Connally Discusses Education

Gov. Seeks Faculty Ideas; Says No Med School Yet

By JANYTH CARPENTER
Copy Editor

Gov. John Connally, in a speech to Tech faculty Monday, asked for the teacher's help and participation in state governmental matters.

"Since my term in office, I have yet to hear from an educator about any concrete changes being made in education," he

said, speaking to a capacity audience in the Coronado Room of the Tech Union.

Wants Ideas

"You have valuable information here on college campuses, and we have no way of getting it. You are going to have to realize we really want your thoughts," he said.

Connally asked the educators

to help him develop the educational system of Texas.

In his 40 minute talk, the governor also answered questions from the audience, and he mentioned educational accomplishments in Texas since 1963.

No Med School

He said Tech is not ready for a medical school because more planning and research are necessary. The Lubbock area needs to offer tangible support to back up the school, Connally said.

Concerning financial support to education, he said all state-supported institutions in Texas have an "insatiable appetite" and money is a universal panacea. Rather than workable ideas and suggestions, he said the plea for money is the major problem brought to him. "Money alone is not the complete answer," he said.

The chances for an increase in research funds are promising, the governor said. But he added that research is nebulous and a hard area to sell to the legislators concerning appropriations.

"Give me the facts; give me something to offer in exchange for the money," he said.

Comments On AAUP

Regarding the American Association of University Professors (AAUP) censorship, Connally said he was reluctant to interfere in such matters but that he was "not above doing it."

An audience member said that appointments to the Tech Board of Directors seemed deliberately aimed at excluding faculty members. Connally said the Tech Board was orientated toward members of the business community, but he added that they served as business managers only.

Senator Blasted In Press Conference

By EUGENE SMITH
News Editor

Governor John Connally talked about Ralph Yarborough, taxes, Texas Tech and future legislative matters in an airport news conference Monday.

In a barbed reference to Yarborough, Texas' senior senator, Connally said, "It's too much to hope that he will be fair to me, but I hope he is fair to the citizens of Texas." The governor said he supposed Yarborough was bitter because he polled less votes than any other state winner in 1964's elections.

The trip was the fourth attempt on the governor's part to come to West Texas in recent weeks, and this one was not without complications. Delayed in Amarillo for an hour by engine trouble, he finally arrived in Lubbock at 11:10 a.m. in a borrowed plane. Three previously scheduled appearances were cancelled because of weather.

Asked what would be the main themes of next spring's legislative session, he listed water and education as the most important and added tourism promotion, industrial growth, and a drastic need for expansion of the state parks system.

He said he could not say whether or not any tax increases would be necessary for these programs, but cautioned that "progress costs money."

He called Texas Tech a "fine institution" whose rapid growth he was aware of, but added that quality should be expanded with quantity.

He said he was not particularly surprised or concerned that both PASO (Political Association of Spanish-speaking Organizations) and the state's AFL-CIO had come out in favor of Stanley Woods, his opponent in this year's gubernatorial election.

"I doubt that they (PASO)

Play Tryouts Set Wednesday

Try-outs for "Gallow's Humor." Tech speech department production, are scheduled Wednesday and Thursday in University Theater.

They will be 3-5 p.m. Wednesday and 3-5 and 7-10 p.m. Thursday. Anyone may try out.

By BEVERLY HUNT
Staff Writer

Governor John Connally told approximately 2,000 Lubbock residents and visitors Monday that the last two sessions of the Texas legislature have increased the state's expenditures for higher education by 100 per cent, while the average enrollment has increased by 40 per cent.

Addressing a joint civic clubs luncheon sponsored by the Chamber of Commerce in Municipal Coliseum, he said Texas is beyond the point in its history where government can be a bystander to economic growth and progress.

Must Change Conditions

Failure to respond effectively to changing conditions means leaving our children with the more difficult task of correcting our mistakes, he said.

Connally discussed the problem of a growing population. Within 35 years Texas will double its present population of 10.5 million persons to 21 million. Furthermore, 80 per cent of the state's growth is in the metropolitan areas where more and better state governmental services will be needed, he said.

Noting 43 per cent of Texas' population is under the age of 21, he said Texas' growth is just beginning.

Salaries Increased

In the field of education, the last two sessions of the legislature have increased lower education faculty salaries by 40 per cent and have doubled the state's

support of public junior colleges, which this year had a 35 per cent increase in enrollment, he said.

