House members balk

AUSTIN — Texas House members balked Wednesday at Senate changes in a bill making campus riots a crime. Only one "no" vote was heard as senators passed 15 statewide and local bills in about an hour, their busiest lawmaking day.

Rep. Joe Shannon of Fort Worth said a Senate amendment to his college disorders bill, incorporating a recent Supreme Court decision guaranteeing the right of peaceful protests on campus, is "vague, indefinite and needs cleaning up."

The amendment was put on Shannon's bill Tuesday after senators complained of the way the bill was written when it came to the Senate after House passage.

Sen. Oscar Mauzy of Dallas said the amendment tracked Justice Abe Fortas' opinion "word-for-word."

Shannon, Reps. Temple Dickson of Sweetwater, Jim Nugent of Kerrville, Felix McDonald of Edinburg, and Tom Bass of Houston were named as House members of a conference committee, the first of the session, on the campus bill.

Demonstrations continue

TOKYO — Anti-Soviet demonstrations went into a third day Wednesday in Peking but a Japanese correspondent said they were carefully controlled to avoid further worsening of relations with Moscow after a battle on the Manchurian border.

The demonstrators were kept away from the Soviet Embassy, said Ieshige Akioka, correspondent of the newspaper Asahi. The crowds had surged around the embassy Monday shouting anti-Russian slogans.

Akioka gave no estimate of the crowds, but the Yugoslav news agency Tanjug in a Peking dispatch said a million Chinese demonstrated.

The dispatch said the Chinese people were told that Chinese guards returned fire after they were fired on by Soviet border guards Sunday at an island in the Ussuri River on the Chinese-Siberian border.

Berliners vote

BERLIN — Justice Minister Gustav Heinemann, a pacifist-minded Social Democrat, won the presidency of West Germany Wednesday in a West Berlin election hotly contested both among the electors and by Communist East Germans who ring the city.

The West Germans successfully defied ominous Communist pressures against the electoral demonstration of their presence and rights in the former German capital. It was the fourth such election since 1954 in West Berlin, which the Communists contend is a separate and independent German entity.

With Russian backing, East German troops blockaded all roads in and out of West Berlin for four hours while 1,023 members of the Bonn Republic's Federal Assembly wrestled via the ballot box with the problem of who was to succeed President Heinrich Lübke July 1.

Program set up

WASHINGTON — President Nixon set up a Minority Business Enterprise program Wednesday aimed at giving blacks, Mexican-Americans and other minorities equal opportunity "at the top of the ladder as well as on its lower rungs."

"Involvement in business has always been a major route toward participation in the mainstream of American life," Nixon said. "Our aim is to open that route to potentially successful persons who have not had access to it before."

Nixon said encouragement of minority business activities is one of the priority aims of his administration. He said he will establish by executive order a new Office of Minority Business Enterprise to be headed by a not-yet-named assistant secretary of commerce.

Astronauts man machine

SPACE CENTER, Houston — Two Apollo 9 astronauts, manning America's moon machine for the first time Wednesday, moved back into the sturdy command module after firing a rocket blast that peeled off skin from the fragile moon landing craft.

Air Force Col. James A. McDivitt and civilian astronaut Russell L. Schweickart spent more than seven hours aboard the lunar module, still docked to the command module.

The third crewman, Air Force Col. David R. Scott, stayed aboard the command module. He acted as gatekeeper for his teammates' transfer, opening and closing the three-foot tunnel connecting the two spacecraft.

Schweickart became the first American to transfer from one spacecraft to another in space. He was the first to enter the lunar module and the last to leave.

McDivitt fired the 9,870-pound thrust descent engine on the base of the lunar module and manually controlled part of the burn.

The rapid acceleration peeled film-like skin from the outside of the lunar module. Both McDivitt and Scott reported seeing pieces of the material fly off.

Atmosphere tense

PARIS — The Viet Cong offensive in South Vietnam and a U.S. threat of retaliation have created a tense atmosphere for the seventh full-scale session of the peace talks Thursday.

President Nixon said in Washington Tuesday that whether the offensive requires a U.S. response "is a decision we'll be making very soon." The question being asked here was whether retaliatory action, all-out or limited, might leave the future of the talks hanging in the balance.

As the four delegations prepared to gather again at the International Conference Center for talks that have produced little but deadlock, few expected that what has been started in Paris would be bombed or shelled out of existence by the two sides in South Vietnam.

Nixon said the United States was not acting precipitately. But he committed Washington to some sort of responsive action if the shelling attacks continue.

Illegitimate births number over 275,000

By KATHY FOWLER
Staff Writer

"We live in a sex saturated society where everything is sold with a sex symbol, whether it be toothpaste or mouthwash," says Dr. Carey B. Looney, executive director of the Smithlawn Maternity Home in Lubbock.

Last year, over 275,000 illegitimate births were reported in the United States, and an estimated one million abortions were performed.

