

Student Senate Elections Set Today

THE DAILY TORREADOR

TEXAS TECHNOLOGICAL COLLEGE

Vol. 41

Lubbock, Texas, Friday, April 29, 1966

No. 131

TV STARS AND TECH BEAUTIES—Ken Curtis and Milburn Stone are shown admiring some West Texas scenery shortly after their arrival at Lubbock Municipal Airport Thursday. The two, stars

of the "Gunsmoke" television series, are here as special attraction for Tech's annual intercollegiate rodeo. The scenery, left to right, is Karan Robinson, Mary John Espy, and Marianne Munz.

'Doc, Festus' Arrive For Tech Appearances

By BILL RYMAN and BEVERLY HUNT
Staff Writers

"Arriving in Lubbock is just like coming home," Ken "Festus Hagan" Curtis said yesterday when he and Milburn "Doc Adams" Stone arrived for the Tech Rodeo. The country boy star of Gunsmoke is from southern Colorado and Stone is from the Dodge City, Kansas area.

As "Doc" walked to the Lubbock Air Terminal, a fan yelled, "Why didn't you bring Matt with you?" "Doc" waved and replied, "We couldn't get him on a plane this little." The plane was a new jet airliner.

12-Year Run
Commenting on Gunsmoke's 12-

year run on television, "Doc" said, "I think the reason is that the audience accepts Gunsmoke as an honest attempt to portray the West as it really was."

In an interview from Municipal Airport to the Coliseum, the two stars talked and acted much like the characters they portray in the series.

"Festus" said he thought their crew is one of the best in television. "It's hard to get a crew of 60 to 70 people who can shoot for week after week and never quarrel."

Ad-Libs

Rubbing his mangy beard but talking without his twangy accent, "Festus" said the characters ad-lib a lot in the scenes. "Doc" added, "We ad-lib and the writers don't worry about it. They know we'll change it anyway."

"Doc" said the audience considers the character of "Festus" unique because he is not really completely pure and they never know which side of the law he is on.

Arriving from Dallas, the two stars will perform at the Tech Rodeo through Saturday night.

Roy Rogers

"Festus" work before becoming a Gunsmoke regular was with Roy Rogers in "The Sons of the Pioneers." Curtis said, "Roy, like James Arness, is one of the few people who hasn't changed with all the glory of becoming a star."

The stars said they work on the set from about 7 a.m. until 7 p.m. and sometimes longer if they are shooting on location. They said, "Even though the script may not be the best, we

feel an obligation to the audience and each show represents our best efforts."

Demo Control Becomes Issue

By THE ASSOCIATED PRESS

Control of the Democratic Party became an issue Thursday along the Texas campaign trails.

Speaker of the Texas House Ben Barnes, unopposed for reelection as representative from De Leon, told a group of oil men in Amarillo he is concerned about voter apathy, particularly at the precinct convention level.

"If the people don't show more interest they are running a chance of losing the fine leadership they have had over the past several years," Barnes said.

Stanley Woods, a Democratic primary candidate for governor, wired a protest to State Democratic Chairman Will Davis, Austin. Woods said he had discovered Davis was actively campaigning for Connally.

"Your appearance Tuesday night before a group of precinct chairmen in Austin is living proof of what I have been saying: 'That Connally thinks he owns the Democratic Party and the government of Texas,'" Woods' wire said.

Connally flew to Houston Thursday to introduce President Johnson at the \$1,000-a-plate President's Club dinner for favored party contributors.

Techsans To Elect 49 Representatives

Techsans will elect 49 senators from 108 candidates Friday to serve in the student government 1966-67.

Polls will be open 8 a.m. to noon and 1 to 5 p.m. in all locations except the Union where they will be open 8 a.m. to 5 p.m.

The Union front and Union cafeteria will have polls where all schools may vote. There will be a polling place in the Ad Building for Arts and Sciences students and all graduates. Polls in the Business Administration, Aggie, Home Economics, and East Engineering Buildings will be for the respective schools and all graduate students.

Agriculture

Candidates for Senator in the School of Agriculture are: David Boston, Calvin Brints, Fe Busby, C. W. DeWitt, Richard Edwards, Mike Ligon.

Home Economics

For Home Economics are: Sharon Baumgardner, Carol Best, Virginia Fry, Jan Hood, Barbara Kelly, Betty LaBounty, Norma Larson, Lynn Snyder, and Jo Ann Wickstrom.

Engineering

For Engineering: Dick Bowen, Lindsey John Bradley, Burgess Buchanan, Bill Byrd, Jay Carter, Mike Daugherty, Sue Durban, James Gattis, Garland Goodwyn, Mike Hancock, Robert Pope, Jerry Rawls, John Tye, Robert Weatherford, and John Wilcox.

Graduate

For Graduate School Clyde Farris, Price Pritchett, and William H. Whiteside.

Business Administration

Candidates for Business Administration are: Ronnie Badley, Max Blakney, John Cope, Jane Craddock, Terry Cunningham, Jackie Dunn, Robert Gantt, Robert Gates, Jim Hayter, Martin Hearne, Krete Jeffrey, Brian Lemons, Scott Murray, Vicki Nichols, Janice Ogle, Richard Raiffeisen, Mike Seeman, Tim Sturm, Clifford Watt, Randy Wright, and Keeton Zachary.

Arts and Sciences

Candidates for Arts and Sciences are: Sharon Abernathy, Carla Bell, Jerry Boatner, Ernest Bramlett, Ronnie Brown, Alicia Burns, Cathy Carter, Barbara Cartwright, Gwen Connelley, John Coppinger, Ray Cravy, Jimmy Davis, Susan Davis, Mary Dolaway, Peggie Frazier, Chris Galanos.

Paulette Gavin, Richard Gregory, Salley Halley, David Hancock, Kathy Harrison, Don Henry, Randi Jackson, Vicki Johnson, Richard Knox, Gary Knust, Pete Kyle, Jr., Lyn McClellan, David McDougal, Lynn Melton, Diane Naylor, Rodney Jay Ribble, George Rice, Patti Richards, Mike Riddle, Jim Roach, Donna Schulz.

Lou Scoggin, David Segrest, Pat Smith, John Strickland, Connie Thomas, Mike Thomas, Doug Timmons, Nan Todd, Betsy Tyson, Ginger Viets, Wesley Wallace, Vicki White, Robert Whitehill, David Wiggs, Rita Williams, Lorrie Woods, and Phil Zeigler.

Ballots will be carefully checked for discrepancies. There will be no run-off.

Women's Service Organization, Chi Rho, and Alpha Phi Omega will conduct the elections.

Chief Justice Will Not Judge Hearing

The Supreme Court ruled Thursday that Chief Justice Bob Fillpot would not sit in judgment in the Court's upcoming hearing of an appeal protesting a decision made by the Elections Committee.

Campaign Manager

Fillpot served as campaign manager for Max Blakney, a candidate in the recent election for business manager of the Student Association. The appeal before the Court is concerned with the campaign of Johnny Walker, Blakney's opponent.

The appeal was based on the Elections Committee's decision not to consider a protest filed by Lyn McClellan because no written rule had been violated. The complaint accused Walker campaigners of placing campaign literature under dormitory doors.

Student Asssiation President Roland Anderson will appoint an interim justice to replace Fillpot on the court.

Interim Justice

Since court rules and procedures and the Student Association Constitution and By-Laws say nothing about appointment of an interim justice, the court ruled Thursday that the appointment will be legal. The appointment will keep the number of justices at seven, and prevent the possibility of a tie vote.

However, Anderson's appointment will have to have the approval of the Student Senate. Consequently, Anderson has called a special session of the 1965-66 Senate for Monday at 5 p.m. The place will be announced later.

Court Procedure

Fillpot asked the court that he be allowed to step down, an action which they approved. In regard to this, court rules and procedures state the following:

"No justices shall sit in judgment on cases in which they have a personal interest or a bias which would prevent their objective consideration of the merits of the litigants' arguments. The court shall be the sole judge of the qualifications of its members to try cases."

Little 500 Race Set Saturday

Forty-two teams will compete for a traveling trophy Saturday in the 9th Annual Little 500 bike race.

Each team will consist of four riders who will split the number of laps they must go around Memorial Circle. Boy's teams will go 40 laps around the Memorial key and girls will go 16 laps around the Circle.

The girls race will begin at 1 p.m. with women's bike inspection at 12:30. The men's race will begin after bike inspection at 1:30 p.m.