A new concept of community-based facilities for the mentally ill and mentally retarded plus an increase by 250 per cent in vocational and technical education are part of the progress program of Texas' government, Connally said.

In an effort to solve the water problem in West Texas, he said, the government is writing a Texas Water Plan whose implementation will be essential to continued growth. Connally said he has recently written to the Texas Congressional delegation asking that Texas be included in a study of water needs of the Southwest, involving the possibility of diversion from as far away as the Columbia River or even Alaska to this particular section of Texas.

Costs Less

Connally said it costs less per capita to operate Texas than any state in the Union except three—New Jersey, Nebraska, and South Carolina.

"Texas is just now being understood as more than a dry, arid, treeless wasteland for cowboys," he said.

Material wealth alone is not enough, he said, and the government of Texas, at both the state and local levels, must anticipate needs and search for every opportunity to fulfill those needs.

Connally was presented with a painting called "Before Sunrise" by Peter Hurd by Chas. A. Guy, editor and publisher of the Lubbock Avalanche-Journal.

Senator H. J. "Doc" Blanchard of Lubbock introduced Connally. Master of Ceremonies was Chamber of Commerce President George McCleskey.

Residents Line Up For Rooms

Residents of Men's No. 10 Monday signed up for 410 spaces in No. 10 next year, leaving 112 spaces for occupancy by present residents of Men's No. 9, according to No. 10 supervisor Charles Wallace.

No. 9 will be converted into a woman's dorm next year. No. 10 residents were able to sign up for rooms Monday, with No. 9 being able to take any spaces left today. The dorms are adjoining.

Residents of No. 9 began lining up for the spaces about 7:30 last night. Registration begins at 8 a.m. today.

Walker Says At BSO Retreat

Organizations Need Individuality

By DAVID SNYDER
Assistant Managing Editor

Organizations must define certain goals as authorized by their constitution and strive for individuality on campus, assistant professor of economics Harry Walker told delegates to the Board of Student Organizations leadership retreat last weekend.

"Too often organizations look like each other," Walker said. "We should be able to distinguish one group from another."

He compared an organization's constitution to a person's birth certificate because it gives each organization unique characteristics.

Walker spoke to approximately 100 persons attending the two-day retreat at Bishop's Lodge, located three miles north of Santa Fe, N.M.

Walker criticized student organizations for lacking force on campus, saying "You (leaders) have to have the guts to get with it."

He described leadership as something which can't be canned, labeled or interpreted

in terms of personality, but as a functional operation.

"Leadership is not a title. You must function as a leader regardless of your title," he said.

Walker listed eight functions a leader and/or his organization should perform:

- Organizations must define goals as listed in their constitution in order to distinguish them from other organizations.

- While an organization must have an overall goal, it must also have specific goals.

- Leaders must be visionary and individualistic.

- Leaders must delegate authority to others in their organizations, while at the same time retaining control over them.

- Organizations must be consistent with their goals. Walker compared some campus organizations to chameleons because of this inconsistency.

- Leaders must maintain adequate communication with their members in order to maintain strength within their organizations.

- Leaders must take the incentive to conduct periodic re-evaluations of their organizations to determine if they are achieving their goals.

- Leaders must seek an intangible cohesiveness within their organizations.

Walker also discussed the force and power of organizations, saying they must display responsibility and constantly strive to contribute to the total environment of the campus.

Walker, who has been in the hospital recently and was not expected to attend the retreat, was keynote speaker for the retreat.

Delegates spent most of the retreat in small group discussions, groups consisting of 8 to 10 persons. Saturday night delegates quizzed a student panel consisting of Suzanne Hightower, Beth Rutledge, Bill Beuck, Bob Fillpot and Mac Johnson concerning campus issues.

Sunday morning members questioned Dean of Men Lewis Jones concerning college policies. Dean of Women Florence Phillips and Jones sponsored the event.

DR. DOUGLAS JACKSON

Douglas Jackson To Speak At Social Ethics Seminar

A Social Ethics Seminar, jointly sponsored by the First Methodist College Class, St. John's College Class, and the Wesley Foundation will be held Saturday and Sunday.

Douglas Ewing Jackson, Professor of Sociology of Religion at Southern Methodist University's Perkins School of Technology, will speak at the seminar.

The theme of the seminar is "The Age of Ethical Revolution."

