

**WHO'S SLEEPY?** — These four Tech students do the Watusi Soddambulism in preparation for tonight's Pajama dance in Fair Park Coliseum. The Chessmen from Dallas will furnish music from 8

p.m. til midnight for the nocturnal affair. Shown warming up (left to right) are Hadra Hines, Donny Anderson, Susan Middleton and Teddy Roberts. (Staff Photo)

## Sigma Nu Sentence Reduced By Court

Interfraternity Court Friday held that previous punishment assessed Sigma Nu fraternity was too severe and granted a reduction in sentence, including removal of social probation.

The fraternity had appealed the decision Wednesday on grounds that punishment was too severe since no girls, only a few pledges and three actives were present during the incident.

Sigma Nu was convicted of violation of the Code of Student Affairs section on alcoholic beverages IFC Court Monday had levied a \$350 fine and placed the moval from social probation alth remainder of this semester.

In Friday's action the court also reduced the fine to \$300. Removal from social probabtion allows Sigma Nu to have its White Rose Formal dance scheduled tonight.

Chief Justice Alan Murray said the prior finding, guilty on all charges, was still effective but the sentence was reduced because of the "degree of seriousness involved in the latter charge." The charges also included violation of the unsponsored, unscheduled and outside the city limits sections of the code.

Using the Phi Gamma Delta case as a precedent the court decided the sentence was too severe because no women were at the function, only a small number of persons were present and no one was affected outside the fraternity, Murray said.

The court said, "We feel that such actions are detrimental to Tech fraternities and the decision should not be interpreted as an attempt to belittle the importance of such actions."

The charges against Sigma Nu were filed by the Office of Student Life following a complaint by a Plainview Hotel manager who said his hotel had been damaged by the spraying or spilling of beer.

### UNION MOVIE

"Desire Under the Elms" will be shown Sunday at 3 and 7 p.m. in the Coronado Room of the Tech Union.

The film stars Sophia Loren, Anthony Perkins and Burl Ives. Admission is free.

## Cong Make Vain Stand

SAIGON, South Viet Nam (AP) —After retreating under relentless pursuit, a battalion of North Vietnamese and Viet Cong turned and made a stand Friday in a central Vietnamese village. It was immediately caught in a storm of bombs, rockets, napalm and machinegun fire after losing 141 killed, by U.S. count.

Encircling troops of the U.S. 1st Cavalry, Airmobile Division and the Vietnamese army hoped to complete a battle of annihilation against the 300 to 400 enemy troops wthin 24 hours, a field dispatch said.

The battle, the sharpest ground fighting in three weeks, raged throughout the day at the village 280 miles northeast of Saigon, then began to sputter out at nightfall.

In the air war, U.S. planes Thursday attacked a highway 15 miles northeast of Hanoi, as close as they have ever come to the North Vietnamese capital, a U.S. spokesman reported.

### Positions Open

Two salesman positions are available on the Treador advertising staff for 1966-67. Applications are being taken in the Student Publications Office (Room 102) and room 203 of the Journalism Building. Deadline for applications is 2:30 p.m. Tuesday, according to Ziggy Nicholson, '66-'67 business manager.

## Moudy Will Deliver Graduation Address

Dr. James M. Moudy, chancellor of Texas Christian University, will speak at Texas Tech's 40th annual commencement exercises at Lubbock Municipal Auditorium May 28 at 8:15 p.m. Fifteen hundred Tech students will receive degrees.

Dr. Moudy spent his early childhood in Greenville, Tex. He graduated from McKinley Technical High School in Washington, D.C., and was employed in the U.S. Treasury Department for six years. He entered TCU in the fall of 1939 to prepare for the ministry.

Dr. Moudy served as chaplain in the United States Army with combat units in England and Europe from 1944 to 1946. After his discharge, he returned to TCU for seminary study.

After receiving his B.D. degree in 1949, Dr. Moudy was awarded a Kearns Fellowship in religion for doctoral work at Duke University. He was elected to Phi Beta Kappa and received his Ph.D. degree in 1953.

Dr. Moudy has served as chancellor of Texas Christian University since July, 1965. He is the first TCU alumnus and native-born Texan to hold this position.

During the exercises, Peter Hurd, artist of the Southwest, will receive an honorary Doctorate of

Fine Arts. The Texas Board of Directors voted to confer this degree at its February meeting.

