

## Beauties Vie For Honors

### Atom Man to Speak Here Wednesday

Adm. Hyman G. Rickover, the man in charge of design, development, and use of nuclear power for the propulsion of Navy vessels, will address Texas Tech's student body at 10 a.m. Wednesday in the Municipal Auditorium.

### Tech Hosts Pre-Meds

Medical doctors representing Southwestern Medical School and the University of Texas medical branch at Galveston will speak at Texas Tech's annual Pre-Med day today (Dec. 5).

Approximately 35 area students and 80 Tech pre-med majors will attend the meeting sponsored by the Tech Pre-Med Society and Alpha Epsilon Delta, pre-medical honorary fraternity.

Dr. Vernie A. Stenbridge of Southwestern Medical School in Dallas will speak at 10:30 a.m. in the Rec Hall on subjects offered in medical school.

At 2 p.m., Dr. K. M. Earle, dean of the University of Texas medical branch in Galveston, will discuss preparation for a career in medicine.

Registration will begin at 9 a.m. in the Rec Hall. A luncheon will be held at 12:30 p.m. in the Tech Union. Tech Dean of Student Life James G. Allen will be present at the luncheon.

The afternoon session to be held in Chemistry 101 will include speeches by Dr. Richard A. Keffler, pathologist at the Lubbock Methodist Hospital, on careers in medical technology and by Dr. James M. Reynolds, Lubbock dentist. Dr. Keffler will speak at 3 p.m. and Dr. Reynolds will speak at 3:30 p.m.

The meeting will be concluded with a banquet at 6 p.m. in the Ming Tree restaurant. Dr. A. W. Bronwell, Lubbock doctor, will be guest speaker.

Classes will be dismissed at 9:40 a.m. and will not resume until 11 a.m., to enable Tech students to attend the speech.

Rickover was largely responsible for the construction of the world's first nuclear powered submarine. His first plans for the submarine were turned down. He then won the support of Adm. Chester W. Nimitz, chief of naval operations, and the nuclear powered submarine project was approved.

In addition to Rickover's duties with nuclear powered Navy vessels, he is responsible for the nuclear power plant at Shippingport, Pa., which generates electricity for civilian use. It is the world's largest nuclear power plant exclusively for such a purpose.

Rickover selected his staff for the atom-powered submarine personally. While choosing his staff, he became a critic of the American educational system. His views on America's education system were published recently in a national magazine.

Rickover will be introduced by Rep. George H. Mahon of Lubbock. The speech is sponsored by the Student Council.

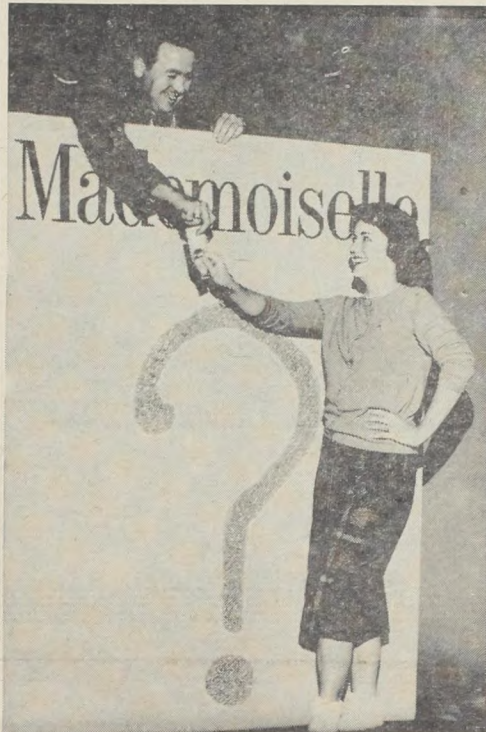

### Who's Who?

HELP!

La Ventana has seven pix that must be identified.

The pix are posted in the glass-enclosed bulletin board at the Student Union entrance.

If you know any of these people, please identify them for us.

LA VENTANA'S 200th BEAUTY CONTESTANT GETS HER MONEY BACK

... Sandra Cole smiles at Ralph W. Carpenter, president of Sigma Delta Chi journalistic fraternity.

