Amendments Two, Six deserve voter support

The annual presentation of Texas constitutional amendments to voters is only 10 days away but, in typical off-election-year fashion, interest in the event is practically zero. Absentee balloting in the election is all but nil, indicating that the legislature may have called "wolf" one too many times in trying to patch the cumbersome state Constitution.

Nevertheless, two of the six amendments are of special interest to higher education and Texas Tech and deserve the whole-hearted support of voters along with a special effort to go to the polls Nov. 11. These are Amendment Two, establishing mental health, mental retardation and public health services, and Amendment Six, allowing non-elective state officials and employees to serve on federal and state advisory boards and committees.

As State Rep. Delwin Jones of Lubbock pointed out recently, passage of Amendment Two would allow a mental health unit to be added to the proposed teaching hospital which would be built in conjunction with a medical school here. Such facilities would greatly expand the program and help Tech attract graduate students doing research in mental health. Although many "ifs" are involved, the long-range possibility is a distinct one.

The primary amendment so far as Texas higher education is concerned, however, is the sixth. The current law prohibiting dual occupation of pay-

ing government positions dates back to 1876 when it was passed to restrict Carpetbaggers, and is hardly applicable now. It is limiting national educational recognition for Texas, limiting federal research funds and closing a valuable source of top part-time faculty members.

The amendment will allow Texas educators to serve on national advisory boards and, thereby, give Texas representation nationally, where it has none now. This will put Texas educational institutions closer to the many national funds which grant monies to colleges and universities. The state is now at a definite disadvantage with no representation on these influential boards.

The amendment will also allow employees of governmental agencies such as the National Aeronautics and Space Administration to serve as part-time faculty members of state institutions.

The benefits to higher education are unquestionable. Voter support is needed Nov. 11 for Amendments Two and Six to allow Texas higher education to continue to improve.

Opinions split concerning benefits of city sales tax

By VY TOWNSEND
Editorial Assistant

Next Thursday is the day set for Lubbock citizens to decide whether to impose upon themselves a city sales tax of one per cent.

According to city government leaders Lubbock has to have more revenue to finance the capital improvements demanded by city residents. Most Lubbock citizens agree the city needs more revenue, but opinions split concerning the means of attaining this revenue.

The proposal to be put to the Lubbock electorate is to take one per cent of each dollar paid for "non-essential" items, which excludes groceries, drugs, automobiles and gasoline. This penny per dollar would mean an estimated \$1,500,000 annually for Lubbock.

THE OKAY for Texas cities to institute the new tax was given when House Bill 207 passed during the recent session of the Legislature.

Proponents of the city sales tax argue that the money must be raised in one way or another. They believe the city sales tax is the most fair way because those who spend the money will pay the tax.

Proponents of the tax claim ad valorem taxes have just about reached their peak in providing revenue.

AGAINST THE opposition's charge that the tax will affect

and urban renewal programs now proposed for Lubbock.

In reply to those who want the tax the opposition says only big businessmen will benefit by the tax. Opponents say the lower income families and university students will be hardest hit.

ACCORDING TO THEM, students feel the effects of the tax most when buying textbooks and eating meals in restaurants. In addition to this argument many

students now pay property tax as residents of the city, pay utilities and also work in order to stay in school. Even more insulting is the fact that most university students are ineligible to vote in the upcoming election.

Proponents of the city sales tax are confident of its success at the polls Nov. 9.

Opposition has little hope with most of its rank coming from student and lower income less influential population.

Selective Service provides answers

(Editors note: Below are questions now being asked at draft boards. The answers are furnished by Col. Morris S. Schwartz, State Selective Service Director.)

Q—We have a farm, most of which is planted in wheat. Should there be a shortage of wheat this year, would this be a factor for receiving an agricultural deferment?

A—Under the new law, surpluses and shortages of agricultural commodities may now be considered by a draft board in reaching its decisions on agricultural deferments.

Q—I'VE HEARD that the deferment of graduate students in medicine, dentistry, veterinary

medicine, osteopathy, and optometry is now mandatory. Is that right?

A—Yes, if the student is satisfactory in his studies.

Q—Who decides he is satisfactory?

A—The school in which he's enrolled.

Q—Who gets classified in Class I-Y?

A—A man who takes the Armed Forces physical and mental examination and is not found qualified for service, but could be later if Congress declared war or national emergency.