Hurd has an international reputation and is especially well-known in Lubbock for the 16-panel mural depicting the development of the South Plains. The mural is in the rotunda of the West Texas Museum on the Texas Tech campus.

John Meigs, an artist and associate of Hurd at San Patricio, said this first award in the field of the Arts and Humanities shows the "coming of age of West Texas." Meigs assisted Hurd with Tech Museum mural.

Last year Hurd was commissioned by the White House Historical Association to paint the official portrait of President Johnson. The portrait is now complete. Mr. Hurd had previously done the cover of President

Johnson when he was "Time" magazine's "Man of the Year."

## 'Gallows Humor' Premieres Before Delighted Audience

By BARBRA WORLEY  
Editorial Assistant

A fast-paced, audience-pleasing second act topped off the night's entertainment and tied together the ends of an equally humorous but slower-moving first act as Jack Richardson's "Gallows Humor" opened at the University Theater before a not quite full house.

The seats could fill up faster, however, when the word gets around that "Gallows Humor" is such a delight. Performances brought off with surprisingly seasoned professionalism by the entire set of players added just the right touch of humor to the already sarcastically laughed-filled lines by the young actor.

The first eerie appearance, made comically difficult by an evasive spotlight, of the Prologue Death, played dancingly and with perfected makeup by Perry Langenstein, set the mood for the play and from that moment all went well.

The play's two acts depict two different stories which are indirectly tied together by the fact that the doomed murderer bemoans the loss of his routine life in the first and his executioner

tries in vain to lose his in the second.

As the murderer, Walter, Jon Stevens performed with his by now accustomed excellence, while Cay Pruitt, after only a brief period of apparent and justified nervousness, moved swiftly into her role as the state-hired prostitute trying to seduce the prisoner.

John Paul Painter, as the Warden, the only character to reappear in both acts, played with all the gesticulations of William Jennings Bryan at the Scopes trail, and was particularly amusing in his second-act clandestine love scene with the wife of his own employee.

Roger Smith was probably the highlight of the play, receiving outright applause on several occasions with his sheepish, lion attempts to rid himself of his everyday life as an executioner and go off to the jungles to grow a beard. His frustrated attempt, in vain, to murder his wife was one of the top scenes in the play, and his pathetic resignation to his fate as the same old Phillip brought a touching close to the play.

Not to be left out of the praise was Doris Jean Smith as the wife of the executioner, whose facial

expressions at times when the audience should have been watching someone else, drew all eyes to her.

In all the play, the players, Ronald Schulz's direction and everything else about the production fused together to become an hilarious expose on what most affects and enralls the audience—the boring but inevitable routine of everyday life.

### RELIGIOUS INTEREST COUNCIL

The Religious Interest Council will meet from 12-1 p.m. Monday in the Anniversary Room of the Union. Program planning for next year will be discussed.

### Job Available

Student government is now accepting applications for an office secretary for next year. Applicants must be able to type and take dictation. They must apply at the student government office in the west wing of the Ad Building by 5 p.m. Tuesday.

DR. JAMES MOUDY

### ID Pictures

Students planning to return to Tech next year must have their pictures taken for ID cards. Pictures are being taken in the east wing foyer of the Ad Building from 8 a.m. to noon today. Pictures will be taken Mon. and Tues. from 8 a.m. to 5:30 p.m. The pictures will be in color for plasticized IDs.

# Political Science Institute Set At Colorado College

A special eight-week Institute in Political Science, featuring practicing politicians, will be held this summer at Colorado College for undergraduates majoring in other fields.

The institute, believed to be the first of its kind, gets under way

June 13 and carries up to 11 semester hours of credit.

The five courses and a colloquium on current issues provide a unified view of political science not ordinarily available in individual courses.

Department, said the institute is de-

### Department Chairmen

Prof. J. Douglas Mertz, chairman of the political science department, said the institute is designed to cover the entire spectrum of politics, ranging from the local to the international level.

Students enrolled in the seminar will have an opportunity to work with men who have been deeply involved in state, national and international affairs for years.

The once-a-week colloquium will (Continued on Page 3)

ROY G. FAUBION

## Roy Faubion Wins Contest

Roy G. Faubion, senior zoology major from Houston, has won a free year's room and board at The Matador, a new off campus dorm.

