

'67 annual dedicated to Ag Dean Gerald Thomas

La Ventana co-editors Charlotte Shive and Nancy Hedleston dedicated this year's annual to Gerald W. Thomas, dean of Agriculture Wednesday in his office at 1 p.m.

"EACH YEAR the La Ventana staff selects an individual who has made significant contributions to Texas Tech and honors that person," said Nancy Hedleston at the dedication ceremony. "It is because of your many contributions and many services to Texas Tech that we dedicate the 1967 La Ventana to you."

"Dean Thomas, since 1958, you have served Texas Tech as dean of the School of Agriculture," added Charlotte Shive. "During this time you have brought recognition to the university through your outstanding leadership, publications and special assignments. In addition to your duties in the School of Agriculture, you have also found time for service in other areas of the campus such as being general chairman of the Presidential Inauguration."

The Idaho-born Thomas came to Tech four years after he received his Ph.D. from Texas A&M University in the field of range management.

THE FORMER navy pilot took over the agriculture reins and expanded the

department's programs to meet the challenging demands of today's agricultural needs.

According to the National Association of State Universities and Land-Grant Colleges, Tech is now listed ninth in the nation in the number of undergraduates enrolled in agricultural education. Another evidence of the school's growth and maturity is indicated by the increasing involvement of faculty members in foreign assignments.

Thomas himself has had special assignments in Italy, Greece, Mexico, and Africa. He has also worked with the United States Department of Agriculture in Washington, D.C.

TECH'S MODERN agriculture facilities include capacity for 1,100 head of beef cattle, 150 milk cows and dairy calves, and a poultry center for 2,500 layers and broilers. There also is a modern laboratory and new horse facilities.

In narcotics case DPS refuses polygraph for three accused men

By JIM WEST
Copy Editor

Lubbock attorney Mark Smith continued his efforts Wednesday to obtain a Department of Public Safety polygraph test for three Lubbock youths—two of them Tech students—accused of marijuana possession.

LUBBOCK REGIONAL headquarters for the DPS Tuesday refused to administer the examinations.

Smith seeks lie-detector tests for Charles Hatley Jr., 19, and Techsams Walter Marlin, 22, and Bill Rider, 22, all of 2617 20th St. They, along with two other Tech students, were named in narcotics charges filed Monday by Dist. Atty. Alton Griffin.

Smith said he had telephoned four state officials, asking them to persuade Col. Homer Garrison, head of the DPS, to authorize the tests. Contacted were Lt. Gov. Preston Smith, Atty. Gen. Crawford Martin, Rep. Delwin Jones of Lubbock and Rep. Ben Atwell of Dallas.

"A CITIZEN should be allowed to use the full facilities of the State of Texas to aid his defense against charges as serious as these," Smith said.

Capt. James L. Miller of Lubbock, acting regional commander for the DPS, refused to allow the tests on the grounds that DPS facilities are available only to law enforcement agencies.

"If this request were made by a police agency we would do it," Miller said, "but it's impossible to run tests for ordinary citizens. Our facilities are provided for police, not citizens."

"THIS IS A city case, and we're not involved in it. We don't intrude into the business of other police agencies unless we're asked to help."

Also charged in connection with a Lubbock police raid early Sunday morning at the 20th St. residence were Tech students David Reece, 21, of 319 62nd St. and Charles Sanders, 19, of 2123 13th St.

All five pleaded innocent Monday before Justice of the Peace George H. McCleskey. Reece and Sanders were released on \$1,500 bond each, and Hatley, Marlin and Rider were released to the custody of attorney Smith.

THE ACCUSED face action before a grand jury due to convene early next month.

Police said they found two penny match boxes containing marijuana in the pockets of Sanders and Reece.

Assistant Dist. Atty. Tom Purdom said the three others were charged in the case because they rent the 20th St. house, and "controlled possession of the premises upon which narcotics were found."

MORE THAN 70 persons, most of them Tech students, attended a weekend party at the house, police said.

About 10 policemen participated in the raid after Peace Justice McCleskey issued a search warrant.

Judiciary postpones hearing

The Tech Supreme Court Wednesday night postponed an informal hearing on a suit challenging the constitutionality of the cheerleader screening board.

THE HEARING was set back at the request of Robert Hoffman, counsel for the Tech Student Association.

Hoffman said he had been notified of the suit Tuesday morning, and had not had time to prepare a reply. He said it was his understanding that he was entitled to at least a week in which to lay the groundwork for a defense of the Student Senate's action in setting up the screening board.

THE ASSOCIATION and the Senate are defendants in a suit filed by Randy Hilton, campaign manager for a coed who made a recent unsuccessful bid for a cheerleader position.

HILTON SAID IN A LETTER to Chief Justice Lonnie Dillard that qualifications for cheerleaders are set out in the Student Association Constitution, and that a screening board for candidates should be authorized by a constitutional amendment, not a by-law passed by the Senate.

Postponement was granted under Article IV, Section 6 of the constitution, which gives a respondent in actions before the Supreme Court "ample time to prepare his case."

Dillard said Hoffman would have until 11 a.m. Tuesday to file a reply to Hilton's suit. He set a preliminary hearing for 8 p.m. the same day. The hearing room will be announced later.

HE SAID THAT IF A FORMAL hearing is held it would be scheduled at least 20 hours after the informal session.

"But," Dillard added, "the count is under no obligation to hold a formal hearing."

Wednesday night's hearing began as an open meeting, but the court considered its decision in a 20-minute closed session.

MAN OF THE YEAR—Dr. Gerald W. Thomas, dean of the School of Agriculture (second from right), looks at the La Ventana Tyme section cover proclaiming him Tech's Man of the Year. The surprise announcement came Wednesday as La Ventana co-editors Nancy

Hedleston (left) and Charlotte Shive presented the cover facsimile to Thomas. Looking on are Bill Dean, director of student publications, and Dr. Grover E. Murray, Tech president.

President grilled on Tech issues

Murray grapples with grippers

By JIM JONES
Assistant Managing Editor

Wednesday's second Tech Union-sponsored Gripe Night turned into a question and answer session between students and President Grover E. Murray and it soon became apparent Tech's eighth president is impossible to fluster.

Some 500 students gathered on the Union Sun Porch to fire questions ranging from the authority of the Association of Women Students to the purpose of ICASALS to Tech's new president.

AND HE, ALONG with Vice President for Academic Affairs S. M. Ken-

Women's Day schedule set

The 35th Annual Women's Day will be sponsored by the Association of Women Students (AWS) April 25.