Q—I'M GETTING in ROTC.

How will I be classified?

A—in Class I-D as a student taking military training.

LETTERS TO THE EDITOR

Coliseum parking spaces missed

I am ordinarily the grin-and-bear-it type, but I feel I must protest action which seems to me to be misrepresentation, to say the least. I refer, of course, to the situation regarding off-campus parking.

When I registered my car for off-campus parking the parking area was quite large. Then what happened? The first week of classes, the dirt lot across from Stangel Hall was declared off-limits. A few weeks later, the two best rows in the auditorium parking lot were denied me. A little later, two rows in the lot across Flint Avenue from Chitwood Hall were taken.

TODAY THINGS took a nasty turn when, without sufficient (if any) warning half of the off-

campus parking was taken. I am writing this during the time I would normally be at my 8:30 monster class. When I had finally driven all the way across campus and parked in the St. John's Methodist parking lot (Bless you St. John's), there was no time to go to class.

I feel that these arbitrary decisions are grossly unfair to those of us who registered for off-campus parking. I realize, too, that this letter is mostly sour grapes. I don't really expect anything to be done. This institution could care less about the desires of its students. However, I don't want to give those responsible the excuse that they didn't know I missed the space taken.

Reagan Upshaw
3201 44th St.

(EDITORS NOTE: Municipal Auditorium-Coliseum and the accompanying parking lot belong to the City of Lubbock and not to Texas Tech. Therefore, the city has the prerogative of full use of the parking lot for major events. Also, The University Daily published Tuesday the announcement of the parking lot being closed Wednesday morning and all day Thursday.)

SPERRY RAND

automatic landings are here!

At 9:45 P.M. EST on February 27, a Pan-American Boeing 727 jetliner with 98 passengers on board made a fully automatic landing at John F. Kennedy Airport in New York—the first operational automatic landing in the history of aviation in the United States.

Sperry Flight Systems Division participated as a member of the Boeing-Sperry engineering team which made this event possible. Our SP-50 Automatic Flight Control System played a key role. It put the Boeing 727 down "smooth as a feather," less than four feet to the right of the runway's center line under conditions of snow and fog—with a crosswind of twelve knots.

This is just another reason why Sperry Flight Systems Division is recognized as the leader in the development of Flight Control Systems and Flight Instruments and Displays. Our engineering team is second to none.

Join Sperry Flight Systems Division upon receiving your degree in Engineering and take that big first step toward fulfilling your professional and academic goals. We are looking for engineers with B.S., M.S. or Ph.D. degrees in E.E. or M.E., to work in the areas listed below.

Sperry Flight Systems Division, located in Phoenix, Arizona, leads in flight systems for airline and business aviation, and also provides such systems for vital military aviation and space programs. Since opening our plant in Arizona 10 years ago, we have grown from 50 to over 3,000 employees, with four plant expansions to accommodate our growth.

About Phoenix: It's a great place to live, with a dry, sunny climate that lets you enjoy year-around outdoor sports and hobbies. Nearby Arizona State University—with present enrollment of approximately 23,000—offers programs leading to advanced degrees in all engineering fields. To assist you in pursuing your further educational goals, Sperry Flight Systems Division will pay your full tuition and book costs.

ON CAMPUS INTERVIEWS Thurs., Nov. 9

It takes only a half hour of your time to get the complete story. To sign up for an appointment with a Sperry Flight Systems Division Professional Representative, see your Student Placement Office.

Pics seek win against Redshirts

The Texas Tech freshman football team will find the going rough against the varsity Red Shirts as they look for their first victory of the year tonight.

Coach Berl Huffman, Picador mentor, says "these boys are really restless for that first win and are going hard to try and break into the win column tonight."

"However, this is going to be a real battle because the group of Red Shirts this year are a pretty tough and rugged bunch," he said.

THE PICADORS will go with basically the same lineup they used in the Arkansas and Oklahoma contests.

"Since this is the last time the frosh play at home this year everyone on the team is expected to see action," says Huffman.

Ernie Sheppard, with a 363 yards total offense through the first two games, is scheduled to start at quarterback for the Pics. Sheppard has hit on 18 of 34 passes for 293 yards and two touchdowns.

Danny Hardaway, the Pic leading receiver, has caught four for 83 yards and a score against the Arkansas Shoats. Hardaway will be used both at offensive and defensive end as well as punt and kickoff returner.