There will be a warm-up period from 12:15 to 12:45. Nineteen girls and 23 boys are entered.

Raider Roundup

WESLEY FOUNDATION its annual spring picnic Saturday. The Wesley Foundation will have Students will leave from the Wesley Foundation at 4 p.m.

★ ★ ★
CHRISTIAN SCIENCE

COLLEGE ORGANIZATION
The Christian Science College Organization will meet Sunday at 5:15 p.m. in the Union to elect officers.

★ ★ ★

AG ECO CLUB STEAK FRY
The Ag Eco Club Steak Fry will be at 6 p.m. tomorrow afternoon at Mackenzie State Park. Volleyball and badminton will be played earlier in the afternoon. There will be dancing later on and the club awards will be presented.

★ ★ ★

INTERNATIONAL INTEREST COMMITTEE
Bill Cox, Lubbock's Ambassador to Colombia will speak at a noon forum today in the Blue Room of the Tech Union. Tickets for the banquet are \$1, and can be purchased in the Program Office of the Union.

Phi Psi's Cinch Berth In Softball Race

Phi Kappa Psi rode a ten-run scoring streak in the first inning to a 10-5 victory over Delta Tau Delta yesterday afternoon.

The victory threw the fraternity fast pitch league into at least a three-way tie between the Phi Psi's, Delts and the winner of the Phi Delta Theta-Kappa Sigma game which was played under the lights at press time last night.

Play-off games between the three teams will begin next week to see which team will represent the league in the All-College Championship games.

In the residence hall fast pitch league, Thompson Hall and Men's No. 9 will complete a protest game Saturday afternoon, picking up in the fourth inning with No. 9 at bat, two outs, runners on first and third, and the score 3-2 in favor of Thompson.

The stakes are high for Thompson. If they win they will be in a play-off with Bledsoe Hall for the fast pitch division. If Thompson loses they will be eliminated from the championship.

The protest is from a game played on March 10. In the fourth inning the runner at first was called out by the first base umpire who then looked away. The first baseman picked the ball out of his

glove and dropped the ball to the ground. Looking back on the play the umpire called the man safe. The plate umpire and the first base umpire then talked it over with each other. The plate umpire called the man out which was termed a violation in mechanics. The protest was taken before the executive committee consisting of three members of the physical education staff. They ruled in favor of No. 9 because of the violation in mechanics since the first base umpire should have called the man out and not the plate umpire.

Phi Epsilon Kappa, men's physical education fraternity, is the only team in the fast pitch league which has a berth in the championship games.

The PEK's won the open fast pitch league with a 7-1 standing over second place Baptist Student Union.

In the slow pitch league, the Newman Club and Phi Delta Theta will meet to decide the All-College Champion of that division. Both teams boast perfect records.

Below are the standings as of today with the exception of the fraternity division.

Senatorial Platforms Presented...

(EDITOR'S NOTE: Following are more platforms from Student Senate candidates. The Toreador ran the platforms of other candidates Thursday, but had to save these for today because of a lack of space and deadlines.)

Home Economics

By CAROL BEST

The executive branch of the student government serves as the "diplomats" for Tech and the judiciary branch is the Supreme Court. Yet were it not for the legislative branch, the Senate, these other two branches would not be able to function properly.

For the Senate to be a progressive body, senators must be well-informed students who have a working knowledge of the structure of the student government and the problems it is now facing. Of specific interest to senators is the relationship between our respective schools and departments and the student government.

As a member of the Discipline Committee of the Senate this year, I have been able to observe the great necessity of a Student Appeals Board. Presently the students have no board to which they may appeal decisions placed up-

on them by members of the faculty and administration. I advocate the construction of an Appeals Board to be made up of equal representation of students and faculty.

This past year the Senate failed to pass a bill raising the scholastic requirements for cheerleaders. Over the past few years at least one cheerleader yearly has failed to maintain a 2.00. By raising the requirements to a 2.20 for the preceding semester and an over-all 2.00, a small but important amount of "padding" would be available.

By VIRGINIA FRY

Home Economics students are so lucky to be able to elect three representatives to the Student Senate this year. With this new representation, there are many things that can be done. Home Economics students should take advantage of these new representatives by using them to join in student government. You don't have to be elected to work. I would encourage Home Economics girls to apply for appointed positions under the executive branch.

Many Home Economics students have not participated in student government because they are not

informed about what the Senate is doing. Those who are interested never get over to the Senate office to read the minutes of Senate meetings. I would advocate either publishing the minutes of Senate meetings in the *Toreador* or posting them in the Home Economics Building where it will be more convenient for H.E. majors to read them. I would also suggest joint reporting of all three representatives to the AHEA meetings.

We in Home Economics are sometimes a misunderstood group. If I were elected Student Senate representative, I would use this position as an opportunity to show all skeptics that a Home Economics major is a professional, does not just cook and sew, and is not in a snap course.

The Student Senate will have a large role in the changes that will be made under the new president, Dr. Grover Murray, next year. I would like to be a part of these changes in the Code of Student Affairs, cafeteria food, student housing, the AAUP blacklist and many others.

To sum up, I think there is always room for improvement in any situation or job, and I am willing to seek out this need and do my best to improve.

By LYNN SNYDER

As a candidate for senator from our growing school, it is my duty to tell you something about myself and a few of the reasons I am seeking this office.

I am a sophomore applied arts major from Lubbock with a 2.81 overall grade average and a 3.16 at mid-semester. As for qualifications, I have this year been a member of the Association of Interior Designers and Decorators College Chapter; the Student Union Entertainment Committee; and am now serving as sophomore representative to the executive council of AHEA (American Home Economics Association).

I am also Panhellenic Delegate of my sorority. Because of my work with the AHEA members, I feel I have become well-acquainted with the attitudes and problems of home economics students in general. I want to make the School of Home Economics a loud voice in our Student Senate. Because of its size and fine reputation throughout the state and nation, our school can no longer be thought of as insignificant and unimportant on the Texas Tech campus.

I want to work for every one of you in the School of Home Economics, as well as for the betterment of Texas Tech, and if elected, I intend to improve the communications between the students and the Student Senate so that you may be better informed. Let me work for YOU by giving me your support and vote on Friday. Thank you very much.

Agriculture

By FE BUSBY

The Student Association Constitution has given the Student Senate jurisdiction in all areas which affect the students' welfare. The Senate is the branch of our student government that provides the student body a method to voice its opinions and make them heard.

For a senator to act effectively on matters concerning his fellow students he must be in constant contact with these students. My plan for next year is to report monthly to the student organizations in the School of Agriculture and let these groups express approval or disapproval of Senate proposals. I pledge to take the ideas presented by these interested groups to the Senate, in order that these students' opinions will be heard.

For Texas Tech to be successful academically, we must do a better job of academic recruiting. This is especially true in our School of Agriculture where we lose many top students to other areas of study. By working closely with the other agriculture seantors and the administration of the School of Agriculture, I hope to help develop a recruiting program that will work for the Ag school and also the

entire college.

Another area the Senate must work on involves Tech's election process. The recent campus elections pointed out this need. There were many infractions of election rules that went unpunished even though complaints were submitted to the Election Committee. Our present election rules must be improved and enforced, in order that all candidates will have fair and equal opportunities for election.

I am ready to work in our Senate on these problems—and more—in an effort to make the School of Agriculture and Texas Tech as good as they can be, and as good as they should be. I would appreciate your support for Fe Busby for Agriculture Senator in Friday's Student Senate election.

By MIKE LIGON

If elected to the office of agriculture senator I have several specific goals I would strive to obtain and several policies I would support. Among them, I would support the Teacher Evaluation Plan and encourage an active participation in the plan by the students of agriculture in order to enable these students to choose suitable professors.

I would attempt to get more publicity of the activities of various organizations associated with the school of Agriculture, such as the Rodeo Association, Block and Bridle, Agriculture Economics Club, Agronomy Club, Horticulture Club, etc., thus bringing more recognition to the important role the School of Agriculture plays on this campus.

I would work to have Country and Western T.G.I.F. dances in the SUB. I feel that since the School of Agriculture is one of the five departments of Texas Tech and that since Country and Western music is preferred by most Agriculture students, that we should have a fair representation of T.G.I.F. dances.

I would work toward gaining for the Senate more authority which is now held by the administration and equal representation of students on student-faculty committees.