ACTIVITIES WILL BEGIN with a luncheon in Knapp Hall honoring Miss Irene Parsons, personnel director for the Veterans Administration. A tea introducing the guest to all women students will be given in the Dean of Women's office from 1:30-4 p.m.

The highlight of the day will be a banquet in the Tech Union ballroom at 6 p.m.

MISS PARSONS WILL SPEAK TO AWS members and guests on "A Woman's Place."

Tech's 1967 Outstanding Woman of the Year and Faculty Woman of the Year will be announced at the banquet.

Candidates file for positions, go over election procedures

Candidates for executive offices and Student Senate positions in campus government met Wednesday with the campaign committee to go over election rules and procedures.

KAREN KITZMAN, SECRETARY of the Student Association, presided over the meeting attended by nearly 75 students. Miss Kitzman announced the dates for the elections as April 21 for executive office candidates, and April 26 for senate elections.

Filing for the office of president were Max Blakney, Carl Moore, Richard Ferguson and Johnny Walker. Gwen Connelley, Vicki Johnson, and Diane Naylor filed as candidates for secretary.

The vice-presidential candidates are Jay Carter and Ronnie Brown. David McDougal is the only candidate on file to date for business manager.

MISS KITZMAN SAID Friday from 1-2 p.m. will be the deadline for any students who have not yet filed.

Walker Moore Ferguson Blakney

nedly, used reason, humor and a little subtle sarcasm in taking the questions to task.

Dr. Murray told the students their complaints were taken seriously by all members of the administration and efforts were constantly being made to answer student questions.

In reference to Tech's presence on the American Association of University Professor's blacklist and the name-change issue, Dr. Murray repeated his previous statement that work is quietly being done on both matters.

DR. MURRAY HAD said earlier in the year he felt these matters would be solved faster and with better results when worked on out of the realm of "glaring publicity and controversy."

Responding to questions about the Code of Student Affairs, which is in the process of being revised, Murray said he did not know if the student body would be allowed to approve or disapprove the new Code because, "Frankly, I had not thought about it."

He added that the group of students and faculty members appointed to the committee to revise the Code was supposed to be representative of campus opinion. Murray said he would ask administrators and campus leaders to review the finished Code and that he is in favor of public hearings on the document.

WHEN ASKED if the Code would be available for publication soon, Murray said he did not know the status of the Code at the present time but he did not wish to "rush a document of such importance."

A graduate coed later chided student participants for asking poorly phrased

questions and the administrators present for giving "bland answers." She concluded by saying that Murray is "obviously not very well-versed on the Code of Student Affairs."

Murray shot back, "And you are also not very well-versed about several matters."

Dr. Kennedy was called to the microphone to explain the process of achieving faculty tenure in response to a question concerning a professor who was recently denied tenure.

KENNEDY SAID faculty members are judged by other members of their respective departments. The department head receives these written statements and then makes the decision whether tenure will be recommended or not. If tenure is not recommended, the faculty member is then asked to present his case before a committee which makes the final decision.

"There has never been a faculty member refused tenure who did not appear before the committee," Kennedy said.

Both Murray and Kennedy told the students that money spent on dormitory construction cannot be used for the building of academic facilities.

Australian to speak on 'down under' opportunities

Lubbock residents and West Texans will have a chance to acquaint themselves with the economic opportunities in agriculture and other fields in the Down Under Land of Australia in a special program scheduled today at KoKo Palace.

AUSTRALIAN CONSUL GENERAL Neil Truscott will be on the Texas Tech campus today to confer with university officials and to obtain a first-hand briefing on Tech's new international Center for Arid and Semi-Arid Land Studies.

Truscott, one of his country's ranking representatives to the United States with offices in San Francisco, will confer at 1:30 p.m. with Tech President, Grover E. Murray and Dr. Thadis W. Box, Organizational Director for the International Center.

TRUSCOTT, SLATED TO DISCUSS areas of possible cooperation and exploration of mutual interests, is scheduled to appear at a 7:30 p.m. meeting tonight at KoKo Palace.

THE PROGRAM, free and open to the public, was arranged by local television farm editor Horace McQueen who recently returned from a three-week, 26,000 mile inspection tour of agricultural facilities in Australia and New Zealand and will feature two color films, plus a panel discussion.

The films are a 26-minute documentary made by McQueen entitled "A Look at Australian Agriculture," and a 45-minute movie on the country and

"MONEY FOR DORMS comes from revenue bonds and to obtain a reasonable bond rating, the university must guarantee that the dorms will be utilized," Kennedy said.

He also said many parents would not want their daughters to attend Tech if dorms were not available.

A coed asked what good a dorm did a 22-year-old woman and Murray quipped, "You can answer that better than I can."

Kennedy went on to explain that money for academic buildings must come from Texas Legislature appropriations and not from bonds.

At one point in the night's questioning a coed stood up to say she had been campused for the night but had "snuck" out of the dorm to attend the session.

"Your grammar is atrocious," Murray said.

"But her courage is commendable, yelled an onlooker.

"No comment," said Murray.

Besides Murray and Kennedy, Executive Vice President W. M. Pearce attended the session.

its people entitled "The Australians."

McQueen, who shot 4,000 feet of movie film in compiling his report, attempted to visit those areas of Australia which were most comparable to West Texas, and to obtain a personal view of the booming agricultural areas of the country which would hold the most interest for Americans.

HE TALKED WITH SCORES of Australian agricultural experts and visited experimental beef cattle and crops stations in Australia and a general research facility in New Zealand.

A question-and-answer session will conclude the program featuring panelists: Truscott, Murray, McQueen, and Bruce Webster, North American Public Relations Director for Quantas Airlines.

The Tech president will outline highlights of the university's new International Center for Arid and Semi-Arid Land Studies and will trace the benefits of the new program as they relate to both the United States and Australia.

"THE CONSUL GENERAL'S visit," said Murray, "of course, is a great honor for Tech, and is concrete evidence of the growing international recognition of our vital program."

"We trust that our discussions will be fruitful," he said, "and that from our meetings will come solid ideas and firm suggestions for programs of mutual benefit to us all."

X-RAY EXPLANATION—An X-ray technician for the West Texas Tuberculosis Association points out some of the equipment in the Mobile Detection Unit to Tech senior Travis Bohannon, right. The unit will be at the northeast corner of Tech Union from 8 a.m. to 5 p.m. today.