On the local level, figures at the Lubbock Public Health Department show that Lubbock County had more than 400 illegitimate births in 1968.

Looney counsels approximately 70 unwed mothers a year who come to the home, not only for physical care, but for psychological understanding and spiritual support.

In discussing unwanted pregnancies, Looney feels sex education is not concerned enough about the consequences of pre-marital sex and that a change of emphasis of sex in our society is needed.

He says today's youth should not feel they have to be a James Bond or a Bridget Bardot in order to succeed socially.

In the eight years of its existence, Smithlawn has housed more than 400 girls between the ages of 10 and 32. Most of the girls are in the 16-19 age bracket, or in the last two years of high school or the first two years of college.

Of these girls who have come to Smithlawn, only one or two per cent have been raped. Most pregnancies occur among couples who have known each other a long time.

Looney says that "twice as many engagements are broken among couples who have had pre-marital intercourse and that many a man's desire to marry decreases when his girlfriend sleeps with him. For most girls the opposite is true. After intimate relations, they often have a greater desire and feel a stronger need to marry."

Statistics have also proved that couples who have had intercourse before marriage are more likely to be divorced, separated, or indulge in adultery.

Unwanted pregnancies are not limited to any one race or color, or to any one socio-economic group.

Mrs. Hester Moore, a public health nurse in Lubbock, says that girls in the lower income group, which is predominately Negro and Spanish, keep their babies because of strong family ties.

Unwed mothers in the middle class usually give their babies up for adoption, while approximately 90 per cent of the girls in the high income group have abortions.

Girls in the middle and high income groups base their decision on the social stigma that will be attached to them and the baby. Most feel that they and the baby will have a better chance socially if the child is adopted.

In the past 25 years, illegitimate births among teenagers have doubled, while births among those in the 20-24 bracket quadrupled in the same period.

What is the cause of the rise in illegitimate births? Looney says some attribute it to the new morality or sexual revolution that sanctions pre-marital sex. Others attribute it to a breakdown in ethics.

Looney says that there is no such thing as the new morality. He says that nothing goes on today that didn't generations ago; that discussion of sex is just more open now than it was then.

Rev. Joe Barnett, minister of the Broadway Church of Christ, says that today, strong voices advocate experimental sex, and that twenty years ago, no one would have spoken boldly before a crowd of people and advocated premarital re-

lationships. He feels that some young people are looking for someone to say "go ahead and do what you want to do."

Is the United States still living under a double standard where society winks at male promiscuity but condemns the promiscuous female?

Dr. John Cantelon, chaplain of the University of Southern California, said in a November interview with a Los Angeles Times reporter, that the double standard is now a thing of the past; that ethics is now a matter of discrepancy between 'ought to be' and 'is'.

Msgr. J. Fitzgerald, pastor at Christ the King Church in Lubbock, says that the double standard is a fact that youth will have to accept. Illicit sex may be indulged in but that does not make it right.

Changes are evident in American society. Illegitimacy is rising, some universities now have co-educational dorms, and unmarried couples are openly setting up housekeeping together.

If this is a sexual revolution and the new morality is here to stay, the only way the problem of illegitimate births could be completely solved, says Looney, is a pill that would eliminate all human emotion and response.

Allows one exception

Housing office vetos soliciting

By JAMES BOYETT
Copy Editor

Tech's housing office does not allow soliciting in the residence halls — with one exception.

All other forms of soliciting — such as letter writing committees and petitions — are out.

Because of this the letter committees, who have been trying to organize a campaign to inform Texas legislators of student disapproval of Texas Tech University, were not allowed to set up tables in the dorms last week.

Texas Tech University is the name-change choice of the Tech Board of Directors. The letter writing committees are advocating Texas State University.

Guy Moore, director of residence halls, said Tuesday The Lubbock Avalanche-Journal is the only organization allowed to solicit in the dorms.

Moore said The Avalanche-Journal is being given preferential treatment because the students in the dorms have said they want a daily newspaper delivered to them.

He said it is hard to draw the line between the good or the bad solicitors — so the housing office has banned all soliciting from the dormitories — except for the local newspaper.

He also said the letter writing committees, which give encouragement to the passing students, are considered solicitors. That is why they were not allowed to set up shop last week.

Meanwhile across campus in the administration Building, another official, who wished to be unnamed, said it was only a communication breakdown that kept the committees from setting up tables in the dorms last week.

The official said he had a meeting last week with a representative of the Men's Residence Council and with one from the housing office to determine a policy on the campaign.

He said during the course of the conversation he inferred he would allow the students to set up tables — so long as they didn't offer encouragement to the students passing by. However, he left town before he could relay his final decision to the housing office.

Because of the inferred decision, the letter writers who set up tables in the dorms last week were evicted before they could do much work.

One student, who manned a table last Thursday, said a dorm supervisor advised him to tear down the table before he got into trouble with the school.