More important though, I would represent the general consensus of opinion of the School of Agriculture, not just the opinion of a few. I would be willing to talk to my Agriculture constituents about the issues and present their ideas before the Senate.

On these grounds, I, Mike Ligon, would appreciate your vote for agriculture senator Friday.

Business

Administration

By TERRY CUNNINGHAM

There are several ideas for improving Texas Tech which are being tossed around. These are proposals which are in the platforms of Bill Beuck, Gary Rose, Johnny Walker, and Karen Kitzman.

Examples of these steps to improve Tech are the formation of a Faculty Council, revision of the Code of Student Affairs, a program for teacher evaluation, name change, academic recruiting, and improvements in the cafeteria services and policies.

These are all ideas and programs which are good, but the executive officers seemingly cannot carry them out by themselves.

As a Student Senator, I will not be content to sit behind a desk and pride myself on my election; rather I will be eager to work for the changes which have been proposed. Personally, I am tired of hearing proposals and want to see some of them put into action.

I am experienced in student government and understand the problems which come with being a representative of the student body. I am very eager to be in a position that will enable me to do something instead of hearing about them. Only the Business Administration students can place me there.

A & S
Senate

Platforms...

(Continued from Page 4)

By KEETON ZACHARY

What is the main purpose of student senators from each school? Is this responsibility being carried out fully? I don't believe that it is, and not because of the senators own neglect; but because of the lack of communication between the elected representatives and their constituents.

There is presently no effective method to relay the wishes and complaints from the voters to their respective senators. I feel that a suggestion box placed in each academic building would give every person a right to express his own personal views about the Senate and its policies. These suggestions would be read by the senators from the constituents' school so that proposals concerning them could be formulated and presented to the Senate. I believe that in this way every interested student could participate in the student government; therefore leading to true representation.

I also feel strongly about revising registration. While serving on the Freshman Council this past year, I worked on a committee to study the present registration procedure including pre-registration. Through a survey taken by this group, I have formed several ideas which I think will help ease this problem.

The issue of changing registration has received much comment and criticism this year. But nothing has really been done concerning this problem. The possibilities of a new system have been discussed and re-discussed; but still no definite action has been taken. I believe that now is the time for action on this issue instead of merely thinking about it.

I would like the opportunity to express myself in the Senate next year and would sincerely appreciate your consideration and vote for the position of Business Administration senator.

Engineering

By DICK BOWEN

In the handbook which is issued to all wing advisors, it is stated that the student does not have any rights, only privileges.

I believe that this line of reasoning reflects the thinking of the Medieval Period before the signing of the Magna Carta and should be changed. It is my belief that the Student Senate, as a voice of the students, is not being used effectively to achieve these basic rights on campus.

Here are just a few good examples of the results due to the lack of students' voice and rights: the new registration procedures (which most students do not know about yet), recent decisions affecting entire dormitories, fraternity and sorority housing and the difficulty in living off-campus.

At no time in the past has Tech had the opportunity to catch up with the times as it has now. The Student Senate, by working closely with the new president, Dr. Murray, can lead Tech out of the Medieval Period and help to catch up with the times. The Senate can also forge ahead in all other aspects of student life, thereby helping the students to obtain a more rewarding and less strictly disciplined education.

By JAY CARTER

With the newly elected and well-qualified officers, and a new Tech president, the Student Senate can play a very important part in determining student affairs next year.

Experienced Senators can help to get the ball rolling sooner because it takes newly elected Senators longer to fully understand what's going on and how to go about getting things done.

Last year I served on the Senate as Chairman of the Senate Food Committee. We met with Mrs. Bates, head of the food service, and Mr. Pennington, vice president. Through these meetings we were able to get several things changed, such as a Continental Breakfast, doughnuts at breakfast and punch served at meals.

Platforms...

(Continued from Page 5)

We are presently working on the possibilities of an optional meal ticket. A change as big as this will require more than one year, and I feel I am qualified to carry on this kind of work with the least amount of lost time.

I also want to see something done about elections, so candidates are elected on ability and not so much campaigning. I think it would be wise to let executive officers and cheerleaders talk and perform at the halftime of the last basketball game. A larger percentage of students would see them than at the election rally.

There are a lot of improvements to be made and I would like to represent you.

By MIKE DAUGHERTY
I am Mike Daugherty and I am seeking election to the Student Senate in the School of Engineering. I feel that since I will be a graduating senior next year that I am qualified to represent my school and the students of engineering. Texas Tech is a growing University and it will continue to grow. The Student Senate must also be progressive in their ideas and goals. I am prepared to spend the time and energy necessary to be a functioning senator.

I feel the Faculty Evaluation Plan will benefit the student. I am in favor of publishing final exam schedules before registration. Most important, however, is not what I want, but what the students of engineering want. As a re-elected officer, I feel my most important duty will be to consult the constituency.

The newly elected president of

the student body has proposed a weekly column in The Toreador which will inform the students of current activity in the student government. This is a step in the right direction, but he cannot be left with the total responsibility. The senators must inform the students. In return, the senators must have the support of the students to be effective.

By JOHN WILCOX

In the coming year many important decisions will be made concerning the physical and mental attitudes of this school. With a new president and a continuing drive to make Tech a great university there will be need for many hard working students who will take time to listen to the ideas of their fellow collegiates and strive to establish these ideas in the body of the Student Senate.

Such questions as to whether or not the engineers of the future will receive a degree from a technological college or a state university; whether or not the Engineering School will remain as one of the primary schools on this campus, or be pushed aside by the ever increasing masses of other schools; whether the population of a school dictates its representation and will Tech be allowed to remain a 20th century school with an 18th century mind.

As engineering representative, I would seek out a representative opinion to such important questions; and with hammering determination work for the placement of these ideas into the working body of Texas Tech. I am ready to work for you, the engineering students, if you will but elect me.

from the AAUP blacklist (which is necessary for Tech's growth) and the proposed name change issue (a student body decision which must be established). The list is numerated by the problems of semester registration, phone regulations, inadequate academic entrance requirements, insufficient athletic recruitment—problems as these must be solved so that we may progress to the status which a school of this size demands.

The Code of Student Affairs still indicates Tech to be on the 3.0 point (A=3 points) system. This exemplifies the antiquity of the system, whereas the vagueness has been shown in various IFC decisions lately. A revision should be a primary consideration of the Senate next year.

As president of Men's No. 10 this year, I have become familiar with problems of the individual student. A system must be established whereas there is a more direct line of communication between the student and legislative bodies. This might be accomplished by reports to the Toreador, taped Senate meetings by KTXT, or possibly by senators reporting to the larger representative groups on campus.

I am interested in students participating in judicial as well as legislative branches of student government. For instance, the Residence Standards Board will give students the ability to make decisions concerning discipline in their individual dorms; i.e. students considering disciplinary actions of other students.

In conclusion, my interest lies in strong student representation and a progressive Texas Tech.

By CATHY CARTER

I am seeking the office of Student Senator in the School of Arts and Sciences, a responsibility which I feel qualified and eager to hold.

Next year we have a new Tech president, and I am sure some of the changes the Senate has been working on will be carried through. For instance, I am interested in

acquiring optional meal tickets as the newly-elected secretary is also.

Bill Beuck, next year's Senate president, wants Tech removed from the AAUP blacklist. This definitely must be done in order to get the best-qualified teachers to our campus. I will help Bill and the administrators in doing this any way I can.

I also feel the Code of Student Affairs has caused a lot of useless trouble because of the way it is written. If I'm elected, I will also look into this and help with its word revision.

My qualifications include secretary of the Science and Engineering Show, West Hall legislator, corresponding secretary for Delta Delta Delta, member of AWS, Toreador staff writer and dean's honor roll.

Tech is now in its era of change, and I would like to be a part of it.

By DAVID McDUGAL

My platform:

1. Abandoning of scholastic order registration.

2. Teacher-evaluation committee should be expanded to a larger scale.

3. I propose elections be taken out of the hands of the secretary and put under responsibility of an appointed and paid election judge because this is a full time job.

4. Pay-as-you-go food program.

5. Weekly senator column in the Toreador written by different Senators each week giving senate opinion and receiving student opinion.

These and many other problems must be solved. They are realized by many, but few want to work for each solution. If elected as a senator from the School of Arts and Sciences, I pledge to voice and work on each of these problems. I would sincerely appreciate the chance to do so.

