

College Awards Board Asks For Nominations

Students who have contributed their time, energy and talent on the behalf of Texas Tech will be recognized at the College Recognition Service sponsored by the College Awards Board on March 20.

Members of the College Awards Board will select these students from among those nominated by any Tech student.

Criteria used by the committee in making selections include:

- The student, or student group, shall have performed in an area of college activity in a way to bring honor to the college and distinction to himself.

- His achievement shall have demonstrated performance either in an area rarely characterized by such excellence or in a degree rarely achieved by students; or the consistency of the excellence of performance shall have reached a standard of rarity.

- Through his example he shall have demonstrated a quali-

ty of performance which will serve as an inspiration to other students or student groups to perform comparably.

- His achievement will be accompanied by the qualities of good scholarship and citizenship.

- His recognition will be compatible with the other recognitions at Recognition Service, and not be duplicated.

Members of the College Awards Board for the 1965-66 academic year are Jack McClure, chairman; Scott Allen, vice chairman; Marge Eubank, secretary; Darrell Ueckert, publicity chairman;

Also Roland Anderson, Bob Fillpot, Jerry Bawcom, Dr. Mina Lamb, Dr. V. M. Smith, Mrs. Dolores Kilchenstein, Dr. Willie E. Phillips, Dr. Samuel E. Curl and James G. Allen.

Nominee forms may be obtained at the office of the Dean of Student Life, and must be returned before March 10.

Space Team Killed In Jet Plane Crash

ST. LOUIS, Mo. (AP)—U.S. astronauts Elliot M. See Jr. and Charles A. Bassett II, the primary crew of the planned Gemini 9 space flight, were killed Monday when their jet plane crashed into the building housing their space capsule.

Bassett was an August, 1960 graduate of Tech, attending under the Air Force Institute of Technology (AFIT) program. An Air Force Captain studying electrical engineering, he graduated with high honors, achieving a 2.78 on a 3.0 system. He was in the upper five per cent of his class.

The backup crew for the flight scheduled this summer, Air Force Lt. Col. Thomas P. Stafford and Navy Lt. Cmdr. Eugene A. Cernan, landed their T38 supersonic trainer safely minutes later at the nearby St. Louis Municipal Airport.

All four were flying to the McDonnell Aircraft Corp. plant here for space training in a space simulator machine when the plane carrying See and Bassett crashed in light fog. McDonnell builds the Gemini spacecraft and Phantom jet fighter planes.

The bodies were thrown from the wreckage after the plane, also a T38 trainer, glanced from the roof of McDonnell's space center and then exploded into

flames on a nearby construction crew parking lot.

The Gemini 9 space capsule was still in the building about 500 feet from the impact point. It was being readied for shipment to Cape Kennedy, Fla.

Also in the building is the production line for jet fighters used in Viet Nam.

It was not learned whether See, 38, or Bassett, 34, was piloting the two-seat plane. Stafford, who rode Gemini 6 into space when it rendezvoused with Gemini 7 last December, was piloting the second plane.

Both planes had left the Manned Spacecraft Center at Houston, Tex.

The cause of the crash, which cut the U.S. space team to 31 astronauts, was not learned.

See was scheduled to be the command pilot of the Gemini 9 two- to three-day rendezvous and docking mission. Bassett, the pilot, was to have taken a 90-minute space walk, highlighted by a test of a new maneuvering backpack.

Bassett, a native of Dayton, Ohio, was graduated from Tech after attending Ohio State University. He later did graduate work at the University of California.

An Open Letter:

Tramps Say 'Thanks' For Spirit

To the Loyal Fans of Texas Tech:

We at Texas Tech take pride in traditionally large turnouts at our basketball games. This enthusiasm is second to none in the realms of behavior as well as size. The Saddle Tramps take pride in serving Texas Tech athletics, the students, and all who are interested in the betterment of Texas Tech itself. We, your spirit organization, thank you for your cooperation and interest in Texas Tech.

As part of our responsibility, we also want to remind you that exhibitions of discontent such as those exhibited at Friday's game against Arkansas are in direct opposition to the "Texas Tech" way of exhibiting school spirit.

Any ice, cups or other litter that finds itself on the court leads only to embarrassment to the coaches and the athletes who

are representing the university we know is Number "1."