The anonymous official said he would clear up the matter with the housing office as soon as he got back into town today or Friday.

When informed of the fact that The Avalanche-Journal is allowed to solicit in the dorms, he said he was under the impression the local paper was being treated like any other organization and not allowed to have verbal contact with the passing students.

However, Moore said The Avalanche-Journal is allowed to have verbal contact with the students — but only on the first two days of classes. He said after the first two days of classes no more soliciting is allowed in the dorms.

Moore said letter writing materials can be placed on tables in the dorms and as long as there is no one at the tables to offer encouragement, they will not be disturbed.

Clearing up another point, Moore said no petitions, of any nature, can be circulated in the dorms. Not even if they are pinned to the bulletin board are they legal, he said.

Petitions have been circulated recently in the dorms, dor-to-dor. The main one has been about the petitioning of the Board of Directors by the students to rehire Coach Gene Gibson.

ANY MORE WISIN' OFF AND—Lubbock sophomore Perry Kingsbery (far l.) keeps a close watch on Aspermont junior David Frazier (seated) while Houston junior Nicky Sample (far r.) makes sure Ralls freshman Keith Carlisle doesn't try any funny business. Looking on are

Fort Worth senior Mark Madlan (center l.) and Dallas senior Joe Jordan. These saddy-looking banditos are members of Pi Kappa Alpha which is presenting the 12th annual Pike Fiesta this Saturday in Fair Park Coliseum. (staff photo by Richard Mays)

Opens today in Tech Union

Registration signals beginning of WAC

Tech's second World Affairs Conference opens today with Bolivian Ambassador to the United States and the Deputy Secretary of State heading the list of speakers for the three-day conference.

"Latin America: Past, Present, Future" will be the theme of the conference with five sessions open to the public.

Thursday activities begin with registration in the Tech Union from 8:15-10:30 a.m. followed by the welcome and first address in the Main Ballroom. Dr. John L. Brown, cultural attaché to the U.S. Embassy in Mexico City will speak to the 10:30 a.m. session open to the public.

The first two seminars will be at 1:15-2:45 and 4-5 p.m. respectively, and are open to delegates only.

Concluding opening day activities, Dep. Sec. of State Robert E. Culbertson will speak at the conference banquet at 7 p.m. in the Main Ballroom.

Culbertson, who entered government service with the social security administration, has served in Greece on a special assignment to assist in the development of the Greek Social Insurance program, and on A.I.D. (Agency for International Development) missions in Peru and Vietnam. He is a former director of industry, government and technical services for the Institute of Inter-American Affairs and from 1956-58 was vice president of the American University in Cairo, Egypt.

Fortuna Calvo, editor of "Vision," a multilingual magazine on Latin American issues, will speak at the

9 a.m. session open to the public Friday.

Miss Calvo, a native of Peru, studied journalism at the Catholic University in Lima before coming to the United Missouri School of Journalism, graduating with honors at the age of 19. Now, at 33, she is considered one of the youngest editors of an international news magazine, and is the only woman

Student allocations still available in government office

Deadline for applications for student services fee allocations is 5 p.m. Friday in the Student Government Office, room 161, Administration Building, 161 Administration Building.

Almost \$26,000 is still available for student organizations and teams that represent Tech in some way, such as debate, soil judging, etc.

Fewer applications have been received this year than last year when 30 organizations were awarded funds.

All applications will be reviewed by the Student Senate Allocations Committee. Appropriations will be awarded on the basis of activities, how much of the student fee they used last year, estimated expenses and outside sources.

Hearings by the committee will be finished by March 27, when results will be sent to the college allocations committee. The committee will make further recommendations for allocations.

in the top editorial post of such a publication. Editorial offices of the magazine, which is published in English, Spanish and Portuguese, are in New York City.

Leon Volkov, Soviet affairs editor for Newsweek Magazine, will speak on "Communism in Latin America" at the 1:30 session Friday in the Main Ballroom which is open to the public.

Russian-born Volkov, who will be returning for his second conference lecture, served in the Red Air Force during World War II. Following his escape to the West in 1945, he came to America and, in 1954, became a U.S. citizen. He had served as consultant on Soviet affairs to several agencies of the U.S. government before joining the staff of Newsweek.

The public is invited to attend the general sessions. There will be no admission charge.

The third and fourth seminars will be Friday 10:30 a.m. to noon, and 3-4:30 p.m. respectively and are open to delegates only.

The fiesta and dinner originally planned to conclude Friday activities has been cancelled according to Mrs. Dorothy Pijan, program office director.

Ambassador Julio Sanjinez has accepted an invitation to address the 11:15 a.m. Saturday general session, said Cathy Obriotti, student director of the three-day series of lectures and seminars sponsored by Tech Union in conjunction with the International Center for Arid and Semi-Arid Land Studies.