By MIKE RIDDLE

Texas Tech is about to explode with change and progress. The decisions made in the next year by our new president and those work-

ing under him will have a profound influence on the future of our university. We, as students have a right to a voice in those decisions.

The student senate must, as the elected representative body of the students, make itself heard in the next year. Student opinion can no longer go unheard and unheeded. As a candidate for student senator I urge a student senate that will act for all of the students and that will serve as a voice for all of the students. I also feel that the senate needs to engage itself in activities that will bring benefit to the entire student body.

To be more specific, I feel that the senate must:

1. Be responsible for rewriting and approving the "Code of Student Affairs."
 2. Take the lead in a drive to get a proper name for our university.
 3. See that something is done to make the registration process less of an ordeal.
 4. Draw together the various divisions of student government and aim for more co-ordination and co-operation among student groups.
- These are the things that I think the student senate not only can do,

but must do for Texas Tech. Basically, what I feel we need is an active, working student senate that cares for the future of the university and for the students it represents. I do care. That is why I am a candidate. I would like to work for you.

By DOUGLAS C. TIMMENS

We have a definite lack of communication between the students and their representatives. This problem must be eliminated by making it clear to the students that their representatives want to hear their problems and views, and that we want to solve the issues which hold their concern. Each representative should go through the MRC and the WRC in order to attend special dorm meetings, allowing him to personally relate this need to the students. In this manner, you, the students, will be taking a more active part in our student government, and the legislative body will be better equipped to act on issues which you want presented for change or initiation.

We must revise the Code of Student Affairs by removing its ambiguities and initiating a set of rules which is in agreement with our changing institution. A means must be found to compensate for meals not eaten, and athletic events not attended. A uni-

fied effort by the students, administrators, and faculty should be made to erase Tech from the AAUP blacklist. Next year, a committee consisting of personnel from these three areas could discuss problems arising between them, and in the future perhaps, avoid such an incident. Also among my objectives is the Residence Standards Board. This system allows students to be judged by fellow students.

Let me state that during this time of expansion for Texas Tech, I sincerely want to place these issues in a working form. This will help enable Tech to become the institution which its size necessitates.

Graduate

By CLYDE FARRIS

TEXAS STATE UNIVERSITY: I believe, that one issue of great importance in which the Student Senate should attempt to lead the student body is the name change issue. The Texas Tech student body is potentially a politically important group. State Legislature candidates who favor the name change should be supported by the Student Senate. For example, the Student Senate can organize drives to send letters and petitions to the Legislature and the Board of Directors, as well as pub-

licly backing these candidates in their campaigns. In short, this name change can become a reality if a unified movement is achieved. The Student Senate is the only organization even remotely capable of providing this leadership.

AAUP CENSOR: The above mentioned methods also apply here; however, they need to be aimed at the Board of Directors. The Student Senate must offer this leadership.

ELECTION OF TOREADOR EDITOR: Any campus newspaper should be the voice of the student body and issue ideas to the student body. However, the Toreador has been totally deficient in both areas. The editor of the campus newspaper is an elected position on other campuses (i.e. the University of Texas), and I believe it would also benefit the student body of Texas Tech.

GRADUATE REPRESENTATION ON THE STUDENT SENATE: Graduates are under represented on the Student Senate. Because they have the choice of buying an I.D. the greatest majority do not make this purchase. This means that they cannot vote or hold an office. The Graduate School is different from other schools, and therefore, should not have to operate under these rules.

FACULTY SENATE: A Faculty Senate would be a benefit to Tech,

and, I believe, that by showing its support the Student Senate could hasten its adoption.

A vote for Clyde Farris, your independent candidate for graduate representative, would be appreciated.

By PRICE PRITCHETT

The addition of a graduate representative to the Senate is a credit to the past year's student government. The time has arrived for that fraction of the campus population to be actively represented. The graduate senator will have the task of representing a variety of interests, uniting a broad range of age groups, and, in this instance, establishing a worthwhile set of projects.

As your senator I would attempt to further organize graduate students through a set of elected officers. Only through such internal organization as this will teaching assistants and other graduates gain the strength needed to have the voice and influence deserved on our campus.

One graduate senator cannot speak loud enough to be heard from the Psychology Building to Industrial Engineering, but through mature organization the graduate population can become most effective, and I would work toward that end. There are, of course, other projects to be considered—better representation of Tech at interregional conferences and workshops, a graduate lounge

The Sigma Delta Chi

Talent — Truth — Energy

Awards

SECTION 11 FRIDAY, APRIL 29, 1966 SDX EDITION

Talent, Truth And Energy Qualities Found In Fifteen

TALENT, TRUTH AND ENERGY.

These three requirements — the watch-words of Sigma Delta Chi, professional journalism society — are the bases for singling out 15 "individuals" out of 15,000.

All 15 — including the two groups — have more than fulfilled these three requirements, and by doing so have each contributed in a distinctively personal manner to the stature of Texas Tech.

Their exceptional efforts have won them a place in the fifth edition of Sigma Delta Chi Awards, presented by the student chapter of Sigma Delta Chi at Texas Tech.

The awards issue was begun in 1961 as a method of recognizing persons or groups who, in an unassuming manner, have proven true to the three standards of Sigma Delta Chi — Talent, Truth and Energy.

Whether as a professor, student, choir director, secretary, committee, or in any other position which represents Texas Tech, these 15 have each contributed in their own way to the betterment of this school and for what it stands.

Whether by teaching or managerial ability, by superior representation of Texas Tech to others, or just by understanding, each of these 15 has more than done

his part in the improvement and the work towards making Texas Tech a truly great institution.

They are, in a sense, being honored for doing their particular job to the best of their ability, without regard for possible recognition or advancement, but because they simply want to do so.

The choice between several persons was difficult to make, since only 15 could be honored for their efforts. In the future, because of a lack of newspaper space and a growing enrollment, the number of those honored will be leveled at 15 each year. But they will definitely be 15 who deserve recognition and haven't received it previously.

In presenting these awards, the chapter hopes that the recognition of these 15 may stand not only for what they have done, but also for the efforts of the many others who have demonstrated the qualities of Talent, Truth and Energy.

As Texas Tech continues to grow, as with the world, society and its tasks become increasingly complex. Only by exhibiting the three qualities above can advancement be made.

No matter how small or how large the image of their positions, these 15 have continually exhibited the three qualities.

Sigma Delta Chi salutes 15 exceptional members of the community of Texas Tech.

Sigma Delta Chi Awards Go To These Fifteen Of Fifteen Thousand

Honored For Service To Texas Tech ★ ★ ★ ★ Speakers Committee

. . . success after one year in existence appears certain. The committee contacted four speakers in a short period of time with results creditable enough to merit their mention here.

Gene Kenney

. . . has given Tech reasons to be proud of the achievements of the various campus musical groups under his direction. He has made Tech's vocal music program one of this university's finest attributes.

Linda McSpadden

. . . has marked her college career with unusual insight and high academic achievement. Her energy and unceasing efforts on behalf of her many interests mark her as one of Tech's most distinguished students.

Tech Artists Course

. . . has filtered a new air of culture over the Tech campus because of their efforts. It has added a new dimension to education at Tech, an education from which all students benefit.

Ronald Schulz

. . . is given a large part of the credit for Tech's University Theater. His accomplishments are many and his value to Tech has increased with his tenure here.

Al Allison

. . . keeping a dream alive can often be a frustrating experience, but that's what Al Allison did—kept the dream for a law school at Tech alive. For his efforts, we pay him this small tribute—long overdue.

Larry Strickland

. . . has led the Interfraternity Council to a place of leadership and respect on the Tech scene this year. Since his freshman year, Larry has actively worked for Tech's fraternity system.

Tom Wilson

. . . had to prove himself as a football player when he came to Tech, and prove he did. Often called the most underrated player in the Southwest Conference, Wilson came from "nothing" to everything in his four years at Tech and has won the respect of all who know him.

Dean Killion

. . . in leading "that Goin' Band from Raiderland" to national prominence, has helped to create a vibrant picture of Texas Tech. His close rapport with band students has made him a highly respected member on the Tech scene.

Richard Vaden

. . . as supervisor of Stangel Hall (formerly Men's No. 9) has been the leader of one of the most active groups of men on campus. He deserves recognition for the example he has set for others.

Debate Team

. . . winning competition trophies from coast to coast, has carried the name of Texas Tech to new heights in the forensic world. Their victories have set records that all Tech students should be proud of.

