Lubbock, Texas, Tuesday, April 19, 1966

No. 123

# Executive Officers List Duties, Qualifications

Are Tech's school elections popularity contests? To keep them from being such, one thing students can do is to know what their student officers do. Present student officers were interviewed and asked: (1) What are your present duties? (2) What qualifications should a candidate possess to meet the duties of his office?

Sara Cox, secretary of the Student Senate said, "The biggest job of the secretary is serving as head of the elections committee." As automatic head of this committee, Miss Cox is in charge of all aspects of the elections. Dates have to be set and service clubs have to be scheduled to be at the polls. The secretary advises and interprets election rules and procedures.

Her Senate duties consist of taking minutes at meetings and having them mimeographed. These minutes are sent to other schools in the Southwest Conference. In turn, Tech receives the minutes from other schools. The Senators are notified by the secretary of the time and place of meetings.

## Coordinating Board Delays Final Action

AUSTIN (AP)—The State College Coordinating Board, facing one of its toughest decisions, put off Monday until April 30 action on a proposal to eliminate Texas Southern University's law school and East Texas State University's doctoral programs.

A vote on both issues was scheduled for Monday, but Tom Sealy of Midland, chairman of a committee studying the two schools, asked more time.

A role and scope plan for the 22 state colleges and universities is awaiting final action. The plan would limit doctoral programs to the University of Texas, Texas A&M, Texas Tech, University of Houston, North Texas State and Texas Woman's University.

The board voted to issue \$20-million in bonds to finance the first phase of the \$89-million college student loan program approved last November by the voters.

Also approved were regulations governing the loan program. The regulations require that loan applications be sent to participating colleges and universities, which would forward them to the board for approval.

In an action that will determine the amount of construction at 17 schools in the next 12 years, the board approved estimates showing the institutions will more than double in enrollment by 1978.

The estimate, showing an increase from 115,015 students next year to 260,097 in 1978, will be used in determining allocation of most of the 10 cents of the state ad valorem tax earmarked for college buildings.

Committee reports of the Student Senate and correspondence from other schools are kept on file in the Student Government Office. Miss Cox is custodian of these.

The secretary and vice president head the legislative branch of the Student Senate, and the vice president, as of this year, presides over the Senate.

**Vice President Scott Allen plans agendas and calls meetings. Plans include deciding what committees will give reports and what business will be heard. The vice president selects with Senate approval, members of temporary committees and standing committees (Elections and Allocations).**

Committees may be created or abolished by the vice president. It is his job to oversee committee work and keep the Senate active.

The vice president must be able to analyze personalities in order to put the best man in the correct job. Knowledge of parliamentary procedure is a must, Allen said.

The business manager—this year, Jerry Rawls—is the link between the cheerleaders and the administration. It is an unofficial policy that the man who holds the purse sets cheerleader policy. Thus he is responsible for cheerleader actions in regard to finances.

Along with the president, the business manager is a student representative on standing committees. His most important role is Chairman of the Student Allocation Committee, where student members examine budgets for the coming year. Forms are prepared and sent to some 30 campus organizations asking for proposed operating costs, requests for the coming year, and proposed sources as well as present sources of revenue.

A hearing is held in the spring where the committee decides if

material and worthy requests for revenue are being made. Next the business manager prepares a budget to be submitted to the Senate and the president of the college for approval.

The president's duties are not as easy to define. Roland Anderson said, "You wake up every day not knowing exactly what may arise—and something usually does."

What the president does, however, select and recommend students for student-faculty committee work. He is an automatic member of seven or eight such committees.

It is the role of the president to be in constant communication with the administration. In turn the administration may seek Anderson's service as spokesman for the student body. As legislator, he may propose certain improvements to the Senate.

The primary attribute of presidential candidates is being able to work with people in another generation, including faculty, administration, Lubbock citizens, legislature, and visiting dignitaries, Anderson says. Student viewpoints on any issues may need presentation at any time, in any place.

## By Association President

# Students' Role Explained

"At Texas Tech, student government is that body which integrates the ideals, philosophies and goals of this generation into the total scope of university life."

These are the words of Student Association President Roland Anderson as he describes the role of students government as practiced here.

"It is through the student gov-

# First Government Day To Establish Precedent

Today's activities in observance of Government Day will set a precedent for what may become a very important program on the Tech campus in the future.