DEFENSIVE STALWARTS Coy Baskin, 6-1, 190-pounder from Houston, and Robert

Mooney, 6-2, 220 pound tackle from San Marcos, are set to lead the corps of defenders.

The Red Shirts, an interesting amalgamation of unseasoned sophomores, old veterans and academically deficient student-athletes, are primed for their only game of the year.

The football season for a Redshirt consists of a workout followed by a workout and then another workout. Their principle value to the varsity program is the running of the opposition's offenses and defenses, against the varsity first team units.

WHEN THEY DO get a chance to show themselves under game conditions their performance is marked by spirited play and, what could be most adequately

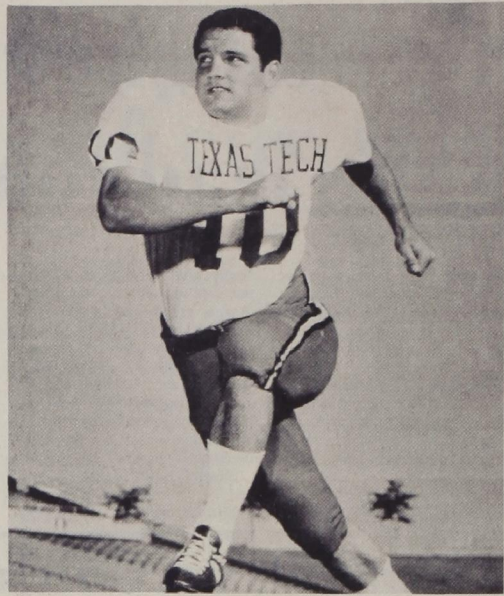

described as, an all-SWC offense and defense—meaning they often draw their game plan from what they have worked on during the year.

When asked about the Red Shirt game plan one quarterback said, "I've been thinking all week about one and believe we can pull a few surprises on those freshmen."

"WE RUN TECH'S offense and variations from others we have been exposed to and in a pinch have been known to draw up plays in the huddle," he said.

"This is our only game of the year and we are going to win it," he said.

The Shirts and the Picadors renew their rivalry at 7:30 p.m. tonight in Jones Stadium.

Injuries due increase says Austin doctor

AUSTIN — Larger numbers of athletes, combined with more strain and impact during games, may account for a steady increase in sports injuries, according to Dr. Joe M. Abell, Jr., Austin orthopedic surgeon.

At a University of Texas conference on the medical aspects of sports, Dr. Abell addressed a session on shoulder injuries in athletes. Dr. Marcus Stewart, associate professor of orthopedic surgery at the University of Tennessee, spoke on the same topic.

"Chronic shoulder injuries tend to be found in baseball players, while acute shoulder injuries are usually found in football players," Dr. Abell told about 30 physicians and trainers attending the conference. "The shoulder is very susceptible to injury, since its purpose is motion rather than stability."

Dr. Stewart told conference participants that rehabilitation is probably the most important part of treating shoulder injuries.

SAFETY MAN ON THE GO — Larry Alford will be seeing a lot of action from his defensive safety spot Saturday when Tech hosts the aerial minded Rice Owls. But the Houston sophomore will have plenty of credentials going into the game, with three pass interceptions to his credit this season.

Owls plagued by injury bug; last victory over Tech in '63

It's homecoming time for the Texas Tech Red Raiders as they battle the Rice Owls in an important Southwest Conference game here Saturday in Jones Stadium.

The game will mark the 17th meeting between the two teams. The Owls lead in the series 13-3-1 in competition dating back to 1942 with a Rice win 19-7 in Houston.

Rice hasn't beaten Texas Tech since 1963, but the Owls came close in 1964 in a 6-6 deadlock in Lubbock.

RICE HAS been hit hard by the injury bug. Quarterback Robby Shelton was lost for the season in the first game. Top ground gainer L. V. Benningfield was lost after the SMU game. Starting defensive and George Alexander and starting guard Frank Mandola also are out of action.

The Owls are 1-1 in conference play after last week's 28-6 loss to Texas at Austin. Rice, 3-2 for year, has posted impressive victories over Navy, Northwestern, and SMU.

Texas Tech, 21-7 victors over SMU last week, comes into the game with all hands healthy and ready for action.