Mrs. Kathryn Durham

. . . when a student in Arts and Sciences needs assistance, he knows exactly who to turn to—Mrs. Durham, administrative assistant to Dean Kennedy. And besides all her other qualities, she's a supporter of Tech athletics, deluxe.

Evelyn Clewell

. . . planning class schedules is a tedious and thankless chore, but it's the job of Evelyn Clewell, assistant registrar at Tech. We say hats off to her for her tireless efforts.

Red Raider Track Team

. . . dedication has been the key word as Tech's tracksters pulled themselves up to Southwest Conference standards and surprised many experts by winning the Fort Worth invitational track meet.

Contributors

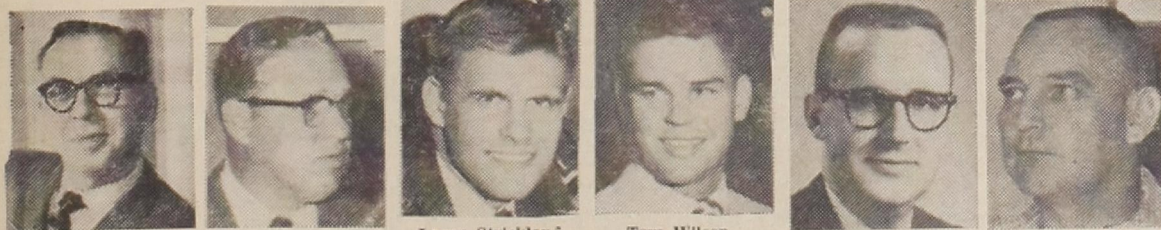

. . . who provide free services and free materials for Tech spirit organizations are long overdue for recognition. We salute these men for their help and wish there were more like them.

Speakers Committee Does Outstanding Job

Tech has completed the first year of the newly organized University Speakers series and judging from the comments of students and faculty, the program has been a resounding success.

To the uninformed observer, the success of the series does not seem too phenomenal since the speakers were of such caliber as Arthur Schlesinger, Al Capp, Dr. Huston Smith and Buckminster Fuller.

What does make the success of the University Speakers surprising is the fact that the Speakers Committee, which selects and contracts the speakers, began working on the 1966 program late last spring.

Within four months the committee had contracted the four speakers who appeared this spring plus the late Dr. Paul Tillich, whose sudden and untimely death forced the Committee to find a replacement for the February date.

Dean of Student Life James G. Allen, chairman of the Speakers Committee, said the committee was very pleased with the reception of the speakers.

Student members of the committee are Roland Anderson, Collier Perry, Beverly Barlow and Linda McSpadden. Other faculty members are W. L. Ducker, head of petroleum engineering; Dr. David

Vigness, head of the history department; and Hugh A. Anderson, associate professor of economics.

"We had very good crowds at all four of the lectures and are already looking forward to next year. Since the day after we contracted the last speaker for this year, we have been screening speakers for next year's program and already have contracted two," Dean Allen said.

"The disappointment and sadness of Dr. Tillich's death and Mme. Krishna Nehru Hutheesing's unfortunate accident slowed the committee down for a while but we knew there would be many disappointments when we undertook the job."

Dean Allen's secretary, Mrs. Cecelia Tietz, said the committee has put many hours into the screening of candidates for the lecture series and then trying to contract the desired speakers.

"The committee will take suggestions from any student, faculty or staff member," said Mrs. Tietz.

"Before we consider a prospective speaker seriously, we make sure they can fulfill certain requirements," Dean Allen said.

"When we find someone we believe has something worthwhile to

say we want to make sure they can say it adequately and informatively," Dean Allen said.

Mrs. Tietz said the committee writes prospective speakers numerous times telling them Tech will accommodate the speaker anytime they can come.

"The committee even sends the prospective speakers the airline schedule letting them know that Lubbock is not at the end of the world, as some speakers seem to think," Mrs. Tietz said.

The Speakers Committee could not possibly be saluted, however, without mentioning the work of Mrs. Dolores Maxwell, Tech Library reference librarian, who compiles information about prospective speakers.

Dean Allen said about Mrs. Maxwell's work, "She does unlimited work in giving the committee information on the speakers and even furnishes addresses of speakers so we may contact them."

So now while the students and faculty wait for next year's University Speakers to come, the committee with the help of Mrs. Maxwell continues the difficult job of sorting out hundreds of names and making one of these names become a reality as a speaker for Tech next year.

Gene Kenney Directs Tech's Choral Groups

"All right, that was pretty good, but we need much more volume from the tenors. Slur it sopranos—it's not a march! Basses, you missed the downbeat. Now—take it from the top up to tempo."

Gene Kenney, Texas Tech choral music director, came here in 1957 from Amarillo High School. Since that time the Texas Tech Choir has become recognized coast to coast as one of the top college choirs in the nation.

Gene Kenney not only is the director of the Tech Choir, but the Tech Singers, the Madrigal Singers, and the Male Glee Club, aside from being choir director at First Presbyterian Church.

Kenney received his Bachelor of Music from Kansas State Teachers College and a Master's Degree from Southern Methodist University. He has an associate professorship at Tech and, aside from the choral organizations, he teaches courses in choral directing and voice.

The Tech Choir has just returned from their annual spring concert tour. Over the past five years, the choir has sung in more than 75 concerts in most of the major cities of Texas. They performed at the New York World's Fair in the spring of 1964 where thousands of visitors from countries all over the world stopped to listen.

The Male Glee Club under Kenney's direction has sung in 45 concerts in the past five years, and the Madrigal Singers, a select group taken from the Tech Choir, has sung in more than 75 concerts in the same length of time.

Kenney has participated in all-state choral festivals in Arkansas, California, Florida, Georgia, Kansas, Missouri, Nebraska, Oklahoma, and South Carolina where he spoke to state choir directors concerning choral techniques.

He has been involved in regional choir clinics at Amarillo, Abilene, Odessa, El Paso, Lubbock, Killeen,

Houston, Corpus Christi, Brownsville, and Wichita Falls, where in each case he worked with a select choir and presented a concert.

Aside from all this, Gene Kenney has served as a judge in some 15 cities in Texas, and has performed for such local organizations as the Chamber of Commerce, the Rotary Club, Kiwanis Club, Century Club and many more.

Kenney is a member of the Texas Music Educators Association, Phi Mu Alpha, professional music fraternity, and a charter member of the Texas Choral Directors Association and the American Choral Directors Association.

Sigma Delta Chi salutes Gene Kenney for his work for Texas Tech, and we express our thanks for giving us pride in our choral organizations.

Platforms...

(Continued from Page 8)

in the Union Building, better representation on faculty committees—but all these and others depend heavily on internal organization. That must be our first objective.

My goals are realistic and worthwhile; past experience in student government has proved to me that organization is the essential, and that idealistic planning is wasted. Don't fail to go to the polls and vote on Friday, and let's take advantage of this opportunity to organize.

SDX Sponsors Beauty Pageant

Sigma Delta Chi each year sponsors the Miss Mademoiselle Pageant at which Tech's most beautiful coed and Miss Playmate are chosen.

Miss Mademoiselle is featured on the cover of the Mademoiselle section of the La Ventana. She and the nine runners-up are featured in full color pictures inside the magazine.

Miss Playmate is pictured in a color foldout in the Playboy section of the Tech yearbook.

Pam Munson, Lubbock sophomore, was named Miss Mademoiselle at this year's contest and Joan Reynolds, Morton senior, coped the Miss Playmate title.

Devoted To Drama

Schulz: Tackling A Big Task

"He came here in 1925 and hasn't stopped working since."

"He's the hardest working and most devoted man I have ever seen."

"He can't know everything, but you never know what he doesn't know."

These statements are only three examples of the many used to describe a man whose name is, obviously, synonymous with work: the University Theater's most important asset, Ronald Schulz.

Just a brief list of Schulz's accomplishments includes credits

that would make anyone stop and take a breath; anyone, that is, but Schulz himself.

His organizational affiliations include the Texas Speech Association, the Speech Association of America, local and national American Association of University Professors, Texas Association of Classroom Teachers and the Texas Educational Theater Association, for which he was elected to a two-year presidency in February.

Before coming to Texas Tech, he was supervisor of Northwestern University's Theatre Workshop for four and a half years. It is from this school that he is presently seeking his doctor's degree, lacking only his dissertation to achieve the honor.