Activities this year are being conducted on a relatively small scale with emphasis primarily on student government through extensive news coverage.

However, plans for the future are on a much larger scale with hopes of expanding the program to include local, state and national politicians, according to Bill Beuck, chairman of the Senate committee in charge of Government Day.

Today's activities are important not only because they will set a precedent for the future, but also because the purpose is to stress government and campus politics and to put students in the right frame for mind for elections this week, Beuck said.

"The primary purpose of Government Day," Beuck said, "is to arouse interest and to make people more knowledgeable of what

## Other Articles Pertaining To Government Day

- Secretary Sara Cox discusses the merits and fallacies of Tech elections—Page 5
- Chief Justice Bob Fillpot outlines the duties and powers of the Tech Supreme Court, a branch of student government often overlooked and misunderstood—Page 6

is going on today and to expose them to problems which they cannot get in government classes."

"Secondary purposes are to bring government officials on campus so we can get to know them better, to better acquaint them with Texas Tech and to establish personal communications between the student body and political leaders," he added.

Plans for the future include:

- Emphasizing government on the national and state levels more than just student government.
- Inviting local, state and national politicians to the campus, possibly having five outside speakers with one special guest.
- Possibly having an all-school convocation with classes dismissed so students can attend the speeches.
- Having smaller group meetings where students will be allowed to question the visiting politicians.

"Of course, all of these plans are tentative," Beuck said, "but we hope to start them next year."

The idea for Government Day was suggested by Ben Barnes, speaker of the Texas House of Representatives, during his visit to the campus at the first of this semester. The idea was again brought up by Vice President Scott Allen at one of the Student Senate meetings and a committee was appointed to research the possibility of scheduling one this year.

ernment that the administration of the college works with the students and how the students work more closely with the faculty," he said. "Student government at Tech is also the means by which all three of these groups are enabled to work together toward common goals and bene-

fits, rather than having each group often work fruitlessly on their own."

## Opportunities Open

According to Anderson, the opportunities for interested students are vast in the student government setup. "The most significant opportunity here is being a part of advancing a great institution such as this," he said, "and in playing a part in guaranteeing the rights of the individual student, not only at Texas Tech, but as a whole."

Students have the opportunity to serve in student government in more ways than through campus-wide elections. They can become part of what Anderson calls the "civil service" department and serve in the cabinet posts under the president in the executive branch of the student government.

## Positions Listed

"Other ways in which students can serve," Anderson said, "are to run for a post in the Student Senate (legislative branch), accept an appointment as a justice on the student Supreme Court (judicial branch), or run for an executive office or serve as a volunteer in the executive department."

"These various positions that require volunteers afford the non-political student, who wants to be a part of college life on an active basis, a chance to work for his school, his fellow students and himself without the necessity

# R. Buckminster Fuller Will Speak At Auditorium Today

Inventor-Architect R. Buckminster Fuller, who has been called "the most forward-thinking engineer of our time," will be the fourth guest lecturer in Texas Tech's University Speaker Series. In his address at 7:15 p.m. today in Lubbock Municipal Auditorium

Fuller is expected to discuss his unorthodox building concepts as well as to make some calculated predictions regarding the future of industrial technology.

Perhaps best known for his geodesic dome concept, Fuller is the architect for the U.S. Pavilion to be erected in Montreal for the 1967 World Exhibition.

He has been a professor at Southern Illinois University since 1959, and has won world renown as an original thinker who has taken

Fuller's light, strong, quickly-erected geodesic domes house U.S. Marines in Antarctica. They shelter the revolving radar antennas of the Distant Early Warning (DEW) line in the Arctic. The Russians expressed their approval of the 200-foot-diameter dome at the 1959 U.S. exhibit in Moscow by buying it. The largest circular structure without internal supports, the Union Tank Car Co. roundhouse in Baton Rouge, La., 384 feet in diameter, is a geodesic dome.

Reams have been written about Fuller in the public press. In a recent cover article, Time Magazine dubbed him the "Dymaxion American," in allusion to a controversial house and car he designed some years ago, and the more successful Dymaxion World Map.

No admission will be charged for the lecture, and although the series is primarily for Tech students, the public is welcomed if seating space is available.

Learn Europe from behind the counter.