### 239 Enter La Ventana Pageant

Miss Mademoiselle of 1960 — the queen of Texas Tech — will emerge from competition with 238 other Tech coeds to reign supreme at the second annual La Ventana Beauty Pageant tonight at 7:30 in the Lubbock Municipal Auditorium.

Also taking the spotlight — and the eyes of Tech's male population — will be nine top finalists in the Miss Mademoiselle contest and Tech's Miss Playmate.

INDICATIONS are that competition will be stiff for the top honors, since the entries include Miss Lubbock of 1959, Miss South Plains Maid of Cotton, a finalist for Miss Hawaii in the Miss Universe contest and Tech's Homecoming Queen. Nevertheless, the judges' task — though pleasant — is not expected to be an easy one.

Awaiting Miss Mademoiselle, her court of nine finalists and Miss Playmate is an all-expense-paid trip to Taos Valley, N.M., for three days of skiing.

Of the 239 girls entered in the Miss Mademoiselle contest, the number will be narrowed to 50 finalists in private preliminaries this afternoon.

The winning Miss Playmate will be picked by Jim Dallas, a local professional photographer, from photographs submitted by male organizations.

Tickets for the pageant will be on sale at the door tonight and in the Tech Union today for 50 cents per person, with no reserved seats.

MISS JANIE NORRIS, Miss Mademoiselle of 1958, will crown the winning Miss Mademoiselle candidate "queen of the campus" at the close of the program.

Les Ready, local advertising official and a former television announcer, and Mrs. Vivian Garets, a former professional singer in New York, will emcee the program.

Music will be provided by the Impressions, a Tech musical group, and Yvonne Skinner, a Tech graduate who was Miss Lubbock of 1958, at the organ.

Ralph W. Carpenter, president of Sigma Delta Chi, professional journalistic fraternity sponsoring the Pageant, said Friday, "We sincerely appreciate the cooperation given Sigma Delta Chi both on and off the campus in helping to try to make this year's La Ventana Beauty Pageant one of Texas Tech's outstanding events of the year."

### Need Loot?

The deadline for applications for National Defense Student Loans for the Spring Semester, 1960, is December 15. Applications for financial aid from other loan funds for the Spring Semester may be made after this date. Students desiring financial assistance should contact James B. Whitehead, Assistant Dean of Student Life, Ad. 163.

### BLOCK AND BRIDLE

## Club Auctions Hams

The Block and Bridle Club will auction off 75 sugar-cured hickory-smoked hams this afternoon at 3:30 in the Livestock Pavilion.

The livestock judging contest gets underway today at 12:30 p.m. in the Livestock Pavilion. Four categories of livestock to be

judged are beef cattle, swine, sheep and horses.

Exhibitors draw the names of their animals from a hat and have two weeks to feed, groom and train them. The animals will be judged on showmanship and grooming. Winners of each category will receive ribbons and prize money.

Following the livestock judging the ham auction will begin. Each of the 75 hams weighs approximately 15 lbs. and has been sugared and hickory - smoked by members of the Block and Bridle Club. Preparation of the hams took 30 days.

A three-man committee will judge the hams and choose a Grand Champion ham. Last year the Grand Champion ham was sold to Levter Feed Lots for \$75. Last year's hams sold for an average price of \$15 to \$16.

Money from the ham auction is used for Judging Team awards and for all Block and Bridle activities including the Little International Livestock Exposition.

The Greased Pig Race and Milk Maid Contest will follow the ham auction. In the Greased Pig Race,

pigs weighing from 75 to 100 lbs. are covered with grease and turned loose. Contestants will try to put their pig into a feed sack. The first to succeed will be the winner.

Winner of the Milk Maid Contest will be the girl who can milk the most in a limited time.

### SWC Debaters To Compete

Debating on the topic, "Resolved that Congress should have the power to reverse decisions of the Supreme Court," students from Southwest Conference schools are participating in the SWC Debate Meet at Tech this weekend.

Ronald Purtell and Jerry Wheeler are taking the negative side of the debate for Tech, while Kip Glascock and Don Zimmerman are taking the affirmative.

Today's round of debates will take place at 8:30 a.m., 10 a.m. and 1 p.m. in the Agriculture and Speech Bldgs. There is no admission charge.

