

### Name-change approved

approved a bill Wednesday that would change the name of Stephen F. Austin State College in Nacogdoches to Stephen F. Austin State University.

change would give the school more prestige and would enable it to start a doctor of philosophy program. The bill now goes to the full House for debate. "One of the reasons we had so much trouble getting our school of forestry accredited was that we were a state college instead of a university," Burgess said. Burgess said Stephen F. Austin was the "fastest growing state college in Texas percentage-wise."

### **Questions** wiretapping

AUSTIN - Liquor Control Board Director O. N. Hum. phreys was asked Wednesday for the second time this month about any wiretapping equipment his department may be using.

Sen. A. R. Schwartz, Galveston, handed Humphreys a letter at a Senate Finance Committee hearing. The letter requested a list of the LCB's "present wiretapping equipment."

Schwartz also asked for a list of the wiretapping equipment "which you include in your present request for appropriations" and an estimate on the number of man hours devoted to wiretapping.

Schwartz said he sent an identical letter to Col. W. E. Speir of the Department of Public Safety Tuesday. He said Speir told him previously the DPS had "a few pieces of such equipment."

Humphreys was accused at a House Appropriations Committee hearing Feb. 3 by Rep. W. S. Heatly, Paducah, and Richard Slack, Pecos, of "bugging" telephones.

### **Clogging limits**

HOUSTON-A Houston transplant specialist said Wednesday clogging of arteries now appears to be the limiting factor in long-term survival of heart transplant patients.

Dr. Robert D. Leachman said in an interview with

volving Shaw and not at the hands of a lone gunman, Oswald, as the Warren Commission concluded. The commission said it found no credible evidence of conspiracy.

Garrison himself, making another of his infrequent courtroom appearances, handled the questioning of Carr, a medium-built man with crewcut, graying sandy hair. Carr sat in his wheelchair and held a microphone before him. Carr said he watched the presidential motorcade in Dallas' Dealey Plaza from the seventh floor of a courthouse then under construction. He said he saw a man wearing "a light hat" in the third window of the fifth floor of the Texas School Book Depository. It was a sixth floor window in that building, the Warren Commission concluded, from which Oswald fired the

Carr. an Army Ranger veteran of World War II action in Africa and Normandy, testified he heard four shots, not three as most other witnesses said. The first, Carr said, sounded like small arms, but the last three were "a highpowered rifle."

fatal shots.

Q. Where did the shots come from?

She was preceded by Dr. John M. Nichols, a University of Kansas pathologist. He testified that an examination of the Zapruder movie showing the assassination indicated the President could have been shot by a gunner in front of him

The testimony today followed a oneday recess for Mardi Gras.

WHAT'S A WAC?-San Antonio junior Cathy Obriotti, director of the World Affairs Conference, shows a list of topics and speakers to Dallas graduate student Chuck Phillips. The conference, sponsored by the Tech Union in conjunction with the International Center for Arid and Semi-Arid Land Studies, includes 20 seminar topics dealing with economic, social and political aspects of Latin

America. Fees are \$3.50 for participation in the seminars and \$2.50 for banquet tickets. Registration will continue today and Friday at booths in the Social Science Building and Tech Union for students wishing to participate in the March 6-8 WAC on "Latin America: Past, Present and Future." Members of the committee were William R. Johnson, chairman of the

the Houston Chronicle the arteries of the transplanted hearts of all St. Luke's Hospital patients were who died more than two weeks after surgery were clogged with an overgrowth of tissue.

Leachman, a heart specialist for the St. Luke's team which has performed 17 transplants, said the artery tissue overgrowth is similar to that seen in persons with arteriosclerosis, the heart disease which causes deposits of fatty tissue to form on arteries and block the flow of blood.

He said large and small arteries of the transplanted heart were involved. He said the process has been noted by other transplant teams throughout the world.

Dr. Leachman said the clogging is "not too surprising" since similar problems were found in some kidney transplants.

### **Favors** surtax

WASHINGTON - In a brief and less-than-cordial en- a Latin. Carr said, The other man, counter with the Senate-House Economic Committee Wednesday, Secretary of the Treasury Davis M, Kennedy cautioned against "attempting to stop inflation too abruptly."

Kennedy said Congress must extend the 10 per cent tax surcharge for another year "unless fiscal 1970 federal expenditures can be cut back appreciably" from the \$195,3 billion level fixed in the budget President Johnson submitted last month for the fiscal year starting next July 1

"The economy must be placed under firm restraint until there are unmistakable signs that we are headed back on a noninflationary path," Kennedy said,

But he added there would be grave risk in pulling the brakes too fast, saying:

"If the economy were to be halted in its tracks, unemployment would rise prohibitively. Even though the inflationary psychology might be broken, the cost would be too high."

### Federal judge bars

A. They came-from where I was standing at the new courthouse- they came from in this direction here he pointed to an aerial photo exhibit, behind this picket fence,

THE FENCE, Carr said, was on the grassy knoll, Several other state witnesses have said they thought the shots came from that area, as opposed to the depository.

Carr said he saw a "light Rambler station wagon" parked on the street near the Depository.