A piece of ice doesn't add to our score—it only becomes a safety hazard, which if unseen and became injurious would bring shame to our school.

Maybe our athletes should throw ice and cups at us because when we act as we did at the Arkansas game, we are acting against every principle for which our athletes stand.

When something happens to stir discontent within yourself maybe you should practice the principle that our athletes live by . . . just grit your teeth and think "Givem Hell, Raiders."

In this way we will be the envy of the conference, not the embarrassment of it.

Doors Open Thursday For MUN Delegations

Peace Corps Discussion Set

Two members of the Peace Corps will be "grilled" today at 7 p.m. in the Union Ballroom.

Dr. Robert Lawrence, associate professor of government, and students Hac Brummett and Peggy Mehaffie will question Corps members Gil Hall and David Lewis. Wes Butler, assistant professor of government, will moderate the panel discussion.

The viewpoints of 100 nations of the world will be represented Thursday, Friday and Saturday as Tech's Model United Nations will discuss and decide positions on six universal topics.

Under the direction of Keith Strain, president of the General Assembly, about 350 students representing the 100 member-nations of the United Nations will offer debates on the pre-formed resolutions.

Eldon W. Griffith, conservative member of England's Parliament, will speak to the delegates Friday. Griffith is a speechwriter for Alex Douglas Home, former prime minister of England. He is presently on a speaking tour of the United States.

Topics Selected

The six topics for debate were selected in September by the

Steering Committee, a supervisory group of students chosen by Tech Union directors and last year's secretary general of the MUN.

The topics are "Representation of Red China," "Nonproliferation of Nuclear Weapons," "A Permanent Peacekeeping Force," "Kashmir," "Land Reform" and "Human Rights in Africa."

"In choosing the topics we tried to select current issues that are important in the world today and issues that keep re-occurring on the international political scene," Strain said.

Make Resolutions

From delegates of the General Assembly, three committees were formed to work with the subjects of debate. Each worked on two issues, creating resolutions giving proposed solutions to the topics. These resolutions will be debated during the sessions.

The three-day sessions will end with a recognition banquet Saturday night. Recognition awards will be presented to the Security Council, to the best overall delegation, and four awards will be presented for outstanding action in the General Assembly. Judges will include faculty members and the Steering Committee.

'Broadens View'

"The MUN gives the students that participate a broader view of the world," Strain said. "The successful delegation has to try to think like the country represented, and through this effort they will discover the strong national interest that other countries have."

Sessions will meet Thursday and Friday from 1-5 p.m. and 6:30-8 p.m. Friday morning at 10 Griffith will speak. Saturday the debates will continue from 10-12 a.m. and 1:30-3:30 p.m.

A TRAFFIC ACCIDENT? YOU'RE KIDDING—But that's what it was. A car involved in a collision on College Avenue tried to take a short cut between the Journalism and Social Science buildings, and hit this wall. There was no indication that the

driver tried to stop. The broken pole once held a phone box for reporting fires. When the car hit it, the ensuing alarm brought eight units of the city fire department out.

(Staff Photo)

Car Sets Off Fire Alarm

A Lubbock resident took a "short cut" across the campus early Saturday morning which resulted in setting off an alarm bringing eight city fire department units to Tech.

The man was involved in a traffic accident at the corner of Broadway and College Avenue. He decided to flee the scene via the campus.

His getaway went smoothly until he tried to take a short cut between the Social Science and Journalism Buildings. His car hit a concrete wall beside the Social Science Building and set off a firm alarm next to the wall.

The Lubbock Fire Department sent eight units to Tech, but there was neither a fire nor a driver. He had fled the scene again, this time on foot.

Lubbock police learned the name of the car owner through a license check and are looking for him. The car was impounded by police.

Tech Trio To Play In Ag Talent Show

COLLEGE STATION—An array of performers from Albuquerque to Baton Rouge will be in the spotlight for the Intercollegiate Talent Show Saturday at Texas A&M University.

Twelve acts, plus a guest appearance by the Tyler Junior College Apache Belles, will be featured in the 6:30 p.m. show at G. Rollie White Coliseum.

Aggie Sweetheart Cheri Holland of College Station, a Texas Woman's University sophomore, will

sing and play the guitar.