Faubion's name was selected during a contest to name the dorm located at 1717 Norfolk, according to Sheila Mitchell, secretary co-ordinator of the dorm. Faubion based his name on Tech's original football team name and on the present school song.

### AWARD RECEIVED

Texas Tech President R. C. Goodwin Friday announced receipt of a \$2,000 award to the College from the Monsanto Company in St. Louis.

Dr. Goodwin said \$500 each would go to the Chemistry Department and to the Department of Chemical Engineering, and \$1,000 to Textile Engineering.

## Conference To Convene On Thursday

Texas Tech Animal Husbandry Head Dr. George F. Ellis Jr. said Wednesday "preliminary indications point to a good turnout" for Tech's Livestock Feeders Conference on Thursday.

Registration fee of \$5 per person includes a luncheon and printed copy of the conference proceedings.

C. G. "Charlie" Scruggs of Dallas, vice president and editor of the *Progressive Farmer*, will be the principal speaker. He will talk at 10:20 a.m. in the Tech Union of the "Changing Agricultural Situation: Its Future Outlook."

Dr. Ellis will report on "Livestock Research at Tech" at 9:15 a.m., followed by a discussion of "The Application of Research Findings to Commercial Beef Production," by Spur rancher O. J. Barron, Jr.

Dr. Willard F. Williams, agricultural economics head, will discuss "Dynamics of the Livestock and Meat Industry" at 11:05 a.m. and Paul Marion, superintendent of the Texas Agricultural Experiment Station at Spur, will report on "Beef Cattle Research at Spur."

The afternoon session will feature a talk on "The Texas Tech All-Concentrate Story" at 1:15 p.m. by Ralph Durham, Animal Husbandry professor.

Several research papers will be presented by the Tech Agricultural School faculty.

### WESLEY FOUNDATION

The Wesley Foundation will have a come and go "Coffee House" today from 2-5 p.m. There will be entertainment. The address is 242 15th.

## Barracks Will Be Relocated

Tech's new law school will have its temporary home delivered to campus this week in the form of relocated Air Force barracks from Shepherd Air Force Base.

Ray Downing, director of building maintenance, said that 19 of the barracks were bought by Tech recently for \$1.00 each. Downing said that the buildings would be used for classrooms, offices, and lab facilities. He said they would arrive Tuesday or Wednesday.

The buildings which will be ready for use by Sept. 1, will be moved to the campus for an appropriate cost of \$1,300 each and will be renovated to fit the needs of the school for \$5,000 each.

This Arrow sport shirt meets all your standards. Except one.

# Tech Given Bequest For Chair In Piano

Texas Tech's department of music has been given a bequest from the estate of the late Eva Browning of Lubbock to establish a Chair in Piano, or scholarships for piano students, Tech officials announced Thursday.

Setting amounts of scholarships awaits the settling of the will, said Robert Deahl, music professor.

Miss Browning stipulated that the come from her estate, valued at between \$200,000 and \$300,000, could go to the Texas Tech College Foundation for "the purpose of creating an artist-in-residence for piano, or piano scholarships, in the department of music."

The First Presbyterian Church has given \$20,000 to establish the Eva Browning and the Joe Dennis Scholarship Funds for Texas Tech music majors, who are members of the First Presbyterian Church of Lubbock and the Lubbock Choir.

Miss Browning, a former member of First Presbyterian Church, taught piano in Lubbock until a

few years before her death Feb. 23. Tech president R. C. Goodwin said "we certainly appreciate this most generous expression of interest in the College and in the department of music.

"We look forward to the implementation of this gift for the continued improvement of instruction in piano, and the College's ability to provide additional artists, both for the campus and for the community."

Dr. Joe Dennis, head of the department of chemistry, called the gift "a very significant contribution to Texas Tech. It is of a sort that seldom comes to the area of the fine arts, and will be a tremendous boost both for music and fine arts in general."

Other recent awards given the department of music include a Fulbright Grant to Tech music instructor Heather G. Woodall and a doctor of musical arts degree to Walter Kent Hill, organ teacher in Tech's music department.

## Pops Concert Scheduled

The Department of Music will present Tech Musical Organizations Pops Concert Sunday at 3:00 p.m. in the Tech Union Ballroom.