Media expert to speak before advertising group

Mrs. Irene B. Runnels, expert in marketing and merchandising in the broadcast media, will speak at a joint meeting of Alpha Delta Sigma, men's advertising fraternity, and

Gamma Alpha Chi, women's advertising sorority.

Mayor W. D. "Dub" Rogers will make Mrs. Runnels an honorary citizen of Lubbock at the meeting in the Arnett Room on the second floor of the Citizen's Tower at 7:30 p.m. Thursday.

The new general manager of KKDA radio of Dallas, Mrs. Runnels has received the 1963 Robert E. Eastman Award as the outstanding woman in radio and television in the Southwest; the 1965 Matrix Award, one of the highest awards for women in the field of communications; and was named Advertising Woman of the Year in 1966 by the Dallas Advertising League.

Mrs. Runnels served as president of the Dallas Chapter of American Women in Radio and Television two terms, and was director-at-large two years in the national organization. She is a permanent member of the National Board of Trustees of the Educational Foundation of AWRT.

Letters

SAO president urges attendance at rally

The rally which was held Friday in support of the name change made evident the student unrest and dissatisfaction with many of the administrative policies on this campus.

Broad base support exemplified by the wide diversity of groups represented at the rally indicate very clearly that there are no longer isolated pockets of dissatisfaction, and it is now apparent that the student body as a whole is willing and prepared to accept the responsibilities which are required of us so that new ideas may become implemented for just and equitable changes which must come about on this campus before

Texas Technological College can become a university in the full meaning and essence of the word.

The 400-500 students who participated in the rally Friday stood in the avant-garde of this movement for recognition of the human rights of all students at Tech. Through their efforts, we are now standing on the threshold of a major turning point of recognition of the individual and meaningful interaction.

The 400 have been able to secure (as you probably well know by now) a general meeting with President Grover Murray on Monday from 2:30 to 4 p.m. in the Union Ballroom. This meet-

ing, as I stated, is the result of the sincere efforts of a representative cross section of the concerned student on this campus.

Now fellow students, it remains for us to follow through — for the entire student body to attend the Monday meeting with Dr. Murray.

We have now, perhaps for the first time, an opportunity for meaningful, progressive and constructive dialogue with the administration. However, this dialogue is only the beginning, for out of this dialogue we hope that the necessary changes on this campus will come about which we hope will have the end

result of benefiting the entire intellectual community and develop a rapport between the three major elements of the community (students, faculty and administration), the likes of which this nation or any country of the world has ever seen, and once developed will set the example for every college and university to aspire to our superlative example.

What I am asking of you is an immense amount of hard

work, and our reward for this will be the knowledge that we Texas — University the greatest and most emulated university in this country has ever known.

Only you can make this come about; only you can make this dream a reality. So why not get in on the ground floor Monday, 2:30 p.m., Union Ballroom — all 18,000.

Arthur Yarish, president Student Action Organization

Death of attempt seems near

The death of a rather brave attempt to influence the administration and the state government seems near.

The fight for Texas State University will be looked on someday as the first great step to re-establish the goodness of a people. The people are the future students of Texas Tech University.

What the students of the now generation are proposing is the desire for change. I hope this desire will not die with its first failure.

President Riddle has had the interest of the student in his coat pocket and has carried it to the people that count. The

people that count have had the money in their coat pockets and have given us a new name.

But it is now that we celebrate a victory—a victory of student voice. For the first time, over the shout of administration, the best of the student has been heard. The precedent has been set for the future.

Today we talk of victory in failure. Tomorrow we cannot. "If I win, all glory is mine, if I lose, all the angels in heaven saying I was right, will make no difference."

Tom Turbiville

KTXT FM needs structure

Tech's radio station, KTXT-FM, is about to lose its faculty sponsor, William M. Shimer, speech instructor and KTXT-FM sponsor, is resigning from the Tech faculty this year.

Leaving with Shimer is his first class radio telephone license without which the station cannot operate. Unless someone comes along with such a license and agrees to be responsible for the actions of the students who operate the station, there will be no campus radio station next year.

KTXT-FM exists as a campus stepchild as it is. The speech department does not have authority over it. There is no governing board for the station. Station General Manager Phil Poynor says he "just assumed his position."

Poynor says his only connection with the speech department is that it pays him a \$40 a month salary as "sort of a lab instructor" for Speech 317, Radio and TV Activities. He got his job because he knew the right people in the speech department and they knew him and he took over by mutual consent.

His selection was haphazard, his authority undefined, his responsibility vague.

It seems logical that the campus radio should have a structure parallel to the campus newspaper. Yet the staff of The University Daily is responsible to a full-time director of student publications and to the Student Publications Committee.

The committee chooses the editor on the basis of qualifications and personal interviews. It can also remove the editor. The director of student publications oversees the operation of the paper, though editorial policy and news content is entirely in the hands of the student staff.

It is strange that a radio station, which must be licensed by the Federal Communications Commission and is subject to its regulations as well as federal statutes, claims, as Poynor pointed out, "absolute freedom by default."