Dr. Jackson has been a member of Southern Methodist University's faculty since September, 1954. He holds the following degrees: A.B.,

Asbury College, 1940; magna cum laude; B.D., Garrett Theological Seminary, 1945, with distinction; M.A., Northwestern University, 1946; and Ph.D., Northwestern University, 1955.

Dr. Jackson has had published many books and articles. He wrote "The Downtown Church," 1958; a chapter in Robert A. McKibbens' "Methodism Looks at the City," 1954; articles in "Adult Teacher," "Adult Student," "Wesley Quarterly," "Christian Advocate" and "Review of Religious Research;" a chapter in "Christianity and Communism;" "An Inquiry into

Relationships," 1958; and "Stumbling Block." He has also had articles published in "Eternity" and the "Perkins Journal."

In Dr. Jackson's career, he has been the pastor of many churches throughout the United States, and has taught at many summer seminars.

Saturday, 7 p.m., at the Wesley Foundation, Dr. Jackson will speak on "Sex and the 'New Morality'."

Sunday there will be three meetings. Dr. Jackson will also speak at these meetings.

9:30 a.m.—First Methodist (College Class).

Topic: "Crisis in War Ethics" (or the Christian's Role in War). 5:30 p.m.—St. John's Methodist Club '01

Topic: "Crisis in War Ethics" (or the Christian's Role in War).

8:15 p.m.—Wesley Foundation

Topic: "Dynamics of Decision Making!" (Gospel and Law, relativism and absolutism).

JUNIOR COUNCIL

Junior Council will meet Wednesday at 8 p.m. in the Union Ballroom.

FASHION SHOW

Summer fashions for men and women will be shown in the Union Ballroom next Sunday.

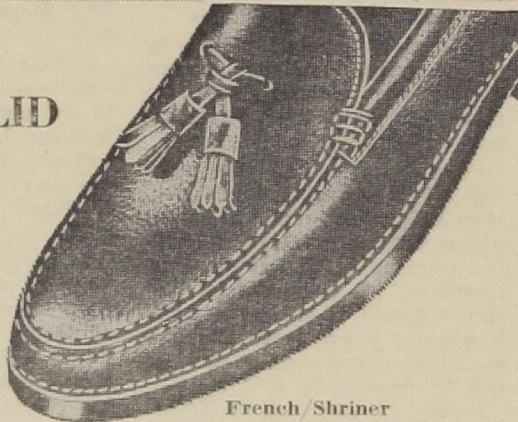

Tech students will model in this show sponsored by the Union Hospitality Committee. Ron Todd and Karen Schroeder, the "Sweet and Simple" singers, will entertain during intermission.

The Traditional Shop and Dom's Limited will furnish the clothes. The showing will start at 2:30.

Admission is free and there will be door prizes.

McDowell To Speak In Union

Dr. Edward McDowell Jr., Union Theological Seminary, will lecture on "Pierre Teilhard de Chardin: A Fresh Look at the Evolution of Man" at 4 p.m. today in the Tech Union.

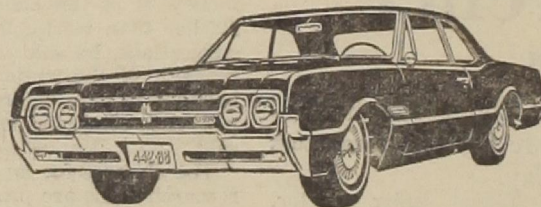

McDowell's lecture will deal with the philosophical and sociological implications of Teilhard's works and with the "Nooshere" concept.

Claude Tresmontant, authority on Teilhard, defines the "Nooshere" as "the realm of the mind or reflective thought, the layer of thinking creatures—humans—who will gradually spread over the surface of the world."

Teilhard wrote "The Phenomenon of Man" and "The Future of Man." He has also been published in several leading periodicals. Among these are Newsweek, Life, and Saturday Review.

McDowell's lecture will be in the Coronado Room of the Tech Union. He is sponsored by the Union Fine Arts Committee.

Tech To Contribute Highway To Water Research Fatalities Set Mark

Texas Tech has joined two other state institutions in a cooperative program of water resources research for Texas, officials announced Saturday.

The agreement, which becomes effective this month between Tech, Texas A&M and the University of Texas, is designed to eliminate overlapping research and academic programs which can best be accomplished through cooperative efforts.

Tech Vice President for Business Affairs M. L. Pennington, who helped negotiate the agreement in behalf of the College, hailed the move as "highly beneficial, not only for Tech and the other two institutions, but for the entire state of Texas."