The Varsity Band, Section II, conducted by Anthony Brittin, will present selections from "The King and I," "Coat of Arms" and "Eagle Squadron."

The Women's Chorus, conducted by George Biffle, will present a choral selection from "My Fair Lady," "Silent Strings," "Clap Yo'

Hands," and "Dream Fantasy."

The Tech Singers, conducted by Gene Kenney, will present "Sing to the Lord a New Song" and "Psalm 150."

The Varsity Band, Section I, conducted by Dean Killion, will present "Purple Carnival," "First Suite in E Flat," "Beguine for Band" and selections from "The Sound of Music."

Admission is free.

## Political Science

(Continued from Page 2) feature U. S. Senators, congressmen, former presidential cabinet members, ranking state leaders, city managers, and diplomats. Following each session, students will have a chance to discuss current political issues with the visiting public officials during the two-hour institute luncheons.

### Central Course

The institute is built around the colloquium and a three-hour central course called "The Study of Political Science," which covers the concepts methods, institutions and forces used daily by working politicians. It is amplified by four seminars, carrying two credit hours each. The seminars deal with political theory, the legal process, international politics, and American politics.

Students enrolling in the seminar will be encouraged to take the central course in political science, plus several of the seminars.

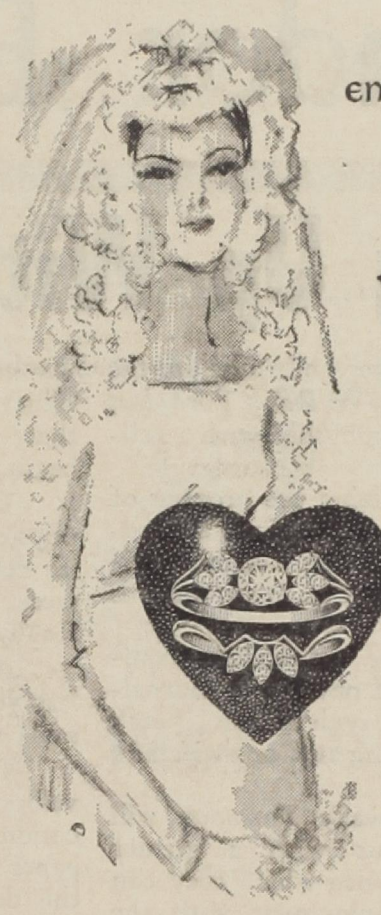

Dr. Gilbert R. Johns, associate professor of psychology and director of the summer session, said a feature of the program is the institute's own "house." Two newly furnished seminar rooms have been set aside for the institute. All classes and seminars will meet in one. The other will serve as an institute lounge and library.

### Department Member

Institute courses will be taught by four members of the Colorado College political science department.

Professor Mertz, an attorney before he became a political scientist, will teach the international politics seminar.

Prof. Rudolph Gomez will teach the American politics seminar, and Instructor Timothy Fuller will teach the seminar in political theory. The central course will be taught by Gomez and Fuller.

## Keeping Up With The Times

Sept. 20 will mark another milestone in the history and progress of *The Daily Toreador*, for it will be the first issue published with a full-size format.

But more than symbolizing the progress of the student newspaper, it emphasizes the advancement and growth of Texas Technological College, for this newspaper can grow only as Tech grows.

The full-size format is the modern, common style in today's field of newspaper journalism. Tabloid newspapers such as this year's *Toreador* are gradually dying out or switching to the larger size.

Consequently, next year's *Toreador* will furnish journalism students with a greater amount of practical experience which they can apply when they seek employment with the newspapers of this nation.

However, the primary reason for changing to the full-size format is to allow more comprehensive news coverage and better news presentation. Longer, interpretative stories can be used since pages will have more space for news and pictures.

Admittedly, many problems will arise next fall and perhaps some will be reflected in the initial appearance of this newspaper. However,

it must be remembered that perfection is rarely achieved in the pioneer stage—where anything that grows into something worthwhile must begin.

*The Daily Toreador* has kept pace with the physical growth of the college as evidenced by its development from a weekly, then twice a week, then three times a week, then daily, to finally a full-format daily.

Also, this newspaper printed 1,086 pages last year as compared to 1,322 this year in the same number of issues.

This progress emphasizes the university development of this institution and the sophistication and maturation that the student newspaper is achieving. It is also an indication that this development and progress will continue.