QUARTERBACK JOHN Scovell will be directing the Raider attack with backs Mike Leinert, Kenny Baker, and Jackie Stewart lending aid. Leinert vaulted into the leading rusher spot

by virtue of his 127-yard performance against the Mustangs. The 5-11, 190 pounder has picked up 443 yards on 98 carries for Tech this year. Scovell will be throwing to

his favorite receiver—end Larry Gilbert, Tech's leading receiver, who has caught 16 passes for 232 yards including two touchdowns. Kickoff is slated for 2 p.m.

Aztecs retain top SW Texas eighth

By THE ASSOCIATED PRESS

Three new teams, New Mexico Highlands, Southwest Texas State and Northern Michigan, forged into the Top Ten in the Associated Press' small-college football poll Wednesday. The voting, though, is still dominated by San Diego State, Waynesburg and North Dakota State.

New Mexico Highlands, 6-0, took over seventh place after walloping Colorado Western 41-2 last Saturday. SW Texas State, a 59-0 victor over McMurry, moved into the No. 8 spot, and Northern Michigan, 24-23 winner over St. Norbert, slipped into 10th place.

THE NEW TRIO replaced Wittenberg, Northern Arizona and Parsons in the rankings. The latter three clubs were beaten last week-end, Wittenberg by Ohio Wesleyan, Northern Arizo-

na by Montana, and Parsons by Idaho.

San Diego State increased its first-place lead over Waynesburg in the balloting by a national panel of 17 sports writers and broadcasters.

The Aztecs collected seven votes for the top position and 152 points on a basis of 10 for a first-place vote, 9 for second etc. Waynesburg drew five votes for first place and 133 points. San Diego State topped the Yellow Jackets by only 10 points last week.

NORTH DAKOTA STATE remained a strong third with 116 points, including 10 for a single first-place vote.

San Diego State beat Fresno State 28-21, Waynesburg blanked West Virginia Wesleyan 22-0 and North Dakota State shut out South Dakota 34-0 last week-end.

The top two teams each has a 7-0 record while North Dakota State is 8-0.

Eastern Kentucky advanced two places to fourth after defeating Murray 28-7. The University of Texas at Arlington, a 37-27 loser to West Texas State, slipped one notch to fifth. Lamar Tech zoomed three positions to sixth after downing Arkansas State 28-23.

Northwestern Louisiana, beaten 28-20 by Troy, Ala. State, dropped from fifth to ninth.

TECH FOLKSINGER — Colleen Walter, coffee house. (Staff photo by Richard Fort Worth senior, practices her folk-singing for performances at a local

Coed's hours spent with guitar, songs

By LARRY CHEEK Staff Writer

"Love is but the song we sing; fear's the way we die. You can make the mountains ring or make the angels cry." The lyrics? Neither Haight-Ashbury nor Peter, Paul and Mary. The song is one of joyful youth, love and adventure. The singer? Likewise neither flower girl nor Ella Fitzgerald, but rather Colleen Walter, Fort Worth senior who has become synonymous with folk music at Tech.

Currently soloing at the Elevator coffeehouse on Friday nights, Colleen, in her four years at Tech, has performed countless times for occasions as varied as frat smokers and church group meetings. SHE HAS SUNG for business club functions around Lubbock, and once gave a concert of traditional Irish ballads for one of Dr. Mary Brewer's English classes.

Hearing Colleen sing is an experience that should stimulate even the deadest of souls. Her style is no stereotyped product of voice and guitar lessons; she has never had any. Neither is it an imitation of any professional singer. It's simply a good sound—a bright, clear

contralto voice dominated by personality and backed by blazing chording on an old Greco classic guitar.

In her performances, she departs considerably from the standard "folk faithful" of Dylan circa 1963. She instead swings with new songs of joyous love, old Irish ballads and embittered blue like "Codeine," a protest against drug addiction. SHE SELDOM DABBLES in political protests, however, but admits that practically every folk song is some kind of a protest against something. "I like sad music best," she says, "but you can't hold an audience with it." Colleen has also written some of her own songs, including one which was born her freshman year during a history lecture.

Colleen first began singing during her senior year in high school, and took up the guitar the following summer. In her first three years at Tech, she performed with a local group called the Coventry Singers, who specialized in old ballads and traditional folk music.

Last year, she branched out into bossa nova and jazz with the Bossa Tres. Colleen did the singing, accompanied by Walter Marlin on bass and Brazilian Luis Rafael on guitar.