"There is no more important subject than water to our part of the state," Pennington said. "We welcome the opportunity to do anything we can to develop this most important resource."

Coordinate Efforts

The agreement enables the three institutions to coordinate their efforts to stimulate greater interest in interdisciplinary water resources training and research since "specific research competence found at any one academic institution does not encompass a broad enough spectrum to satisfy all the needs of the state."

In executing the agreement, Chairman R. Wright Armstrong of the Tech Board of Directors, Chairman W. W. Heath of the UT Board of Regents and President H. C. Heldenfels of the Texas A&M Board of Directors explained:

"It is recognized that water resources are of vital importance to the continued economic development of Texas, and that urban and industrial pressures as well as agricultural needs will demand water in greater amounts and better quality, necessitating consideration of a broad spectrum of research capabilities."

Program Highlights

The agreement specifically calls for:

—The Water Resources Research Institute in Texas established at Texas A&M by legislative action in 1964 to be the agency through which state-supported universities will present proposals to the U.S. Department of Interior's Office of Water Resources Research and to the Legislature for funds to support research.

—The establishment of a Water Resources Program Committee composed of administrative heads of the three institutions or their designates to formulate the program and priorities for research projects to be presented to the Department of Interior for funding.

—The committee to prepare an annual program of water resources research and education in the state, the priorities for program needs, the identified research competencies for carrying out the program and recommendations for the coordination of research and exchange of information, and legislative funding.

To Establish Committee

—The establishment of a Texas Water Resources Research Advisory Committee to advise the program panel on questions concerning the needs of the state in water resources, the types of problems that need to be solved, the use of research results "and any other matters that are in the public interest concerning the role and scope of water resources research

in Texas." The advisory panel will be composed of from 12 to 21 members appointed by the program committee.

Dr. Keith R. Marmion, Head of Tech's Civil Engineering Department and Acting Director of the Tech Water Resources Center, said "We certainly are pleased. This agreement will give us the opportunity to participate on an equal basis, and on our own merits."

He added that the pact was the culmination of efforts begun more than a year ago. "It's in line with the thinking of the Legislature and the Coordinating Board that we take part in this outstanding example of inter-institutional cooperation."

Dr. Marmion said he felt that the agreement would pave the way toward additional faculty members at Tech who would devote more of their research efforts toward water. "We know it will assist us in our search for funds, and certainly expect that additional research monies will become available as a result of the agreement," he said.

Tech Dean Given Office

Texas Tech Dean of Men Lewis N. Jones has been named president of the Southwest Association of Student Personnel Administrators which includes colleges and universities in Texas, Oklahoma, Arkansas and Louisiana.

The association meets annually to discuss mutual problems and explore new ideas. Next year's session will be held at Tech.

Jess Parris, former Tech staff member now at San Angelo State College, was elected second vice president. Another former Tech staff member, Jack Collins, now at Northeastern Louisiana State College, is the executive secretary.

Jones was named Dean of Men at Tech in 1953, after serving as assistant dean. He is a graduate of Cleburne High School and holds a masters in history from Tech.

Texas Department of Public Safety Director Homer Garrison Jr. announced today the annual traffic "death book" has been officially closed for 1965, showing that more people were killed on the streets and highways last year than ever before with a total of 3,028 fatalities.

Garrison said, however, there were 26 fewer fatal accidents in 1965 than in 1964. Whereas, 3,028 persons were killed in 1965 in 2,460 accidents, 3,006 were killed in 1964 in 2,486 accidents.

He explained that the traffic toll almost throughout last year was running slightly less than the year before, until a tremendous unexpected upsurge came in December, when 363 persons were killed in 293 fatal accidents. In December 1964, 280 persons were killed in 246 accidents.

December, 1965, was the highest month on record for traffic fatalities. On the weekend prior to the Christmas holidays last year, a terrific toll of 49 lives was lost in just two days in 39 accidents. On the corresponding weekend in 1964, 20 lives were lost in 17 accidents.

LETTERS:
Views Of The Reader

Respect Or Toleration...

THE TEXAS TECH GENERAL catalog lists 167 organizations which are officially recognized by the college's Committee on Student Organizations. Undoubtedly some are completely dormant, while some are extremely active. But most, we fear, are just there, having a material but not spiritual existence.