It is only fitting that the new size paper will arrive along with what could be a banner year in Tech history. It is also possible that *The Daily Toreador* may have a new name to welcome what could become a new era at Tech.

We hope that this change is viewed as a step forward not only by the journalism department, but by the entire university community.

We have reached the point when we must change to keep up with the times.

## 1966-67 Should Provide Impetus For Big Moves

Editor's note: This is the first of a two-part series on the development and expansion of Texas Tech and just what the campus community can expect to see happen next year and in the near future.

As the year of the ruby in Texas Tech's history comes to a close, all signs point to 1966-67 as the year of development.

The forty years forward which this year served as a good theme for Homecoming could now be the guideline for movement forward for development and improvement which should, according to the calculations of several of Tech's top officials, gain great momentum next year.

By  
**Barbra  
Worley**

Just what can be expected?

A school which sees a predicted enrollment of 19,000 for next fall finds one major field of growth in creating space to put these students, not only in the area of residence space but in classroom and office facilities.

### IMPACT FELT

"We have begun to feel the impact of increased enrollment this year," Vice President for Business Affairs Marshall Pennington said, "and our preparation is picking up so we can at least begin to provide adequate space next fall."

This quickened pace includes the order of 19 temporary surplus buildings which will be open in September for both classrooms and faculty office use—one of the major space shortages now.

Also in the building stages, according to Pennington, are the Foreign Language and Math Building, located to the west of the University Theater, and the south end of the basement and third floor of the library. Both of these projects are "more than 50% done," Pennington said.

Final specifications have been completed for the new Southwest Museum, to be located at 4th and Indiana, and plans for the use of the present museum building are presently being considered from three alternatives: as an administration building to contain the offices of the President and the Vice Presidents and their staffs, or as a classroom and office building or as the site of the law school scheduled to open in 1967.

### MUSEUM STUDY PLANNED

Pennington said the use of the museum building would probably be determined when the results of a feasibility study of the building's engineering needs were complete.

A new business administration building to be located south of Stangel and Mardough dormitories is nearing the final planning and specification stage, a biology building behind the present science building and a new Chemistry building are in preliminary planning stages and addition to the home economics building is also being planned.

The need for expansion of engineering and utility services has prompted the planning of a new power plant to be located somewhere to the southwest of the campus.

All of these buildings come under the classification of educational and general buildings, which means they are supplied through a constitutional building amendment providing a 10 per cent ad valorem building tax.

### PROGRAM TOTALS MILLIONS

The other type of buildings—the ones which are causing a bit more trouble, according to Pennington, are the self-supporting buildings, which include the residence halls, the Texas Tech bookstore and the Tech Union.

The educational and general building program which will be financing the building to be started next year totals approximately \$19.5 million dollars supplied by the constitutional building amendment.

The dormitory building fund, which includes near \$16 million needed, is another story.

Funds for this program must be obtained through a "match loan," Pennington said, explaining, "This means that a sum of, say, \$50,000 loaned us by either the Federal or State government must be matched by us with another \$50,000 from open markets."

### DORM SPACE DUE IN '67

Upon the acquisition of these funds, construction of the high-rise dormitories for men at Flint and 19th will begin, with one-half of the planned residence area hopefully to be completed by 1967 and the second half in 1969.

"All in all," Pennington said, "from all sources of building and planning, we will probably, by 1975, add \$50 million to the value of the school."

"We will keep up this progress," he said, "because we go into it with a spirit that is typically Texas Tech. And with the plans we are now beginning and the continued dedication and support of the faculty and students, there is nothing this school cannot do in the future."

## It's That Time Again

The long, drawn-out election campaigns have finally ended on the Texas Tech campus, and almost everyone is just plain tired of them, at least on the university level.

However, today is election day on a different level—that of the Texas Democratic Primary Election. Candidates are vying for the Democratic Party's nomination in the Nov. 8 general election, but for all practical purposes Texas' new state officials will be elected today.

The statewide campaign has drawn little interest, with most of the excitement being on the local level. Consequently, an extremely light voter turnout has been predicted.

Many persons at Tech are eligible to vote in this election. We would hope that they do so, remembering that the necessity of democracy is to vote.

