rather than discourage further steel imports.

That increases the vulnerability of American steel consumers to supply interruptions and predatory pricing from abroad. It increases our trade deficits and exposes our greater vulnerability to geopolitical

forces that can shock our economy.

Steel-making jobs, points out McBride, are not the only ones to be lost. There are miners of metallurgical coal, iron ore miners, limestone quarry workers, the men and women who fabricate and install "hot-end" equipment, the armies of mill support workers and the community businesses

and services which supply the needs of millworkers.

That may be one reason many state legislators and city councils have passed resolutions condemning this deal.

McBride proposes an alternative to the deal for U.S. Steel. He suggests it go ahead with modernization plans for the plant, as it suggested to the workers it would. An investment which the company has never claimed it could not afford would make the plant state-of-the-art, with oxygen furnaces and continuous casters. The investment would even be subject to amortiza-

tion. The company and the workers could both profit eventually.

Many people concerned about our economy now and in the future, are urging their legislators to look into this issue.

People wishing to write their legislators on this or any issue can reach representatives at the House of Representatives, Washington, DC 20515, and Senators at the U.S. Senate, Washington, DC 20510.

The Milky Way can be easily seen as a bright haze on a clear summer night.

McBride Scotland to be processed at U.S. Steel's

Hundreds of thousands of jobs may be saved, experts say, if America's steel companies invest in modernizing their plants instead of importing their products.

Quality Health Care

Facts From The Medical Society Of The State Of New York

Here are answers from experts on some important questions about organized medicine and physician discipline.

Q. Should the public be alarmed by widespread reports of misconduct among physicians?

A. Even one "bad" doctor—that is, a doctor who is

guilty of misconduct as defined by state law—is one too many. Whether there is cause for widespread alarm is another matter. According to the New York State Health Department's Office of Professional Medical Conduct, 53 physicians were disciplined in 1982, just over one-tenth of one percent of the state's practicing physicians.

Q. Who is responsible for disciplining doctors?

A. The State's Health Department and Education Department have the power to impose sanctions against

physicians.

Q. What role does organized medicine play in that process?

A. Under state law, individual physicians as well as other individuals and organizations in the health care delivery system are obliged to report any evidence they may have of misconduct to the state. In addition, the medical societies do conduct several relevant activities.

County medical societies have mechanisms which review complaints against physicians.

(Quality, simplicity, service)

Welded aluminum alloy construction for lightweight strength and ease of handling.

Heavy-duty expanded aluminum radar mesh reflector.

Single post polar mount system enables you to change satellites in seconds. This system receives all geostationary satellite signals serving North America. Easy to install and easy to align.

Custom-alloy aluminum used throughout for corrosion resistance.

Exceptional good looks and performance.

Custom Colors Available

Chaparral Feedhorn

Adjustable declination for truly accurate polar tracking.

Twelve-foot reflector with 42.3 dB gain.

Focal length/diameter ratio .375.

What is an Earth Station?

The Paracclipse High Performance Satellite Television System represents the leading edge of today's communications technology, it will bring the world into your living room. With the Paracclipse system you can receive any television signal beamed to North America via satellite. You and your family will enjoy countless hours of entertainment and educational television in the years to come.

How does it work?

The program originates at the television studio and is beamed to the repeater satellite via an uplink transmitter. The satellite is in a geostationary orbit over North America, so tracking it across the sky is unnecessary. The Paracclipse can tune in on one satellite at a time and can receive as many as 24 channels from each one.

The parabolic antenna dish amplifies the extremely weak (5 watts) signal over 10,000 times, which is then pick-

ed up by the Low Noise Amplifier (LNA). This small, state-of-the-art microwave amplifier is housed in a weathertight aluminum case that "looks back" at the dish. The amplified microwave signal is then changed by the down converter to a more common 70 mhz signal.

The receiver tunes and separates the signals for each channel made available by the down converter, and sends them through the modulator to the TV set. The receiver also provides power for the LNA and the down converter.

The New SR-1 Receiver System

Includes:

Your source for: **USS, Dexcel, Drake, Automation Techniques, and Arunta, receivers, & Stereo processors.**

Complete systems starting at \$1995

as kit!