No less unique than her performing, though, is Colleen herself. Progressing from running track in high school, she has been a candidate for Homecoming queen twice at Tech. She is a psychology major, currently works part time at the Village Dress Shop, and claims approximately three minutes of spare time per week. Those scarce moments, says Colleen, are usually spent practicing guitar in the Doak Hall basement, keeping up with her poetic diary, or talking to nosy University Daily reporters.

AS FOR HER future, Colleen surprisingly reveals that her plans do not coincide with the music business. "I don't want to give up other things for music," she says. "It's only a form of release—a type of communication for me." After graduation, she plans to spend a year in social work of some sort, to graduate work in psychology, and possibly go to Australia to live "because it's still a lonely country." The aspirations, dreams and personal philosophy of Colleen Walter can be summed up in a single verse. They're in the lines at the beginning of this article, and to hear her sing them, you know it's what's gonna happen.

Raider Roundup

Mortar Board will meet at 7 p.m. today in room 209 of the Tech Union. Officers will meet at 6:30 p.m.

Delta Phi Epsilon, national professional foreign service fraternity, will meet today at 7 p.m. in the Mesa Room of the Tech Union. Guest speaker will be Dr. Roger M. Toub, department of economics. Dress will be coat and tie.

Rodeo Association

There will be a meeting of the Rodeo Association today at 7 p.m. in the Agricultural Engineering Building. Horace McQueen, KLBK farm editor, will speak on Australia.

Pre-Veterinarian Society

All persons interested in veterinary science are invited to attend a meeting today at 7 p.m. in room 165 of the Vet Science Building.

Schools receive \$7,500 grant

An unrestricted grant of \$7,500, to be allocated to three Tech schools, was presented Wednesday to Tech President Grover E. Murray by Humble Oil and Refining Company.

The grant was allocated, in equal shares of \$2,500, to the Schools of Business Administration, Engineering and Geosciences.

Byrd said the grant was part of \$363,000 being awarded by the Humble Oil Education Foundation to 89 institutions of higher learning during 1967-68.

Geography students form local chapter of honorary

Gamma Theta Epsilon, a professional honorary society in geography, will be established on the Texas Tech campus Nov. 9.

The national society, started in 1931, now has 125 chapters with 16,400 members according to Dr. Karl Wuersching, faculty advisor for the society.

Gamma Theta Epsilon maintains a loan fund for graduate study purposes which is available to all members. Also, two scholarships of \$500 each are awarded annually to qualifying students.

Although it has been offered only two years on the Tech campus, it has already reached the degree-plan level. Much of this advancement is due to Dr. Wuersching who has provided much of the enthusiasm needed to initiate the Texas Tech chapter of Gamma Theta Epsilon.

Friday is the deadline for senior class members to have pictures made for the 1968 edition of La Ventana.

Any student who has not had his picture made may do so at either Koen's Studio location 8 a.m. to noon and 1 to 4 p.m. daily.

Appointments are not necessary.

NEW! electron-positron accelerator being built at Livermore Laboratory

LRL - Livermore discovers "mendelevium 258" The heaviest isotope known to man!

Engineers build a graphite engine to operate continuously at 2700°F for more than 270 hours

These are a few of the accomplishments of scientists and engineers at Livermore. These pioneers of research work on the technology of tomorrow in virtually all phases of nuclear energy.

If the following information is of interest, contact your placement office and arrange an interview with our representatives when they visit your campus.

What are we?— One of the largest scientific research laboratories in the world with a staff of over 5,600 scientists, engineers and support personnel engaged in virtually all phases of nuclear energy research.

Where are we?— Our Livermore facility is located in a pleasant suburban area within easy driving distance of the San Francisco Bay Area.

What do we offer?— A tremendous variety of unusual stimulating research problems; a large number of outstanding technical associates; a vast array of equipment including some of the most advanced computers in existence; hard work.

What kind of people are we seeking?— Scientists, Engineers, Mathematicians at all degree levels who have the ability and desire to contribute to our research effort.

Current openings at all degree levels include:

Theoretical and Experimental Physicists • Hydrodynamics • Nuclear physics • Fission and fusion reactions • Astrophysics • Geophysics • Solid state physics • transport theory

Electronics Engineers • Systems design and development • Instrumentation • Computer technology • Field systems engineering

Mechanical Engineers • Advanced machine design • Analytical and experimental stress analysis • Applied mechanics • Environmental testing

Hostesses choose 20

Twenty upperclass coeds have been chosen as Texas Tech's new official hostesses.