## 25 000 JOBS IN EUROPE

Luxembourg-Each student applicant receives a \$250 travel grant and a paying job in Europe such as office, factory, sales, resort, farm work, etc. Send \$2 (for handling and airmail) to Dept. O, American Student Information Service, 22 Ave. de la Liberte, Grand Duchy of Luxembourg for a 36-page booklet giving all jobs, details and travel grant application forms.

# Mortar Board Taps Members For Initiation

Robed, singing members of Mortar Board tapped 31 juniors and an honorary member yesterday for initiation into the national senior honorary.

Miss Margaret Stuart, associate professor of chemistry, was selected as the honorary member.

Following a long-established tradition, seniors formed a formal robed procession which paraded from class to class and revealed the new members by tapping them during the class period. Selection is based on outstanding scholarship, leadership and service.

Mortar Board projects throughout the year include a homecoming coffee for alumni, Smarty Party for freshmen women and the hosting of Operation Senorita. This year's primary job was the continuation of "Pictures for Posterity," an effort to collect valuable old photographs of early-day Tech to add to the college's Southwest Collection.

New members include:

- Audrey Kerl Anderson, San Bernardino, Calif. Government; Transferred from UCLA in Fall, 1964; Alpha Lambda Delta, Phi Mu, Doak Hall Legislator, UCLA Hall Judicial Board Chairman, National Merit Scholar
- Eleanor Sherrill Andrews, Houston 2.93 Mathematics; Model United Nations Secretary, Honors Council, Student Union Secretary-Treasurer, Ideas and Issues Committee, President's Hostess, Hulien Hall AWS Representative, Gates Hall Legislator
- Roselaine Louise Ashton, Odessa 3.75 Foreign Language; Alpha Lambda Delta, Junior Council, Sigma Delta Pi, Women's Service Organization Mile-of-Penny Project Chairman, Wall Hall Student Assistant
- Beverly Barlow, Richardson 3.08 Child Development and Family Relations; Drane Hall Legislator, Channing Club Secretary-Treasurer, Student Union Committee Chairman, Phi Epsilon Omicron, Tech Dancers, Chairman of BSO Leadership Conference, Junior Council
- Jean Biggs, Panhandle 3.72 English; Alpha Lambda Delta, Junior Council, Sigma Tau Delta, Phi Alpha Theta, Chi Omega Chapter Cor-

respondent and Treasurer, Wall Hall Legislator, Student Union Ideas and Issues Committee, Inez Carter Scholarship recipient

Genelyn Cannon, Amarillo 3.13 Advertising; Phi Gamma Nu Secretary, Gamma Alpha Chi Pledge Trainer, Delta Gamma Asst. Pledge Trainer, Women's Residence Council, Wall Hall President, Panhellenic Scholarship Chairman, AWS Judiciary Chairman, Junior Council, President's Hostess

Margha Clayton, Waco 3.00 Elementary Education; Alpha Lambda Delta, Junior Council, Sigma Tau Delta, Kappa Alpha Theta Scholarship Chairman, Town Girls, Baptist Student Union Missions Chairman, President's Hostess

Laura Virginia Coil, Lubbock 3.27 Math and Psychology; Sigma Tau Delta, Phi Chi, Le Cercle Francais, BSO Recreational Chairman, Town Girls, Model United Nations Delegate, Student Union Committee, BSU Missions, Biology Research Assistant

Cassandra Lee Devlin, Lubbock 3.48 French; Alpha Lambda Delta, Junior Council, Pi Delta Phi, President's Hostess, Kappa Alpha Theta, Town Girls, Model United Nations Delegate, BSU Missions Program

Jane Edwards, Lubbock 3.07 Elementary Education; Texas State Teachers Association, National Education Association, Kappa Kappa Gamma Panhellenic Delegate, Student Union Hospitality Committee, President's Hostess, Hall Legislator, Secretary of Freshman Class

Marge Eubank, Idalou 3.67 Home and Family Life; Alpha Lambda Delta, Junior Council, Phi Upsilon Omicron Secretary, ACE, President of AHEA, Religious Interest Council, Chairman of Awards Banquet, Outstanding Sophomore in Home Economics, Who's Who

Nan Faulkner, Lubbock 3.96 English; Alpha Lambda Delta, Junior Council, President's Hostess, Sigma Tau Delta, Pi Beta Phi Panhellenic Delegate, Rush Advisor, Scholarship Committee, AWS Women's Day Committee Chairman, Panhellenic Rush Advisor, Pi Beta Phi President