100 churches sponsor

McIntire to speak

Dr. Carl McIntire will speak tonight in Lubbock Municipal Auditorium on "Freedom of Speech and our American Way of Life."

Beginning at 7 p.m., the lecture is sponsored by more than 100 local churches.

McIntire is director of the 20th Century Reformation Hour broadcast and editor of the weekly newspaper, "The Christian Beacon," which sponsors the daily broadcast sent over 600 radio stations, including locally over KCLR.

PASTOR of the 1700-member Bible Presbyterian Church of Collinswood, N.J., since 1933, McIntire is the author of 12 volumes discussing religion in the world today.

McIntire

These include "Servants of Apostasy," "Modern Tower of Babel," and "Author of Liberty." Dr. McIntire was the first president of the International Council of Christian Churches and is a member of its executive committee. Elected the first president of the ICCO in 1948, he has been re-elected to this position at each of the organization's six plenary congresses. In this position he has circled the globe 10 times.

He will be speaking tonight from the same stage as did Bishop James A. Pike, controversial theologian. McIntire has challenged Pike several times to appear on his radio show but the challenges have been ignored.

The Federal Communication Commission has also been challenged by McIntire for trying to remove all independent broadcasting which requests funds. Last year McIntire received over \$300,000 which was used to help Korean orphans.

Time for questions from the audience will be allowed after his speech.

Dr. S. M. Kennedy, vice president for academic affairs, sent out over 2,000 letters Wednesday urging faculty and staff members to take advantage of the mobile chest x-ray units now on campus.

The letter mentioned the chest x-ray's sensitivity to tuberculosis, certain heart ailments, tumors, and emphysema.

The x-ray program is free but donations will be appreciated. Each x-ray costs the West Texas Tuberculosis Association 97 cents.

The campus drive has been coordinated by James Sayter of the Student Senate and Dr. Robert Amason of the Faculty Advisory Committee.

Registration at noon Friday will begin the retreat, with the participants scheduled to leave at 12:15 p.m. The site of this year's retreat will be Bishop's Lodge, Santa Fe.

Hollis, a specialist in the field of college leadership programs in the nation, will direct studies in exerting leadership and working in groups.

Lorna Novak, noted novelist to speak at Matrix banquet

Mrs. Lorna Novak will speak tonight at the Matrix Table banquet about her own writing in a talk that promises to offer a good deal of humor.

The banquet will be sponsored by the Lubbock professional chapter and Tech student chapter of Theta Sigma Phi, women's honorary journalism fraternity.

Mrs. Novak picks up local color of Texas and adjoining states in her travels and incorporates it in her works.

Mrs. Novak will be introduced by Mrs. Opal Dickson, president of the professional chapter. Miss Barbara Worley, president of the Tech chapter, will preside over the banquet.

TECH's outstanding Senior Woman Student in Journalism will be awarded, Headliner awards will be presented to one outstanding girl from each of Lubbock's three high schools.

The top over-all winner will receive a portable typewriter. Another will be awarded a radio, and the third will receive books.

All three girls will get engraved charms, and seven other girls nominated by their teachers will be recognized.

W. E. Garets, head of the journalism department, will give the invocation and James G. Allen, dean of student activities, will give the benediction for the banquet.

Which is better—depth for a few, chosen by the state or nation to be highly educated, or the opportunity for all to seek depth in higher education if they elect to do so?

As one would expect, there is growing dissatisfaction both in England and in France on the part of many with their education systems. The headmaster at Eton, perhaps the most sophisticated of all English prep schools, told us frankly that they were fighting for their "lives," and they were not sure they would win!

History shows us that the 'common' people can be subjected so long, and then they rebel. They are beginning to rebel where the education of their children is concerned. Each nation is proposing reforms of a palliative nature, but none which seem destined to succeed any time soon.

IT IS A NEW EXPERIENCE to be on the outside looking in at the educational problems in nations which count time in centuries instead of years. I shall try to remember this when I am back at Texas Tech and we are trying to streamline registration, eliminate examinations, or solve the parking situation!

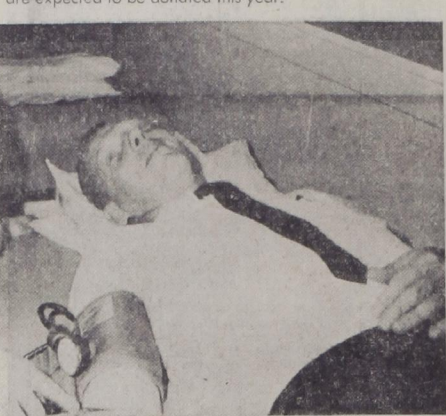

Articles prepared on ICASALS

Twenty-nine articles and papers by Texas Tech's faculty members have been prepared recently on subjects related to the International Center for Arid and Semi-Arid Land Studies, Dr. Thadis W. Box, organizational director of the International Center, announced Monday.

HE SAID THAT the items, which include articles for academic journals and papers presented at meetings of academic societies, cover such topics as lakes of the Texas plains, weather, ground water, brush control, range management, location of cities in arid regions, governmental and economic aspects of arid land development, livestock breeding and development, fertilizers, parks and recreation and desalination of sea water.

BLOOD PROGRAM — Dale Zinn, acting head of Texas Tech's animal husbandry department, contributes blood to the newly established Tech Agricultural Ex-Students Blood Account which started Tuesday. Doing the honors is blood services nurse Janie Grimsley. The program is designed to provide blood to all Tech Agricultural Ex-Students and their dependents. In order to be eligible for the blood services, and ex-student must contribute one or more pints of blood, or have it donated in his name. Over 1,000 pints are expected to be donated this year.

OSU rodeo draws riders from Tech

The Texas Tech Rodeo team leaves today for Oklahoma State University to test their cowboy skills in competition with eight other teams in the first collegiate rodeo of the season.

The 11 member team, selected by the board of directors as the best able to represent Tech, consists of seven boys and four girls.

BOYS' competition will include bull-riding, bareback riding, saddle bronc riding, calf roping, ribbon roping and bulldogging.

Barrel racing and goat tying are the contests for girls' competition.

Each girl member of the team, led by Marianne Munz, last year's goat tying champion, will enter two events. Nancy Munz of Alvin, Annette Duncan of Brownwood, and Kara Robinson of Slaton, complete the team.

Mobile TB unit located at Union

Tech students, faculty and staff will be able to have chest X-rays made today in the Mobile Detection Unit at the northeast corner of the Tech Union from 8 a.m. to 5 p.m.