Too often organizations look like each other, Harry Walker, assistant professor of economics, said at the Board of Student Organizations retreat last weekend. In other words, many organizations are performing the same function, when in actuality each was begun for an entirely different purpose.

Walker asked that each group on campus define certain goals as listed in its constitution. A constitution is comparable to a birth certificate—it gives each individual certain characteristics which differentiate it from everyone or everything else, he said.

Many organizations at Texas Tech are not following their constitutions, nor are they headed in any certain direction. They fulfill no purpose, other than an occasional social get-together. Anything which has no purpose had just as well cease to exist, because it has nothing to look forward to in the future.

Also, any organization in this predicament has no respect from its members or from the rest of the college. Herein lies a possible reason for its failure, for its performance can be described by no other word.

We quote from the college catalog:

"The recognition of a club or society on the Texas Technological College campus is based on the assumption that such an organization satisfies a student need for professional, scholastic, social, religious, service or common-interest expression consistent with the best college achievement."

This is a great assumption, considering many of the organizations now on campus.

We ask that each organization dust off its constitution, re-evaluate its program and re-shape its goals in accordance with its original purpose. Each one has its own special way to benefit its members and to benefit Texas Tech.

There's a great deal of difference between an organization which is respected and one which is merely tolerated.

★ ★ ★
Speaking of the BSO retreat, we offer thanks and a hearty "well done" to those who devoted their time and energy to its success. Specifically, we mean retreat chairman Liz Gerbetz, president Ernie Cowger, treasurer Robert Hayes, secretary Becky Wilson, corresponding secretary Cheryl Russell, publicity chairman Laura Coil and decorator Katy Gnauck.

We now hope the delegates will apply what they learned.

Roe Disturbed

By Book Theft

Dear Editor,

I am proud to be a student at Texas Tech. I am, however, ashamed of my fellow students. I, like so many others, have become a victim of the "Somebody stole my book, so I'll steal somebody's" plot. I cannot help but wonder is this the way mature college students behave?

Of course it is not, but why then do so many behave in this manner? Don't they realize the importance of the notes we all make in our books? They seem to realize the expense involved, and since they cannot, or rather will not, suffer the cost of replacement, they simply pass it along to another who may be less able to afford new books.

Naturally not all of the book thefts are to replace lost books, but rather to earn money for some heavy date or other reason of immense importance.

I don't know why two of my books were stolen, but if someone tries to sell them they may have some difficulty since I have informed the local bookstores of my loss—an action which I believe would deter many thieves. If they were stolen for another reason, I wish to say the thief will be glad to know he has dealt me a very heavy financial blow. I shall, of course, try to recover the texts, but unless I do so very quickly I may fall very far behind in two important classes.

Congratulations children. College students don't act in this manner.
Terry Roe

Two Write Poem On Smith's Column

Dear Editor,

Deeply moved by W. Eugene Smith's poetry and observations about the campus, we counter with a "masterpiece" of at least equal proportions.

While pondering ODA's, poles and cracks that abound

We note a "William E. WESSpeare" 'round,

His comments—excessively stale and trite

Of course viewed through infirmity light.

The most extravagant exaggeration of all

Was the sexy farce at Horn Hall;

'tis possible this point is not clearly sent

But with all regrets—"No Comment."

We students of TECH, encompassed by the strange and off-beat

Are truly sorrowful we are not of the elite,

For we fail to note in this time and day

The importance of the incidents WES tries to portray.

Warren Watson
Bruce Mabrito

Dawes Writes About ODA's

Dear Editor,

On the ODA:
One would think that in this world of strife, affection should be encouraged, and call-downs given for "OCA's" instead. Yet an Obvious Corruption of Affection hurts only the performers: A call-down even for that would be a superfluous action.

It is my humble opinion that those people who feel that their strange "embarrassment" at the sight of affection is justification for any action but the turning of their own heads are scum. This kind of neighbor I find hard to love.

Robert L. Dawes

Coed Criticizes Corrupt Justice

Dear Editor,

Examine the evidence. In the early morning hours two boys are

discovered in the dorm room of two Tech coeds, not roommates, but who just happened to be studying together that night. The girls, in their pajamas when the policeman arrived, claimed "they didn't know the boys were coming." The mystery that let the boys into the locked dorm has somehow convinced authorities that the girls should be allowed to withdraw from school with clean records. Ask the girls about it; they think it is funny.

