NUMBER 92

## Student opinion sampler

TOMMY WILKINS, senior marketing major from Amarillo...

"I think that the parking violation procedure used by the Traffic Security office is an elusive action towards the students of this campus. Tech has a parking problem and I think that something should be done about it with the money received from parking violations.

"I'm sure that there are several good uses for this money but as far as parking improvement there is no evidence of any. "We, as students, should not have to have such a heavy penalty for parking that has been put on us for two reasons. The first being that it is ridiculous to have to suffer a high fine just for parking violations such as Tech enforces. Secondly, the parking facilities are insufficient and it is not fair that the students are the ones to suffer the consequences.

RONNY RAMSEY, junior government student from Houston...

"There has to be a semblance of order on the campus because if this was an open campus and traffic tickets were not given, people would take advantage of this as a result.

"Although I don't always agree with some of the regulations, I feel that the rules must be followed.

"However, when it comes to giving tickets at 1:30 a.m. for being "double-parked" in a dormitory parking lot, I cannot agree with this action. Therefore, I feel that there should be designated times when parking tickets can be given. There seems to be no specific time or area pattern in which tickets are given. For example, I have noticed that some areas are patrolled more frequently and on closer intervals than others."

LYNN COX, senior English major from Ozona...

"I feel that the Traffic Security is justified in many of their policies. However, I cannot agree with all of their actions.

"One of the most damaging aspects of the parking on the Tech campus is the distribution of many more parking stickers than there parking spaces. To remedy this grave problem, I feel some of the dirt lots surrounding the campus should be turned into paved parking lots. Although it is quite scenic to have grass areas surrounding dormitories, I feel that portions of this ground should also be turned into more parking areas. Tech is a growing campus, adorned with construction sites on every corner but the only thing not growing with the increased enrollment, buildings and departments, are the parking lots.

"I also do not think that the traffic tickets should increase with the number of offenses.

## Barnett kills housing rumor

Rumors have been flying about the campus recently about campus housing policies. Many of the rumors indicate the board has to approve the action by the administration, but will not do so for some time.

Dr. Glenn Barnett, executive vice president, said Thursday the board does not have to approve the actions — only review them.

"The board has already reviewed the regulations and they are in effect," Barnett said.

Lewis N. Jones, dean of student life, said no one has informed him the board has reviewed the regulations. He said he has been waiting since May 1 to start work on letting persons off campus.

The regulations are:  
— a student is living in the home of parents, a brother, a sister, grandparents, an uncle, an aunt, a father-in-law or a mother-in-law.

— a student is 21 years of age or over on or before Sept. 1, 1969.

— a student has completed 96 or more

hours of academic credit prior to the beginning of the 1969 fall semester.

— a student has served at least one and one-half years in the military service as verified by a discharge certificate.

— a student has a health problem which precludes living in the residence halls, as verified by the Student Health Service.

— a student presents evidence of extreme hardship, including requirements for employment.

The regulations were the recommendations of a committee composed of students and representatives of the Administration.

Dr. Grover E. Murray, Tech president, said after announcing the new policies April 30 that approximately 500 students might want to vacate the dorms at that time which would mean a net loss of about \$200,000 to the dormitory system.

He said this estimate included students transferring into Tech.

## First repertory drama unfolds tonight in Theater

The curtain goes up at 8:15 tonight on "The Night of the Iguana," the first of three dramatic presentations which Tech's Summer Repertory Players will bring to the stage of University Theatre.

Also slated for alternating performances during the 11-day season ending July 7 are Dylan Thomas' poetic and

earthy epic, "Under Milk Wood," and the international musical hit, "Stop the World—I Want To Get Off."

Tickets to individual performances are \$2 for the general public and \$1 for students. Season tickets are \$5.

Reservations may be made by calling the University Theater box office at 742-2153, according to Ronald Schulz, Theater director.

"Night of the Iguana," Tennessee Williams' outspoken drama of physical and spiritual love, will be shown tonight, Monday and Thursday nights at 8:15 p.m. and July 6 at 3 p.m.

In "Under Milk Wood," Thomas conjures up a multitude of characters and experiences as he presents a day in the life of a Welsh fishing village, told in a series of vignettes linked by who is really Thomas himself.