## LETTERS TO THE EDITOR

### Says Frosh Muddled

Dear Editor,

I noticed a poster yesterday which read, "Splendor in the Mud," all school dance sponsored by Freshman Council. Now really only a dumb freshman could conceive of such a dance.

I know some schools (Michigan State, Cornell, etc.) have various spring festivities such as beer can stacking contests or bed racing marathons, but a "mud-dance?" (I have been told there is going to be only damp dirt) a lot of schools get national publicity by such practices, but this is not for Tech.

Even though it might be fun, the clown should have known the students, especially the coeds wouldn't accept such a dance. Coeds would much rather be in some nice, clean parked car than at a "dirt" dance.

The Sunday evening 6-8:30 time for this fiasco rally really shows the stupidity of this freshman. Every Tech student is going to church on Sunday night, like they do every Sunday. Sacrelig! Sacrelig! This heretic must be burned!; but have mercy for his is only a dumb freshman.

Thank you,  
 Everett Urech  
 a dumb, stupid, sacreligious  
 and "well-done" freshman

### Has 'Horsey' Comment

Dear Editor,

May I congratulate you on reporting the horse barn move in the Thursday 5 May edition under the banner, "Facilities Moving to New Quarters." It illustrates so well the traditional emphasis of our "technological college"—progress.

Certainly the move of 23 horses from their smelly occupancy of real estate in the middle of the campus is far more important than the construction of a new business building on that "horsey" site for the third largest undergraduate student body of any school of business in the United States.

Perhaps in a forthcoming issue you will be able to report that the buggies have gone along with the horses.

It is exciting to read about Tech's forward motion toward the twentieth century.

Yours truly,

James A. Watkins

Instructor

School of Business Administration

'H2O-A-Go-Go'

Swimming Exhibit Set

Intricate routines, beautiful costumes and lots of spectacle will be the order of the evening May 10 when students of Texas Tech's Women's Physical Education Department and Dolphins, mens' swimming fraternity, stage "H2O-A-GO-GO," synchronized swimming show and diving exhibition, in the Tech pool.

Mrs. Anne Simmons, assistant professor of health, physical education and recreation for women who directs the show, said the one-hour performance would begin at 8 p.m.

The cast will include 29 coeds and 30 Dolphin members who are coached by Jim McNally.

A star attraction will be guest performers Jo Ann Glauberg and Jan Bechannan of San Antonio College who have competed in the National AAU synchronized swimming competition. Their routine is entitled "Night of the 13th Moon."

Two modern dance sequences will be performed at poolside under the direction of Assistant Pro-

fessor Peggy Williams. Assistant Professor Margot Jurdy will direct the clown divers, and Tech's varsity divers will give an exhibition. The public is invited and admission is free. The pool is located in the Mens' Gymnasium near the intersection of 6th and Boston.

H2O A GO-GO CAST—Pausing for a break between practice sessions are part of the cast which will stage "H2O A GO-GO," a synchronized swimming show and diving exhibition at 8 p.m. Tuesday in the Texas Tech pool. Performers include students of Tech's Physical Education Department and the Dolphins, mens' swimming fraternity. Shown here (on diving board) from left are Sandy Timm of Dallas, Vicki White of Lubbock and Pat Griffith. In the water is Jeanne Afflect of Waco and (counterclockwise behind her) Irene Ruehle of Lubbock, Flo Miller, Linda Black of Fort Worth and Carole Lawrence. (Tech Photo)

Other travelers checks are every bit as good as First National City Bank's

...until you lose them!

When you go where the fun is, don't bring losable cash. Bring First National City Travelers checks. You can cash them all over the U.S. and abroad. But their big advantage is a faster refund system. See below.

Other leading travelers checks, like First National City travelers checks, can be cashed all over the world.

But if you think all travelers checks are alike, you may be in for a rude shock if you should lose your checks.

With other leading travelers checks, elaborate and time-consuming inquiries often have to be made. It may be days—even weeks—before you get your money back. Who wants to wait?

But, if you lose First National City travelers

checks, you don't have to worry. There are more than 20,000 places around the world authorized to give you a fast refund—right on the spot!

First National City travelers checks come from the leader in world-wide banking, and have been in use over 60 years. They are known and accepted in more than a million shops, hotels, restaurants, air terminals, etc., the world over.

Next time you travel, insist on First National City travelers checks.

They cost just one cent per dollar.