The SR-1 Receiver System is the most user-friendly satellite system on the market today. Familiarity with satellite systems is not necessary for operating this system with ease! The SR-1 incorporates the quality of the commercial grade receivers and is actually superior because it has many features the commercial receivers lack. The SR-1 incorporates: **Automatic Quartz Synthesized Tuning**, just push the "soft touch" button and you're automatically locked into that channel. Once the button is touched, the receiver locks onto the frequency and requires no further tuning; **LED readout**, lets you know exactly what channel you're on instantly; **Push Button Polarity Circuitry**, (with the addition of an automatic polarity rotator), you can push a button and instantly change polarity. The circuitry is already built into the receiver; **Polarity Reversing Switch**, for Westar satellites that have their polarities totally reversed, this switch lets you go from Satcom to Westar satellites without confusion; **Automatic Audio Scan**, just push a button and the unit will scan all active subcarriers from 5 MHz to 8MHz until it finds a channel in use; **Dual Conversion**, no signal radiation, higher quality than single conversion receivers; **100° K Low Noise Converter** is standard with each system; **Full Function Remote Control** (optional) plugs in any wall outlet, allows complete control from any room, turns receiver on or off, changes channel, changes polarity, changes audio-all push button; uses **RG-6 Cable Only**, this system uses only one RG-6 cable between the LNC-Down Converter and the receiver; **Illuminated Field Strength Meter**, enables the installer to peak the antenna and serves as an accurate reference point for the user to gauge optimum performance; **Internal Modulator**, is available for channels 3 through 6. The SR-1 Receiver is the system you have been waiting for!

Greyhounds brand Vega Longhorns 7-6 in thriller

Would you believe a 7-6 ball game that was closer than the score?

Faithful Greyhound football fans who traveled to Vega Friday night and saw the Gruver team escape with a 7-6 season opening victory over the Longhorns will tell you the game couldn't have been much closer.

The thriller was a real defensive duel all the way, although Greyhound Head Coach Barry Haenisch said, "Vega never really stopped us. We put together several drives but we stopped our selves with our own mistakes. We lost five fumbles, and were penalized six times for 60 yards."

The game was so close, the 'Hounds had to score twice to get it to count once. The Gruver touchdown came three or four plays into the second quarter. But it did not come easy. The 'Hounds drove steadily downfield from their own 40 and apparently scored when Rodney Clawson took an option pitch, skirted end and raced 15 yards to cross the goalline.

But an illegal motion penalty nullified the run, and the Greyhounds had to do it over again. They did just that, thanks to a spectacular catch by split end Marshall Cator.

Quarterback Chad Logsdon lofted the scoring pass to Cator who was moving in heavy defensive traffic near the backline of the end zone. The 139-pound senior end leaped high at the backline, and hauled in the pass, holding on although a defender was riding his back. The weight of the defender caused Cator to fall across the backline out of the end zone, but not soon enough to prevent the touchdown.

Rod Been, 179-pound senior full back then booted the point after conversion attempt between the uprights for what later turned out to be the crucial winning point. With 11:15 left in the first half, Gruver led 7-0.

The fierce 'Hound defense held the Longhorns at bay until midway of the final quarter when the Longhorns mounted their scoring drive.

Using their hard charging fullback as their main weapon, the Longhorns drove from their own 40 where they got the ball via a Greyhound fumble. One 18-yard pass kept the drive alive and on a fourth down sweep from the 'Hound eight yard line, Longhorn left halfback Toney Badillo scored Vega's touchdown, slipping a 'Hound tackle at the three, bringing the Longhorns to within a single point, 7-6 with 7:30 left to play.

Vega Coach Dwayne Gray elected to go for the win, and called for a two-point try for points after rather than a PAT boot attempt.

Vega quarterback Shane Jackson rolled left on an option keeper, but Greyhound defender Justin Finney read the play and charged in fast, hitting Jackson hard behind the line. Finney wrapped his arms around Jackson's so the Vega quarterback could not get off the option pitch, and brought him down behind the line.

Gruver started another drive highlighted by a couple of long runs, but another fumble killed the effort, and Vega tried desperately to salvage the game with long passes from their own 27 yard line in the waning seconds.

The Greyhound secondary was equal to the pressure, batting away the passes to preserve the win.