In the University Theater's version, slides and films featuring members of the student cast, will be projected to augment the action and set the mood of the various scenes.

"Stop the World" combines such songs as "What Kind of Fool Am I?" and "Once in a Lifetime" with the story of Littlechap and his success with women. It will unfold Sunday, Wednesday, Saturday and July 7 at 8:15 p.m.

Performances will be at 8:15 p.m. Saturday, Tuesday, July 4 and July 6.

## Play tryouts begin Tuesday

Tryouts for the Southwest premiere of "Celebration," a new musical with words by Tom Jones and music by Harvey Schmidt, will be conducted Tuesday, Wednesday and Thursday in University Theater from 2-5 p.m.

The production, scheduled for Aug. 15-17 and Aug. 28-Sept. 2, calls for seven women and nine men characters.

Auditioners should bring two prepared songs with them to the tryouts, where an accompanist will be provided. Scripts are available for an overnight check-out in the box office.

The music director for the production is Ron Williams, the choreographer Janet Watson. The musical is being directed by Charles Kerr.

CELEBRATES FOURTH — Melissa Sellmeyer, advertising sophomore from Lubbock, gets ready to celebrate the Fourth of July with traditional Independence Day fireworks. (Staff photo by Richard Mays)

## Staff, users discuss projected updating of computer services

The Computer Center scheduled the first meeting for its users Wednesday in an effort to determine their needs and goals in a projected five-year updating of the present system.

"The Computer Center is running 24 hours a day, seven days a week, and even with this kind of effort the current equipment is not able to provide enough service for the campus," Ron Brown, associate director of the Center said.

The present system operates three computers, IBM 360 Model 50, IBM 1401 and CDC 1604, for the service of the entire campus, administration, faculty, and students.

PRIMARY JOBS involve students: course homework, research, payroll, registration, grade reports and student records.

"Not all departments use the Center at the present time, but probably all could make valuable use of the computers. By educating them they may in-

corporate it into their jobs," Brown said.

Five computer manufacturers are giving formal presentations until July 14 on the limitations and capabilities of their equipment for the users and computer staff to compare with Tech's needs.

After the presentations, the staff and users will meet July 17 to discuss their impressions and any further action needed before the Computer Center Committee presents its final program for the next five years.

THE COMMITTEE hopes to have its recommendations for the "higher level administration" by Sept. 1 to be able to include it in the budget submitted to the state legislature.

"We need an idea of the most needed desires now in order to determine where to cut down in case funds will not be available," Brown said.

Future considerations will not only

include a projected increased enrollment and expanded needs of departments, but even such things as the needs of Tech's new medical school.

A COMMITMENT of computer deadlines must meet those reported by the college catalog for grade reports and student records, Dr. Floyd Boze, director of the admissions department, said at the meeting.

The users also discussed efficiency programs innovations in programming, and which jobs were the most important to run.

"The ideal situation for a priority system would have rules already set up by a higher administration to determine whose program would run through the computer first.

"That way the Center wouldn't be faced with deciding whether the biology department's or the history department's jobs have first priority," he said.

'Night of the Iguana'

'Stop the World—I Want To Get Off'

# Area mementos housed in Tech's Southwest Collection

By PAGE CALHOUN  
Managing Editor

in," said Roy S. Dunn, director of the collection.

Glimpse the history of the Southwest, a relatively young area, but rich in folklore, cattle ranching, oil, pioneer families and rattle snakes.

The original documents, letters, ledgers and maps from Austin to Death Valley, Calif., by the people who settled this area are being collected at Tech's Southwest Collection.

"We want the history of the area, and it doesn't matter if the material concerns an insignificant person or an event unrecorded in history. It's the people and a feel of life in any era that we're interested

THE COLLECTION, a separate department at Tech, began in 1955, and has expanded to over 3 million leaves, 400 collections of family and town records, 1,000 maps, 300 tapes or oral history, and 1250 reels of microfilm.

As knowledge of the "repository for Southwest history" expands, the store of information has increased. "This summer has been one of our biggest booms of information," Dunn said.