First National City Bank Travelers Checks

Sold by banks everywhere

## ROTC Selects Honor Cadets

Seventeen outstanding Air Force ROTC cadets were honored at Texas Tech's department of aerospace studies annual Spring Awards ceremony April 28.

Winston King received the President's Award presented by Dr. R. C. Goodwin to the outstanding Professional Officer Corps cadet for academic achievement and contributions to student life. King is cadet wing executive officer, a member of Arnold Air Society and Kappa Alpha Order. He is the son of Mr. and Mrs. Howard Squires of El Paso.

Robert Vacker received the Professor of Aerospace Studies Leadership Award from AFROTC Commander Lt. Col. Henry L. Gantz Jr. for leadership within the cadet wing. Cadet Vacker is the son of Mr. and Mrs. Willie Vacker, Seymour.

The Air Force Association Award went to Michael G. Gurley of Marlin and the AFROTC Dynamics Award to Charles Edward Burton of Comfort.

John N. Turquette of Lubbock received the Air Force Times Award. Service Medal and Michael William Starch of Ralls was awarded the Chicago Tribune Gold Leadership Medal.

**THE OLD AND THE NEW** — D. M. McElroy, Director of Texas Tech's educational television station KTXT-TV, is flanked (left) with one of the two new 4½-inch image Orthicon cameras recently acquired by the station and (right) one of the old Vidicon cameras. The new cameras are equipped with zoom lens and weigh 200 pounds. The station will cease operation May 16 until the fall to undergo extensive renovations made possible by a federal grant.

## TV Station Awarded New Equipment Gift

KTXT-TV, Texas Tech's educational television station, has received a \$173,191 federal grant to be used for the purchase of new television equipment.

D. M. McElroy, director of the station, said the complete project will cost in excess of \$235,000 with donations and college funds making up the deficit.

McElroy said two RCA image orthicon cameras have already been received and the station's second video tape recorder is on the way. The studio cameras are equipped with zoom lenses which make possible the increase of a picture 10 times.

The station will also have a new six-kilowatt transmitter to take the place of the 500-watt transmitter now in use. This will increase the viewing radius from 20 to 50 miles.

With the radius increase, McElroy hopes that sometime in the near future a cooperation with the Lubbock Public School System will be achieved which would make possible the extension of the station's educational services to about 80,000 public school students. If this is done, the college work will be done by closed circuit. Another federal grant of \$19,000 will be used for this purpose.

Other expenses include a \$15,000 film camera chain and the construction of a transmitter-projection room to be added to the present building.

## Kappa Sig Dance Tonight

The Chessmen, reported to be the best band at the University of Texas round up, will play for the pajama dance tonight.

The dance is sponsored by Kappa Sigma Fraternity and will be in Fair Park Coliseum from 8 p.m. to midnight.

The Chessmen are from Dallas as are the Chants, who will play during the two intermissions.

## Tech Graduates Aided By Placement Service

The Tech Placement Service working with the College Placement Council will provide increased services to the Tech graduate next year.

The new system called GRAD

(graduate resume and accumulation and distribution) through electronic data processing will be able to scan qualifications of alumni on a nationwide basis and find broader jobs at a nominal cost to alumni.

This system will be an instrument where the placement director remains responsive to his agency and where placement service effectiveness will be improved. It will allow more time for personalized placement and recruitment.

Requirements for graduates to be served by GRAD are that he have at least a four-year degree from an accredited college or university whose placement service belongs to a Regional College Placement Service and that he has had one year of work experience following completion of his latest degree. The armed service or the Peace Corps also fulfill this requirement.

To participate, an alumnus needs to apply through his placement service and obtain the endorsement of that office on his GRAD system resume form.

Each student entering the system will be required to pay a \$10 registration fee which is paid to the council. After payment of this fee, the student remains active in this program for six months.

Following completion of the above steps, the GRAD Data Center extracts a major job title and 20 selectors from the resume and stores them in an electronic file for immediate retrieval.

The employer searches the electronic file and orders copies of the resume that he is interested in and that meet his specifications.

# U. S. Nuclear Bombers Cut Back

WASHINGTON (AP) The five-year-old program of around-the-clock flights of nuclear-armed B52 bombers is being cut back, it was learned Friday.