The West Texas Tuberculosis Association has asked for a contribution of \$1.00 from those able to pay for the service. The X-rays will not only detect tuberculosis but also other chest illnesses, including emphysema, cancer and heart irregularities. The WTTA especially urges smokers to use the service.

ALL ARE accused of having been involved in a series of burglaries which occurred in Lubbock between Feb. 20 and March 2. Police said the burglaries netted at least \$800 worth of golf clubs, automobile wheels and tires, stereo tape decks and related items.

The charges were an outgrowth of a search of Wells Hall by Bill Daniels, Tech chief of traffic security, after he received a report that stolen traffic signs were in one of the dormitory rooms.

When charges were filed March 7 all the youths were Tech students, but Dean of Men Lewis N. Jones said Wednesday that only three are still enrolled.

Indicted on charges filed by Dist. Atty. Alton Griffin were James E. Gissler, 18, accused in two counts of burglary of a motor vehicle; John Randolph Martin, 18, James P. Leach, 19, and Jeffery L. Dixon, 20, each charged with one count of burglary of a motor vehicle; John W. Pouncey, 21, Michael V. Bivin, 20, and Robert E. Malone, each charged with receiving and concealing stolen property; and John R. Millner, 19, charged with felony theft.

Three Tech students and five ex-students face trial on burglary and theft charges as the result of indictments returned Tuesday in Lubbock's 140th District Court.

Indicted on charges filed by Dist. Atty. Alton Griffin were James E. Gissler, 18, accused in two counts of burglary of a motor vehicle; John Randolph Martin, 18, James P. Leach, 19, and Jeffery L. Dixon, 20, each charged with one count of burglary of a motor vehicle; John W. Pouncey, 21, Michael V. Bivin, 20, and Robert E. Malone, each charged with receiving and concealing stolen property; and John R. Millner, 19, charged with felony theft.

Last in series Tinsley considers individual's worth

(Editor's note: Following is the eleventh and last in a series of articles written by Dean Willa Vaughn Tinsley of Tech's School of Home Economics during a three-week comparative education traveling seminar. Dean Tinsley returned to Lubbock during spring vacation.)

By WILLA VAUGHN TINSLEY

AIX-EN-PROVENCE, FRANCE—(Special) — International Edition of New York Times reports that in a 12-nation survey, the U.S. ranks low in the teaching of math. Since I have been studying the educational systems in two of the countries which outranked us—England and France, I at once began to think back over the differences in the basic philosophies between our nation and theirs.

NEVER HAVE I BEEN MORE appreciative of the fact that we purport (even when we fall short) to recognize the worth of individuals—not just a predetermined number of a favored few. In England 8% to 10% and in France about 30% of the students whom we consider eligible to go into higher education are permitted to do so. Each institution takes its quota and the others are denied entrance. The reason the institutions have this quota and stick to it, is that the government pays the tuition and other costs of education for all of those admitted. (There are very few private institutions and they are more rather than less strict in admitting students.) They are very proud of the low dropout figures and the high achievements of their students, as well they should be. While a few hundred are admitted entrance, thousands were turned away.

At age 11, at the end of grammar school, each student must choose the field in which he will specialize while in high school. Guidance counselors are unheard of in these systems. Teachers tell these youngsters what they seem best fitted registration, eliminate examinations, or solve the parking situation without starting back at the beginning. High school continues through age 16, but in its final year is comparable to our junior college level. This is one fallacy in the study reported in the New York Times. English and French students in their final year of high school out-performed our students in their senior high school year. Not only were their classifications not comparable, neither were the intelligence levels of the sample comparable. The English and French students would have been highly screened representing the top brains in the nations to have survived to this level, whereas in our country, the seniors would have been a cross section of low, medium, and high achievers, thus diluting the sample.

I WOULD NOT QUESTION the fact that our students were outranked, even if comparable grade levels had been studied. I visited a math class in a typical London final year in high school. This final-year group consisted of four (4) students—all girls—who had been studying math 5 years with a skillful teacher. They were developing (and proving) formulae combining principles of analytical geometry, trigonometry and calculus without referring to books or notes. (There had been 200 admitted in this group their first year in high school and four had survived. It's groups like this who stood the math test in the 12-nation survey!)

Which is better—depth for a few, chosen by the state or nation to be highly educated, or the opportunity for all to seek depth in higher education if they elect to do so?

As one would expect, there is growing dissatisfaction both in England and in France on the part of many with their education systems. The headmaster at Eton, perhaps the most sophisticated of all English prep schools, told us frankly that they were fighting for their "lives," and they were not sure they would win! History shows us that the 'common' people can be subjected so long, and then they rebel. They are beginning to rebel where the education of their children is concerned. Each nation is proposing reforms of a palliative nature, but none which seem destined to succeed any time soon.

Raider roundup

WOMAN OF THE YEAR
Nominations for Tech's Outstanding Woman of the Year and Faculty Woman of the Year are due Friday. Any woman's organization on campus may nominate candidates for election to be held April 24.

RODEO ASSOCIATION
Rodeo Association members will meet at 7:30 p.m. today in the Agriculture Auditorium to discuss details of the annual Tech Rodeo.

ALPHA EPSILON DELTA
Members of Alpha Epsilon Delta, Pre-Med Society, will meet at 7 p.m. today in the Tower Room of the Chemistry Building.

TECH UNION OFFICERS
Applications for chairman and assistant chairman of Tech Union are now available in the Program Office of the Union. Applicants may pick up applications in the Program Office from 8 a.m.-5 p.m., Monday-Friday.

A 2.2 overall grade point average and a 2.0 g.p.a. for the preceding semester required for an applicant.

Applications will be screened April 15, and interviews will be set up April 20-22.

CIRCLE K
Circle K Service Organization will meet at noon Thursday in the Tech Union.

AIEE
American Institute of Industrial Engineers will meet at 7:30 p.m. Thursday in the Architecture Auditorium. H. J. Tauerwald of Deere and Company will be guest speaker.

ACE
The Association of Childhood Education will meet at 6 p.m. Thursday in the Mesa Room of the Tech Union. Dr. Donald McDonald, Tech education professor, will speak on children's literature.

ACE officers for 1967-68 are: Carol Dion, President; Melva Ambery, first vice-president; Betsy McCraw, second vice-president; Ann Kerr, third vice-president; Donna White, secretary; Paula Horne, treasurer; Nancy Heilstone, parliamentarian; Susie Jeter, publicity director.