"One of the biggest handicaps is that many people think

their things wouldn't belong or be of interest.

"WE HAVE field workers usually old friends of the university, who live in the area, know the people and can constantly be alert for pertinent information. They go and talk to the old settlers, and seek out the old records which enrich the Collection," Dunn said.

"Another largely untapped resource are the students at Tech who could locate these old records in their hometowns but are ignorant of the Southwest Collection," Dunn said.

The Collection occupies four levels and the basement of the Social Science Building filled

with books and boxes of information. The display case outside room 101 of the Social Science Building only hints at the wealth of newspaper clippings, artifacts, photographs and books stored inside.

Every phase of the Southwest Collection overlaps in a continually growing picture of the history of the Southwest, Dunn said. A collection from one source leads to information about other sources. The historical relates the sociological and economical.

"We're interested not only in just the history and products of this area, but the subjects relating to those topics. For instance, the southwest cot-

**SORTING LETTERS**—Elizabeth Chapman, Lubbock senior, sorts old letters from the Graham contribution to the Southwest Collection. (Staff photo by Richard Mays)

ton industry and development and publishing finding aids and serving the public.

Once the material is brought to the Southwest Collection, the processing involves inventory, sorting, counting, listing, boxing and shelving.

The Collection serves one of its main functions as a research center for graduate and some undergraduate students. Original documents are invaluable to these and research papers, according to Dunn.

"Some of the information is published and cataloged in the Library of Congress. You can understand the years of research saved by finding a list of information categorized and

their locations given. By writing each of the different pertinent addresses, the researcher gets original information that might have required years to travel to locate," Dunn said.

Opinions expressed in The University Daily are those of the editor or of the writer of the article and are not necessarily those of the college administration or of the Board of Regents.

The University Daily, a student newspaper at Texas Technological College at Lubbock, Texas is published by Student Publications, Journalism Building, Texas Technological College, Lubbock, Texas 79409. The University Daily is published daily except Sundays and Mondays during the long terms, September through May, and weekly (every Friday) during the summer session, June through August, except during review and examination periods and school vacations. ## Option seats in stadium now available at half price

Tech football fans may now purchase the remaining option area seats in Jones Stadium at one half the original price, according to Mrs. Ruth Sturtz, Tech ticket manager.

The option seats, originally selling for \$300, \$200, and \$100, may be purchased for \$150, \$100, and \$50. Remaining press box options, formerly selling for \$1,250, may be bought for \$625.

Mrs. Sturtz pointed out that since only six years remain on the original 15-year Tech option plan, the Tech Board

has authorized the Athletic Department to sell the remaining options at half price.

Four regulations, established in the original option plan, will remain in effect, Mrs. Sturtz said. They include:

— All options will expire 14 days prior to the first varsity football game of 1975;

— Option purchases may be paid for over a three-year period;

— All payments of option purchases are paid to the Tech Foundation and are tax deductible;

— Surcharge payments paid the year prior to the purchase of an option can be credited to the price of the option if the option is purchased prior to July of the following year.

The options are available now at the Tech ticket office located at Jones Stadium, 6th and Akron. The office is open from 8 a.m. until 5 p.m. Monday through Friday.

## Prof leading workshop

Associate Dean John C. Gilliam of Tech's School of Business Administration arrived in Gunnison, Colo., Monday to conduct the 16th annual Business Education Workshop for Western State College of Colorado.

Gilliam also is the chief consultant for the workshop on "Current Issues in Business." The sessions will continue through Thursday.

## Raider Roundup

Doctoral Degrees

Harry Gene Newton will take the final oral examination for his Doctor of Education Monday at 2 p.m. in room 208 of the Tech Union.

David B. Brown will take the final oral examination for his Doctor of Philosophy Monday at 3 p.m. in room 101 of the Industrial Engineering Building.

Roger Terry King will take the final oral examination for his Doctor of Business Administration Tuesday at 3 p.m. in room 208 of the Tech Union.

Clifford A. Hardy Jr. will take the final oral examination for his Doctor of Education July 7 at 2:30 p.m. in room 205 of the Tech Union.

John Randall Wilbanks will take the final oral examination for his Doctor of Philosophy July 12 at 9 a.m. in room 120 of the Science Building.