While on a school sponsored trip, a Tech athlete takes money from machines in a California motel. His coach persuades authorities not to press charges, arguing that it was just a little misguided mischief. The boy came home with extra change in his pockets and a good laugh.

Four athletes are held for breaking and entering and destroying private property after an all-night drinking party with their girlfriends. Their sponsor persuades authorities to let him handle their punishment. Their reprieve cost the entire team of that sport a probation. No one can truthfully deny any of the above facts.

Without the sins of having overnight male guests in my dorm room, stealing, or destroying private property, I hereby cast the first stone against the corruption and indulgence at this college. When money and influence outweigh justice, as it has in these and other cases at Tech, we may as well check in our Student Locator cards. The worst is yet to come.

Sincerely,
Marilyn Hammett

Men's No. 10 Completes Hike

Forty-five residents from Men's No. 10 completed a 51-mile hike to Girlstown, U.S.A., 11:30 a.m. Saturday in an effort to focus nationwide attention on the Whiteface institution.

Doug Timmins, chairman of the Girlstown Project and dorm vice president, said his group helped raise more than \$200 for the institution, but that the resulting publicity should bring in many times that amount.

"We believe our purpose has been achieved. We set out on the march not merely to present Girlstown with the \$200 we raised, but, more important, to put Girlstown in the eyes of the nation and the public. We hope that national organizations and individuals will take up where Men's No. 10 left off," Timmins said.

Sixty-five students started out on the 51-mile trek 7 p.m. Friday, but 20 had to drop out before reaching their destination due to bad blisters, inadequate clothing (the temperature dropped to 28

degrees before dawn and many had failed to dress warmly enough).

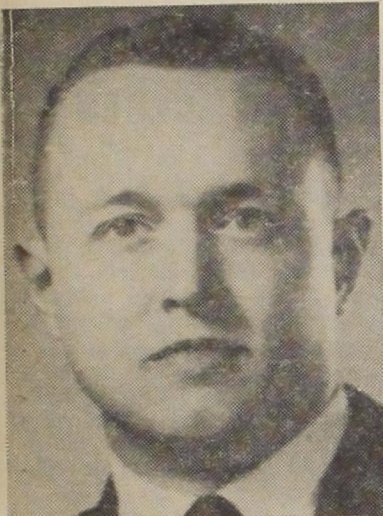

The dormitory contributed \$100 for the project and individual wings chipped in another \$40. The other \$60 was picked up along the route as travelers and townspeople offered contributions for the institution.

The mayors of Levelland and Whiteface met the marchers at the VFW Hall in Levelland for breakfast which was provided by VFW Auxiliary No. 7. This group also provided supper for the marchers prior to the start of the hike Friday night and Girlstown provided lunch upon their arrival there.

The marchers were then shown around Girlstown, an institution which accepts young women from all 50 states. Girlstown takes girls through 16 years of age who have no other place to go.

"Many individuals and organizations helped make the Girlstown hike successful," Timmins said. "We would like to thank the administration, particularly Aubrey Lewis, director of men's halls,

and James Allen, dean of student truck used to relieve the tired, life, for their assistance, and the weary travelers during the trip," Lubbock Ford Co. for donating the he said.

DR. SAM E. CURL

Firm Gives Grant To Tech Prof

Dr. Sam E. Curl, associate professor of Animal Husbandry in Tech's School of Agriculture, has received a research grant of \$5,400 from G. D. Earle and Company of Chicago to continue his studies on the synchronization of the estrus cycle in sheep.

The grant is the second from the Chicago-based pharmaceutical firm. A similar grant of \$3,600 was awarded last year. Recent grants for Dr. Curl's studies now total \$18,928, of which \$14,323 has been awarded during the past nine months.

Dr. Curl was selected by the Searle Company to work on the study in the United States, following preliminary field trials in Australia involving progesterone hormones. He is attempting to bring a large number of ewes into estrus at the same time, thus controlling the lamb crop.

The objectives of the study, as outlined by Dr. Curl, are to evaluate the use of the progesterone hormones applied within the reproductive tract for estrus synchronization and to determine the influence of this method on conception rates after the ewes have been taken off the hormone.

"Also," Dr. Curl said, "we are determining what effect progesterone has on the pre-natal and post-natal livability of lambs and the lambing percentage in the ewes and to measure the effectiveness of this method of estrus synchronization."