He received both his BS and MA degrees from Northwestern in 1947 and 1948, respectively. The latter was given him "with distinction." In his nearly five years' association with that school afterward, its Workshop Theatre produced 18 short plays annually.

In his 13 years at Tech, the theater activities of the speech department have included four plays

annually. He also teaches drama and dramatic literature classes in the department.

The culmination of Schulz's efforts at Tech is illustrated in the University Theater, which he fought and worked for and finally saw come into being in the Spring of 1964.

A native of Rio Hondo, Tex., Schulz graduated as valedictorian from Rio Hondo High School in 1935 and attended Brownsville Junior College for two years. He attended evening classes at the University of Minnesota from 1937 to

1941 prior to entering the armed service.

He was an Army artillery captain in Europe during the war, and was awarded the Purple Heart.

In 1948 Schulz was director of the Highland Park, Ill., Community Players, and in the summer of 1947 directed the Bovinia Players at Highland Park.

Dr. P. Merville Larson, speech department head, said of Schulz, "His knowledge of collegiate theater and his being born and reared in this country gives him a combination one doesn't easily find."

RONALD SCHULZ

Tech Artists Course Adds Cultural Air

The Texas Tech Artists Course has added a new and important dimension to the education of Tech students this year. It is a dimension measured not in terms of factual knowledge, but in terms of a keener awareness of the sights and sounds of the world's finest music, drama, and dance.

The Artists Course was initiated in July, 1965, with the express goal of creating and perpetuating a cultural atmosphere unparalleled in the history of the college.

In formulating the Artists Course programs, the Artists Committee, headed by Harold L. Simpson, associate professor of foreign languages, and composed of eight other faculty, administration, and student members, confined its concern to the performance of the great works of the past and the "new masterpieces" of the present.

Members of the Artists Committee include Simpson, chairman; Elizabeth Sasser, professor of engineering architecture and allied arts; Charles W. Post, assistant professor of music; Ronald E. Schulz, associate professor of speech; James G. Allen (ex officio), dean of student life, Dorothy Pijan, Student Union Program Director; Roland C. Anderson, Student Association president; Julia Jakobsmeier; and G. W. Bailey.

The internationally known Harkness Ballet was brought to Lubbock Oct. 10 as the first of four giant steps in the college's ambitious venture.

Jennie Tourel, the world famous mezzo-soprano, was sponsored by

the Tech Artists Course Nov. 17. The noted singer was followed Feb. 7 by the National Shakespeare Company's performance of "Macbeth."

The Tech Artists Course closed this year's season with a concert by the Pittsburgh Symphony Orchestra April 18, which included performances of the works of Beethoven, Schoenberg, Schubert, and Weber.

The programs were financed by a 50 cent allocation from the Student Services Fee; and while tickets for each were \$4 for the general public, students with ID cards were admitted free. There were no reserve seats, making it possible for any Tech student to have the best seat in the house.

The Texas Tech Artists Course, with this year's program and those proposed for the years to come, is a new and noble experiment in teaching. Its sponsors hope the experiment will increase the students' awareness of and interest in the arts.

Through presentations of diverse and distinguished talents, it may help open up a new world of enjoyment and knowledge to the average Tech student and, thereby, make him better prepared for his role in the world after he leaves college.

ATTENTION, ART CONTEST ENTRANTS

All artists who entered the Campus Art Contest and who have not yet picked up their entries are requested to do so immediately. The entries are in the Programs office of the Union.

Tech track coach Vernon Hilliard west on their first outdoor performance this season, scooting to the Southwestern Recreational title in Fort Worth and they've been making turning in top performances ever since.

Seldom, if ever, has a Tech track team been so proficient in the

spring sport and the leader of the Raider rebellion could be a husky lad in the shot put ring — Ed Mooney.

Mooney's lost only one time in seven outings in the shot put and that was to Matson in the Texas Relays. Mooney's best toss this year has been 56-7 two weeks ago in a triangular meet in Abilene.

But Mooney's not Tech's only drawing card. The Big Red has also scored heavily in the high jump with two first places, four seconds and a couple of thirds in the meets the Raiders have participated in this season.

Jim Flowers registered the first blue ribbon performance in the high jump in the Southwest Rec meet, scaling the bar at an even six feet.

Frosty Miller sacked the other first place with a 6-3 effort in a triangular meet at Tech against McMurry and Arlington State.

Flowers has three other second place jumps and Miller has one second and a third. Sophomore Art Carroll notched a third place in the triangular at Tech.

The 440-yard relay team has won two races, finished second in one and third in another. Best clocking has been 41.6.

And with the Southwest Conference meet just weeks away, there's no time for the tracksters to slow down. And if they perform with the dedication they've given all season — they won't.

AWS WOMAN'S DAY TICKETS

Tickets for AWS Woman's Day Banquet will be on sale through Saturday in the dorms, the Dean of Women's office and the Union. They will also be sold May 2 until noon.

Hopeful Graduates Know Mrs. Durham

Mrs. Kathryn Durham can be described as a dynamo of energy and understanding — two qualities desperately needed to keep Tech's largest school, Arts and Sciences, performing adequately and efficiently.

Mrs. Durham, according to Dr. S. M. Kennedy, dean of arts and sciences, is an ardent supporter of Tech's athletic program and a staunch Tech ex.

She received a degree in Spanish and taught in public schools before deciding she liked college administration. She returned to Tech during World War II to assist in the military training program.

In 1944, she transferred to the office of arts and sciences as secretary to Dr. R. C. Goodwin, then dean and now president of Texas Tech. She has been in the arts and sciences office since that time.

Her job at the present time, says Dr. Kennedy, is to guide people along the route of their degree plan to the reception of their degree.

Dr. Kennedy said Mrs. Durham has helped countless distraught seniors with their degree problems and helped them figure out how they were going to graduate.

He added that she would not budge on requirements necessary for graduation but she could help perplexed students solve their problems.

"She has an extraordinary memory," he said. Before the school became so large, he added, students would often come in with their problems and she would know what their requirements were without looking at the file. "People who come back after graduation to visit are surprised to find out how much she still knows about their

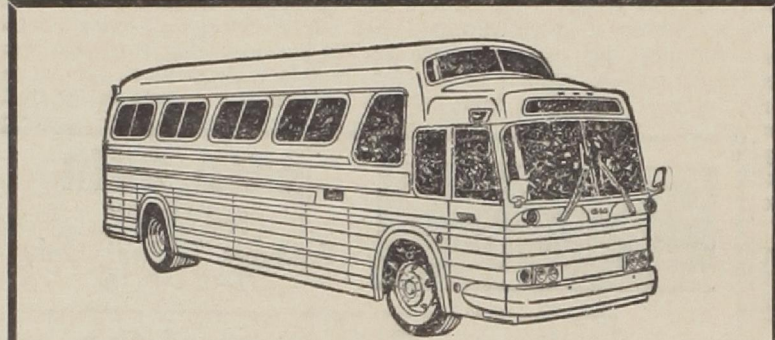

KATHRYN DURHAM

problems when they were students. "She also is extremely competent in getting people to work together and maintaining high morale in the office," Kennedy said. She is responsible for screening and training the secretaries in the outer office.

Mrs. Durham, according to Dean Kennedy, is extremely active in the Caprock chapter of the National Secretaries Association and has held numerous offices in that organization.

Kennedy summed up his praise of Mrs. Durham by saying that he has had the privilege of working with her since 1952, when he started as an instructor at Tech, and has never regreted it. "She is one of those people who can get an office running smoothly and efficiently."

Allison's Law School Dream Now A Reality

For many years, a law school at Texas Tech was only a fancy dream.

But there was one man who kept that dream alive until it became a reality under the approval of the Texas State Legislature last year.

The man — Al Allison. His position — a member of the Texas Tech Board of Directors. His goal — a first-class law school at Texas Tech.

Allison began his background work on the law school long before 1962, but it was during that year that he was able to put his plans on paper and make formal request to the Board.

After the Board gave its seal of approval, the measure went to the old Texas Commission on Higher Education (TCHE) for staff study.

For two years they studied, and

McSpadden Takes Lead On Campus

Her involvement in numerous campus activities have made her a nominee for many honors.

Her notable scholastic achievement has placed her among an elite group of campus scholars.

And her continuing friendliness makes her an all-around campus favorite.

Linda McSpadden, a senior English major from Tulsa, Okla., deserves the honors she has received, because she has sincerely earned them.