TECH TALENT—Above are a half dozen examples of the wealth of talent being drawn upon from the Tech campus for "Vaudeville '67." This group, which calls itself the "Uptown Singers," is one of 11 acts slated to

perform at the second annual Student-Faculty Variety Show in the Union Ballroom at 8 p.m. today. From left to right are Bill Stinson, Glenda Fanning, George Jackson, David Willis, Cathy Stubbs, and Johnny White.

O'Niell play final production of UT

Behind-the-scenes work, in the most literal sense, began Wednesday at the University Theater for its final major production of the year, Eugene O'Neill's "Desire Under the Elms," set for production May 12-15.

THE PLAY, ONE of O'Neill's best-known works, is set on a New England farm in 1850. Of the story, John Gassner writes, "On the stony soil which old Ephraim Cabot subdued with his labor, men hunger for land and emotional release. Land is not easily available or fruitful; men therefore guard it greedily."

Tryouts for the production were held last week, with final casting completed Tuesday. Cast members will be announced at a later date.

EPHRAIM CABOT represents the traditional New Englander identifying with a God of harshness and solitude. He is a hard man proud of his own "fruitfulness." His son by a second wife is Eden Cabot, who hates his father and blames him for the death of his mother, whom he still

mourns, ten years after her death.

ABBIE PUTNAM is a sexually vigorous woman determined to gain security for herself first through ownership of land and finally through love. Simeon and Peter Cabot, Ephraim's sons by his first marriage, are earthy characters, somewhat clumsy and stoop-shouldered.

Other characters in the play are the Sheriff and neighboring farmers, including a fiddler who comes to the dance in celebration of the birth of Ephraim's new heir.

DR. RONALD SCHULZ is director for the production, with set design by Frederick March.

THEATER BEHIND THE SCENES—University Theater designers Laurie Stepanian, lighting designer; Ramona Peebles, costume designer; and Frederick March, set designer, look over preliminary work for the upcoming Theater production, Eugene O'Neill's "Desire Under the Elms."

Vaudeville '67' sets mood at Union student-faculty show

"Vaudeville '67," featuring talent drawn directly from the Tech campus, will unfold at 8 p.m. today at the second annual Student-Faculty Variety Show in the Tech Union Ballroom.

SPONSORED BY THE Special Events Committee of the Union, the variety show includes 11 acts on its bill, as well as the special vaudeville touch of change of title-cards for each act.

Well-known faculty and staff members are scheduled to appear in various entertainer roles ranging from tap dancing to jazz violin playing. Student talent numbers will include performers selected by

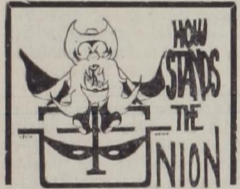

the Special Events Committee from auditions held earlier, according to Jeanne Affleck, committee chairman.

THE ACTS INCLUDE the Up Town Singers with "You Baby" and "I Want to be Free," Dan Bullock singing "Maria," Mercy doing two numbers, Bruce Watson with a piano number and Suzie Shaw doing "Funny Little Clown."

Also vocalist Weldon Beckner, folk guitarists Herbert Heichelheim and Elmer Al-

brocht, Suzie and Joanne singing "Making Whoopie" and "Goat Song," Dr. Panzie Kimmell playing piano, two numbers by "The Jug Band" and Dr. B. J. Fallon.

TECH FACULTY, STAFF and students are invited to attend, Miss Affleck said, and there is no admission charge.

April 6 — Student-Faculty Variety Show, "Vaudeville '67," 8 p.m., Ballroom, sponsored by Special Events Committee.

April 7—Popular Film Series, "The Seven Faces of Dr. Lao," 8 p.m., Coronado Room, sponsored by Special Events Committee.

April 8—Reception for University Speakers Series, John Kenneth Galbraith, Mesa Room, following speech.

April 9—Popular Film Series, "The Seven Faces of Dr. Lao," 3 and 7 p.m., Coronado Room, sponsored by Special Events Committee.

April 11—Foreign Film Series, "Buddenbrooks Part II," 7:30 p.m., Coronado Room, sponsored by International Interest Committee.

Student politics begin

Campus "politics" 1967-68 officially began Wednesday with the certification of candidates for executive offices of the Student Association and the Student Senate. For the next three weeks expect an active campaign with more true politicking years.

Candidates will be forced to sharpen up on campus issues if they expect to do any campaigning. Following the Election Revision Bill, little is left for candidates to use other than their own wits, and speaking ability. Signs other than wall posters, costumes and other campaign

Good decision

Executive Vice President Pearce's clarification of policy concerning student ID cards at Tuesday night's Senate meeting will save students many steps and is another knock against *in loco parentis*.

Dr. Pearce said students must present ID cards upon request but are not required to surrender them to Traffic-Security officers, university officials or anyone else. No longer will students have to make trips to the dean's office to recover their private property.

The administrative decision represents elimination of one form of control over the student. If students are now given traffic tickets when they would formerly have had their IDs confiscated, then this is fine. It is a lessening of the double standard under which students live.

The decision is a good one.

"crutches" were eliminated by the bill.

As a result, we hope candidates will turn to speeches, personal contacts and realistic, thought-out platforms to get their votes. To facilitate this, *The University Daily* will report on speeches given by candidates for President of the Student Association.

Voter turnout at the April 21, 26 and 28 elections should prove to be a good indication of the amount of work candidates put into the campaign. Unquestionably, gimmicks have helped to bring out the voters in past years. Voter turnout in Tech student elections has averaged 35 to 40 per cent of enrollment, better than on most campuses. If candidates put on a good campaign, this figure should be maintained.

The upcoming three weeks will be interesting ones. They will show the validity and usefulness of the Election Revision Bill and also the enthusiasm of the candidates. We hope candidates, especially those for executive offices, realize they are asking for an increasingly difficult job which will require them to represent approximately 20,000 students, and that whoever is elected will probably wish more than once that he hadn't been.

We also hope they realize what they represent in their campaigns will be the sole basis of their vote total, and that they plan the next three weeks accordingly.

Techsans' money bolsters economy

(Editor's note: The following article was taken from a master's degree thesis by Jerry Mike Hood, now an instructor in the department of finance, entitled "The Economic Impact of Texas Technological College on Lubbock for the Years of 1956-57 through 1965-66.)

By LARRY ADKINS
Editorial Staff

Tech students have bolstered the Lubbock economy to the tune of \$340 million over the last 10 years, including \$57,076,688 spent last year. These figures were compiled by Jerry Mike Hood in his master's degree thesis presented in August, 1966.