Master Of Ceremonies

Bob White of Radio KILT, Houston, will be master of ceremonies. Voted one of the top 10 program directors in the nation last year, White is a former WTAW platter-spinner—under the pseudonym Bob Jay.

A&M's representative to ITS is Magician Jim Baldauf.

Other acts, according to schools, include:

Texas Tech—Ray McCorkle, Mack Lawhon and John May, bluegrass instrumentalists.

New Mexico University—Beth Ertz, a pianist who has performed with Lionel Hampton.

Jazz Dancers

Lucy Linderborn and Cissy King, jazz dancers.

Ben Chavez and Ron Cardwell, rhythm and blues singers.

Baylor—Terry Phelps and Louis Perry, singing excerpts from Broadway musicals.

University of Texas—Vocalist Larry G. Smith . . . Marie and Molly O'Shaughnessy, a singing duet.

DR. WILLIAM D. KEMPER

CHI RHO

Chi Rho, service fraternity for Catholic men, will have a smoker Wednesday. The coat and tie event will be in the Coronado Room of Tech Union from 8:15-9:30 p.m.

All Catholic men are eligible to apply for membership. The program will consist of information on the fraternity. Those attending are asked to bring an expendable photograph.

Soil Scientist Will Speak To Aggie Club

Dr. William D. Kemper, of Colorado State University, will visit Texas Tech Friday and Saturday.

Dr. Kemper will speak in a meeting Friday at 7:30 p.m. in Tech's Agricultural Auditorium.

He will address the 29th annual banquet of the Tech Agronomy Club Saturday at 7 p.m. in the KoKo Palace Ballroom. His topic will be "Will Western Agriculture Survive the Loss of Its Waters to Urban and Industrial Users?"

Dr. Kemper's visit is sponsored by the American Society of Agronomy and the Ford Foundation. He holds a bachelor's degree from Brigham Young University and the master of science and Ph.D. degrees from North Carolina State.

A professor of soil science at Colorado State, Dr. Kemper's research has centered around the measurement of moisture and salinity in soils. He is the author of more than 40 technical journal articles.

Dr. Kemper is past chairman of

the Soil Physics Division of the American Society of Agronomy and a member of Sigma Xi and Gamma Sigma Delta.

VISTA Team Visits Campus

Representatives of VISTA, Volunteers in Service to America, are currently visiting the Tech campus to explain the program to prospective volunteers.

VISTA is one of the anti-poverty programs established to help fight America's War on Poverty. Volunteer Joe Parker said the program is open to any citizen of the United States who is at least 18 years old. Married couples are eligible if they have no dependents under 18. Volunteers serve one year terms but can volunteer for a second term.

Linda Hargrave, VISTA representative from the Office of Economic Opportunity, Washington, D.C., said volunteers will be on campus through Friday.

Volunteers are available as speakers for any campus organization or professor. The VISTA representatives are located in the lobby of the Library.

P. E. K.

The National Physical Education Fraternity (P. E. K.) will have a smoker Monday at 7:30 p.m. in the Union Ballroom. Speaker for the event will be Burl Barlett, Tech backfield coach.

Discuss opportunities with members of TRW's technical staff on campus
MARCH 1st & MARCH 2nd

If you are receiving your M.S. or Ph.D. during 1966, we invite you to join this select group. At TRW you will work on major projects such as Pioneer interplanetary spacecraft, OGO satellites, Mars mission studies, Apollo/LEM descent engine, LEM inertial guidance system, underwater defense systems, communications satellites for military and commercial use, advanced ballistic missile studies, Vela nuclear detection satellites, advanced space probes, and Apollo mission planning and analysis.

TRW will assist you in your career planning by encouraging you to continue your development through the many educational opportunities offered by major colleges and universities in the Los Angeles area. You may participate in TRW's Development Programs as you assume greater responsibilities.

Please make arrangements with your Placement Office for an interview; or you may write College Relations at the address below. TRW is an equal opportunity employer, male and female.

LETTERS: Views Of The Reader

Yetta And Big Mother...

THE POSTMAN USUALLY brings us a large assortment of mail every day, including everything from letters, to public relations material, to just plain junk.

But yesterday, he brought something that was too good to ignore. It was from a Jewish mother (as she calls herself) who lives in the Bronx.