## High school, junior college teachers to attend workshop

Twenty high school and junior college journalism teachers from across the nation will attend the fifth annual Photo-journalism Workshop July 13-26 at Tech.

The 20 will receive grants from the Newspaper Fund, Inc., of the Wall Street Journal.

Ralph Sellmeyer, professor of journalism, is in charge of the workshop, the only one of its kind financed by the Newspaper Fund.

Among participants will be Miss Elizabeth Hurley of Pampa and Mrs. Lynda Wade of Brownfield.

Also taking part will be James H. Beistle of Unity High School, Milltown, Wis.; Mrs. Sammy Bynum, Sealy, Texas; Willard S. Campbell, Camden, Ark.; Sister Desales Arndorfer, Marquette High School, Bellevue, Iowa; Mrs. Rachel Dick, Heppner, Oregon.

Roy Garvin Jr., Shelby, Ohio;

Mrs. Gertrude C. Guyette, Fullerton, Calif.; R. Rex Jackson, Evangel College, Springfield, Mo.; Sister Mary Josette, Notre Dame Academy, Covington, Ky.; Mrs. Mary Jewel Ledbetter, Riggs High School, Pierre, S.D.; Mrs. Mary McConnel, Academy High School, Erie, Pa.  
Mrs. Grace Moore, James Bowie School, Simms, Tex.; Miss Carol Rapoport, Tuley High School, Chicago, Ill.; Mrs. Annie Soo, El Cerrito, Calif.; Sister Ann Therese Syron, St. Cyril High School, Detroit, Mich.; Miss Louanne Ward, John Marshall High School, Okla. City, Okla.; Mrs. Mary L. Williams, Copperas Cove, Tex.; and Glenn R. York, Sierra Vista High School, Baldwin Park, Calif.

## Into works of James Joyce

# Volume offers new insights

New insight into the works of one of the world's most controversial authors is available with this month's publication of "James Joyce: His Place in World Literature" by Tech Press.

The 115-page volume containing papers presented at Tech's Joyce Symposium in February was edited by Dr. W. T. Zyla of the university's department of Germanic and Slavonic languages.

Zyla is chairman of the Interdepartmental Committee on Comparative Literature which sponsored the two-day series of lectures, panel discussions and seminars concerning the Irish author.

Thomas F. Staley of the University of Tulsa and editor of "The James Joyce Quarterly" who spoke on "Ulysses" and "World Literature," and Dr. William J. Handy of the University of Oregon whose topic was "Criticism of Joyce's Works: A Formalist Approach."

The cover and sectional divisions of the book are illustrated by Tech Art Professor Rodrick Parkinson's original sketches of Joyce.

## Law's moot court team to compete at convention

The Law School's Appellate Advocacy (moot court) team will compete with teams from other law schools in Texas at the State Bar Convention Wednesday through Friday at Fort Worth.

The competition is sponsored annually by the State Junior Bar.

Members of the team are Jess H. Hall Jr. of Lubbock and Jeffrey Wentworth of Amarillo, first year law students; and William G. Shaw of Brownwood, second year student.

Hall is a graduate of David Lipscomb College, Nashville, Tenn., and minister of the Greenlawn Church of Christ. Wentworth and Shaw are graduates of Texas A&M University. Wentworth formerly was congressional aide to Congressman Bob Price of Amarillo and is vice president-elect of the Student Bar Association.

C. Tom Reese, professor of law and faculty adviser to the team, said the competition essentially entails the writing of a brief and the argument of a hypothetical case before judges, with the finals being argued before the Court of Criminal Appeals.

The problem is conducted in the same manner as an actual case.

This year the problem is based upon a criminal law hypothetical case and involves the receiving and concealing of stolen goods, the defendant's right to confrontation as guaranteed by the Sixth Amendment of the United States Constitu-

tion and the defendant's privilege against self-incrimination as guaranteed under the Fifth Amendment.

"The two prior teams which the Tech School of Law has entered have performed very satisfactorily," Reese said, "and this year's team is expected to do equally as well or better."