The game was as close in statistics as on the scoreboard. Vega ended up with a thin 11-10 edge in first downs, but Gruver outrushed the 'Horns, 173 yards to 149 and each team gained identical 24 yards in the air.

Perhaps because of a stiff breeze, the usually potent Gruver passing attack was off, as the 'Hounds completed only one of seven passes and suffered one interception.

Coch Haenisch said that apparently Vega had learned a lesson from the Greyhound-Hooker, Okla. Bulldog scrimmage when Gruver scored twice on a "long-bomb" TD passes, and set up another score with a third.

"They used a three deep secondary against us, plus one guy who roved about 25 yards deep. They seemed determined not to let us have the long pass.

But when it counted, it was the pass that did the Longhorns in--the pass, and the sensational catch by Cator.

Dr. McClellan brings program at Lions Club

"MAKE IT CLICK—DRIVE DEFENSIVELY"
Questions and Answers

Q. Are safety belts effective?

A. Approximately 14,000 to 18,000 lives could be saved annually if all passenger car occupants used safety belts at all times. The National Highway Traffic Safety Administration estimates that safety belts reduce the chances of serious or fatal injury by 50 to 65%. Society would also be saved millions of dollars. (The National Safety Council estimates that each motor vehicle death costs society \$190,000—including the cost of insurance administration, medical expenses and lost wages.)

Q. I don't wear my safety belt all the time, just on long trips and on expressways; isn't that enough?

A. No! Most crashes (more than 80%) occur at speeds under 40 mph. Fatalities involving non-belted occupants have been recorded at as low as 12 mph (about the speed you would be driving in a parking lot). About 70% of all accidents occur within 25 miles of home, probably because most people drive locally for more than they drive long distances. Consequently, the chances of being in an accident closer to home are greater. So buckle-up before driving to your shopping center, just as you would for a long trip.

Q. Do I need a lap and a shoulder belt?

A. A lap belt will protect you from serious injury. But a shoulder belt provides important additional protection. During a crash, a shoulder belt keeps your head and chest from striking the steering wheel, dashboard and windshield. Using a lap and shoulder belt offers you the best possible protection in the event of a collision.

Q. How do safety belts work?

A. A fastened safety belt distributes the force of a collision over your hips and shoulders—the parts of the body that can best withstand the force. Your belt will also stretch a bit to absorb some of the impact force and, most importantly, stop your body from striking the hard, interior surface of the car or another person.

A car that is traveling at 30 mph will come to a stop within 1/10 second after a collision. Any unbelted occupants will continue to move forward inside the vehicle, at 30 mph. One-fifth second after the car has come to a stop, the unbelted occupants will slam into some part of the car or another passenger—this constitutes the second collision.

Impact during this second collision (at 30 mph) is equivalent to a person falling from a height of several stories. Occupants will not have the time nor the strength to "brace" themselves. (At 30 mph, an occupant strikes the vehicle's interior with a force of several thousand pounds.) Second collisions with steering wheels and windshields account for 38% of the deaths in auto crashes.

Q. Who should wear safety belts?

A. Everyone.

Children under four years of age and weighing less than 40 lbs. should ride in a child safety seat that meets or exceeds federal standards. Never allow passengers to hold an infant or child in their arms. An unrestrained infant will be thrown out of an adult's arms; the adult, in being forced forward, can then crush the infant. For additional protection, small children in child safety seats and older children who can use standard safety belts should ride in the rear seat of the car. Pregnant women should wear their safety belt in the rear seat of the car. Both a shoulder and lap belt should be used to provide an extra safety factor.

Q. Isn't it safer to be thrown clear in an accident?

A. If thrown from a vehicle, your chances of being killed are 25 times greater. The force of the collision can fling you as much as 150 feet (15 car lengths). "Thrown clear" is a misnomer; leaving the vehicle involves crashing through the windshield or being thrown out a door. Once outside, additional dangers include being scraped along the ground, being crushed by your own vehicle or being thrown into a roadside object. The safest place in the event of a crash is inside the vehicle, protected by a fastened safety belt.

Q. Wouldn't a fastened safety belt delay an attempt to escape from a burning or submerged car?

A. Less than one-half of 1% of all injury-producing collisions involve some fire or submersion! In such situations, your first concern is to stay conscious so you can escape. A fastened safety belt will greatly minimize or eliminate potential injuries so that you are capable of escaping.