"It was parked on the wrong side of the street . . . It was headed in the wrong direction," he said, "Immediately after the shooting, there were three men who emerged from the back of the School Book Depository,"

Two of the men got into the car. driven by a dark-complected man, or Carr said, "came down the street toward the construction site . . . in a very big hurry, and every once in a while he would turn back and look over his shoulder as if he was being followed.'

On cross-examination, Carr said of the man who walked from the deposi-

tion, Forum Chapter of Mortar Board suggests that the week of Monday-March 1 be set aside as Faculty Recognition Week on the Tech campus.

BECAUSE IT would be presumptuous to try to recognize individually 800 faculty members, Mortar Board has selected five professors with whom we have come in contact to honor during this week as representative of the highest ideals of their profession.

MORTAR BOARD will hostess these professors at a luncheon in their honor March 1. Also to show our appreciation, the senior women's honorary will contribute a book of the professors choice to the Tech Library in his name or will give him a membership in the Friends of the Library. In this way, we hope symbolically to express our appreciation to the entire faculty.

We are recognizing these professors from the students' point of view, not as the five best teachers at Tech, but as examples of the excellent quality of faculty we have. As you read about each professor honored, it is our hope that you & will think of those you have had who measure up to similar standards, and be appreciative for their contribution to your life.

### Rural south Nixon retains Job Corps; AEC looking notes cases for superior of poor diets Head Start control changed **Tech grads**

#### By CARL P. LEUBSIORF Associated Press Writer

Page 6

WASHINGTON (AP)- Amedical team told senators today they found intestinal worms in 73 per cent of 131 preschool Negro children checked during a study of malnutrition in a rural South Carolina county,

The report on last year's study in Beaufort County, S.C., was presented to the Senate's Select Committee on Nutrition and Human Needs by Drs, E, John Lease and Felix H. Louter and research assistant Betty W. Dudley of the University of South Carolina,

that the daily diet of the Negro children was below the National Research Council's recommended daily allowance in calories, calcium, iron, niacin, and the vitamins A, B1, B2 and Sen, Ernest F. Hollings, D-

S.C., said Tuesday the government "should set as a national goal the elimination of hunger and slum conditions in Ameri-

dent Nixon, backtracking on some election campaign views, told Congress Wednesday he wants to keep the Job Corps alive for at least another year,

but remove it from the antipoverty agency, Nixon, who called for abolishing the Job Corps during the campaign, also announced to Congress that he will switch the popular Head Start program from the Office of Economics Opportunity to the Department of Health, Education and Welfare.

LOSS OF the Job Corps and The medical team reported Head Start will remove from OEO about half of its \$2 billion annual budget for antipoverty efforts.

While there had been speculation early in the administration that Nixon might even abolish the OEO, he said experience has proven "the value of having in the federal government an agency whose special concernis the poor."

But he pictured OEO's great- the campaign, ca," just as it set out 10 years est value as devising new programs and serving as an "incu- Nixon voiced no current value gram,

WASHINGTON (AP) - Presiinitial, experimental phases,"

> BY SHIFTING the Job Corps to the Labor Department and relieving OEO of responsibility for operating Head Start, the President said that agency could concentrate its energies on in-

novation. White House sources as an important new move, Nixon told Congress in a special message that he pledges to support "a national commitment to providing all American children an opportunity for healthful and stimulating development during the first five years of life,"

HEAD START, offering summertime preschooling to the deprived, normally affects youngsters 4 and 5 years old, While Nixon said Head Start remains an experiment and "its

effects are simply not known." associates said he might wind up expanding the program-a move he had suggested during

bator" for them "during their judgment about the Job Corps

but recommended it be continued at least until June 30, 1970. Meanwhile, he said, the Labor Department will try to develop on a priority basis "a comprehensive manpower program, designed to make centrally available to the unemployed and the underemployed a full range of In what was described by federal job training and placement services."

He said it is essential that many federal manpower programs be "integrated and coordinated," a move that could result in eventual elimination of the now-separate Job Corps, NIXON SAID he will submit to Congress before June 30 another message embracing "a

comprehensive proposal for the future of the poverty program, including recommendations for revising and extending the act itself beyond its scheduled 1970 expiration.

Meanwhile, he said he wants Congress to extend for one year beyond June 30 the authorization for appropriations for the Job Corps, Head Start and other

Representatives of the Atomic Energy Commission will conduct interviews on the Tech campus Tuesday for graduates business, engineering and in physics.

Bachelor or master degree candidates with a 3,0 grade point average or who are in the upper 25 per cent of their class may schedule interviews through the Placement Service now, according to Mrs. Jean Jenkins, director of placement, The Commission is accepting applications from bachelor or master degree candidates in accounting, physics and electrical, chemical and mechanical engineering. Applications from master's degree candidates in any field of business for management internship will also be accepted.

The AEC conducts research and development programs in the use of nuclear energy in producing electricity, desalting seawater, powering space vehicles, conducting medical re-

Engineering and Science at IBM

## "You're treated like a professional right from the start."

"The attitude here is, if you're good enough to be hired, you're good enough to be turned loose on a project," says Don Feistamel.