The winning negative and affirmative teams will receive trophies and a traveling trophy will be presented the college with the best overall record.

JIM KNOWLTON AND JO ANN DOBBS

... those hams look mighty tasty

### Women's Honorary Seeks Applicants

All junior girls interested in Mortar Board who have not received a letter should see Cora Jo Lilly, Weeks 362, as soon as possible.

### Home Ec Students to Attend Scholarship, Awards Banquet

Home economics majors who have received scholarships will be honored and the outstanding sophomore home economics student will be announced at the annual home economics banquet Tuesday. The banquet, sponsored by the Home Economics Club, will be at 6:15 in the Tech Union Ballroom.

PLEDGE SWEETHEART — Bette Barnhill, Delta Gamma pledge, was named sweetheart of the Sigma Chi pledge class at a dance Friday night.

### STD Pledges To Become New Actives

Twenty-five new members will be initiated into Sigma Tau Delta honorary English fraternity, at 7:30 p.m. Monday in the Tech Union Anniversary room.

AT THE INITIATION ceremony STD will host students from the Superior Normal School of Mexico City visiting on campus this week.

Membership in Sigma Tau Delta is open to English majors or minors who have completed 12 hours of English and maintained a 2.2 overall grade point average.

J. T. McCullen, English professor, sponsors Sigma Tau Delta and Carolyn Watkins is president. Other officers are Mary Sue Black, vice president; Gay Phipps, secretary-treasurer; Liz Wilson, publicity chairman.

### Phi Gammas To Initiate

Dr. P. Merville Larson, speech department head, will speak at the fall initiation banquet of Phi Gamma Nu Sunday at the Holiday Inn.

Pledges of the national business sorority for women will be initiated at 1 p. m., preceding the banquet.

Those to be initiated are Mary Francy, Rebecca Weddie, Susan Philbrick, Janet Druessow, Joan Kelly, Carole Kutner, Diana Gibson, Mary Cole, Linda Linn, Lenora Copeland and Wina Gayle Barn, Cheryl Crawford, Sue Springer, Nancy Carlock, Mary Ann Weaver, Eka Kaye Ainsworth, Shirlene Jones and Nell Quain.

THOSE TO BE initiated Monday are as follows: Louise Aguilar, Eleanor Clayton, Cynthia Cochran, Sandra Cox, Lowell Cross, Elsa Dockray, Ann Dyess, Karen Frack, Romero Garcia, John Gibson and John Gilbert.

Others are Carolyn Jenkins, Nancy Koger, Marion Lynch, Carolyn McFarland, Linda Moore, Maybeth Pendley, Jeneane Price, Patsy Pugh, Elwyn Weathers, Eleanor Bond, Ann Firestone, James Powell, Melvin Roberts and Ann Glenn.

### Phi Mu Takes Two

Phi Mu has pledged two more girls during open rush. New pledges are Janis Kiles, San Antonio, and Phyllis Brown, Harlingen.

**THERE'S AN IMPORTANT FUTURE AHEAD FOR THE MEN WHO WEAR THESE WINGS**

The Air Force pilot or navigator is a man of many talents. He is, first of all, a master of the skies—and no finer exists. In addition, he has a firm background in astro-navigation, electronics, engineering and allied fields. Then, too, he must show outstanding qualities of leadership, initiative and self-reliance. In short, he is a man eminently prepared for an important future in the new Age of Space. Find out today if you can qualify as an Air Force pilot or navigator. Paste the attached coupon on a postal card and mail it now.

# JUST SOME GAB

j.s.g.

The other day, whilst "subbing" some coffee, I was shocked out of my apathy, my meditation of a Spanish quiz, and nearly out of my trousers, by a weird concoction of noise emanating from the juke box. I had been warned not to sit at that end of the building, since some friends of mine had flipped their natural wigs (to borrow a phrase), and somebody had said that their friends' hearing had been impaired, but I was not too awake, you know?

Well, like, at first, I was afraid to find out what was happening. I thought maybe the thing had broken down, or perhaps the needle was not in the groove, or something. At any rate, having survived the initial shock, I turned slightly, rose, and cautiously approached the "thing" to investigate. (I had had the foresight to tamp cotton into my ears as a preventative). It was very horrifying, especially in hi-fi, to see that everything was in order. Dismayed and insecure, I returned to my seat, removed the cotton, and tried to listen.