Q. What is Defensive Driving?

A. Driving to prevent accidents in spite of the incorrect actions of others and adverse conditions.

This information provided by your doctor, the Texas Medical Association, the American Seat Belt Council, and the National Safety Council.

It's amazing how many excuses a person can find for not making a donation to some worthy cause.

Hurricane Alicia results

This rattle snake was found hanging on an electric pole at Jamaica Beach on August 22, 1983.

The picture was taken by Marlene Shutter's son who lives near the Galveston County Trailer Park. Hurricane Alicia hit the area very heavily and knocked power lines down for miles.

A Winner
When you have a fight with your conscience and get licked, you win.
-Grit.

Timely Warning
You can't change the past, but you can ruin the present by worrying about the future.
-Sun, Sac City, Ia.

Process
Marriage is a process of finding out what kind of a guy your wife would have preferred.
-Quonset Scout.

Why?
Why is it the guys who brag they can take it or leave it alone are always taking it.
-Hoist, San Diego.

421 W. Kenneth 659-2012 Spearman, Texas

A Centerpiece

by: Alma Remy

The rain finally came with a little shower on very hot Sunday afternoon and again Sunday night. It made everything smell so fresh and the weather has been cooler since.

The center was a place of much activity on Monday when volunteers turned out for the second session of counted cross stitch taught by Marilyn Cline. Several had finished their trial patterns and they are beautiful.

Recently blood sugar tests and blood pressure were taken. If you are in doubt about either come on down to the center. Joan McClellan is the gracious nurse who checks. This is a courtesy done for our senior citizens so do come in. She will be glad to help you. This is usually done on the Tuesday evenings of the 6:30 get-togethers, however, if you need help between times, Pearl will be glad to help you.

By the way, Tuesday night of this week the First State Bank furnished the hamburgers and did the cooking for our

dinner. Salads and desserts were furnished by the senior citizens. Some 50 people turned out for the dinner and games later.

Bank President Jim Shirley visited and showed sketches of the new bank soon to be under construction and C.A. Gibner was a welcome guest for the evening.

Muriel Boyd organized the affair and if you are wondering just how all those hamburgers got from the back yard to the table, they didn't just fly in. If you looked closely you could see that Muriel was keeping the platters filled and everything running smoothly. Thanks to Muriel and all the good cooks from the bank and Rich Melton, a board member from the Center. It was a real success and was thoroughly enjoyed by all. If you missed this one—you missed a dandy.

Again, I would like to remind you of our Information and Referral service. We are here to serve you so give us a call if we can help you.

Local personnel attend Cost Approach School

A Cost Approach School, relating to methods of appraisal, was held at the Quality Inn in Amarillo August 22, 23, 24 for personnel employed in the appraisal field. Local personnel attending from the Hansford County Appraisal District were Pat Cates and Marsha Kuehl.

The State now requires all personnel in the field of appraisal to be registered with specific qualification to be met before being eligible. Other

schools will be held in the near future relating to the appraisal field. Plans are being made for local personnel to attend these schools.

Cator receives degree

Joseph V. Cator from Spearman received a bachelor degree in Engineering Technology at Texas A&M University's summer commencement exercises.

Something Proud is Happening in Our Area

The First National Bank Art Show and Sale

Nancy Lamb, Ochiltree County Art Association President and Juanita Brillhart, Art Show Coordinator.

This Friday and Saturday, September 9 and 10, the 2nd Annual Art Show and Sale will be presented at First National Bank. It's a proud event, because there is lots of art talent right here in our area. Dozens of artists from Perryton and one hundred miles around will show their best work. Oil painting, watercolor, pastels, photography and more will be featured.

We're proud to be hosting the event. The best artwork will be awarded prize money and ribbons. Join us Friday from noon to 4:00 p.m. and on Saturday, from 10:00 a.m. to 4:00 p.m. for the public showing. It's open to everybody at no charge. Artwork will be on sale and can be purchased right there.

The Art Show Coordinator is Juanita Brillhart, Assistant Vice President at FNB. The Ochiltree County Art Association, headed by President Nancy Lamb, will handle the display of artwork.