They are Jeanne Affleck, Mary Lynn Anderson, Carla Bell, Judy Caldwell, Pat Coll, Mary Coleman, Gwen Connelley, Carla Dunn, Susan Elle.

Sharon Haralson, Janis McDuff, Gwen Henry, Tina Heuer, Susie Jeter, Diane King, Elizabeth McAninch, Betsy McCraw, Kathy Moore, Diane Naylor and Jackie Scott.

Hostesses are chosen each year by the AWS Executive Council and the Chairman of the President's Hostesses.

Among their duties are welcoming visitors to the campus, serving as hostesses in the Press Box at home football games and assisting with various administrative functions.

Coach's disease alarms schools

Exposure to spinal meningitis affected hundreds of Lubbock residents Monday.

Sherm Pruitt, assistant coach at Coronado High School, was admitted Sunday night to Methodist Hospital after complaining of a severe headache. His condition was diagnosed as spinal meningitis.

Immediately all 40 members of the Coronado football team and eight coaches were contacted and given medication.

NOTES WERE SENT home to the parents of all 634 students of Maedgen Elementary School after it was learned that Pruitt had served candy at the Maedgen carnival Friday night. The notes resulted in a flood of calls to the school switchboard.

It is estimated that nearly 1,000 people were exposed to the disease. However, it was learned Tuesday morning that Pruitt was not afflicted with the contagious form of the disease.

Andy Williams, who has been described as the best-selling vocalist in the recording industry, has a philosophy so contrary to that of his hectic business that it marks him as a most unusual individual.

Williams says, "I've never been in a hurry to achieve success!" Despite this feeling, success has been in a hurry to capture him. He has proved to be an outstanding performer in a multi-faceted career encompassing television, recordings, night clubs and concert tours, one of which is bringing him to Lubbock.

WILLIAMS' TALENT has catapulted him to the top of the entertainment world. But make no mistake about his easy-going attitude. He possesses a tremendous desire and capacity to work hard for any success he might want to achieve. Today his albums are sold at the rate of 25,000 per week.

In only five short years, "Moon River," "Days of Wine and Roses," "Call Me Irresponsible," "Dear Heart," "Born Free," and four other albums have brought to a total of nine

Opera tickets ready Monday

Tickets will be available Monday for "Curlew River," an opera based on the medieval Japanese Noh-play "Sumidagawa" by Juro Montomasa.

Benjamin Britten's "Curlew River" is slated for next Thursday. Tickets are available to students upon presentation of IDs, as the opera comes under the auspices of Tech Artists Course.

The opera will be preceded by a short orchestral work. The touring company includes five soloists, a male chorus and a small instrumental ensemble.

the number of Gold Records he has won for individual album sales exceeding \$1 million.

So Andy Williams must be something special. He is a mixture of sophistication and simplicity. His mellow baritone voice and infectious sense of rhythm appeal to both young and old. It is a phenomenon in show business today, but it comes from a long career in the public eye.

HIS CONCERT TOURS have been complete sell-outs. A Boston promoter once had to take ads in the metropolitan newspapers apologizing to those fans who were unable to get in to see Williams.

"Time" Magazine lists him as the country's foremost box office attraction at fairs, where he has drawn as many as 25,000 paying customers a night.

In Japan, Andy played to 14,000 delighted fans in a stadium that had once played host to 9,000-strong audience for the Beatles.

Now he brings his talents to Lubbock. He and oscar-winning composer Henry Mancini will play a one-performance-only concert Tuesday in the Lubbock Municipal Coliseum. Tickets for the event are still available at Furr's Family Center for \$3.50 and \$4.50.

SAM RIBBLE FLORIST

Reader's theater to present Shaw

"Don Juan in Hell" will be presented Nov. 11-12 under the direction of Vera Simpson at 8:15 p.m. in the old Speed Building Theater.

The sequence is the third act of Bernard Shaw's "Man and Superman." The Reader's Theater production complement the major University Theater production of "Man and Superman," which opens Nov. 10.

The "Don Juan" sequence will not be included in the University Theater production.

The cast includes Gary Haj as Don Juan; Margot Purdy as Donna Anna; Morris Burr as the devil; and Kenneth Rhymes as the statue. Bever Lumpkins will narrate. Admission will be 50 cents.