Besides providing the campus with Top 40 music, KTXT-FM has presented public affairs broadcasts this year on such campus issues as the name-change and cheerleader behavior at football games and it has broadcasted the University Speakers Series and freshman basketball games.

We hope it can find someone with the proper license to stay on the air and we think a structure of authority and responsibility should be set up so the station can discard its air of illegitimacy and capitalize on the communicative potential it has illustrated this year.

Holiday Magic

Needed: Managers, saleswomen. We will train you for positions with distributors of Holiday Magic cosmetics products, full or part time. Small investment brings you generous commissions. Unusual opportunity in America's fastest growing industry. Must have good appearance, intelligent manner. For appointment call: Carolyn Kelly at 762-9050.

Broadway play ends civic season

Seats for the stage engagement by Civic Lubbock of the Broadway comedy hit "You Know I Can't Hear You While the Water's Running," coming to Municipal Auditorium Wednesday at 8:15 p.m., are now on sale in the Auditorium box office from 9 a.m. to 5 p.m., are \$5.50, \$5, \$4.50, \$4 and \$3.50.
Starring Imogene Coca and King Donovan, "Water" is playwright Robert Anderson's comic comment on sex in marriage, from young couples to middle-aged spouses to partners past the prime of life.

Students may attend the single performance for \$2.50. Seats

Radio 'Hotline'

Radio KTXT "Hotline" will broadcast a taped interview with Coach Gene Gibson at 7 p.m. today.

According to Wes Wallace, host of Radio "Hotline", Gibson will comment on his job and what led to the non-renewal of his contract and his plans for the future.
The interview was taped Wednesday as Gibson will be in Dallas today, said Wallace.

Following the interview, the hotlines will be opened until 7:30 p.m. KTXT is located 91.9 FM on your radio dial.

ROSE PRINCESS—Miss Nancy Prosk, sophomore elementary education major from San Antonio, was presented as Sigma Nu's White Rose Princess for February at the Swahili Rumble Party Feb. 15.

Future cities shown

The city of the future and even some futuristic cities of the present came to Lubbock and Tech Tuesday in an exhibition of urban designs displayed in the West Texas Museum.
The exhibition, sponsored by the Tech Artists Course Series, was originally scheduled to open Sunday, but delays in shipment from the University of Texas postponed the opening until Tuesday. It will run until March 30.
Solutions to problems such as pedestrian traffic, automobile storage, air conditioning and many other 20th century difficulties are suggested in the exhibition, "The Art of the City."
Included are some 20 projects, primarily photographs and drawings, representing the imaginative thinking of such designers as Le Corbusier, Yona Friedman, Peter Cook, Buckminster Fuller and Paolo Soleri.
The designs span nearly 50 years and include examples from the United States, Canada, France and Great Britain.
Many of the projects offer total innovations in construction techniques.
"Metro-Linear," by Reginald Malcolmson, breaks away from the traditional centric planning solutions by suggesting a system of urban expansion at a regional scale.
"Plug-in City," designed by Cook, is based on the concept of rapid obsolescence. Ron Heron's "Walking City" presents a design for a nomadic city which utilizes the independent life support systems developed by space technology to free the city from a static life in a limited surrounding.
"Paris Spatial" is an idea presented by Friedman for the renewal of Paris by the use of a space frame, allowing the activities of the city to continue as expansion moves upward into the air space above existing structures and streets.
Soleri's contribution is "Mesa City," a theoretical proposal in which environment is architecture merge in a sculptured city rising out of the desert of the southwest United States.

Engineering and Science at IBM

"The interdisciplinary environment keeps you technologically hot."

"Working in data processing today pretty much means you work in a broad spectrum of technologies," says Nick Donofrio.
An Associate Engineer at IBM, Nick is a 1967 graduate in Electrical Engineering. He's using his technical background to design circuits for computer memory systems.
"Circuit design used to be a narrow job," he says. "Today it can take you into the front yard of half a dozen different fields. In my job, for example, I work with systems design engineers, chemists, physicists, metallurgists, and programmers."

Nick describes a hypothetical case history: "A memory systems man comes to me with memory circuit requirements. Before I can start designing the circuit, I go to see a physicist. He helps me select an appropriate technology for the monolithic circuit."

"As the design develops, I work with a test group and also check back with the systems and semiconductor people to make sure I'm on the right track."

Keeping up
The interdisciplinary environment at IBM helps you keep up to date technologically. As Nick puts it, "You're constantly exposed to what's happening in other fields."