Hormones and research materials for the project have been provided by the Armour Pharmaceutical Co., Kankakee, Ill.; The Upjohn Co., Kalamazoo, Mich.; Eli Lilly and Company, Greenfield, Ind.; Searle and the National Institute of Health, U.S. Public Health Service, Bethesda, Md.

Dr. Curl has been active in animal fertility work since his pre-doctoral days at Texas A&M University. He holds the bachelor of science from Sam Houston State College, a master of science degree from the University of Missouri, and the Ph.D. from Texas A&M.

The 28-year-old Tolar native holds memberships in Sigma Xi, American Society of Animal Science, Gamma Alpha and the American Association for the Advancement of Science.

Dr. Curl has written more than 25 articles for scientific publications. He is currently a lieutenant in the U.S. Army Reserve.

FINANCE ASSOCIATION

The Finance Association will meet Wednesday at 7:30 p.m. in room 312 of the BA Building. Dr. Robert Rouse, head of the finance department, will be the guest speaker.

Gridders Open Spring Training Drills Today

By MIKE LUTZ
Sports Editor

Spring became official early Sunday morning, and not to let the season get too old before get-

ting outdoors, Coach J T King opens nominations today to candidates for the 1966 Red Raider football team.

Today's 3:30 p.m. spring train-

ing opener will be the first of 20 sessions, with 10 workouts distributed before and after the spring vacation break. The team will work on a four-day week, Tuesday through Thursday and Saturday.

The success of the Red Raiders could hinge heavily on the forthcoming festivities as King has declared "all positions open" in efforts to find the best integral parts of machinery.

Biggest Problem

Biggest denture work facing King and his staff will be to fill 12 graduation cavities. The most noticeable holes will be at halfback and quarterback, prompted by the departure of all-America Donny Anderson and signal-caller Tom Wilson.

Other vanguard objectives confronting King and company include: replacing personnel like co-captains Chester Howard and John Porter; finding someone with adequate punting and kick off skills;

molding a two-platoon system for the offensive unit; experimenting at fullback and improving defense.

And the objectives aren't necessarily listed in order of importance.

"I think we'll be improved on defense," King said. "There are some people who say we can't go anywhere but up."

King said spring training would be used to experiment with a new basic defensive formation. "We'll attempt to change to the four-deep secondary as compared to the three-deep situation we had last year," he said.

"I don't know if we'll be using it next fall or not, only spring training will tell," King said. "A lot of it depends on the type of offenses the other conference schools use."

"If the SWC goes for a wide-open game, then I'd say the four-deep would be one of our basic defenses."

In addition to co-captains Wilson, Anderson, Porter and Howard, King must replace starting berths left vacant by: ends, Jeff White and Jerry Shipley; right guard, James Cecil and halfback Johnny Agan on the offensive unit.

Missing from the defensive starting list will be linebackers John Carrell and Kenneth Gill and halfback Robert Yancer. Graduating offensive reserves are tackle Wayne Bargainer and center Robert Fuller.

"Most of the youth on the team must do a lot of backyard fighting to see if they can fill the shoes of Anderson, Wilson and the others," King said.

"The thing about last year's team was that we didn't have great material but we had a lot of experience and poise on offense with the exception of fullback."

Changes Uncertain

King said it is too early to tell if any changes will be made offensively.

"We must get a quarterback who can move the club whether it's on the ground or by passing," King said. "After spring training we'll learn which type offense we'll use. In any case, our material will determine the type of offense we run."

King said running would be emphasized in spring drills but said he hoped the passers would prove adequate enough to allow a passing attack.

The actual battle for the top quarterback spot appears between senior Guy Griffis and junior John Scovell.

"They're the front-runners. That's as it should be," King said. "They have the most experience."

Equal Opportunity

King said to give each quarterback an equal opportunity to win the No. 1 spot, Griffis and Scovell would rotate at the top quarterback position on a weekly basis.

"Griffis will operate at the No. 1 slot throughout this week," King said. "Scovell will take it next week and so on throughout spring training."

Other quarterback hopefuls include redshirts Don Smith of McKinney and Chris Alford of Houston Spring Branch and sophomores Joe Matulich of San Antonio and Tom Sawyer of Plainview.

One of the Raiders' stronger points in 1965, the kicking game, will be in for severe changes with regard to personnel, according to King.

Punters Needed

"Anderson punted almost every time for us during his three years," King said. "And the reason we've had such success with punt-

New Commissioner Named...