She wrote:

"Dear Future Voters:

Soon it will be November 1968 and time to decide on your next President of the U.S.A. I, Mrs. Yetta Bronstein, urge you to vote for me and help put a Mother into the White House. I promise to run this great country with a strong arm, the same way I run my house.

Also, there will be no stealing, cheating or arguing among my government officials in Washington. If politicians want to insult each other and carry on the way they do today, let them join the Army, Navy or Marines!

Now, students, I would like to take you by the hand and explain some facts of life that aren't in your books. Think with me and together we will learn the right answers. First, who is the *only* person in your life you trust? Answer: your Mother. Second, who *really* handles the money in your family and makes all the important decisions? Answer: your Mother. Finally, if the Good Fairy gave you one great wish to come true, *who* would benefit from such a dream? Answer: your Mother.

Think of all the things your Mother did for you: the feeding, changing, washing, ironing, telling bedtime stories, lying for you, crying for you . . . everything to make you big and strong. Now you can pay her back by putting me in office. I will represent *all* your Mothers and act in their behalf for *you*."

Her platform (that's the way she spells it) in the campaign will include (1) lowering voting age to 18, (2) better government, (3) floridation (again, her spelling), (4) national bingo, (5) sex education, and (6) stronger government.

About the only thing she left out is a chicken in every pot, but that may come next week.

And we have the perfect campaign slogan: "Big Mother is Watching You!"

Just A Reminder:

Jim Vaus will speak at the Baptist Student Union and the First Baptist Auditorium Wednesday.

This man's early life of crime and his later devotion to help others is both interesting and inspirational. Everyone who can,

Nominal Fee Buys Date

SAN ANTONIO (AP)—Robert Schneider is convinced there's gold in college romance and is out to get his share.

Schneider, a 28-year-old graduate student, is founder of Computer Quest, an organization which arranges dates by electronics.

For a small fee, \$3 for boys, \$2 for girls, Schneider's organization will use a computer to match

collegians with dates of similar interests and background.

He said his organization played matchmaker for students at the University of Texas, Southwest Texas State, Texas Christian, Southern Methodist and North Texas State University last fall and is now moving into the Old South. He just returned from a selling trip to Auburn, the Univer-

MUN Chairman Corrects Mistake

Dear Editor,

Your otherwise fine article on the meeting of the Economic and Social Committee this week contained one slight flaw in that it misquoted all three points of Tunisia's amendment to the Ivory Coast Resolution on human rights in Africa. The original text of the Ivory Coast Resolution called for economic and military sanctions in the form of an embargo and a blockade.

Tunisia felt that this was in direct violation of Articles 39-42 of the U.N. Charter which gives only the Security Council the right to determine a breach of the peace or to enforce economic and military sanctions. Despite repeated threats to our personal welfare by the Ivory Coast Delegation, Tunisia's delegation proposed the following amendment which, after deleting the offending clause on the use of force, stated:

- That the Secretary General, upon consultation of the Trusteeship Council, use whatever persuasive means available to his high office to liberate Southwest Africa from South African imperialism.
- That the liberated territory of Southwest Africa be placed under the supervision of the U.N. Trusteeship Council, and there be prepared for independence with all deliberate speed.
- That in the event that the Secretary General is unable to recover the above territory, the whole question be taken before the Security Council for a possible military solution.

This was indeed passed by the committee by a large majority.

The Permanent Mission of the Republic of Tunisia to the Model United Nations by
Bruce Pope
Delegation Chairman

Coed Criticizes Dormitory Project

Dear Editor,

Here's to Tech rules and regulations! Universities of the world are following our example. Sorbonne has proposed to clear the area of Montmartre for a multi-millionaire dormitory project!

And he's looking for more markets to crack.

Schneider was a graduate student at Massachusetts Institute of Technology last fall and got the idea for his organization from similar groups in the East.

He said he's "trying to get enough money" to return to MIT to complete work for a doctorate in political science.

The new market in Alabama, Georgia and Florida, he said, is "going quite well," with more than 2,000 applicants.

"We still have mail coming in," he said.

The San Antonio student said his organization uses computers at a bank and at San Antonio College here.

He said the electronic match-making groups are springing up all around the country and the competition is getting stiff.