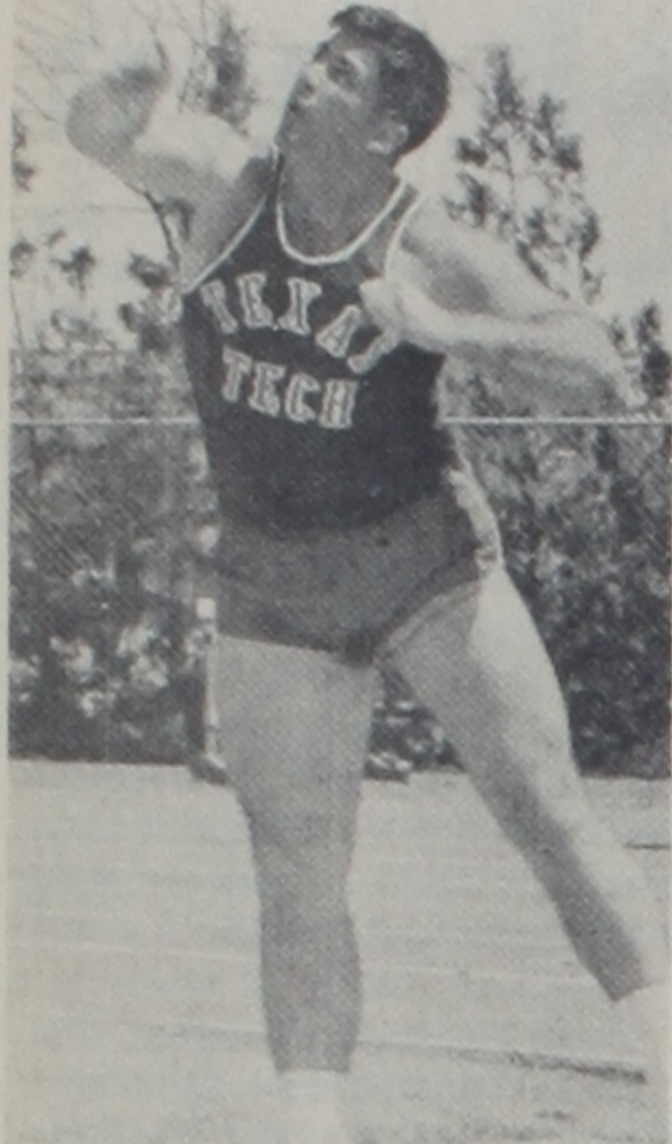

IBM needs technical graduates to work in research, design and development, manufacturing, product test, field engineering, and space and defense projects. We also need technical people in programming and marketing.

Super Joe will not quit football for movie career

NEW YORK (AP) — Joe Namath, transformed into an instant matinee football idol by the New York Jets' Super Bowl victory over the Baltimore Colts, figures to be in more football movies than the Hollywood kind next season.

Rumors have been following the Jets' quarterback from New York to the Far East to Miami that he might give up his lucrative football contract for an equally lucrative movie career.

But one of his advisers said Wednesday Namath has no such thought in mind.

"That's not true," Sonny

Werblin said of the reports. "He's a football player. He's going to play football as long as he can. He has no idea of doing anything else."

WERBLIN, former partner and president of the Jets, who originally signed Namath to a \$427,000 contract, said the 25-year-old superstar has received movie offers from Metro-Goldwyn-Mayer, Paramount, 20th Century Fox, Bob Hope and some others.

"But we haven't seen the scripts yet," he told The Associated Press from his winter home in Golden Beach, Fla.,

adding that a couple of the offers call for the movies possibly to be made before the 1969 football season.

Werblin, who's helping advise Namath along with attorneys Mike Bite and James Walsh, also said the Jet has received a number of offers to make endorsements.

NAMATH and his advisers also are negotiating with a major publishing firm for a book. They will discuss all of the offers at a meeting in Florida this weekend, and an announcement could be forthcoming next week.

OOF—Defending SWC shot put champion Ron Mercer will be among the Tech tracksters journeying to Laredo Friday for the Border Olympics.

Lynch 'in the dark' about future at Tech

By JIMMY SNOWDEN
Sports Editor

"I think another head basketball coach will be named in a very few days," he added later.

Tech basketball assistant Charley Lynch, in a telephone interview Wednesday, added his name to the list of those who are in the dark about his future at Tech.

"At the present time, it doesn't seem likely that I'll be appointed (as head basketball coach, replacing Gene Gibson)," Lynch said.

Tech golf team starts new year at Laredo meet

Tech's golf team tees off today at the Border Olympics in Laredo, for the linksters' first action of the year. Approximately 30 schools from three states including top Texas independent, Houston, and last year's SWC champ the University of Texas will participate in the tourney.

Tech coach Gene Mitchell took six of his 20-man squad to the three-day affair.

PLAYERS REPRESENTING Tech at the meet are: Ronnie White, Corpus Christi senior; Jim Arnold, Tulsa senior; James Whitteker, Sweetwater junior; John Shepperson, San Angelo junior; Brad Wilemon, Arlington senior and Lee Moss, Lubbock freshman.

Mitchell cited Texas as the team to beat.