Among the distinguished Joyce scholars represented are the Rev. William T. Noon, S.J., of Le Moyne College who presented a paper on "The Religious Position of James Joyce," Dr. Dounia Bunis Christiana of Wisconsin State University at Eau Claire, who discussed "The Polyglot Poetry of 'Finnegans Wake,'" Dr.

# LSU prof to head Research Farm

Dr. R. Hollis Klett of the animal science department at Louisiana State University (LSU) has been named superintendent of the Tech Research Farm and the Killgore Beef Cattle Center at Pantex.

Dean of Agricultural Sciences Gerald W. Thomas announced Monday that Klett will assume duties at the research farm Sept. 1, succeeding Dr. Dale Furr who resigned to enter private industry as a nutritionist and part owner of a livestock producing and feeding firm in the Friona-Hereford area. Furr will continue as a consultant for Tech.

As superintendent of the research farm and Killgore Center Klett will be in charge of

operations on the some 14,000 acres of grass and cultivated land and the research cattle projects.

KLETT WILL take to his new position a background of industrial operations, research and teaching.

He is completing teaching and research work at LSU this summer before moving to the superintendency of the Research Farm northeast of Amarillo.

"We are very fortunate to obtain the services of an educator and researcher such as Klett as we continue to expand our research into solutions of problems of the rapidly growing feedlot industry in this area which this year will handle 2.5

million head of cattle," Thomas said.

KLETT SAID, "I am glad to get an opportunity to come to the Panhandle-South Plains area where there is tremendous growth in the cattle feeding industry."

"I am pleased with the program at Tech and particularly with the location of the research farm in the Panhandle in the midst of the explosion of the feeding industry."

"I am looking forward to working with feeders, and I hope they will give us suggestions of the things we can do to help them increase performance of cattle in the feedlots and make a contribution to the overall increase in livestock production."

"Klett and co-workers at LSU this last year produced a 180 per cent calf crop from 20 head of cattle," Thomas said, "by the use of hormones to obtain multiple births."

"HIS PRIMARY interest is in nutrition and the feedlot industry."

Klett, a 1954 graduate of Menard High School, attended Tarleton State College in 1954-55 and San Angelo College in 1955-56, received his bachelor of science degree from Texas A&M in 1958 and his master's from the same institution in 1963.

His doctorate came from Oregon State University in 1966. KLETT JOINED the faculty at

LSU in July of 1966 where he has taught at both the undergraduate and graduate levels.

His professional experience includes management from 1958 to 1961 of the Dixon Polled Hereford ranch at Vaughn, Miss., where he was in charge of all breeding, feeding and management of a 200-cow herd.

Klett's research activities have been in several fields of nutrition. He has been cooperating with Dr. Wayne White at the Rice Experiment Station at Crowley, La. Work conducted in those studies deals with forage utilization, roughage levels in feedlot rations, and basic rumen characteristics as related to types of rations.

UNDER MILK WOOD—Organ Morgan, the musician (Phil Weyland) continues to play while his wife (Evelyn Kay Jones) regales him with gossip in a scene from "Under Milk Wood." The play will be presented Saturday, July 4, and Tuesday, July 6.

## Chemists to honor Dr. Dennis

Chemistry faculty members will honor Dr. Joe Dennis with a dinner and reception in July to mark his resignation as department head.

Dennis, who has held the position for 19 years, will continue as a professor when his duties officially terminate at the end of this summer session.

The dinner honoring Dennis will be at the Tech Faculty Club July 12, and the reception will be July 13 in the Union Ballroom from 3 to 5 p.m. During the reception the faculty will present him with a portrait painted by Mrs. Thelma Clark Griggs, a Lubbock artist.

Dr. Lorrin Kenamer, Dean of Arts and Sciences, said the announcement concerning filling the position vacated by Dennis will be made "very soon this summer."

His career as chairman of the chemistry department has spanned a period of growth for the department. Dennis recalled the highlights of his career as department head including "our approval by the American Chemical Society for undergraduate training of chemistry in 1956, the first big research grant the school ever got—the Air Force Office of Scientific Research—\$209,000 and the gift of \$1 million from the Welch Foundation.