Don earned a B.S.E.E. in 1965. Today, he's an Associate Engineer in systems design and evaluation at IBM. Most of his work consists of determining modifications needed to make complex data processing systems fit the specialized requirements of IBM customers.

Depending on the size of the project, Don works individually or in a small team. He's now working with three other engineers on part of an air traffic control system that will process radar information by computer. Says Don: "There are only general guidelines. The assignment is simply to come up with the optimum system."

### Set your own pace

Recently he wrote a simulation program that enables an IBM computer to predict the performance of a data processing system that will track satellites. He handled that project himself. "Nobody stands over my shoulder," Don says. "I pretty much set my own pace."

Don's informal working environment is typical of Engineering and Science at IBM. No matter how large the project, we break it down into units small enough to be handled by one person or a few people.

Don sees a lot of possibilities for the future. He says, "My job requires that I keep up to date with all the latest IBM equipment and systems programs. With that broad an outlook, I can move into almost any technical area at IBM-development, manufacturing, product test, space and defense projects, programming or marketing."

### **Farmer** says talks could settle unrest

DALLAS (AP)- James Farmer, highest ranking Negro in the Nixon administration, said Wednesday in Dallas that the solution of school unrest might come through more talks between students and administrators,

"We do know there must be more dialogue between students and administration," the recently-appointed assistant secretary of Health Education and Welfare said during a news conference,

"I am confident," said Farmer, "if college administrators would turn the situation around and place all the facts and options concerning the problems of education in the hands of the students - then the students would probably come up with the same answers as the adminisgrators. What is missing now is the dialogue,"

Farmer said he will attempt to act as a liason between the Negro community and the Nixon administration.

# **Students** protest seminary courses

CLAYTON, Mo. (AP)- The 600 students of Concordia semimary are discontented and they want their teachers and administrators to do something about it,

Unlike students on many other American campuses, the seminarians are not protesting loudly and violently; they are talking quietly with their elders. The student body of Concordia, the largest Lutheran seminary in the world and the third-

largest Protestant seminary in the United States, asked for a three-day suspension of classes

going to have to structure itself to keep up with the constant changes of our times."

A statement summarizing talks by 24 student-faculty "buzz groups" Tuesday said students feel the seminary of-

fers too many courses with "no relevant or practical applicadon."

Concordia seminary is operated by the Lutheran Church-Missouri Synod, Its graduates go out to parish ministries and missions all over the world,

player according to his performance on every play.

DURING THE PAST grid season, Cox was a team captain. He did not play in a single game, however, because his knee was still not strong enough to withstand the rigors of Southwest Conference football.

Cox said yesterday, "It was pretty much my own decision not to play. My knee was not as strong as I had hoped it would be."

COX PARTICIPATED in most of the drills during Tech's last campaign, but was never able to be in any contact work. As yet, he does not know whether he will be able to go full speed in spring training this year.

"I guess I'll have to wait and see what the doctor and **Texas b'ballers** lose no. 1 spot

Ashland College, of (AP) Ohio has taken over first place in The Associated Press' small college basketball poll.

The once-beaten Eagles, 20-1, moved up from second Wednesday as a result of Lamar Tech's 83-69 defeat by Trinity of Texas.

Lamar, now 17-2, dropped from the top perch to fourth and Fairmont, W.Va., 21-1 advanced from fourth to second. Kentucky Wesleyan, 18-4, held onto third although the Panthers were upset by Gannon

Mando Ramos, a stripling of only 20, is the new ruler of the world lightweight division, youngest boxer ever to reach such a summit.

And it appeared Wednesday that the fallen champion, Teo Cruz of the Dominican Republic has little chance of getting a rematch for the crown he held less than eight months.

Tamos, the erstwhile high school dropout from Long Beach Calif., trailing through the early rounds, ripped open a deep cut over Cruz' left eye in the eighth round Tuesday night.

RAMOS' VICIOUS right concentrated on the bleeding target. And with 19 seconds remaining in the 11th of the scheduled 15-rounder, Referee John Thomas, on the advice of the ring physician, stopped the match. After 10 rounds, one official had Ramos ahead, another had Cruz in front and the third had the fight even. Under California rules, where there is no technical knockout, it goes into the record

book as a knockout. And colorful, black-haired Armando, in only his 26th pro- day. fessional ring engagement, is the king of the 135-pounders. Jackie McCoy, Ramos' mana-

ger, said: match before Mando gets mar-

ried in April but we have no plans for a rematch with Cruz." N.C., and Bobby Isaac of Ca- fect."

# The Following Merchants Wish to Pledge Their Support to ADVERTISING RECOGNITION

Man lives in a world torn by economic and social problems, but as he exists the problems become only shadowy figures of the past. Man's continued existence is testimony to the fact that he has succeeded in solving these problems. But with the past remains the memories of War, Assinations, Poverty, and Human Misery; while such events as Political Elections, a Trip Around the Moon; or just a new year 1969 seems to bring hope and a new realization - that Advertising more now than ever before - is Helping America Happen.