(Continued From Page 7) As commissioner, Williams will head the board's professional staff which prepares recommendations and studies for the 18-member board's action. Newton Gresham, Houston, who headed the committee that conducted the six-month nation-wide search for a commissioner, said the committee gave up hope of finding a commissioner at the \$22,500 salary provided in the general appropriations bill.

He said the committee found "after six weeks . . . we couldn't hope to interest in discussion the type of man we wanted."

TOWN GIRLS

Town Girls will meet today at a luncheon in the Mesa Room of Tech Union.

Raider Linkmen Crush Cowboys In Dual Match

The Red Raider linksters rolled over the Hardin-Simmons Cowboys, 9-0, to sweep a dual match victory, Saturday in Sweetwater.

Tech's Steve LeCrone defeated Van Newberry, 2 and 1, while Robert McKinney whipped Greg Hansen, 3 and 2. LeCrone and McKinney teamed to defeat Newberry-Hansen, 2 and 1.

Joe Huber downed Harold Preston, 6 and 5, and Jerry Hrnciar dropped Dan Newberry, 4 and 2. Huber-Hrnciar downed Preston-Newberry, 6 and 5.

Triangular Track Meet Set Here This Weekend

Tech's track and field men, on the road for three weeks, make their first home appearance of the season as hosts to Arlington State and McMurry in a triangular meet here Saturday.

Although the Raiders lost the meet last year, Coach Vernon Hilliard is pretty optimistic over Tech's chances this year.

"We have done well in the first two meets and have improved considerably," he said.

"We have several boys who have turned in very good times in the mile and distance medley." Although McMurry is picked to come out on top, I wouldn't die of shock if we pulled it out."

Ed Mooney, the big junior from Walkkill, N.Y., will be going after his fourth consecutive double victory of the season in the shot and discus. At the West Texas Relays last week, Mooney's winning discus throw of 175 feet 1½ inches toppled his own standard of 170-1½ established two weeks earlier at the Southwestern Recreation Meet. Mooney's first place shot put of 54-2 was short of the school mark he set at the Border Olym-

pics of 55-1. Mooney is currently eleventh in the nation, only two inches out of the top ten.

On the doubtful list for this week's meet is pole vaulter Sam Hart of Tatum, N.M. He was held out of the West Texas Relays to protect a pulled muscle. Injured last week was 100-yard dash man Donald Parrish who sprained an ankle. Parrish will run this weekend, but his injury may hamper his performance. Last week, he turned in a 9.8 performance.

Tech finished sixth last week with 26 points, 15 coming in the field events. Besides Mooney's new record, Tech got another one when the distance medley team of Bobby Nelson, Terry Diveley, Ronnie Davis and Rich Kay were timed in 10:20.4 while finishing fourth. The old mark was 10:30.5.

Tech also gained points when Foster Miller was fourth in the high jump and Tom Hutton was fourth in the broad jump. Randy Hicks was a surprise, finishing fifth in the shot put.

Admission to the meet here will be \$1 for adults, 50 cents for all others except Tech students, whose ID cards will admit them.

Following are the results of last week's meet.

Broad jump—Tom Hutton (4) 21-10½

Shot put—Ed Mooney (1) 54-2, Randy Hicks, (5) 47-4½

Discus—Ed Mooney (1) 175-1¼

High jump—Foster Miller (4) 6-0

Distance medley relay—Tech (4) 10:20.4

Mile—Ronald Davis (5) 4:25.7.

Gridders...

(Continued From Page 6) ing is that Donny booted them so high, our people had time to get downfield to cover."

But Anderson is gone and so is Gill, who handled most of the kick off chores.

Their replacements are still in doubt but possibilities includes Bob Bearden, who subbed at kicking off when Gill was sidelined last season, and Kenny Vinyard of Amarillo, a candidate for punting duties.

Punting Prospect

"Vinyard is a fine punting prospect," King said. "He gets tremendous distance."

King said Saturdays would be reserved for scrimmages, but no scrimmage would be held during the first week.

King urged fans to attend workouts but asked that spectators remain on the sidelines.

"It's been a problem before," King said. "And we certainly want everyone to attend workouts but would like to ask them to remain on the sidelines."

MARKETING ASSOCIATION

The Marketing Association will meet today at 7:30 p.m. in room 208 of the Union.

AMERICAN CHEMICAL SOCIETY

The American Chemical Society will meet today at 7 p.m. in room 302 of the Chemistry Building.