"Pretty soon," he said, "everybody will be cutting their prices."

From the political and philosophic lands of Berkeley thinkers are forgetting such trivials as integration and war. They are in the process of selecting colors for their blazers. There is a widespread move to mimeograph some teacher evaluation papers and to bring down an all powerful clamp on the lascivious-enticing liquor laws. At the University of Denver intellectuals have thrown aside their books and have turned all their time out of class into shoe-shopping in order to comply with the new rule prohibiting barefeet.

At Oxford Peter the Hermit is being denounced as unshaven and barefooted, who had no business going South to start those nasty Crusades. Closer to home, the Texan as well as its counterpart the Ranger, have assaulted school officials about the salacious hand-holders on Friday and Saturday nights. Visiting parents might think the school a place of poor

professors and equipment, should they see these students.

The Prime Mover (in the way of rules) has "fired the shot heard outside the Bible Belt." And symbolically, this is a sad paradox . . . as Horace said: "How fleeting time is, but don't cry, just live as intensely as you possibly can."

Sincerely,
Kathleen Pearson

professors and equipment, should they see these students.

The Prime Mover (in the way of rules) has "fired the shot heard outside the Bible Belt." And symbolically, this is a sad paradox . . . as Horace said: "How fleeting time is, but don't cry, just live as intensely as you possibly can."

Kathleen Pearson

Student Describes Typical Sophomore

Dear Editor,

One addition to "Guide to 'Sophomorphism'" which could apply to Tech students only.

A sophomore at Tech is the guy who has an eight o'clock everyday, classes all Saturday morning and classes at twelve everyday including Saturday.

Just sign this,
A typical sophomore.

Look At The Record Reveals Rare Facts

Did you know that Joe Louis was not the all-time kayo artist . . . that Everest is not the tallest peak . . . that the largest palace in the world is also the world's largest art gallery? Are you a bit skeptical? Then "look at the record"—as Al Smith used to say.

The world's record for number of knockouts is 136 held by the one-time Light-heavyweight champion Archie Moore. Joe Louis racked up 51 kayos during his career from 1934 to 1951—impressive, but not a record.

As for naming Mount Everest as the world tallest peak, guess again. While Everest at 29,002 feet is the highest point entirely above sea level, Mauna Kea in Hawaii measures 30,000 feet from base to top, 13,769 foot of which is below sea level!

The fastest dog in the world? If you bet on the greyhound, you're wrong: it's the Saluki, which has been clocked at maximum speeds up to 43 m.p.h.

The world's most precious stone, since 1955, is not the diamond but the ruby, which carat for carat sells for more than the diamond, sapphire or emerald. Today, a 6-carat ruby can bring up to \$33,600.

A gem of a monument, completed in 1965, is the Gateway Arch in St. Louis, Missouri, which was built to commemorate westward expansion after the Louisiana Purchase of 1803. Designed by the late architect, Eero Saarinen, the sweeping arch spans 630 feet and is 630 feet high—making it the tallest in the world.

Strangely enough, another monument of superlatives, the world's largest palace, is no longer a palace at all. Instead, it is known as the world's largest art gallery—the Louvre Museum in Paris. Built between 1546 and 1857 by various French monarchs, it extends over 48.9 acres in area.

The longest recorded reign in history was that of the Sixth Dynasty Egyptian Pharaoh, Pepi II,

who ascended to the throne around 2272 B.C. at the age of six and reigned for 91 years! The longest current reign is that of King Sobhuza II, the head chief at Swaziland. He was born in July, 1899, became ruler at the age of 5 months and has reigned continuously for some 66 years.

But monarchs, regardless of the length of their reign, have always been great patrons and collectors of the arts. Today, for example, perhaps the world's greatest private collection of art belongs to Francis Joseph II, reigning prince of Liechtenstein. An earlier ruler, King Francis I of France, once owned the most valuable painting in the world, the "Mona Lisa" by da Vinci but, the only trouble was he used it to decorate, of all places, his bathroom.

Some of the most exquisite works of art from ancient times, from the Egyptians and Romans, are, oddly enough, preserved in floors—thanks to the great durability of mosaics and terrazzo.