LYNCH SAID he is now considering several possibilities: "I have received offers from both business and coaching areas. Right now, though, I'm not sure whether I'll stay in coaching — or get out.

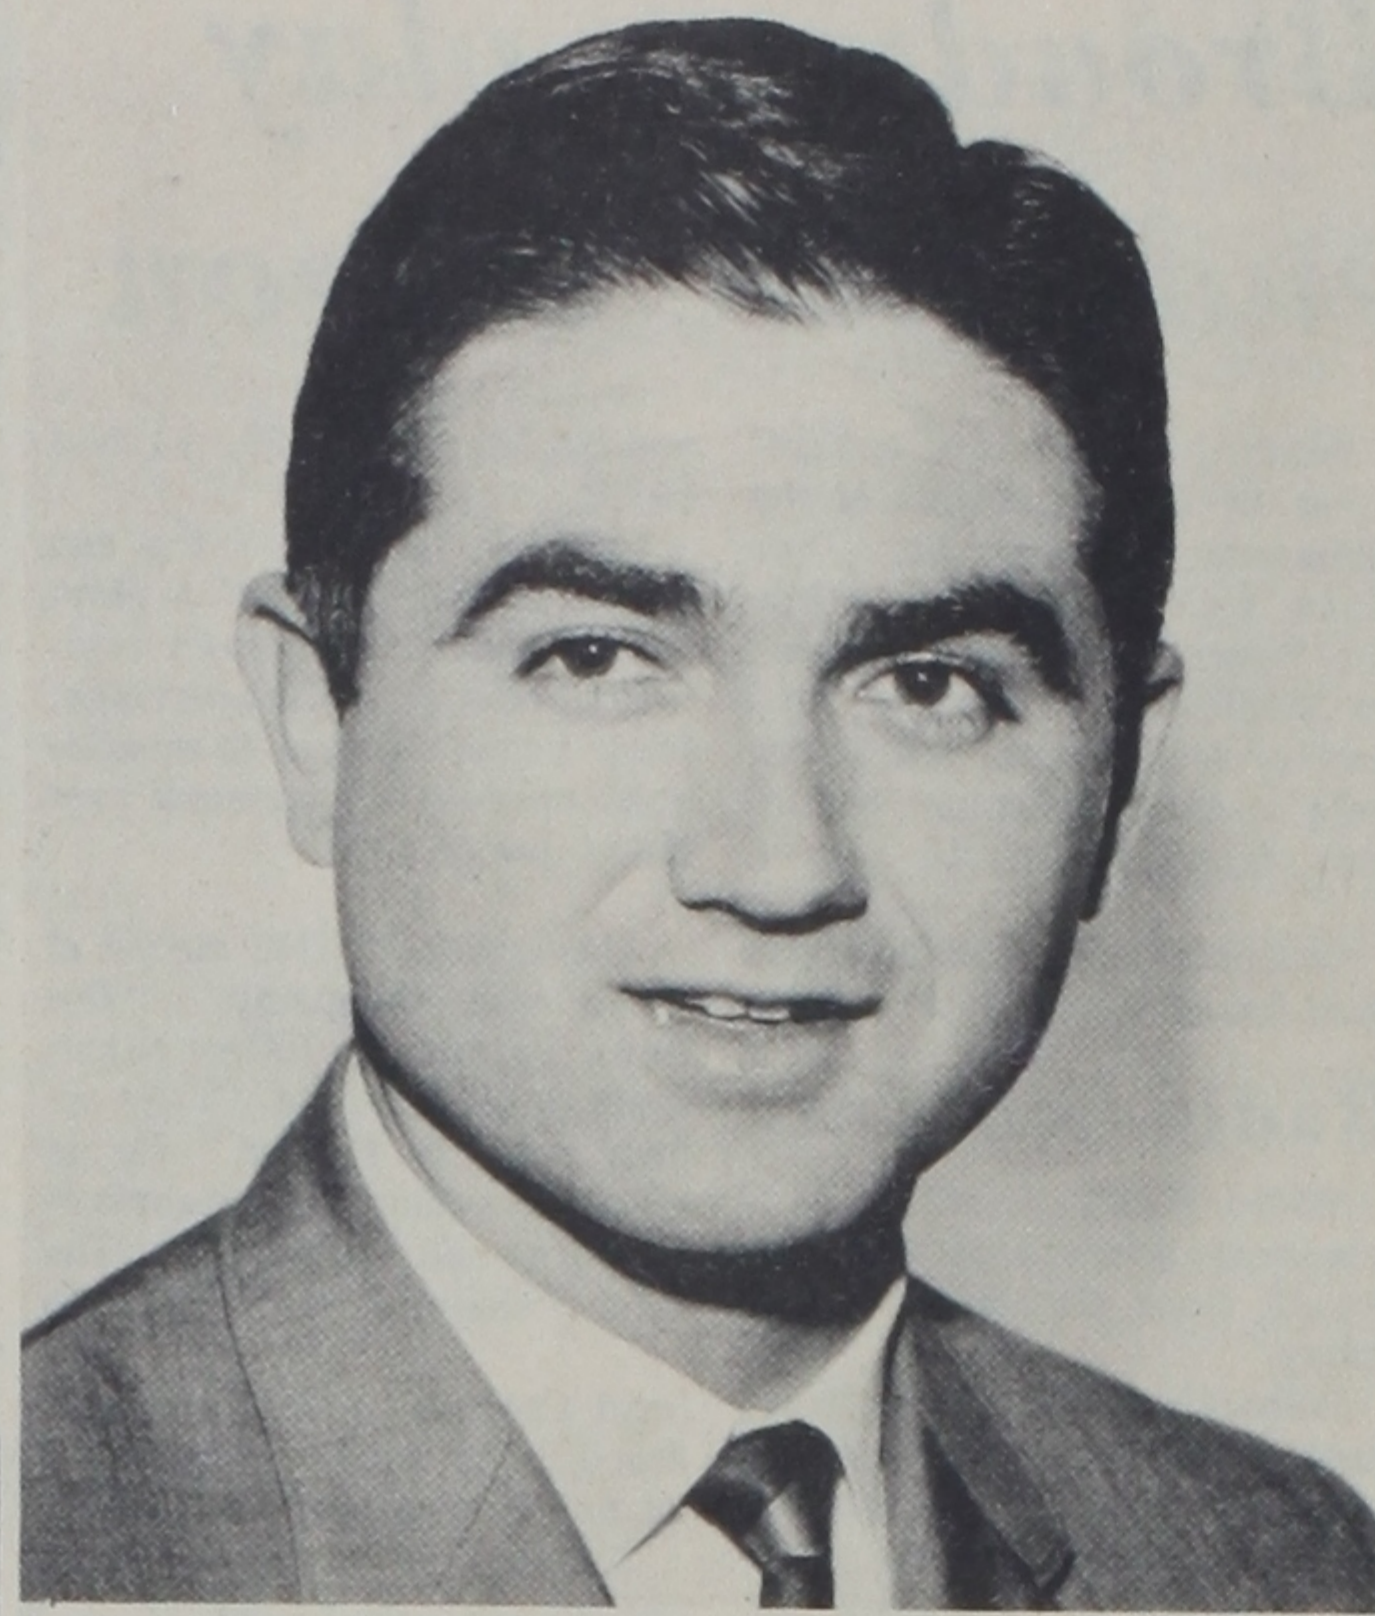

"While Tech is making its decision, I'm contacting those people who have made offers to me," he said.

Athletic Director Polk Robison said Wednesday that contrary to some reports, Lynch has not been dismissed, nor has his contract been reviewed. Lynch's contract expires May 31.

WHOEVER IS named head basketball coach probably will have the privilege to select his own assistant," said Lynch. Should someone other than Lynch be given the job, that person might still ask Lynch to retain his present post. Lynch said, "There are several possibilities and this is one that I am considering."

LYNCH GRADUATED from Tech in 1959 as a three-year letterman. During his final season as a Tech basketball player, he was named to some All Southwest Conference teams.

Lynch, Gibson's assistant for eight years, married Kay Woody in 1962. His wife is a former Tech cheerleader. At Sudan High School, Lynch was an all-around athlete.

SUMMER JOBS

Camp Waldemar for Girls Hunt, Texas
Interviewing for Counselors March 11 and 12 at Placement Service. Women sophomores, juniors, and seniors with special skills in individual sports, arts and crafts, drama, campcraft, office work, contract bridge, dietetics. Two 6-wk. sessions. Make appointment.

Come on Up!

Get on top of your studying with Evelyn Wood Reading Dynamics. The only course that offers a **Lifetime Membership** and a **Guarantee**.

Spend Less Time Reading

In just eight weeks you can be a successful Dynamic Reader. You will be able to cover your reading requirements three to ten times faster than before, with full comprehension.

PAT McKEAN, Tech Basketball player says, "Reading Dynamics has provided me a skill which has helped to reduce my study time considerably. Being in athletics I needed something to cut the time, and Reading Dynamics did it."

Make Better Grades

Our Reading Dynamics course is much more than just a speedreading class. Your retention improves.

We spend at least one class period teaching you new study techniques associated with dynamic reading.

By being able to read rapidly you can go through a given book two, or three times faster than you

normally read and capture the flavor of the book.

We teach you how to preview books. Previewing a book is a way of understanding it before you read it.

We teach you how to read trade journals, technical bulletins, periodicals and novels.

We devote class time to teaching students how to take tests, and how to approach these tests with poise and confidence.

Come To A Free Mini - Lesson

The mini-Lesson is a free, one hour introduction to our Evelyn Wood Reading Dynamics course. In this brief period you will learn how Reading

Dynamics can help you to faster reading, improved comprehension, and greater retention.