Nancy Eileen Fordtran, Houston 2.88 Spanish; Sigma Delta Pi, AWS Rep. of Wall Hall, AWS Judiciary Council, Pi Beta Phi Pledge Trainer, President's Hostess, Pi Beta Phi Recording Secretary

Elizabeth Ann Gerbetz, Dallas 3.25 English; Junior Council, Sigma Tau Delta, President's Hostess, French Club, Women's Service Organization Social Chairman, President of Alpha Phi, BSO Treasurer, Wall Hall Legislator

# Brutten To Speak

Dr. Eugene Brutten, professor of speech correction at Southern Illinois University, will be on the Texas Tech campus today to deliver a lecture on "Stuttering: Behavior Theory and Therapy."

His address at 7:30 p.m. in Tech Union Ballroom is being sponsored by the Tech speech department and Sigma Alpha Eta, speech and hearing honorary.

Dr. Brutten's visit, previously announced for early April, was rescheduled because of conflicting engagements, fraternity officials said.

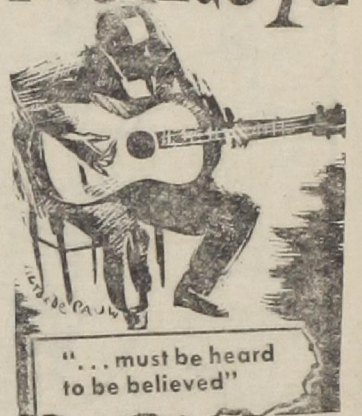

The meeting will be open to the public at no admission charge, said Dr. William K. Ickes, director of Tech's Speech and Hearing Clinic.

Dr. Brutten is widely known for his research in speech pathology and as the originator of a device used to gauge anxiety present in stuttering behavior.

A member of the Southern Illinois University faculty since 1957, he earned his bachelor's degree from Kent State University, his masters from Brooklyn College and a PhD in speech pathology from the University of Illinois.

COMING . . . April 26th

## A Time To Care ...

TODAY IS GOVERNMENT DAY on the Texas Tech campus.

It is a day like any other day, except that it is intended to stress the workings of an important element of campus life—Student Government.

Bill Beuck, chairman of the Government Day Committee, says that the purpose of this day is to "arouse interest in government at all levels and to make people more knowledgeable of what is going on today outside of government classes."

The scope of Government Day in the future will be to focus attention on the workings of government at all levels, but because of the shortage of time since the committee was formed, the emphasis this year will be on student government.

And it is a good place to start.

As trite as it may sound, the college campus is indeed a training ground for future government leaders, just as it is a place where students become citizens and learn of the responsibilities involved in good citizenship.

This includes participation. A government at any level is only as good as the people behind it, and it works best when those people are interested and make their feelings known.

The same is true of student government. It can accomplish a great deal and be a strong voice, but not if the people behind it don't care.

And all this week, starting today, is a good time to care. Elections are coming up this Friday for executive officers and next week for Student Senators. Student Government is on its way to assuming a more important role here next year, but it needs able leaders and able support from interested students.

We care about student government, but more interested students are needed.

## LETTERS:

# Views Of The Reader

### Congressman Asks Lower Voting Age

Dear Editor,  
 I am writing to solicit your interest in an important item of legislation.

For some twenty years, eighteen year olds have been privileged to vote in the State of Georgia. There is now an opportunity to extend this privilege—and responsibility—to all the citizens of the United States who are eighteen years of age or older.

I have introduced a Constitutional Amendment which would set eighteen as the legal voting age in all of the fifty states. This proposed amendment is now before the Judiciary Committee. It is time that this measure be considered by the Congress.

The fate of this bill, as of any legislation, rests with the opinion of the American public. This is where you can be of significant influence. When the issue is known, I believe the people will respond. I hope that you and your staff will consider developing an editorial policy on this matter. The response of your fellow students can be quite beneficial.

With best wishes,  
 Sincerely,  
 Charles Longstreet  
 Weltner  
 Member of Congress

EDITOR'S NOTE: Following is a speech Rep. Weltner delivered in Congress on his proposed amendment.

Mr. Speaker, America is a young nation. Soon, over one-half our population will be less than 25 years old. Today, 8,000,000 young men and women are between the ages of 18 and 20.