Come share in a proud happening. See the quality art that's part of our communities in the North Panhandle area.

We Make Proud Things Happen.

Jaycee led drive collects \$3,000 in MD Telethon

The local Jerry Lewis Labor Day Muscular Dystrophy benefit telethon campaign raised "about \$3,000 to combat the dread disease according to Mike Cudd, president of the Spearman Jaycees that spearheaded the local end of the telethon fundraiser.

"We collected about \$2,600 in pledges, Cudd said, "and the kids with cannisters and fire department people with 'boots' collected about \$300."

Cudd said the telethon center in Spearman Chamber of Commerce was manned by Jaycees including himself and Winegarner, Steve Donnell, Mark Schoenhals, Tommy

Barber, Michael Tucker, Kim Brock, Kent Benton and Verlin Winegarner.

Cudd said the Jaycees would like to thank members of the Spearman Fire Department who donated their time to the fund raiser by stopping autos and soliciting donations in long firemen's boots.

He also praised the efforts of local youngsters who took cannisters and went door-to-door seeking donations. He said he would not try to name the firemen or youngsters involved in the telethon fundraiser, for fear he would forget some of them, but said their efforts were greatly appreciated.

Mike Cudd, [left] takes a pledge call during the Jerry Lewis Labor Day Telethon to raise money to combat Muscular Dystrophy. Manning the local telethon center desk in Spearman Chamber of Commerce

with Cudd was fellow Jaycee Norlan Winegarner. The Jaycees and other volunteers collected \$3,000 in cash and pledges during the 24-hour Labor Day Telethon.

The 64th Annual Equity Stockholders meeting will be held at the Perryton High School Auditorium Thursday, September 8, 1983. Registration will begin at 6:30 p.m. The meeting convenes at 8:00 p.m. Free barbeque dinner will be served.

All Equity Stockholders are cordially invited and encouraged to attend.

One of the first lamps was a wick dipped in grease. The holder was made of stone.

Joni Eareckson is featured in film series

BLESSINGS OUT OF BROKENNESS, a four-part film series featuring Joni Eareckson Tada will be presented on four separate occasions at the First Baptist Church, 123 South Bernice Street. The series will begin on Sunday, September 11, and run every Sunday, beginning at 6:00 p.m. The last film in the series will be presented on Sunday, October 2. The films are open to the public and there is no admission charge. Joni Eareckson Tada is well-known to the public as a best-selling author, a recording artist, and accomplished

illustrator, as well as an actress. At the age of seventeen, Joni was the victim of a tragic diving accident which left her paralyzed from the neck down. Her struggles with quadriplegia and depression were chronicled in the book, JONI, which sold over four million copies. A major motion picture of the same name starred Joni playing her own life. The film, as well as Joni's natural acting skills, were highly praised by audiences and critics alike. Joni's experiences have given her an opportunity to reevaluate her faith, and her

priorities in life. Some of these thoughts were revealed in her second best-selling book, A STEP FURTHER. And, to a much greater extent, they are brought into sharper focus in the film series, BLESSINGS OUT OF BROKENNESS. This film series "Offers hope and comfort to those who have personally experienced hurts—broken homes, broken hearts, broken bodies, and broken relationships." In the four films, Joni discusses these topics: Why the Brokenness?; Where are

the Blessings?; Mending Things; and, Healing and Heaven. Included are glimpses of Joni's personal life and her work with other handicapped individuals. These films demonstrate how each of us can play a special healing role in the lives of those around us who are experiencing brokenness. Bruce Chesser, Pastor of First Baptist Church, stressed that the public is invited to attend the entire series.

Debra Davis
Spearman Police
Department Dispatcher

Debra Davis, former head dispatcher at Spearman Police Department, has returned to work parttime as a dispatcher. Mrs. Davis worked for Spearman PD for four years before "I quit to have a baby." She stayed away from the dispatcher's job for nine months, but said "I missed it too badly." She commutes to Spearman from her Morse residence and said she had another job in Morse but that she will "fill in a few days here (as dispatcher), just to hold on to it." Mrs. Davis, while working previously for the police department, attended judicial school in Lubbock, prosecutor's school in Borger and teletype communications school in Wichita Falls. Her husband Scott is a farmer. They have one child, nine-month-old Donnie.