And speaking of floors, the man who held the floor and spoke the longest was Texas State Senator Kilmer Corbin—who expounded for 28 hours, 15 minutes in the Texas Legislature on May 17-18, 1965, against financing water projects by taxation. The longest continuous filibuster on record in the U.S. Senate was delivered by Wayne Morse of Oregon. He spoke on the Tidelands Oil Bill in 1963, for 22 hours, 26 minutes without returning to his seat.

Oil is also responsible for the "one that got away;" give a thought to these record-breakers that were really caught. The largest fish ever brought in on a rod was a 2,664-pound, 16-foot-10-inch man-eating great white shark, reeled in by Alf Dean at Denial Bay, South Australia in 1959. Even more impressive was the 4,500-pound white shark harpooned by Capt. Frank Mundus of Montauk Point, N.Y., in 1964, after a battle of five hours.

Letters To The Editor

All commentary letters for publication should be addressed to "Editor, The Daily Toreador, Campus."

Letters on any topic are welcomed and encouraged, but will be rejected for publication if they are libelous or too long for practical use. All letters will be edited for spelling, grammar and minor mistakes.

Letters mailed through the intra-campus mailing service require no postage.

Peace Corps Group Visiting On Campus

A recruiting team of Peace Corps volunteers is on the Tech campus this week to speak to students interested in Peace Corps work. Team members have set up an Information Booth in the library lobby where they are available for questioning about opportunities and experience of Peace Corps volunteers. Films of Peace Corps' work

abroad will be shown. Applications will also be accepted.

Placement Exam

A placement exam will be administered twice daily at 3 p.m. and 7 p.m. said Richard Wanush, Peace Corps spokesman from Liberia. The exam lasts an hour and a half, is non-competitive, and requires no prior preparation. It is used to help assess an applicant's qualifications and to determine what type of overseas job he is best suited to handle.

The Peace Corps is celebrating its fifth anniversary this year. The college and university recruiting program has been in effect for two years, Wanush said. "Its purpose is to inform college students of the types of persons needed to fill Peace Corps positions."

12,500 Volunteers

The Corps currently has some 12,500 volunteers working in 46 countries throughout Latin America, Asia, and Africa. New programs in Africa and Asia are being initiated this year.

"The people at Texas Tech have always been a source of strong support and enthusiasm for the Peace Corps since its inception. We hope this support continues in the form of many well-qualified applicants for Peace Corps service," according to one Peace Corps spokesman.

The recruiting program is headed by Gil Hall, returned volunteer from Ecuador. Other team members, all recently returned from overseas duty are Ginny Prytherch, West Pakistan; Richard Wanush, Liberia; and Joan Dillard, Borneo. All are now employed with the Peace Corps staff in Washington.

FRESHMAN MEN'S HONORARY
Men students who are eligible for initiation into Phi Eta Sigma, should notify the Office of Student Life as soon as possible.

Eligibility requires a 3.50 average on all courses except one hour courses in which there is no final examination, for the fall semester of 1965 or for the first two regular semesters enrolled in Texas Tech.

Dallas Editor Dies At 85

DALLAS (AP)—Allen Duckworth, 55, veteran political editor of the Dallas Morning News, died of an apparent heart attack Monday.

He worked on the old Dallas Dispatch and Journal, covering police, educational, cotton and sports beats, until he joined the News as assistant city editor in 1938.

Duckworth started covering Texas politics in 1944, and encompassed all aspects of the field from the precinct to the presidency.

He was a member of the National Press Club in Washington, and past president of the Dallas Chapter of Sigma Delta Chi. He also served on the editorial board of This Week magazine, a supplement to the News.

Gov. John Connally said Duckworth "leaves a legacy of great writing and reporting which is a credit to the Dallas Morning News and the newspaper profession in general. All of us who knew him and respected his immense talent and insight are grieved at his untimely loss."

Duckworth became ill early Monday and was taken to Baylor Hospital, where he was reported dead on arrival. An autopsy was ordered.

Services are scheduled for 11 a.m. Wednesday at the Highland Park Presbyterian Church.

Raider Roundup

UNION HOOTENANNY

The Union Entertainment Committee is sponsoring a hootenanny March 8 at 7 p.m. in the Coronado Room.

Students wishing to participate

must sign up at the Union newsstand by March 1.