These young Americans represent the United States across the globe as Peace Corps Volunteers. They labor in slums, hospitals, and schools in the struggle against poverty. They represent the nation before the world in Olympic competition and international conferences. They man the lines of defense around the world. And, most important of all, they are fighting—and dying—in Southeast Asia.

These young people, ages 18 to 20, have proven themselves worthy of the awesome tasks we place upon them. They are a generation of dedication and ability.

They can do many things, Mr. Speaker, but there is one area where they are excluded. For except in Georgia and three other states, they cannot vote.

They can fight and die—but they cannot vote.

They can represent this great nation in some remote outpost of civilization . . . but they cannot vote.

They can sacrifice their time and energy in ministering to others . . . but they cannot vote.

A Congress so firmly dedicated to the principles of voting rights should move now to extend the franchise to these young Americans.

I have today introduced a resolution to amend the Constitution to this end. It is a plain and simple proposition:

"No citizen of the United States who is 18 years of age or older shall be denied the right to vote by reason of age."

We have placed upon these Americans the duties of citizenship. Let us now extend to them the most basic right of citizenship.

### Powell Supports Computer Center

Dear Editor,  
 In reference to Bruce Mabrito's letter printed in the April 5 Toreador, I should like to speak, informally, on behalf of the computer center staff.

Mabrito is apparently of the opinion that "Computer Charlie" is a machine. This is not strictly correct. Computer Charlie is a psychology student, senior classification, who works for the Psychology Department part-time, for the Computer Center part-time, and as student full-time. (If you think that isn't a load, try it!)

If, as your undoubtedly faithful, loyal and hardworking (oh, yes! and dedicated, too) teacher advises, the faults lie with Charlie, please don't blame our machines. If, on the other hand, the fault is a faulty machine (which is somewhat more plausible), please do not slur one of our "friendly, helpful, empathetic and competent" staff members by confusing him with a machine or blaming him for things which are not his fault.

Finally, I would like to know why your teacher relies completely on a machine when he is apparently much more competent at test grading. I understand that other teachers grade their own papers.

In summary, I suggest to Mabrito that he place his sickening sarcasm and blame where they belong.

Sincerely,  
 D. Bruce Powell  
 Computer Center

### Student Questions CSO Decision

Dear Editor,  
 In discussions both with men and women students concerning the CSO decision on rules about allowing women in the fraternity lodges, several questions have been brought to the minds of Tech students.

1. It seems that only two formal expressions of opinion were brought before CSO. Why was the issue not publicized so that others might have been given an opportunity to give their view?

2. The two written opinions given were both of like nature in that they were both by women students signing as individuals, yet more importance was assigned to the one signed by sorority presidents than the one signed by representatives of all women's organizations. Why?

3. Did CSO consider fraternity members pay fees for the use of their lodge? If this use is denied, the money and facilities (such as TV and study rooms) in the lodges will be wasted.

4. It seems as though members of the college staff are concerned about morality in the lodges. Would they rather see Tech students in parked cars and apartments?

5. The ages of Tech students range usually from 23-18. Are they not responsible for their own actions?

6. The ratio of voters on CSO was six faculty members to three students. Should there not be equal representation?

7. How many nights a week would these faculty members, for instance, care to babysit in the lodges for about five hours?

8. Realizing that mere complaining will solve nothing, this is not our objective. In conclusion, we would like to ask in what ways this question could be raised again in order that a truly representative opinion can be known.

Thank you,  
 BS

# Sara Cox Comments On Upcoming Election

Tech elections have progressed out of the realm of personality contests and are based almost entirely on issues and qualifications, according to Sara Cox, Student Senate elections committee chairman.

Miss Cox, who has a long record of student government experience dating back to junior high, says the most qualified candidates nearly always wind up the victor in Tech elections.

"You can't campaign on an empty platform," she said, "and the students who vote are the same ones who take time to find out who is best qualified for the job."

### Helps Cheerleaders

She said the "cute campaign" probably helps swing more votes in the cheerleader contests than in student government elections. In these elections the hard campaigner stands a better chance of winning.

As chairman of the elections committee, Miss Cox runs into motley attempts to slip under, go around or just plain bypass election regulations. During one 30 minute interval Monday afternoon she received five complaints about infringement of election rules.