Linda has a 3.81 overall grade point average, which distinguishes her as a diligent student.

She is president of Mortar Board this year and also is a member of the University Speaker's Committee for 1965-66.

Linda has taken an active interest in her social sorority, Pi

LINDA McSPADDEN

Beta Phi, and served as scholarship chairman of the sorority during 1965.

This energetic coed was a member of Junior Council, another women's campus organization, in 1964-65, and was a member of Phi Kappa Phi, junior and senior men and women's honorary during 1964-65.

Linda's achievements are listed in the Who's Who in American Colleges and Universities for 1965-66, and an entry in this book is in itself a great honor.

Last summer she worked for a Baptist mission in Mexico, and worked with needy children.

Sigma Delta Chi congratulates Linda McSpadden on her honors, and says thanks for the many hours she has devoted to helping create a greater and more enjoyable Tech community.

it was not until the summer of 1964 that the TCHE recommended a law school to open here by 1967.

And during those two years, Al Allison was busily working for Texas Tech and its needed addition. He prepared studies of his own and was in constant touch with the TCHE.

After the law school finally was approved, Allison didn't stop working; he led the search to find a capable man who would head the new school from the important dean's chair.

In this capacity, Allison traveled, wrote letters and interviewed prospective candidates until he found the man who was needed—Richard B. Amandes—in California.

And Allison still isn't through working for the law school. Now his work is centered around the physical plant of the new school and what it will become in the future — a job that interests him greatly.

But his interests don't stop there,

either. He is also still vitally interested in Texas Tech as a whole, and many of his efforts are aimed at its physical growth and educational excellence.

For instance just this semester he made history by speaking frankly in his position as a member of the board of directors.

In the question-and-answer session with members of the Student Senate, he fielded all questions aimed at him, no matter how touchy or taboo they had been with other administrators.

For this fact alone — that he spoke out and openly acknowledged what was wrong — he deserves this special recognition.

But he has done much more. Ever since he was a student at the Texas Tech of the 1920's and early '30's, he has been working for the betterment of this school in the best ways that he could. For these efforts, we believe he deserves the SDX honor.

Choose your own pharmacist—Have your physician write your prescription and hand it to you so that you may exercise your own choice of a pharmacy.

Miss Evelyn Clewell

She Arranges Tech

Next Sept. 16 approximately 20,000 Tech students will go to their specific classrooms at specified times, never once wondering why they are going where they are, when they are.

They will never be conscious of the great amount of work that went into the planning of the class schedule, the placing of some 2,500 classes in classrooms suited to their needs, and the coordination of time and place for maximum utilization of classroom space on a campus "bulging at the seams."

They will never be conscious of Miss Evelyn Clewell, coordinator of space and assistant registrar, who is responsible for the above tasks, as well as many other duties in the Registrar's Office of Texas Technological College.

In addition to preparing class schedules three times a year, Miss Clewell prepares all predictions of enrollments, most of which have been uncannily accurate; prepares break-downs of grade-point averages; prepares final examination

schedules, and makes classroom reservations for college organizations wishing to use them.

"Miss Clewell not only does an efficient job, she looks for ways to

EVELYN CLEWELL

help students. Even as Tech has grown larger, she has kept an individual touch," Dean of Student Life James G. Allen says.

In order to perform all her duties adequately, Miss Clewell often works after-hours, something which many administrators often find themselves doing. She does much of her paper work after 5 p.m. because she believes she can do more accurate work when she can adequately "concentrate" on a matter. Often deadlines on statistical information necessitate that she work much more than a normal eight-to-five day.

Other duties Miss Clewell performs include checking grades for organizations to determine eligibility, determining students who qualify for the annual All-College Recognition Service each spring, distributing class tickets and cards to departments during registration (approximately 280,000 of them), and keeping up with enrollment figures during registration.

However, it would be difficult to describe Miss Clewell's job as a "duty" to her. To her it is an opportunity to work with young people, to be of help to other administrators and to help Texas Tech run more smoothly.

Miss Clewell came to Tech in August, 1929 as a secretary in the Registrar's Office. She became an assistant registrar in 1935, a position she has occupied ever since.

Miss Clewell is a member of the Tech Campus Planning Committee, an appointment which adds considerably to the time she spends working for Texas Tech.

Few persons realize the contribution Miss Evelyn Clewell makes to Texas Technological College, something she has been doing for 37 years. She is indeed a member of the "behind-the-scenes" personnel.

Coach, Players Laud Quarterback Wilson

In 1962, Tom Wilson graduated from Corsicana High School and one school took the chance of offering him a football scholarship.

"He was too small, too slow, and too weak," said Coach J T King, "but he never gave up." That one school was Texas Tech and last fall, according to his coach and fellow players, Tom Wilson was the most underrated player in the Southwest Conference.

"He's a great guy and a good leader," said Kenny Baker, the Red Raider fullback. "He just has that 'something' that makes for respect."

"He's one of those individuals who excel when they have nothing to recommend them," said Coach J T King. "He did it through sheer will power."

"He was a long way from being a college quarterback when he came here," said King, "but he

studied the plays and developed his passing until he was like having a coach in the huddle. He knew as much about the offense as the coaches did."

He knew enough to help the Raiders to their first winning season in nine years in the fall of 1964, and to second place in the SWC last fall. And King gives him sole credit for three of Tech's eight victories.

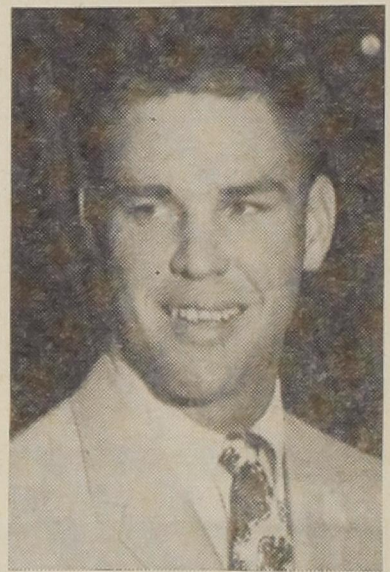

"Tom won three of our games with less than two minutes left on the clock," said the coach. "We couldn't have done it without him."

"His strength is in his leadership," said Baker. "I came to take what he said for granted, just like a coach was talking."

But Wilson didn't just use those around him. On his own, he set the hottest offensive pace the SWC had seen since the days of all-American Don Trull at Baylor, coming close to breaking all of the former Bear's passing and total offense records.

Wilson now is helping coach the quarterbacks during the Raiders' spring training, and Coach King said next year he will be a graduate assistant on the staff.

It was a lucky day for Tech when the school took a chance on Tom Wilson, and Sigma Delta Chi takes this opportunity to wish him the best of everything and voice a desire that he exercise his talents for the Raiders for a long time to come.

TOM WILSON

Strickland Leads IFC Foreward

No organization on campus this year has gained more respect or acted more responsibly than has the Interfraternity Council.

One of the primary reasons IFC has furthered its own goals and simultaneously afforded leadership for the entire student body this semester is Larry Strickland, president of the council.

It is significant that though many have complained of the existent "in loco parentis" philosophy at Tech, the protest had not

— Best Year Yet —

Tech Debaters Rank High

Oscar Wilde, British dramatist, once said arguments are to be avoided; they are always vulgar and often convincing.

Apparently, the arguments of the Tech debate team have been convincing for this has been the most successful year in Tech's history for the team.

Headed by Debate Coach Vernon Ray McGuire, the debate team is made up of 60 students. Although all the members have participated in tournaments at one time or another during the year, five outstanding students have been the work horses for the team.

Five Members

These members are seniors Janine Coats of Amarillo and Hal Upchurch of Kermit, sophomores David Bradley of Denison and Carl Moore of Lubbock, and Robert Trapp, Perryton freshman.

Although this is McGuire's first year as debate coach, he has compiled a record any coach would envy. The team has participated in 13 major tournaments and with the exception of the first two, took first, second or third place in every meet.

Last year, the debate team won

more trophies than all the other years combined. This year McGuire's "Fuss Budgets" have already taken four more trophies than last year.

Best Year

"This is undoubtedly the best year Tech has ever had in the debate field," McGuire said. "If we get the high school recruits we're going after, next year should even be better."

The speech department does most of its recruiting by holding speech tournaments at Tech. Two other methods are personal contacts by speech students with high school students and personal contacts by the speech faculty.