RIC

Houston Hodges will discuss the "God is Dead" theologians today

at noon in the Blue Room of the Union.

The program is sponsored by the Religious Interest Council.

NEWMAN CLUB

The Newman Club will have a panel discussion Sunday at 7:15 p.m. at the Newman Center on birth control.

SIGMA ALPHA ETA

Sigma Alpha Eta will have a noon meeting today in the speech and hearing clinic. Lunch will be served.

NCAS

The National Association for Secretaries will initiate new members at a meeting Wednesday at 7 p.m. in the Coronado Room of Tech Union.

Three Injured In Flash Fire In Office Building

AUSTIN (AP)—An electrical explosion and flash fire injured three persons and forced several hundred employees to leave the 11-story Sam Houston State Office Building Monday.

Hospitalized

In a hospital in fair condition with burns about the face, neck, arms and hands was Richard Overstreet, 56, a plasterer. Treated for burns on his fingers was John Roundtree, 26. Minor burns also were sustained by Oscar Holts, an electrician, who required no treatment.

Fire broke out in a fifth-floor electrical panel.

Service Interrupted

Elevator service was interrupted, sending state employees scampering down the stairs. They watched the boiling smoke of the flash fire from a lawn.

Workmen said the blaze was smothered quickly with a fire extinguisher, but the smoke persisted.

Fire Chief R. H. Dickerson said the fire apparently was caused by the fifth floor short circuit.

Raiders Close Out Home Slate

By **MIKE LUTZ**
Sports Editor

Few would have predicted that the Red Raiders would play out their last home date in no higher than third place in SWC standings and eliminated from any chance at the title.

But that is exactly the situation in Municipal Coliseum tonight at 8 when the pre-season favorite Techsans host cellar-dwelling Rice in a match that will be the final appearance before the home folks for three Raider seniors.

Tech will enter the final home stand with 7-5 credentials, while SMU is 10-3 and Texas A&M 9-3. SMU beat TCU 100-96 in overtime Monday night to eliminate Tech from the race.

Final Appearance

It will be the final home appearance for seniors Dub Malaise, Russ Wilkinson and Norman Reuther.

"Our workouts have been pretty good and I think they'll be ready to play," Coach Gene Gibson said. "It's the last home game of the season and besides, we're not expecting Rice to play dead."

The Owls ended a marathon losing streak against Baylor several games ago, but it's the only victory for the Houston school this season. Rice will enter tonight's battle with a 1-11 conference standard and 1-20 season mark.

McKendrick Paces Owls

Still pacing the Owls, as he was the last time these two teams met, is Doug McKendrick, who's currently ninth among loop scorers with a 16.2 average. He's sixth in the scoring standings for the

season with a 19.2 average.

For the Raiders it will be Vernon Paul and Wilkinson at forwards; Malaise and Reuther at guards and Bob Glover at center. The Tech Picadors will meet the Abilene Christian College freshman preceding the varsity clash. In other conference games tonight, Texas A&M hosts Baylor and Arkansas plays Texas in Austin.

Tech Tankers Meet 'Hounds

Texas Tech's swimming team will close out its regular season in a double dual meet with Arlington State College and Eastern New Mexico University here Saturday.

Competition will begin at 4 p.m. instead of at 3:30 p.m. as originally scheduled.

Coach Jim McNally's Red Raiders, currently 8-9, could finish above the .500 mark with a pair of victories. Texas Tech last week on the road lost to Texas and defeated Texas A&M. The Tech frosh pulled a surprise victory over the Texas frosh and followed that up with a win over the Aggie freshmen.

After Saturday's meet remaining will be the Southwest Conference Meet at Austin March 10-12 and the NCAA Championships at Air Force Academy March 24-26.

Braves' Trial Recesses After Ten Minutes

MILWAUKEE (AP)—Baseball went on trial Monday—for about 10 minutes—before the case being heard by Circuit Judge Elmer W. Roller was recessed for the behind-the-scenes legal skirmishing involved in marking exhibits.

The important case, which likely will test the entire structure of baseball, began minutes after 9 a.m., before a packed courtroom holding about 150 onlookers, a battery of 17 legal experts and a jury box filled with reporters.