You know, when you get old, they say the world tends to pass you by. That's how I felt—passed! Surely the natives were not THAT restless! This—I thought—THIS is music? I wasn't convinced. I listened. There were some erratic off-beats (I might add, "WAY off"); some incantations regarding love, I think; and an off-key counter-wail in the too-near background which I ascribed to a broken guitar. When it was over (finally), I tried to remember what had passed for music when I was—well—younger.

There was Miller, the Dorseys, the "Bird," "Pres"—all now gone. Really gone! Some of the "oldsters" were still around, tho': Basie, Herman, Kenton, Duke. And we still had some singers of the old school, like Jo Stafford, June Christy, Chris Connor, Como, Sinatra, and some fine intelligible groups: the Frosh, the Modernaires, Mills Brothers . . . whatever happened to their records? It would certainly improve the taste of the coffee (honest)!

As I said I felt left out, but then I shouldn't say that the ENTIRE crop of current music is bad. There is a bright side (not on this juke box, or at least not played on this juke box). Johnny Mathis comes on; Bobby Darin might make it if he'd stop snapping his fingers long enough for us to hear him; Eydie Gorme, Betty Johnson, the Axidentals, Julie London . . . but, to hear 'em, you've got to have your own library. The good ones just ain't on the jukes! And only rarely can you tune in your radio (that's TV, kids, without pictures) and hear anything resembling that which would soothe a savage beast. Two FMs (KBFM and KRKM) and perhaps two regular stations (KCBF and KFYO) stay off the more violent or downright bad current stuff, playing what I'd call "music, pure music." But, like I say, I'm biased.

It seems to me, tho', that with the advances made in the machinery—hi-fi, tweeters, woofers, stereo, and so on—they ought to go forward in the product, too. If they went far enough, they might get back to Webster's definition of music. "The science or art of pleasing, expressive, or intelligible combination of tones." Man, like, that'll be the day!

## LITTLE MAN ON CAMPUS

"BOY, DID YOU GUYS EVER MAKE A LOTTA NOISE COMIN' IN LAST NITE?"

# TOREADOR

The Toreador, official student newspaper of Texas Technological College, Lubbock, Texas, is regularly published each Tuesday, Thursday, and Saturday morning during the two long terms, excepting holidays, by students of the College as an expression of campus news and student opinion only.

The Toreador is financed by a student services fee, advertising, and subscriptions. Letters to the editor and columns represent the views of their writers and not necessarily those of the Toreador. Letters must be signed, but may be published with initials in justifiable instances. The views of the Toreador are in no way to be construed as necessarily those of the administration.

Entered as second class matter at the Post Office in Lubbock, Texas, under the act of March 3, 1879.

## In Official Statement

# Committee Protests Oath

The Committee on Relationships of Higher Education to the Federal Government recently issued support for the removal of loyalty oaths required by the National Defense Education Act of 1958.

Several reasons—very valid ones at that—were given.

The Committee feels that such oaths are "discriminatory against students as compared with other persons, such as farmers, dependent people, etc., who receive Federal assistance; and among students it is discriminatory by singling out for special distrust those who, because of financial need, are compelled to seek aid to attend the colleges of their choice."

It also states that the oath is unfair because it subjects the swearer to possible jeopardy on account of his popular beliefs, not his overt actions, and yet offers no clear and definite criteria for determining subversion.

"We see," the committee says, "no validity to requiring such an affidavit as a prerequisite to borrowing money or otherwise obtaining aid to finance an education. That the source of funds is the Federal Government rather than a private bank appears irrelevant."

The committee echoed the argument that loyalty oaths do nothing to dissuade disloyal persons not to commit disloyal acts and that they would have no scruples about signing one.

"It involves Government interference in institutional affairs," the committee concluded. It felt that by requiring signatures on such oaths, the Government is interfering in an area of administration which belongs properly without restriction to free institutions of higher learning.

So, we aren't the only ones who protest loyalty oaths. It is nice to know that more potent organizations are investigating and studying the effects of same.

Maybe one of these days there will be no required signatures, no pledges or oaths, but, rather laws written and enforced as are present in other segments of the country.

TOM SCHMIDT  
Editor

## Organizations Present Events Galore

Within the next week, three very important and interesting events will be available for Texas Tech students.

In short, these are the La Ventana Beauty Contest Saturday night, Admiral Rickover's speech Wednesday morning and a visit and speech by Dr. Antonio Carrillo-Flores, Mexico's Ambassador to the United States, Friday night.

But to take first things first, Sigma Delta Chi, professional journalism fraternity, is again sponsoring the beauty contest for the second year in a row.

Almost 250 girls will be judged in the preliminaries Saturday morning and afternoon, with final eliminations open to the public beginning at 7:30 p.m. Saturday in the Lubbock Municipal Auditorium.

Members of SDX have taken every precaution necessary to make this a top notch affair. It should far surpass the one last year. Admission is 50 cents per person.

As far as planning goes, they are much ahead of schedule in building stage sets, publicizing the event and writing the script. One member remained in Lubbock during the Thanksgiving holidays and almost single-handedly completed them a week ago. Last year the sets were finished the night before.

The Student Council will bring Admiral Hyman Rickover, the father of the Atomic submarine, to Texas Tech Wednesday. He will speak

solely to members of the Texas Tech staff and student body at 10 a.m.

Classes will be dismissed and no admission will be charged. The Council hopes that this will be only the first of a series of noted national figures. But it must be a success!

Council members have been months in planning Rickover's visit and they have had full cooperation from all Tech officials.

A certain amount of controversy has centered around Rickover during his career. His talk should be well worth the walk—or drive—to the auditorium.

★ ★ ★  
A touch of international relations will be provided Friday night—also in the auditorium—when Mexico's ambassador to the U. S. speaks under the auspices of the Tech Union World Travelers Committee and the Cosmopolitan Club.

Actually, he has been brought to Lubbock by three Lubbock civic groups and the two Tech organizations have succeeded in having him appear here.

We would feel a bit overbearing if we urged 100 per cent attendance at each of these programs. But, one thing is sure. It's been a long time since events with so much interest and entertainment-value has been presented within one week.

Anyone with normal interests in extra-curricular activities should find plenty to do before Christmas.

FACE BUFF FIVE

# Raiders Play Tonight

Tech's youthful Red Raiders will attempt to make it two in a row when they take on the University of Colorado tonight at 8 p.m. (MST) in Boulder, Colo.

The Techsan cager quint will meet a team that is equally deep in sophomores. Nine of the Buffs' squad of 14 men are up from last year's freshman team while eight of the 12 Raiders are in their second year.

The Big Eight Conference — of which Colorado is a member — has proven over the years to be a

tough nut for the Raider teams to crack. They have beaten teams from the conference only twice over the years while losing ten times. Tonight's tilt with Colorado is the first meeting between the two teams.

The Raider starting lineup has not been announced but Robison is expected to use the same system of starters and substitutions as he did against New Mexico.

After tonight's game in Boulder, the Raiders go to Lawrence, Kansas, for a game with the Uni-

versity of Kansas on Monday night before returning home. The next home game for the Tech cagers will be Wednesday night when the University of Oklahoma journeys to Lubbock for a renewal of their rivalry. Last year, the Raiders downed the Sooners 73-64 in Norman.

## Sundown Eleven Spills Rattlers, 20-8

A crowd of 3,500 wind swept fans watched Friday night as Sundown's Roughnecks manhandled Stinnett 20-8 in Plainview. The victory advanced Sundown to the semi-finals in the Class A high school football race.

The Roughnecks were led all the way by David McInturiff who scored twice on a completed pass and a 57 yard TD sprint.

## raider review

by john petty

Here we are in a new and different role—that of a columnist.

From time to time (whenever we feel that there are sports items of interest to Techsans) 'raider review' will appear with the facts as we see them. We can assure you that the review will be completely devoted to sports, i. e., no play reviews, etc.

While most college football teams have finished their season's schedules there are a few stragglers who have waited until today to cap the year's play. The most notable among these Yule month games is the tussle between U.C.L.A. and the Big Orange from Syracuse in Los Angeles.

A lot of talk is circulating about how this could be the upset of the year. The Bruins pulled one sneaker in downing unbeaten Southern California a couple of weekends ago, and so some sources feel that today may bring sneaker number two.

We feel that it will be a cold day in . . . California when the Uclans take Syracuse. The New Yorkers have too much weight, talent and just about anything else you can mention. And with all that Dallas cotton stuffed in their ears, they probably haven't heard a word about upsets. We like Syracuse and by three touchdowns.

The Raider cagers will leave at 11 a.m. today for a two game tour through Colorado and Kansas. Tonight the Robison crew will play Colorado University in Boulder, and then on to Lawrence, Kansas, for a game with Kansas University Monday night.

This early in the season it's hard to say what the Raiders will do.

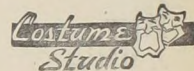

From their one home performance, they showed that they have hustle and desire aplenty. But their opponents for the weekend have consistently been the strongest teams in the Big Eight Conference. As much as we want the Raiders to win, it's pretty difficult to foresee a victory in either game.

We can't help but think of all the prestige and prominence that E. J. Holub's All-American awards will bring to Tech. The big center's appearance on Perry Como's TV show will go a long way toward making Texas Tech known to the East Coast and the rest of the nation.

Too, the magic title of All-American will be a big help in recruiting high school athletes for Coach Weaver and his staff.

With E. J. around next year to turn in the same type of outstanding performances as this year that new stadium will probably be a little more crowded with fans who come to see him play. He will be a good drawing card and the old cash drawer should really jingle.

## Announcing a comprehensive Postgraduate Education Program for engineers, scientists and mathematicians

Ever since the founding of the company some forty years ago, IBM has recognized education as an integral and continuing part of a professional person's life. Through formal educational programs within the company, and through affiliations with universities, it has long been possible for IBM employees to earn scholastic credits. Now a comprehensive Postgraduate Education Program, surpassing any previous program, has been initiated at IBM for plant and laboratory personnel.

### ADVANCED DEGREE UNIVERSITY PLAN

A qualified engineer, scientist or mathematician, who has been with IBM at least a year, may compete for a fellowship or a scholarship in selected fields at the university which he believes offers the finest opportunities for advanced study. All benefits that would normally accrue if the candidate were on active employ-

ment will be retained.  
• *Doctoral Fellowships:* Selected candidates will receive full tuition, fees and regular salaries for full-time study up to three years.  
• *Masters' Scholarships:* Selected candidates will receive full tuition, fees and regular salaries for an academic year of full-time study.

### ADVANCED DEGREE ON-SITE PLAN

A qualified engineer, scientist, or mathematician may undertake part-time graduate studies at an IBM plant or laboratory, concurrent with active employment.

• *Masters' Degrees:* Candidates may complete their studies at company expense under various programs operated in conjunction with universities near IBM facilities.

### ADVANCED STUDY PLAN (NONDEGREE)

These studies offer continued educational opportunity throughout a career at IBM. They are not generally degree-oriented. Given at or near IBM facilities, they are designed to help retain mastery over basic engi-

neering, science, and mathematical subjects and to gain knowledge in advanced fields such as number theory, finite mathematics, magnetism, solid state physics, and network analyses.

For a descriptive folder about the new IBM Postgraduate Education Program, write to: **MANAGER OF ENGINEERING EDUCATION, DEPT. 843, IBM CORPORATION, 590 MADISON AVENUE, NEW YORK 22, N. Y.**

# Robi

by DON JONES  
Toreador Sports Writer

Heading the Texas Tech basketball team last Tuesday night against Mexico University, sitting on the bench was Coach Robison. He has been here since the exception of the 1946-47 season when he was in private business.

When the Tech cagers last Tuesday night again met Mexico University, sitting on the bench was Coach Robison. He has been here since the exception of the 1946-47 season when he was in private business.

ROBISON, WHO graduated from Tech in 1915 with a degree in journalism, has been here since the exception of the 1946-47 season when he was in private business.

The tall, quiet Tech coach and assistant football coach has been here since the exception of the 1946-47 season when he was in private business.

Robison continued. Before coming to Tech, he was head coach in basketball and football at Burnett High School.