"We expanded the rules this year in an attempt to encompass every violation we could think of," she said, "but it's difficult to anticipate all the new ideas candidates can conceive." Monday she received requests by candidates to

move an outhouse on campus and to land a helicopter at the Thursday night rally.

"The rules are simply written and easy to follow but the candidates just have a hard time following them," she said.

### Hears Controversies

The election committee hears controversies arising during elections and decides them by secret ballot, she said. Candidates who don't agree with the election committee decision can appeal to the Tech Supreme Court.

Miss Cox believes that Tech students are not apathetic and election turnouts are good percentage wise. "The only way the vote could be increased would be to pass out ballots in classes and we don't want uninformed or uninterested voters," she said.

The advent of the IBM ballot on the Tech campus two years ago has contributed to faster tabulation and is more accurate than the previous method, she said. All in all Tech elections are more and more becoming work contests instead of personality contests.

# Twenty-Five Sophomore Coeds Selected For Junior Council

Twenty-five outstanding sophomore coeds were roused from slumber at 7 a.m. this morning to attend Junior Council tapping ceremonies at the Toreador Room of Furr's Cafeteria.

The select group were elected by the vote of present members based on scholarship, leadership, service, responsibility and high character demonstrated on the campus. Each new member must have maintained a 3.0 overall grade point average.

Selected for next year's council are:

**Sharon Ann Baumgardner**, Home Economics Education, 3.61—Alpha Lambda Delta, American Home Economics Association, Dorm legislator, Young Republicans, All College Recognition Program, National Food Nutrition Scholarship, Home Demonstration Scholarship, Baptist Student Union.

**Janyth Carpenter**, Spanish, 3.83—Freshman Representative, B.S.O. Retreat delegate, Alpha Lambda Delta, Treasurer, Sigma Delta Pi, CorpsDettes, All College Recognition Service, Dean's List, Legisla-

tor, Special Events Committee of the Student Union, Toreador.

**Mary Lou Clements**, Pre-Med, 3.60—Freshman Representative, Kappa Kappa Gamma Scholarship Chairman, All College Recognition Service, Vice President-Drane Hall, Women's Residence Council, International Interests Committee, Alpha Lambda Delta, Alpha Epsilon Delta, B.S.O. Retreat Delegate, Dean's List, Kappa Kappa Gamma, Association of Women Students Representative.

**Suzanne Cook**, Elementary Education, 3.30—Delta Delta Delta Best Pledge, Best Freshman Member, Pledge Historian, Chapter Historian, Marshall—Association of Childhood Education, La Ventana, Dean's List.

**Suzanne Crain**, English, 3.97—Pi Beta Phi Best Pledge, Association of Women Students Rep., B.S.O. Retreat delegate, Union Hospitality Committee, Town Girls.

Provides Student Voice

# Authority Vested In Senate

The Student Senate, one of the three main branches of student government at Tech, provides Techsians with a method and avenue to voice their opinions and make them heard.

"The Senate is the supreme student group on campus and ultimate authority rests with it," said Scott Allen, Student Association vice president and chairman of the Senate.

The Student Association constitution grants the Senate the power

to "make recommendations over all matters of policy affecting student welfare under this constitution," which, in effect, grants the Senate jurisdiction in any area which affects student welfare or in almost any area of the campus.

This group which has such an important say over campus life consists of 40 elected senators and is presided over by the vice president of the Student Association. The Student Association secretary keeps minutes for each of the meetings and a president pro tempore is elected from the Senate to serve in the absence of the vice president. The Student Association president is not directly connected with the Senate, but presides over a separate branch of government.

The Senate maintains two standing committees, allocations and elections, and has the power to set up as many special committees as are needed. This year, the Senate appointed between 20 and 25 special committees, Allen said.

The Senate meets as often as business requires, which is usually

once every two weeks. Meetings are called by the chairman of the Senate and are open to the student body.

"During some meeting throughout the school year, the Senate will take action which will concern every student on campus. Although no student will be able to attend every meeting, Techsians should keep up with what is going on and attend those meetings which directly concern them," Allen said.

"The Senate is eager to have students come to meeting because the senators are only students themselves and their opinions may differ from those of another student," he added.

Allen said the primary purpose of the Senate is to work for the betterment of the Senate and thereby for the betterment of Texas Tech.