TO DERIVE these figures he studied four sources: expenditures of students, local expenditures of Tech, expenditures of out-of-town football and basketball fans, and expenditures of other campus visitors.

Off-campus men, composing eight per cent of the student enrollment were the largest individual spenders. Married students spent the largest in proportion. On-campus women spent less individually, and on-campus men, the largest portion of the student body, spent the most money for the four groups.

OFF-CAMPUS men spent an average of \$2,197.00 for the nine month term. For the same period of time, on-campus men spent an average \$1,943.00; on-campus women spent an average of \$1,796.00; and married couples spent \$4,021.29. The figures are averages, and actual expenditures vary with the individual.

Some expenses included in polling the off-campus men included: rent, food, tobacco, liquor, dating, pictures, gifts, contributions, entertainment, sports, laundry, hobbies, medical care, school supplies, registration fees, books, club dues, association and fraternity dues, car and miscellaneous expenses.

ON-CAMPUS men had about the same types of expenses, the primary difference being in food and rent. Car expenditures were less for on-campus women, as 60 per cent of the men polled had cars, and only 32 per cent of the women owned cars. Women had less tobacco, liquor, and entertainment expenses, but those interviewed had more associa-

\$340 million

an estimated \$93,581,485 was spent locally by Tech.

HOOD ESTIMATES through sending questionnaires to a representative group of out-of-town football and basketball fans that this group contributed an estimated total of \$1,201,809.88. This figure includes such things as tickets, lodging, gasoline and oil, food, shopping, and incidental expenses. Lodging was not figured for basketball visitors. Football contributes most of the revenue, figured at \$1,126,203.96, and basketball put an additional \$75,000 into the local economy.

Campus events such as conferences, symposiums, shows, meetings, track meets, workshops, and miscellaneous college activities brought another 25,072 visitors to the college and Lubbock last year. This group left \$1,079,361.37 in Lubbock.

HOOD SAID the figures he has given are probably conservative, and the economic impact is probably far greater. Over the last ten years,

LETTERS TO THE EDITOR

Calls censorship rules 'stupid'

The editorial of April 1 says "The Tech department of architecture) believes these rules (of the Municipal Garden and Art Center) are too strict, and we agree with them."

GENTLEMEN, anyone who says that these rules are "strict" is making a mistake. They are not "strict." They are, in fact, utterly stupid, founded on an idiotic, untutored, primitive and provincial idea of what a work of art is and of how a work of art communicates. In short, the rules are perfectly suited to Lubbock and to its cultural aspirations.

Cites mistake

In the fourth article in a series of Thursday, March 21, your occasional correspondent states, "One has to go to a technical school to study engineering. Technology is taught only in special institutes."

NOTHING is more inexact. As I spent some 40 years in Europe, here is the real situation as far as engineering is concerned. Except for England, there are two university degrees in Western Europe:

The *Docteur* and the *Ingenieur* degrees which are obtained after five years of university following junior college.

AN INTERMEDIATE degree of *Licencie* (*Licentiate*) precedes and is the prerequisite for the doctor's dissertation. Very few students interrupt the cycle of their studies at the level of the licentiate degree since they are so close to the doctor's degree. Some private institutes confer an engineer degree of lower value than that of university graduates obtained in two years less of study than the university degree.

The following degrees are not offered at the university level: home economics, education, music and physical education. Your correspondent complains about the curriculum: "It has not changed with the changing of times." This is certainly not the case for sciences and engineering. And after all has the "old European system of education" not produced men such as Einstein, Fermi, Von Braun, etc. to name only a few?

Dr. J. A. Renard
Ingenieur-Chimiste
Licencie en Sciences
Professor of Chemical Engineering

The rules are untutored and stupid in that they betray no shadow of comprehension of the function of art, either in itself or in society. Even Tolstoy, probably one of the worst prudes in the history of criticism, would be revolted by the outright ignorance of these "standards."

THE RULES are primitive in that they are based on the principles of magic found in even the most backward human societies. (See J. G. Frazer, "Golden-Bough"). The rules are provincial in that they combine ignorance and primitive modes of thought with aspirations to "Culture." As I said previously, it's just what you expect of the Hub of the Plains.

Tom Halliburton

Proposes code

In the information distributed by the "Campus Reform Action Movement" there were certain stated objectives which I would like to question.

I WOULD contend that these people are missing the point almost as completely as the administration when it comes to the "Code of Student Affairs." What the students in this group would have us do is replace the administration's arbitrary judgment for the judgment of the majority of the student body.

At first this seems reasonable, but in the context of our democratic system it is repugnant to our concept of individual freedom. In the area of morals an individual should be allowed as much freedom as society can tolerate and continue to exist.

Of course there are certain rules of society as a whole which must be obeyed, but these laws (of the United States and of the state of Texas) seem to me to be sufficient for the citizen both in and out of the University.

THIS LEADS to two proposals. First, the elimination of the Code of Student Affairs except for a simple statement to the effect that any student is answerable to the laws of the State of Texas.

Second, that becoming a resident in a dorm is voluntary and that the rules that are necessary for running a dorm be in keeping with independent, adult living. This leaves to the individual the right of "self-determination," which is so essential to the University in a democratic society.

J. Terry Finley

Says Daily on Leftist side

A University Daily columnist says, in rhapsodizing about the liberals, Modernists, and Socialists who have lectured on Tech campus this year that "we have had the ultimate of ultimates, James A. Pike."

YES, I AGREE with the columnist; Pike is the ultimate in Modernism and apostasy. Does only this sort of thing "set our minds to working," to use the columnist's own words? It would be good to learn if our minds could

be set to working by things that are good.

I suggest we go hear Carl McIntire, one of the "ultimates" on the side of the true, unalloyed Christian faith and doctrine this Thursday at 7 p.m. in Municipal Auditorium.

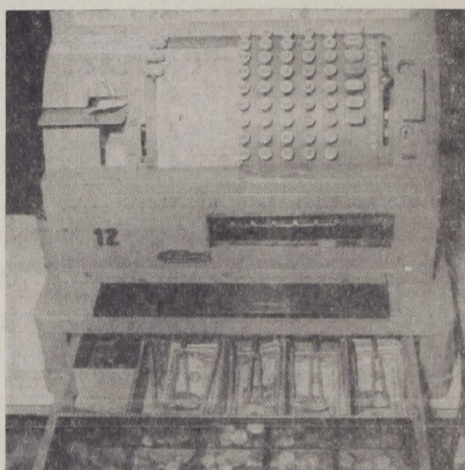

NOT THAT I anticipate that this letter will be printed or will be printed in time for people to attend the lecture. Those who holler for academic freedom are interested in it only when it propounds their own views and any one who reads the University Daily knows it is on the side of Leftism.