Dennis received his BA in Chemistry from Austin College and his MA in Biochemistry at the University of Texas where he also received his Ph.D. in Biochemistry by 1942. At Austin College, he was president of the Davis Foute Eagleton Chapter of the Scholarship Societies of the South which was a fore-runner of Alpha Chi. In 1964, he received an honorary Doctor of Science from Austin College.

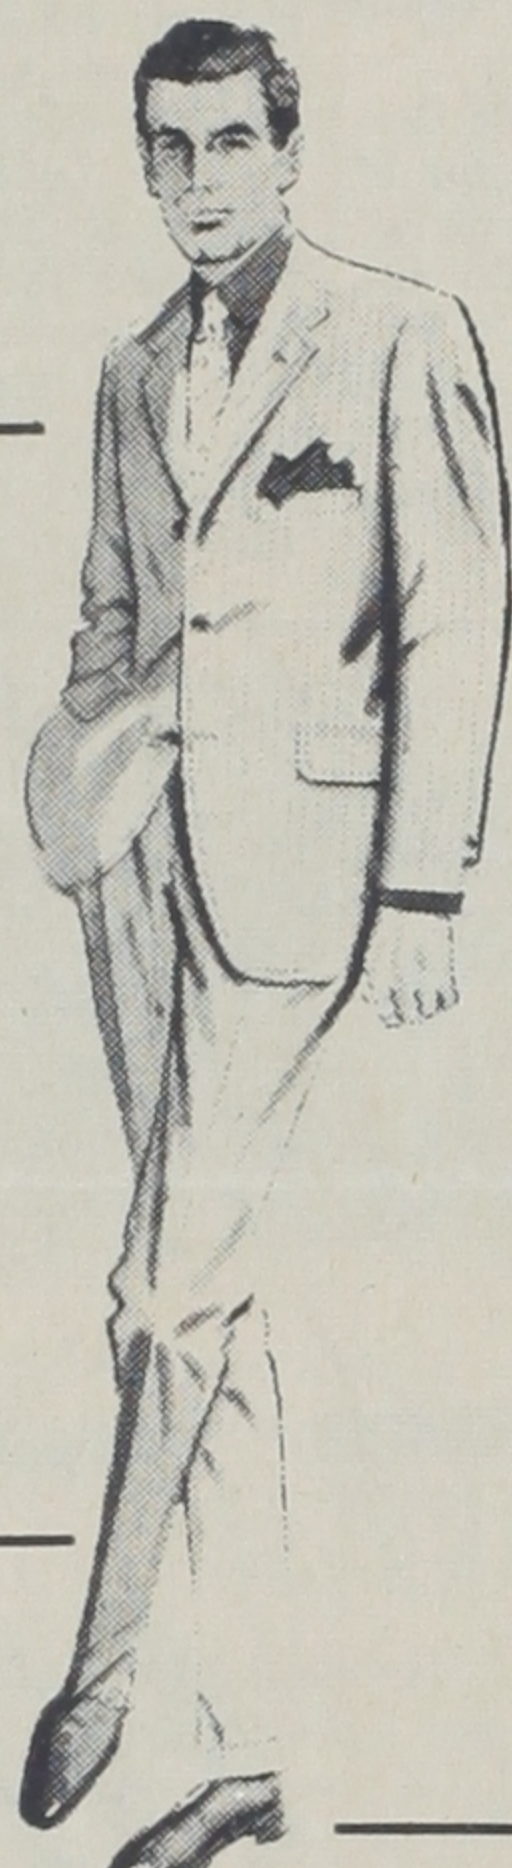

He is a member of the national American Chemical Society and he has been named to Who's Who.

**Choose a Jeweler...**

as carefully as you choose a gem!

May we again remind you that we are Lubbock's Oldest and Finest Jewelers, now in our 46th year; that we are completely owned and operated by the founder and his family, ever jealously on guard of our reputation for honest, conscientious service and customer satisfaction.

When it comes to diamonds, you'll want to choose with confidence...and give with pride. Seems only sensible to let an established authority help you choose. That's what we are...authorities. Knowing diamonds is our business. We can help you buy to the best advantage - in price, in quality, in pride of possession.

30-90 Day Charge or 12 Month Budget