However, in carrying out its role as the voice of the students, the Senate faces many problems. The lack of continuity in the executive leadership of the Senate hampers the organization in carrying out its work. Officers and senators serve for only one year and then other students are elected to take their place.

Although this provides more students with a chance to participate in student government, it also means that just as officers and senators are becoming familiar with various areas and problems of the campus they are replaced by other students who are not so familiar with the campus.

With the large turn-over in the Senate, an issue of major significance may be dropped at the end of the year rather than being carried over to the following year.

But despite the disadvantages and handicaps which the Senate works under, Allen believes the Senate greatly affects the student's life and all campus issues.

For instance, the following is only a partial list of the many activities carried out by the Senate this year:

- Allowing graduate representation on the Senate.
- Appointing two students to serve on the Intramural Executive Committee.
- Arranging joint meetings between the Food Committee and members of the administration.
- Establishing the foreign student buddy program.
- Appointment of summer senators to work with freshman pre-registration.
- Revision of election procedures to make them more efficient.
- Adoption of the Course and Instructor Evaluation plan.
- Plans for a Senate retreat next fall to acquaint the newly elected senators with campus issues.

## Many Students Misunderstand Supreme Court

The Tech Supreme Court would be more useful if the student knew more about it, and if its powers were broadened, according to Bob Fillpot, chief justice of the court.

"The student doesn't realize that he can bring problems before the court, and automatically get legal counsel from the Pre-Law Club."

The Rules and Procedures of the court provide that a student who wishes to bring a controversy before the court has only to submit his complaint in the form of a business letter.

### Improvement Probable

"The court doesn't have nearly the power that it should," said Fillpot, but he noted that there is a good possibility of the situation improving. "The court can operate only within the limits imposed by the student association constitution, and that covers only a small part of campus life."

The Tech Supreme Court operates under Article IV. Its powers include giving advice on the constitutionality of legislation, review of legislative and executive actions, and hearing cases appealed from the election committee. It also has the power to settle any disputes arising under the constitution.

### Advancement Made

"It is in this area that we have made the greatest advances," said Fillpot. He cited the recent case of the student allocations budget which was called for early by the administration. In a belief that they did not have time to approve the budget, the Senate gave their approval without seeing the document. This is contrary to the constitution, and the court reminded the senate of this fact, forcing them to put the budget through regular channels.

Fillpot said one of the areas for greatest possible improvement in the court would be to make it the highest appellate court in a system of "dorm courts" (Residence Standards Board). This proposal was submitted to the Administration last spring, who took it under consideration.

## Students' Role

(Continued From Page 1)  
of running for an elective office," Anderson said.

One of the major goals facing student government at Texas Tech, according to Anderson and other leaders, is to see that Tech becomes "the major university it is destined to be, without allowing reactionary influences to hamper and defile this ideal."

"However, there is another overriding goal that student government is concerned with," Anderson said, "and that is to stimulate the school, and all persons involved, out of the enigma of tradition and work for more progressive policies, rather than allowing the school and its students to remain a victim of many of the restrictive policies now in effect."

Wednesday night the possibility of bringing a new professional fraternity, Delta Phi Epsilon, to Tech will be discussed and decided.

Delta Phi Epsilon, a national professional foreign service fraternity, is orientated toward the study of international business and governmental relations. All male government, economics and international trade majors would be eligible for application.

If organized at Tech the fraternity would join 17 other chapters in

the world, and it would be the only chapter in Texas. However, Dan Dennison, president of the International Trade Society, said that the University of Texas is presently planning to establish the fraternity there.

"If Delta Phi Epsilon were founded at Tech, it would promote a view that would go beyond the Caprock—beyond the borders of the United States. It would provide a grounds where international problems concerning the United States would be met and discussed," Dennison said.

He went on to say that through the fraternity prominent leaders outside the Lubbock area could be brought to Tech.

Delta Phi Epsilon was founded at Georgetown University in Washington, D.C., in 1919. Membership in it is lifelong.

The International Trade Society is sponsoring the attempt to establish the fraternity on Tech campus and if there is enough interest, the organization will become effective next fall.

A board of inquiry will be elected at a meeting Wednesday at 7:30 p.m. in room 209 of the Tech Union to consider the possibilities of bringing the fraternity to Tech. The meeting is open to the public.