Alma J. Carnes

Spring drills stress punting

Tech's football team put their kicking game into second gear and added punting to Wednesday's spring workout. In sharp contrast to Tuesday's hot, sultry afternoon, a strong, cool breeze swept over the practice field and the sighs of relief from the grid aspirants were almost audible.

Head Coach J. T. King was pleased with the two-hour workout saying, "It was a heck of a lot better than yesterday. Of course, yesterday was our first really hot afternoon and I'm sure it had its affects on the team."

"IN A workout such as the one today," the Raider mentor continued, "It's really pretty hard to single out the ones who had the best day, but I'd say on the whole, this afternoon's drill was one of our most spirited ones."

Defensive halfback Ronnie Rhoades drew praise from the Raider grid master for his performance in the workout.

"RONNIE had a real good day," he commented. "He played aggressively, and really got after 'em."

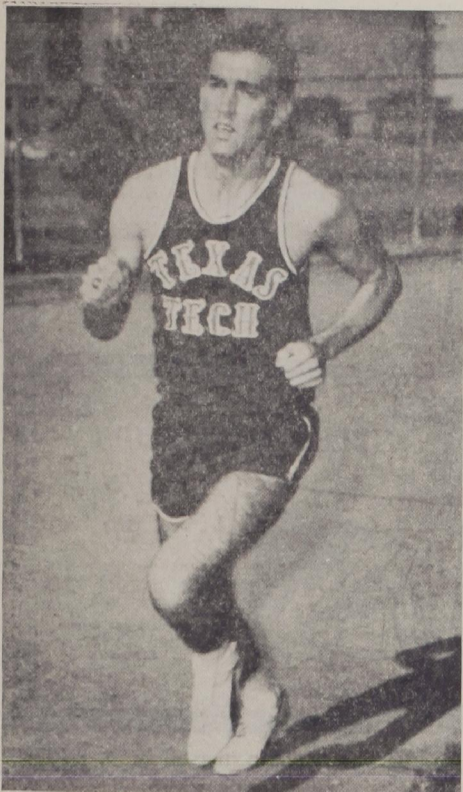

Linebackers were also praised as King stood observing a group getting in some "overtime" trying to build a little speed into their running.

"BOTH Fred Warren and Jackie Booe were hitting well," he said. "In fact, on the whole I'd say the defensive units are beginning to come around."

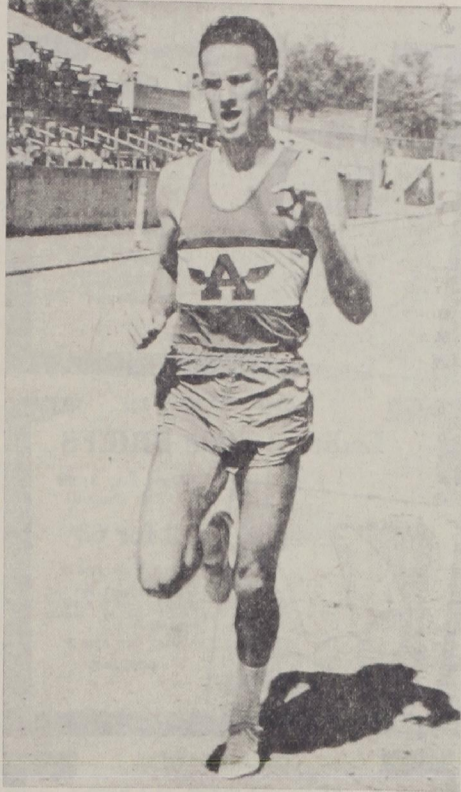

Lineman Jim Arnold, who has already had more than his share of injury problems, missed yesterday's workout after suffering a knee injury in Tuesday's drill. The extent of Arnold's injury is not known. Arnold was slated for a defensive starting role at the beginning of this past season, but a knee injury kept him out for the year.

TODAY, the Raiders will work on pretty much the same phases as Wednesday's session. Then they'll have Friday off and Saturday will mark their first scrimmage.

The scrimmage will be about the same as a formal game except there will be no kickoffs or punt returns.

INJURED SPRINTER — Wayne Nelson, Houston junior, will anchor the mile relay team in the triangular meet today unless his leg injury interferes. Nelson ran last week on the record-setting 440 relay team at the Texas Relays.

DISTANCE WHIZ — Dale Drennan of the University of Texas at Arlington is expected to get a double win in the mile and three-mile events today. The meet is scheduled to start with field events at 2 p.m.

TCU, UTA meet Tech in triangular today

The Tech track team will be going after their third meet win of the season today as they host a triangular with Texas Christian and University of Texas at Arlington.

While the meet — slated to begin at 2 p.m. at the Varsity Track — is expected to be a close one, Tech would have to be a very slim favorite.

THE MAIN thing the Raiders have got going for them is depth. Although they're not expected to take the most first places in the events, Coach Vernon Hilliard's think-clads are strong enough to place in enough events to boost the Raiders' team points to the top.

The Raiders are expected to score heavily in the sprints where the sprint team composed of the same trackmen have set school records in both the 440 and 880 relay events.

At the Texas Relays last week in Austin, a hobbled Wayne Nelson substituted for injured Richard Parrish in the 880-yard relay. Even then, the team clipped a tenth of a second off the school mark of 1:26.3 set in 1965 by Ken Coleman, Clark Willingham, Richard Vogan and Hardy.

WHILE HELPING to set the new mark, Nelson did further injury to his leg and Tim Garrison, a former Lubbock Christian star in the hurdles, may sub for Nelson. Even then, the Raiders will be the strongest team in the event.

Tech's best bet for a double win will rest on the massive shoulders of Ed Mooney who could easily set some records in the shot and discus. Mooney got off to a slow start in both since he played at the line-backer spot during the football season. However, his throws have improved with every meet, and he took a second in the shot last week in the Texas Relays.

QUANTITY, not quality, is the big problem facing the Arlington squad. They're faced with a depth problem with less than a dozen varsity competitors.