Although car safety laws haven't been the topic of debates, the team would be well qualified to debate the subject after traveling to the various tournaments throughout the nation.

Travels

One member reported that the team has traveled through Texas, Oklahoma, Mississippi, Kansas, Nevada and Utah. All teams combined have logged 12,000 miles in tournament travel. Funds for the

travel expenses come from the Student Association fee.

With his first year as debate coach marked as a success, McGuire is looking forward with optimism towards next year.

"We hope to double the number of students engaged in forensic activities next year," he said. "If predictions hold true, we will see the largest influx of freshmen interested in debate in the history of the college."

If the predictions of McGuire's debaters holds true, Tech will boast one of the best teams in the state again next year.

Strickland...

(Continued from Page 14)

progressed beyond the stage of semantics, until Larry and other members of the IFC Court penned a letter to the administration, asking that something be done about it.

The significance of the letter lies not so much in the opposition to archaic rules as to who was voicing the dissent. Here was a group of students, led by Larry, with proven dedication and responsibility going through proper channels, presenting a distinct problem and requesting that it be solved by those who should rightly solve it. The students and faculty should, the letter said, rewrite the Code of Student Affairs.

An examination of the credentials of the author of the letter lent more to its weight.

Larry Strickland, a senior ac-

counting major, was one of nine Tech men named to Who's Who in American Colleges and Universities for the 1965-66 school year. His qualifications include a 3.10 overall grade point average.

In 1964 Larry served as Guard of Kappa Sigma, as IFC delegate and was a member of the discipline committee.

He served as IFC delegate to the national convention in 1964, was treasurer of IFC and served on the Rush and Housing committees.

In addition, Larry served as chief justice of the IFC Court in 1964-65, was vice president for the spring of 1965 and succeeded to the presidency last fall.

By acting responsibly, coolly and with little recognition, Larry has exemplified that students can in fact contribute significantly to Texas Tech and society if given the chance.

Two Service Stations Contribute To Tramps

Two service stations near the Tech campus have donated storage space, labor and gasoline to the Tech Saddle Tramps.

For this Sigma Delta Chi recognizes Ammon and AcAdams Texaco at 1411 College Ave., and Medical Center Phillips 66 at 3723 19th St.

The Phillips station, owned by Roy Matthews, stores the Saddle Tramp car. Since the early fall the station has serviced the car and donated approximately \$100 worth of gasoline for in-Lubbock use.

The Texaco provides a place in front of the station for the Spirit Bell. It also has donated all gasoline for out-of-town trips of the

Saddle Tramps for the last two years.

This year \$250 worth of gasoline has been donated by the Texaco Station.

Saddle Tramps president Bob Fillpot says that the service and gasoline provided by the two stations has helped Saddle Tramps get to out-of-town games when otherwise they would have been unable to attend.

The spirit shown by these two Lubbock business establishments and their owners exemplifies the backing given Tech by the entire city of Lubbock. Sigma Delta Chi and Texas Tech say thank you, Ammon - McAdams Texaco and Medical Center Phillips 66.

Vaden Works Prove Success

Personal and group achievements explain why Richard Vaden, residence hall supervisor of Stangel Hall, formerly Men's No. 9, has been chosen to be honored by Sigma Delta Chi.

Presently, Vaden is working on a doctoral degree. He received his masters degree from Texas Tech last August. His BA degree was earned at the University of Texas in 1960.

Allene Vaden also graduated from the University of Texas and will receive her masters degree from Tech this summer. She will then begin study for her doctorate.

Another Vaden achievement will come in September when they will join the Tech faculty. Vaden will teach management courses in the school of business while his wife will teach courses on food nutrition.

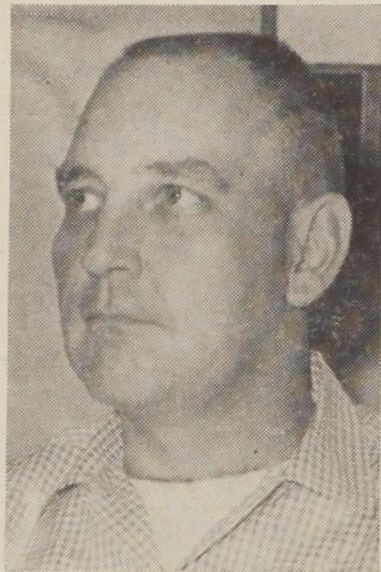

One of the biggest achievements of the year is the excellent record of student activities made by the men of Stangel Hall.

Vaden praised the 527 men for their outstanding record and credited them with the year's successes. They were the ones contributing the unique, bright and aggressive ideas for the dorm's numerous projects, said Vaden.

"Without his support and his in-

fluence with college authorities many of our projects would have failed. We all owe him a tremendous amount," said Noel Knight, Odessa junior living in Stangel Hall.

Vaden considers himself a professional listener with the responsibility to aid students needing help by guiding them to Tech's pro-

RICHARD VADEN

fessional services, such as the Guidance Council.

In the category of valuable student services is Vaden's establishment of a dorm tutoring service which aids students needing help with class assignments. Vaden praised his wing advisors for their cooperation in forming the tutoring service.

Richard Vaden is a progressive and modern thinking person, as indicated by statements made during an interview he believed was being conducted for La Ventana's Playboy magazine.

Vaden said the new co-educational environment that will be offered by Stangel Hall and Men's No. 10 next year will be a valuable experience for the residents.

He pointed out the need for male students to learn to accept women as intellectual equals in preparation for the society they will face after graduation.

Vaden considers his association with the men of Stangel Hall to be a privilege. He said it gave him a meaningful look at student life, student problems, personal and group problems, and it has helped him to understand the students' needs.

Killion Often Called 'Mister Man Of Music'

"Mr. Man of Music" some have called Dean Killion, director of the Texas Tech Band and professor of music.

Dean Killion's record of achievements speaks for itself. In his seven years at Tech, he has done

much to bring honor to himself and his "going band from Raiderland." Because of his efforts to have the band march in the Gator Bowl before 60,000 cheering fans and a national television audience, he received praise from across the country, from people in and out of the music profession congratulating him and the Tech band on a great halftime show.

According to Fort Worth Star Telegram, in a review of the bowls, it was the "best halftime show, by Texas Tech's band, which dazzled the Gator Bowl TV audience with the greatest marching exhibition since Alec Guinness paraded his troops across the River Kwai."

The Tech band has a great respect for the man who helped promote and raise \$16,000 on a 14-hour "bandathon" to send the band to Florida.

A native of Fairfield, Neb., Killion graduated from the University of Nebraska in 1950 with a bachelor of music education degree. He received his master's degree a year later.

While at Nebraska he was featured trumpet soloist with the brass choir and later was director of the choir. The youthful bandsman was president of the Nebraska University band, president of Sigma Chi social fraternity, national councilman for Phi Mu Alpha, honorary music fraternity, and a member of Gamma Lambda, band honorary, and Pi Kappa Lambda, music and scholarship honorary.

Then in 1959 he became director of the Tech band.

While at Tech, Killion has been given numerous awards and honors. In 1963 Killion was awarded the Lubbock's Citizen Award for Excellence.

"I inherited a good 120-piece band when I arrived," Killion once said. "I was determined to mold it into a top national band. Due to the heavy enrollment, we enlarged to 270 this year. My original plan was to road march only 230, but it became such a task to select persons to make the road trips, I decided to take them all. It is hard to tell someone who has really worked hard that he will not be able to make a trip."

Hard work has made Killion's band a powerful spirit on the Tech campus. Killion the man, Killion the force behind the 270 strong—all this and more has been the reason why he is often thought of as one of Tech's outstanding faculty members.

DEAN KILLION

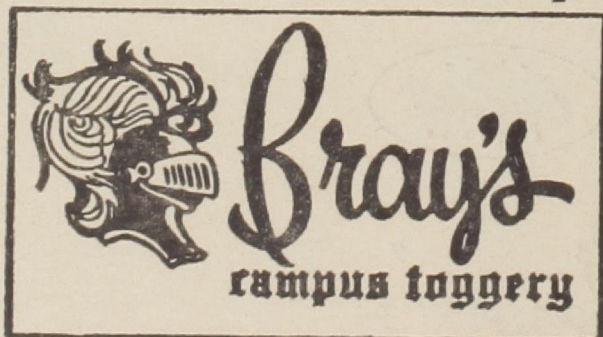

shall we dance?