Not since these deterrent flights were begun in 1961 has it been disclosed how many of the deadly aircraft were kept in the air constantly so they could retaliate swiftly against any surprise nuclear attack. Nor is it known how many will be kept aloft under the new, curtailed program.

Secretary of Defense Robert S. McNamara disclosed his thinking on the airborne alert earlier this year when he testified in secret before a House Appropriations Committee that the full-scale alert no longer is needed.

### Reasons Given

McNamara said this is so because:

—The U.S. radar system now is good enough so the bombers can be sent into the sky before they can be destroyed on the ground by enemy missiles.

—“The declining importance of bombers in relation to missiles” makes the large-scale continuous airborne alerts unnecessary.

When the alert was implemented at a time of deep concern over a possible surprise nuclear attack, the United States had in place only half a dozen intercontinental mis-

siles and had only three Polaris missile-firing submarines in operation—so the bomber forces was the main nuclear deterrent and destruction of even a substantial part of it on the ground would have been catastrophic.

### ICBMs Ready

Now the United States has some 900 ICBMs in place in protected launching facilities and counts 36 Polaris submarines packing another 575 missiles which can be fired from beneath the sea.

McNamara indicated to the committee that the joint Chiefs of Staff opposed complete elimination of the airborne alert.

“I replied that they could carry out whatever airborne alert was consistent with the regular train-

ing program and would not require additional funds,” he said.

The airborne alert has been costing \$103.9 million a year, according to Pentagon sources, and this could be scaled down \$63.6 million under a reduced operation.

These sources said about 75 bombers—roughly one-eighth of the 600-plane force—is earmarked for airborne alert duty on short notice and this is likely to continue.

In addition, these sources said, about half the bomber force will continue to be held on what's called airstrip alert, ready to take off on 15 minutes' warning—well within the 30-minute warning time the new radar is counted on to give if enemy missiles are launched.

**TECH WEIGHTMAN**—Ed Mooney, holder of school records in the shotput and discus, practices on his form. Mooney has hurled the iron ball 57'4 1/4" and has thrown the disk 175'1 1/2" and is expected to finish second behind the A&M giant Randy Matson in both events at the SWC meet today in Austin.

## Man Recalls 69 Kentucky Derbies

(AP)—The 92-year-old Kentucky Derby may be the top horse in the racing world but its most dedicated fan remembers when the classic was a wobbly-legged colt. Harry L. Waggener, who will be 84 next month, has attended every Derby since 1894, when the winner got only \$4,000.

“The Derby didn't amount to much in those days,” the erect and alert gray-haired Louisville resident recalls. “Why they would even run it on weekdays. And there would be only three or four horses entered.”

This coming Saturday possibly up to 17 colts will compete for a \$125,000 purse. And, Waggener will be a guest of Churchill Downs for his faithfulness through the years.

At his very first race, the 12-year-old Waggener picked the winner, Chant. Presed for details as to how many winners he has picked in the 72 derbies he has attended, Waggener paused to skim through a record book. The total, somewhat to his surprise, turned out to be 28.

He takes special pleasure in the number of long-shots he has picked, including one at 20-to-1 and several at 8-to-1.

Foremost among these was 1953 when Native Dancer had set the racing world agog. Waggener not only predicted that Native Dancer would lose, he bet on the winner, Dark Star, who paid \$50.

“I like to pick a horse in the fall,” he says, “and then follow

him through to the Derby. Of course a lot can happen between fall and May. For instance, my horse of last fall, Father's Image, isn't even in the Derby.”

Waggener hasn't decided on which entry he'll bet this year but says it will either be Kauai King, Abe's Hope or Tragniew.

Horse racing is the only sport for Waggener.

“I wouldn't look out the back window at a baseball game,” he says.

The Louisville racing season is only three weeks long, however, so on year he tried to take up baseball—and even went to one game. He fell asleep.

## JOIN THE "GRETSCH SET" For the Authentic Sound of the Times

The Gretsch Folk Guitar is the hands-down favorite on campus and at folk festivals. For Gretsch gives you the rich, resonant bass and the clear singing highs that only come from the work of skilled guitar makers.

At Gretsch we work with aged woods carefully chosen for mellow resonance. Seasoned rosewood is used for fingerboards, molded to specially contoured Action-flo necks to make fingering fast and easy.

Magnificent sound... a wider world of music... is yours when you join the Gretsch Set.