UTA's Dale Drennan, one of the state's best distance men and Arlington's first All-American, is the solid favorite in the mile and three-mile events. The distance whiz has beaten both the mile and three-mile marks existing at Tech. Drennan's best time in the mile is 4:08.8 and has run a 14:26.0 in the three-mile.

and off the school mark of 1:26.3 set in 1965 by Ken Coleman, Clark Willingham, Richard Vogan and Hardy.

While the meet — slated to begin at 2 p.m. at the Varsity Track — is expected to be a close one, Tech would have to be a very slim favorite.

THE MAIN thing the Raiders have got going for them is depth. Although they're not expected to take the most first places in the events, Coach Vernon Hilliard's think-clads are strong enough to place in enough events to boost the Raiders' team points to the top.

UTA's Dale Drennan, one of the state's best distance men and Arlington's first All-American, is the solid favorite in the mile and three-mile events. The distance whiz has beaten both the mile and three-mile marks existing at Tech. Drennan's best time in the mile is 4:08.8 and has run a 14:26.0 in the three-mile.

OTHER UTA favorites today will be Ken Walters in the 120-yard high hurdles, Bob McGlothlin in the 440-yard intermediates, Richard Key in the 880-yard run and Mike Hale in the broad jump. Walters owns a 14.4, McGlothlin a 53.8, Key a 1:55.1 and Hale has done 23.5 in those events.

TCU's performances will depend mainly on its injury status. The Frogs have been plagued with injuries throughout the season, but could be strongest in the high jump, the 440, the mile relay, and the 100-yard dash.

JUMPER Robert Ness of TCU threatens the high jump record of 6.5 three-fourths set by Tech's Dub Thornton in 1959. Ness went 6-8 March 11.

Field events will start at 2 p.m. and the running events will commence at 2:30. The Raiders' next meet will be a triangular with Abilene Christian and Baylor April 15 in Abilene.

HOPE REIGNS Bob Hope will repeat his reign as king of the 39th Annual Academy Award presentations, scheduled for 9 p.m. Monday. Hope has been master of ceremonies for the Oscar presentations more than any other person since their beginning in 1926.

Head Coach J. T. King was pleased with the two-hour workout saying, "It was a heck of a lot better than yesterday. Of course, yesterday was our first really hot afternoon and I'm sure it had its affects on the team."

"IN A workout such as the one today," the Raider mentor continued, "It's really pretty hard to single out the ones who had the best day, but I'd say on the whole, this afternoon's drill was one of our most spirited ones."

TODAY, the Raiders will work on pretty much the same phases as Wednesday's session. Then they'll have Friday off and Saturday will mark their first scrimmage.

The scrimmage will be about the same as a formal game except there will be no kickoffs or punt returns.

Golfers gather for Masters

AUGUSTA, Ga. (AP)—Jack Nicklaus is edgy as a wet rooster, Arnold Palmer has his fabled charger juices flowing again and they're the two men on the spot in the 31st Masters Golf Tournament, starting today.

EIGHTY-THREE of the world's best shotmakers, pro and amateur, start teeing off at 9 a.m. EST over the flowing but formidable Augusta National course, with one question paramount: "Who's going to crack the big two?"

Between them, the 27-year-old, long-driving Nicklaus and the colorful, aggressive Palmer have won seven of the last nine Masters, the last five in a row. Big Jack is defending champion and recordholder, seeking his third in a row, and Arnie is the only man who has won four.

RATED CHIEF threats behind these 6-1 co-favorites are U.S. Open champion Bill Casper and flamboyant Doug Sanders, rated 8-1; Gary Player, Gay Brewer and aging Julius Boros, 10-1; Bob Goalby, Bruce Devlin and Phil Rodgers, 12-1.

Many observers think this may be the year for Casper, the slimmed-down Mormon who came from seven shots back to tie Palmer and then later win the 1966 National Open.

Sanders, who has the shortest and quickest swing in big-time golf has one drawback. He may be over-matched by

the 6,980-yard, par 72 Augusta course, termed the hitter's course.

PLAYER, the dogged little South African who won here in 1961, says he is playing "quite nicely but not great. I don't have quite the same desire any more," he added.

The 47-year-old Boros, two-time National Open champion and off to his best spring start in his 18 years as a pro, is calmly confident.

BREWER, who spewed out 29 birdies at Pensacola two weeks ago and who still smarts under the embarrassment of the three-putt 72nd green that cost him the Masters title a year ago, is apparently at the top of his game. "I want the Masters—I think I can win it," he said determinedly.

Devlin, the Australian, has the game for the Augusta course—long off the tee and solid on the greens—but he is hobbling around on blistered feet.

NICKLAUS, exposed to the mumps two weeks ago and to driving problems most of the year, has seldom been more on edge. His nerves are like guitar strings.

On the other hand, Palmer, winner of two tournaments so far this year, close in two others and leading money winner with \$49,650, appears to be like the Palmer of old—loose, enthusiastic and brimming with confidence.

"I'm pretty satisfied with my game," he said. "I really get charged up around here."

Intramural wrestling slated Monday night

More than 20 wrestlers "pinned" their way to the Intramural Wrestling Finals and several more will pair off in preliminaries Monday night.

Two men have already emerged as champions in their weight classes simply by signing up for the sport. No one else registered in the classes. These are Paul Presson in the 123 lbs. class and Dale Vick in the 177 lbs. class.

FOUR MEN qualified for finals without having to show up for the preliminaries since they only had one opponent. In the finals which will be held May 4 during Noches de Conquistadores, Eddie Anwill wrestle in the 130-lbs. class and Larry Strickland will go against Dennis Grub in the 137-lbs. group.

Among those who had to work for their finals position is Eff Embree. Embree defeated Johnny Martin in the second period to win the right to face John Valusek in the finals. Valusek drew a bye for the prelims.

IN THE 157-lbs. class, Steve Schulz and Larry Braden, both winners of Monday night's matches, will meet in the finals.

Eight men entered in the 167 lbs. class, and Doug Barberie, Larry Sava, Scott Bowler and John Conlin will divide into pairs Monday night to decide who will go into the finals.

MARK Schreiber and Henry McCreight will meet in the

INTERVIEWS for:

Sales and Sales Management Training Program

This Program is designed to develop young college graduates for careers in life insurance sales and sales management. It provides an initial training period of 3 months (including 2 weeks at a Home Office School) before moving into full sales work.

Those trainees who are interested in and who are found qualified for management responsibility are assured of ample opportunity to move on to such work in either our field offices or in the Home Office after an initial period in sales.

Aggressive expansion plans provide unusual opportunities for those accepted.

Arrange with the placement office for an interview with:
