

# SUMMER SESSION OPENS

## Slight Decrease Is Forecast By Early Enrollment

Classes convene today to mark the beginning of Texas Tech's sixteenth annual summer session, again under the direction of Dean J. M. Gordon, head of the Arts and Sciences division of the college.

At a late hour yesterday afternoon, 1098 students had filed through the Registrar's office and obtained permission to register. To some extent, the relatively slow influx of students for the summer term confirms the decline considered possible because of conscription into the Army. However, no definite figures are available and late registrations will supplement the present total.

The first summer session of Tech, 1925-26, had 336 students enrolled. Within three years, in accord with the phenomenal growth of the college, summer sessions passed the 1,000 mark enrollment and have continued to expand both in numbers and scope of the program offered. Last year's final registration, for both terms of the session, was 1,800, a slight decrease from the previous year's 1,932.

Among features of this year's summer session are the extensive recreation program undertaken for students under the supervision of Dean of Men James G. Allen, and the eighth annual band school under the general direction of Professor Wiley, director of the Tech Band.

## Air Corps Takes 65 Tech Students

Representing the physical qualities and spirit of Texas Tech campus, 65 students passed examination to qualify for enlistment in the Army Air Corps last week.

More enthusiasm was exemplified than in any other school where examinations were offered, and the largest percentage of applicants passed the examination from Tech than shown in other colleges to the Lieutenant Van Mullem of Randolph Field.

With orders to accept all students who could qualify physically and mentally, air corps officials expected an enrollment of approximately 20 Tech students. Basing their expectations upon the interest shown in other college the Randolph officials were pleased and also surprised at the results of examination here.

Students who passed the test will enter preliminary training in the same class and continue as one unit. Those who qualify will be called in August.

Shirley Porter was graduated from Iowa with honors, although handicapped by blindness.

## Between Defense Success And Failure Looms A Constantly Growing Shadow

By ERNEST CURREY  
Toreador Staff Writer

The horror and threat of Europe's inferno gradually approaches to endanger the normalcy of the United States. Each day news of a German victory makes clearer that picture of future battles to be fought between Americans and Germans.

Each day descriptions of fighting — fighting with its great burst of shells, swift, thunderous bomber and pursuit planes and rumbling tanks storms the American mind with a meaning vastly more personal.

Each day we see across to the East and turn alarmed to look about us that we might feel reassured by the re-armament featured by our government and people.

And here we witness a gear-up for arms production. Industry heeds the orders of our government. The men of capital

## New Members Placed On Tech's Directors Board

Four appointments to Tech's Board of Directors have been named and sent to the Senate for confirmation by Gov. W. Lee O'Daniel, as follows:

James M. West of Houston, present chairman of the board, for another six-year term.

John B. Collier, Jr., of Fort Worth for a six-year term.

A. J. Riddle of Denison to fill the unexpired term off the late Joe T. Sneed of Amarillo, ending Feb. 19, 1945.

Chancellor Weymouth of Amarillo for a six-year term.

Other members of the board are: Spencer A. Wells, Lubbock, vice-chairman; C. C. Thompson, Colorado City, treasurer; L. L. Steele, Mexia; Mark McGee, Fort Worth; and Milburn McCarty, Eastland.

Latest reports from Austin indicate that all of the new appointees to the Tech board have been confirmed and will be officially inducted in the near future.

## Harvard Exhibit Gets Modernized Lighting

The famed glass flower exhibit at Harvard university which attracts 2,000,000 visitors annually, has been modernized with fluorescent lighting to bring out more exactly the fidelity to natural colors.

First placed on exhibit in 1890, the models were shown under gas lights, and for many years have been displayed under ordinary electric lights.

Officially known as the Ware collection, the models were produced from 1887 to 1939 by Leopold and Rudolph Blaschka, German artist-naturalists, the only artisans in the world combining the required skill with glass and knowledge of botany.

A \$140,000 ROTC building is being planned at Virginia.

are compelled to use their capital at a stipulated percent of profit. All factories needed are being drafted into the program or are being constructed. The wheels are beginning to move. America's giant industry is harnessed.

Manpower of the nation is likewise controlled. Through a selective draft men, regardless of occupation other than engagement in key posts of the nation's re-armament plan, by the tens of thousands pour steadily into army camps from the north to the south and from the east to the west. And the strong stride of these many thousands is electrifying. From erstwhile weaklings spring hardy soldiers capable of attacking, conquering, and holding. Iron infests the fibers of each erect body.

But here ends the pleasant outlook. A cloud descends, blights, and makes weak the effort and sacrifice on the part of capital and the nation's

## Variety Keynotes Summer Session's Recreation Plan

Tech's Summer session Recreational program, under direction of Dean of Men James G. Allen will offer students a wide variety of entertainment and diversion, with moving pictures, dances, athletic contests and artist course events.

Beginning June 10 a moving picture will be shown each Tuesday through the first six-week term of the summer session. First picture, June 10, will be "The Count of Monte Cristo," starring Robert Donat. On succeeding Tuesdays pictures will be "Kathryn the Great," "The Ghost Goes West," "First Love," and "Private Life of Henry VIII." Pictures will be shown on the south side of the Administration building as early as darkness permits.

Wednesday nights from 8 to 8:45 band concerts will be held and from 8:30 to 10 old-fashioned dances will be sponsored on the Tech tennis courts.

Thursday nights will offer artist guest stars, beginning June 12 with Charles Ferguson, Jr., baritone, Scheetz and Co., magicians, will follow on June 19 and an artist quartette has been tentatively scheduled for June 26. A comedy-drama, "Princess in Tartary" will be presented July 3 under the direction of Mrs. Alan Lang Strout.

Jack York's 12-piece band will swing out for informal sport dances, 8:30 to 11 p.m. in the gym Friday nights, June 13, 20 and 27.

In addition to the evening schedule, both tennis and golf tournaments will be conducted during the six weeks. Dates will be announced as soon as arranged. Awards will be made to top performers in these events.

Next week's program will feature:

June 10, Count of Monte Cristo, a moving picture, on the south side of the Administration building, about 8:30 p.m. June 11, Band concert, 8-8:45; old-fashioned dance, 8:30-10, Tech tennis courts.

June 12, Charles Ferguson, Jr., baritone.

June 13, Sports dance, gymnasium, 8:30-11, Jack York and his 12-piece band.

Holders of the recreation program cards will also be accorded special rates for golf, swimming, theaters, and others items listed on the back of the card.

## Defense Course On Sanitation Opens At Tech

A national defense course called "Community and Camp Sanitation" is offered at Tech this summer. This is a non-credit course open to those who are interested in the practical problems of sanitation.

Prof. J. H. Murdough, head of the department of civil engineering, is chairman of the committee sponsoring the course. J. O. Sealy, assistant professor of biology, will be in charge of instruction during the first six weeks. G. W. Parkhill, associate professor of civil engineering, will have charge of instruction during the second term. Charles G. Decker, instructor in civil engineering, will act as assistant.

Since the course is offered as a national defense measure, there will be no tuition charge. The only cost to those taking the course will be a breakage fee of \$3.00 which will be refunded at the end of the course.

Among the topics to be treated are: public health, administration, special subjects related to health, waterworks, sewage and sewage disposal, surveying, drawing, concrete making and placing, public speaking, community sanitation and miscellaneous sanitation problems.

The course will consist of lectures, laboratory exercise, and demonstration, and field inspection work. The instructors of the different phases of the course will be professors of Texas Tech, each teaching the subject that lies in his special field. Members of the Texas State Board of Health will also give lectures to the enrollees of this course.

High school education is a highly desirable though not entirely necessary prerequisite to this training. Facilities will accommodate twenty students.

Professors Decker and Parkhill were at Camp Barkley at Abilene June 3 to examine the sanitation and health equipment there. They received the cooperation of the Army Medical Corps.

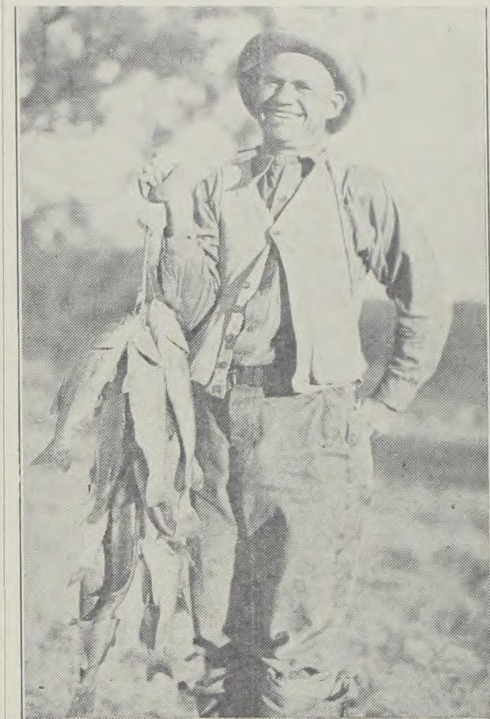

This training will be similar to the public health course offered by Tech in summers past. It will be conducted this year with the sanction and support of the state health department, the army medical corps and the national defense training administration.

## School Students Bands Will Blow On Tech Campus

Texas Tech will not be without music this summer according to band officials reports. Approximately 90 high school students from over the state of Texas have enrolled in the last three days in the Seventh Annual High School Band School to be held on Tech campus.

Three bands will be organized from the group to entertain summer school students. The 90 youngsters, who can be seen trekking across the campus with instruments under their arms or expelling musical notes from dormitory windows during the practice periods are to be divided into junior, senior and concert bands. The concert band will play each Wednesday night on the green behind the Administration building as an attraction of the summer school recreation program.

Along with young musicians and possible former Matador band members who may play the Fight Song and Matador song for future charging Red Raider football teams comes approximately 65 high school directors who will study under the direction of Prof. D. O. Wiley during the summer.

Typical of World-Famous Sportsman Jack Lamb's pastimes is this string of trout from Mountain lakes caught recently during one of the jovial outdoor-playboy's photographic holidays. He will be here tonight with technicolor motion pictures of the Big Bend National Park. The program is scheduled to start in senior high school auditorium at 8 p.m.

## Rabbi Lefkowitz Addresses Assembly Of Summer School

Rabbi Lefkowitz, Temple Emanu-el in Dallas, was scheduled to be the first speaker of the summer at Texas Tech. According to Dean James M. Gordon, Director of the summer session, Rabbi Lefkowitz was to address an opening assembly of summer school students, held for the first time in the history of the summer term.

Rabbi Lefkowitz' subject was to be "Facing Democracy's Crucial Test," and was to be delivered from the lawn on the south side of the Administration building. Inclement weather forced a change in the setting of the address and it was held in the gymnasium.

Rabbi Lefkowitz was educated at City College in New York and did post-graduate work at the University of Cincinnati. He also received an honorary degree from Southern Methodist university in 1930.

## It's A Big Cinch If Brains Wear And Brawn Last

"Proof of the pudding is in the eating," and six young men at Oglethorpe university way down in Georgia have come up with irrefutable evidence that too much work does not harm the average college student.

The six young men are survivors of an eleven-man "brain trust" which went into operation in September, 1939. They have qualified for bachelor of arts degrees in less than 20 months.

of the "brain team" carried each of the "brain team" carried some 30 hours work per semester, more than twice as much as the ordinary load. They are still healthy, happy and going strong. Therein lies a moral for the student who strikes a "grind" pose under 12 hours.

Students at Colorado State are adopting an honor system.

## Awards Of Merit Made To Shryock, Lowe And Akers

Smiling confidently, 407 Techsians took diplomas in hand and set forth into what commencement speakers termed a turbulent world at the fifteenth annual commencement exercises held at Texas Technological college Monday night, when annual collegiate honors and awards to the following were announced:

Rex Lowe of Cameron was awarded the \$270 Roscoe Wilson Memorial scholarship in foreign languages given by Mrs. Roscoe Wilson.

Betty Shryock of Pampa won the \$50 Lubbock Avalanche-Journal scholarship for the best work in reporting by a junior journalism student during the fall semester, given by Chas. A. Guy, publisher, and Parker Prouty, business manager.

A. C. Lambert, Jr. of O'Donnell was winner of the \$50 Wilbur C. Hawk Memorial scholarship for the best work in reporting by a junior journalism student during the spring semester given by Gene Howe, publisher of the Amarillo News-Globe.

Winner of the Mrs. J. T. Hutchinson scholarship of \$100 to the journalism student of sophomore or junior rank who makes the highest scholastic average for the year will be announced after the grades are compiled.

William Walter Akers of Lubbock was awarded the Mary Overton Craig prize in chemistry to the sophomore student who shows the greatest promise as a chemist, awarded by Dr. and Mrs. W. M. Craig.

Daphne Stephens of Roby was announced as winner of the \$50 cash award made by the Lubbock Pan-Hellenic society to the highest ranking freshman student in the division of home economics.

C. L. Storrs of Lubbock won the Standefer-Canon award which is given each year to the football letterman who makes the highest grades for the year.

H. L. Pinkney Moore of Bonham received a medal awarded by the National Association of Cotton Manufacturers for having the highest scholastic average among the graduates of the department of textile engineering.

Robert Estes Rankin of Midland was given the West Texas Geological Society award for outstanding work by a senior student of geology.

William E. Bauman of Munday received the award of the American Society of Mechanical Engineers to the member of the local chapter who has contributed most to the student branch during the year.

Howard Allen of Lubbock was given the prize offered by the faculty of the department of architecture and allied arts to the senior student who has shown the greatest accomplishments in his work.

## The Governor Makes Four Wise Selections

CURRENTLY AWAITING Senatorial approval in the Texas Legislature are the names of four outstanding Lone Star state civic leaders, recently appointed by Gov. W. Lee O'Daniel to the Texas Tech Board of Directors.

They are men of merit, appointees whose interests and prestige will go far toward the furtherance of Texas Tech's welfare. Evidenced by their positions in the professional world, they have shown their ability and interest in public affairs. And for a school so young as Texas Tech, those are needs as great, if not so tangible, as buildings or increased personnel.

In such men as newly-appointed John B. Collier, Jr., of Fort Worth, A. J. Riddle of Denison, Chancellor Weymouth of Amarillo and re-appointed Board Chairman James M. West of Houston, Tech finds itself under the leadership of men long familiar with public affairs and educational problems.

Mr. Collier has been a luminary in Fort

Worth civic and professional circles, while Mr. Riddle has served the same purpose in Denison. Mr. Weymouth is known throughout the southwest for his prominent position in civic enterprises and cattle and banking interests. He was appointed to fill the seat of the late Joe T. Sneed on the Board, while Mr. West of Houston was appointed last winter.

Awaiting approval of the Texas Senate, those four are due to take official places on the Board of Directors, currently composed of Spencer A. Wells of Lubbock, Lisle L. Steele of Mexia, Mrs. W. R. Potter of Bowie, Milburn McCarty of Eastland, Charles C. Thompson of Colorado City, Mark McGee of Fort Worth, and Tomas G. Pollard of Tyler. Mrs. Potter and Mr. Pollard are the retiring members.

Texas Tech is to be congratulated, and the governor of the state of Texas thanked for maintaining the prestige of the Board of Directors with the three appointments and Chairman West's re-appointment.

**THE TOREADOR**

THE TOREADOR, student newspaper of Texas Technological college, is published Friday throughout the summer on the campus of Texas Technological college by students of the department of journalism.

Entered as second class matter, October 31, 1925, at the postoffice in Lubbock, Texas, under the act of March 3, 1879.

*America First For Lindbergh First*

A man who as a statesman is a good aviator has taken upon himself the duty of making known the will of the American people in regard to our foreign policy. There are no available records to show that even a minority of the population of the United States have elected him as a spokesman.

Lindbergh openly condemns the properly elected representatives who have been appointed by public opinion to formulate policy and action. In a recent speech he stated that the last election gave the voters no choice. He has repeatedly attacked the administration on the grounds that it was serving the ends of a small minority.

Why does he not hold some official title? Why, if he expresses the ideas and beliefs of a majority, does not that majority place him in a legal position so that his remarks may carry some weight.

Any man has a right to state his own private opinion of the present administration, the President, or the foreign policy. No man has the right to express the will of any other man unless he be properly elected or appointed as a public spokesman.

Lindbergh is a good showman. The people have proclaimed and publicized him as such. He has proved himself a daring flyer, but he has yet to prove his ability at statecraft.

No sufficient majority has expressed con-

*Lowest Type Of Biped*

Because the Toreador is not printed upon asbestos, we shall not express our exact opinion of the two crawling things that sabotaged the senior class gift.

Those chimes were to have rung for the first time at Commencement. Graduating seniors dug up the money to buy them. The two thieves dropped them when caught by the nightwatchman and damaged them to the extent of \$500.

The loss in hard cash hurts, but the worst part of the crime is the motive. Perhaps some poor person really needed a set of electric chimes, or it might be that some kleptomaniac expressed his twisted complexes by attempting to carry away the apparatus. But probably it was the work of some misguided misanthrope who's idea of humor would make a decent person gag.

The case rests in the hands of the law and the criminals can not be brought to justice too soon to suit Tech students.—Louie Johnston.

confidence in him to place him in office. He professes to abhor dictatorship. Why then does he use their methods? Hitler and Mussolini both took over the control of the state in the name of a small minority of the population of their countries.

If Lindbergh can prove that the last election was fraudulent or that the voters had no chance to select men in whom they could place confidence, he has a right to condemn the present leaders.

He insists that our ocean barrier will keep away any invasion. Who was it that gained fame by spanning that same barrier in an airplane. Also the ocean has always been a highway for commerce rather than an obstruction.

The fact that the lanky flyer has always been found somewhere near the limelight has caused some to wonder if "America First" is really not just another way of putting "Lindbergh first."—Louie Johnston.