IN REMINISCING over years as a coach, Coach Robison said that he had kept up on all of his players. He said that the no blacksheep in the bunch are doing well in their profession or vocation, making their contribution to society.

"I have had the opportunity of working with the highest type of high school and college men during years that I have been coaching," Robison said.

The calm, immaculate Raider coach, who is assistant athletic director and athletic director, brightened up when asked about being in the Southwest Conference.

"TECH IS FORTUNATE being able to compete in the Southwest Conference. It is one of the toughest in the nation. In addition to a tough conference, it has athletic facilities and support from sports fans," Robison said.

STARTING 18th SEASON

# Robison Praises Tech

by DON JONES  
Toreador Sports Writer

Heading the Texas Tech Red Raider basketball team for his 18th year is a man who has worked with or been under all seven presidents of Texas Tech—Polk Robison.

When the Tech cagers opened their 1959-60 basketball season last Tuesday night against New Mexico University, sitting on the Raider bench was Coach Robison, kicking, throwing up his hands, and going through other motions that have become a familiar sight to Raider fans over the years.

Coach Robison first came to Tech in 1942 as head basketball coach and assistant football coach. He has been here since then, with the exception of the 1946-47 year when he was in private business.

**ROBISON, WHO** graduated from the old Lubbock High School, modestly admitted that one of the great thrills in his life was to beat out men in college who beat him out in high school for starting berths on athletic teams.

The tall, quiet Tech mentor graduated from Tech in 1934 with a degree in journalism. "I was thinking of sports writing, and since radio was a coming thing then, I also thought of being a radio sports announcer," the affable coach commented.

"However, all this time I had coaching in the back of my mind. I had played almost every position in football, as well as being associated with most other sports at one time or the other. I had also studied most of the sports that I had not been associated with," Robison continued.

Before coming to Tech, Robison was head coach in basketball and line coach in football at Burk Burnett High School.

**IN REMINISCING** over his 25 years as a coach, Coach Robison said that he had kept pretty well informed on all of his former players. He said that there were no blacksheep in the bunch. "They are doing well in their chosen profession or vocation. All are making their contributions to society."

"I have had the opportunity and privilege of working with the highest type of high school boys and college men during the 25 years that I have been coaching," Robison said.

The calm, immaculately dressed Raider coach, who is also assistant athletic director of Tech, brightened up when asked how he liked being in the Southwest Conference.

"**TECH IS FORTUNATE** in being able to compete in the Southwest Conference. The conference is one of the toughest in the nation. In addition to being a tough conference, it has good athletic facilities, and fine support from sports fans," Robison said.

In commenting on Tech's future, the assistant athletic director said, "Tech has passed over the last major barrier in being recognized as a major athletic institution. That barrier was the selection of E. J. Holub to two All-American teams by official, well-recognized organizations."

"Athletically, we crawled for a while, then walked, now we are in a position to run. Tech will compete for the first time next year in all sports in the Southwest Conference. We have a new stadium that will soon be ready, an almost new coliseum, and, overall, one of the best athletic plants in the Southwest. Tech is and will continue to keep up athletic wise," Robison said with a smile.

Coach Robison concluded by saying, "There has never been a time in America when competitive sports were more important to the nation. Never have sports been over-emphasized, and I would be the first to admit that sports, at times, have been under-emphasized in programs of the schools."

### TV OR NOT TV

The academic world has made its first tentative steps into television—a few lectures, a few seminars, a few lab demonstrations—but colleges have not yet begun to use television's vast capacity to dramatize, to amuse, to stir the senses, to unshackle the imagination. Like, for example, the following:

**ANNOUNCER:** Howdy, folksies. Well, it's time again for that lovable, laughable pair, Emmett Twonkey Magruder, Ph. D., and Felicia May Crimscott, M.A., in that rollicking, roistering fun show, American History 101... And here they are—the team that took the "hiss" out of "history"—Emmett Twonkey Magruder and Felicia May Crimscott!

**DR. MAGRUDER:** Howdy, folksies. A funny thing happened to me on the way to my doctorate. A mendicant approached me and said, "Excuse me, sir, will you give me 25 cents for a sandwich?" and I replied, "Perhaps I will, my good man. Let me see the sandwich."