The state of Wisconsin eventually will put before the court its contention that the National League has violated antitrust laws by moving the Braves from Milwaukee to Atlanta. But there was little courtroom activity as the trial began.

The first official move was an attempt by baseball's counsel to amend its answers to the state's complaint by getting before the court rulings by Georgia and Texas judges who have ordered the Braves to play the 1966 season in Atlanta.

Willard S. Stafford, special counsel for the state attorney general, immediately objected because the matter "is not relevant to the controversy."

Trackmen Move Outdoors

Tech's track and field team will open outdoor competition Saturday in the Southwestern Recreation Meet in Fort Worth.

Heading the Raiders' hopefuls are senior Ronnie Davis of Brownwood who captured the Southwest Conference three-mile event last spring and sophomore Rich Kay of Orinda, Calif., winner of the SWC freshman mile event last year.

In the shotput division, the Raiders could be strong with junior Ed Mooney of Wallkill, N.Y., and sophomore Randy Hicks of Seminole in the varsity division, Lee LeBow of Lake Jackson and Ronnie Sowell of Artesia, N.M., in the freshman competition. Mooney, national junior college champion from Scottsbluff, Neb. College last year, finished second in the Fort Worth indoor meet and first in the Dallas indoor this month.

15 Varsity Performers

Coach Vernon Hilliard plans to enter 15 varsity performers and 16 freshmen in the Fort Worth meet Saturday.

By Events, Tech's entries:

440 relay—John Semetko of Houston, Clark Willingham of Dallas, Don Parrish of Daingerfield, and Richard Hardy of Dallas, varsity; Steve Behrens of Aurora, Colo., Dennis Lilley of Lubbock, Jerry Pinkston of Dallas, and Copie Perry of Maryville, Tenn., freshmen.

High and intermediate hurdles—Art Carroll of Lubbock, Foster Miller of Llano, varsity; Perry and Lilley, freshmen.

100 and 220 dashes—Parrish, Willingham, Hardy, varsity; Behrens, Pinkston, freshmen.

440 dash—Bob Nelson of Quanah, Davis, Semetko, varsity; Mark Wadener of Fort Worth, freshmen.

880 run—Davis, Kay, Terry Diveley of Midland, varsity; George Coon of Morga, Calif., freshmen.

Mile Performers

Mile run—Davis, Diveley, Kay, varsity; Widener, freshmen.

Mile relay—Parrish, Willingham or Davis, Nelson, Hardy, varsity; Behrens, Coon, Lilley, Mike Eggemeyer, of Dallas, freshmen.

IM Program Prepares For Spring Sports

Softball is on the top rung of importance in intramural sports as it and other spring sports begin in earnest.

Although the soccer playoffs have reached the semi-final stage, the men's intramural department is concentrating upon softball.

Monday the fraternity league had its meeting to draw for schedule positions and today at 5 p.m. the residence halls, independent organizations, and clubs will meet to draw up a schedule. The meeting will be held in the Intramural Gym conference room. Competition will begin in the fraternity league 1:30 p.m. Sunday on the campus softball fields.

Wednesday Phi Kappa Psi is scheduled to square off against the Phi Deltas in the fraternity league playoffs. The winners of the 5 p.m. game will meet the Kutis, an independent team, for the All College Championship.

Faculty and staff basketball competition is also just beginning, and this week is set aside for team entries. There will be an organization meeting Monday, at 5 p.m. in the IM Gym conference room. Play will begin March 11.

Ice hockey is still underway, while badminton competition is just beginning. Golf and tennis are scheduled soon, and cross country competition is open for entries.

The Intramural Department needs softball officials. All officials will be paid and experience is not necessary. Please contact the intramural office.

Galileos...

TRW needs you. Centuries ago the thinking of Galileo, da Vinci, and Newton was thought heretic by many of their contemporaries. But, the test of time has seen such thoughts develop into the technologies of today. Now, in recent time, computer applications through scientific programming have so accelerated the process of problem analysis that the thoughts of today have become the designs of tomorrow.

At TRW, we have taken important strides in advancing technology through the use of computer applications. In Houston, adjacent to NASA's Manned Spacecraft Center (the home of Apollo), and at Redondo Beach near Los Angeles International Airport, several hundred skilled TRW programmers are applying their brain-power to further advance the capabilities of computers and computer sciences.