"What-um You-um Want-um?"

**MISS CRIMSCOTT:** Oh, how droll, Dr. Magruder! How delicious! You're a regular Joe Fenner!... But enough of badinage. Let us turn to our rollicking, roistering fun show, American History 101.

**DR. MAGRUDER:** Today we will dramatize the taut and tingling story of John Smith and Pocahontas. I will play Captain Smith and Miss Magruder will play Pocahontas.

**ANNOUNCER:** But first a message from our sponsor... Folksies, have you tried Alpine Cigarettes yet? Have you treated yourself to that fresh filtration, that subtle coolness, that extra-long, extra-efficient filter? Have you? Hmmm? ... If not, wake your tobacconist and get some Alpines at once! ... And now to our grim and gripping story. Picture, if you will, a still summer night. An Indian maid stands by a moonlit brook. Suddenly she hears a footstep behind her. She turns...

**MISS CRIMSCOTT:** Oh! John Smith! You-um startle-um me-um!

**DR. MAGRUDER:** Howdy, Pocahontas. What are you doing by the brook?

**MISS CRIMSCOTT:** Just washing out a few scalps. But what-um you-um want-um?

**DR. MAGRUDER:** I came to see the Chief.

**MISS CRIMSCOTT:** You-um can't-um. Chief is leaving for Chicago.

**DR. MAGRUDER:** On what track?

**ANNOUNCER:** And speaking of tracks, stay on the right track with Alpines—the track that leads straight to smoking pleasure, to fun, to frolic, to sweet content... And now back to those two gassers, Emmett Twonkey Magruder and Felicia May Crimscott.

**DR. MAGRUDER:** Well, folksies, that's all for today. See you next week, same time, same channel.

**MISS CRIMSCOTT:** Stay tuned now for "William Cullen Bryant—Girl Intern."

**ANNOUNCER:** And remember, folksies, there was a time when you needed to smoke two cigarettes to get what you get from one Alpine—one cigarette for light menthol, one for high filtration. Today you can get it all in a single Alpine, which means you no longer have to go around smoking two cigarettes at a time, causing your friends to snigger, and violating the fire laws.

And speaking of TV, remember to watch Max Shulman's "The Many Loves of Dobie Gillis" on CBS every Tuesday night—presented by Marlboro Cigarettes, from the makers of Philip Morris and Alpine.

## Intramural Speech Program Continues

The third round of the Intramural Speech Program is scheduled for Monday for 7-9 p.m. Phi Gamma Delta holds the over-all total so far with 182 points. Kappa Sigma, last year's sweepstakes winner, has 174 points.

Third place is held by Kappa Kappa Gamma, with 135 points, and Pre-Law is fourth with 128. Contests are open to both or-

ganizations and individuals. Trophies will be awarded the organizations that accumulate the most points in each monthly contest and the over-all champions in each event.

A Sweepstakes trophy will be given the organization with the most points accumulated through the year in all events.

## DR. CARILLO—FLORES

# Ambassador to Speak

Dr. Antonio Carrillo-Flores, Mexico's ambassador to the United States, will speak in the Lubbock Municipal Auditorium at 7:30 p.m. Friday.

Dr. Flores will discuss "The Role of Student Exchange in the Field of International Understanding."

His trip to Lubbock is being sponsored by the Lubbock Chamber of Commerce International Affairs Committee in cooperation with the Good Neighbor Commission of Texas.

He will arrive in Lubbock and

attend a reception given for him at the Lubbock Club that night.

At a luncheon Friday, he will address a joint meeting of the Lions Clubs.

Dr. Flores' speech in the Lubbock Municipal Auditorium will be sponsored by the World Travelers of Tech Union and Cosmopolitan Club.

He received his doctorate degree of law from the University of Mexico in 1950. He was professor of the National School of Econo-

mics there for five years. He was also a member of the Board of Governors of the University of Mexico from 1947 to 1952.

He has served as Mexican delegate to such international and financial conferences as the Inter-American Conference on Systems of Economical Control, the United Nations General Assembly's Economics Commission, and the twenty-ninth International Conference of American States.

Dr. Flores' address in the Municipal Auditorium will be open to the public at no charge.
