Saddle Tramps Play Paul Revere; Tech Spirit Hits High

## Techsans Enter 88 as Beauties

### Saturday Final Day to Nominate

LA VENTANA beauty nominations soared to a new high today in the history of Texas Tech. Eighty-eight candidates had been nominated by 2 p.m. yesterday in the school's first open nomination period.

Nominations will continue through Saturday. Past beauty contests have been conducted on a preferential elective system and only a small number of girls placed on the ballot.

Each girl, whose name has been entered, will be considered a beauty candidate and will appear before a nominating committee who will reduce the number to 32. Later the 32 girls will be introduced to the student body in a general convocation.

Following the introduction a preferential election will be held and 16 of the girls will be elected as beauty nominees. Some person regarded as an authority will pick half this number as beauties to be featured in the 1942 La Ventana.

Those nominated by yesterday afternoon were: Mary Jarrott, Dorothy Marrs, Ann Moore, Peggy Hess, Harriet Price, Jerry Larick, Betty Carol Wood, Ollie Sue Armstrong, Virginia Sutton, Faith McNamara, Marie Peterman, Jeanne Saunders, Dorothy Winston, Frances Mudge, Genevieve Decker, Mary Butler, Patsy Baker, Mary Ann Stephenson, Ruth Loflin, Julia Jones, Sara Bourdian, Marjorie Hall, Virginia Jane Hall, Jane Frickett, Roberta Owens, Martha Herring, Mallory Kelly, Ethel Burns, Elizabeth Bowden, Marjory Ridley, Mozelle Williamson, Pauline Barrier, Dorothy Lou Emmitt, Marilyn Landrum, Fannie Dale Cheek, Marian Kendall, Heidi Schneider, Yvonne Westmoreland, Jo Ann Lewis, Flora Lee Williams, Jane Hughton, Mana Mae Millikin, Frances Clark, La Verne Allen, Sylvia Wheelock, Dorothy Nell Swanson, Margaret McCreif, Thelma Rarney, Mary Martha, Jane Crocker, Evelyn Cooper, Thelma Crawford, Winifred Woods, Mary Louise Cooper, Othella Bertram, Theola Bertram, Twila Farrell, Jane Brownfield, Catherine Dil-

## Garb a la Vogue Of Girls in Dorm Reveal Natures

By MARY DUNBAR  
Toreador Feature Staff

A House meeting in the girls' dorm gives a variety of impressions. On just casually, and ever so languidly looking around, a person can get a general idea of the garb a la vogue worn after hours. Naturally, if you are under the piano during the meeting, your view of the proceedings and girls, and more girls, will be a little crooked, but nevertheless effective.

One long smattering of colors cover the floor like a carpet. Housecoats are so pretty these days. Everyone is draped over the chairs, lounges, and the piano seat... heads nod against the walls and off-key giggles punctuate the semi-quiet.

A few are unrecognizable with their faces in eight o'clock quiz subjects, their hair framing a nice curtain about their features. Hidden by heads and a pillar or two, one slime gives a demonstration of artificial respiration to her colleagues who are avidly interested. Another read it can't happen here, and is she gullible! Time limps on among wandering thoughts and a light litter ripples over the room in answer to something amusing said by the unseen, unknown person who has the floor.

The acoustics under a Steinway are pretty terrible. Some fingers run into the keyboard and a minor key makes a shocking entrance into the crowd. A cute little blond yawns sleepily and promptly folds in the lap of her roommate.

Then there is always the girl who writes a letter and who really isn't aware of anything. She smiles pensively as she writes, and until the receiver may have to make a weekly serial out of it. She lives in a world of her own, cringing when spoken to and this doesn't happen very often. Some one will have to tell her about Hitler sometime. She doesn't look anti-terror proof.

After all business has been carefully attended to and it is getting pretty late, the meeting breaks and everyone undraps, and another House Meeting is over.

## Saddle Tramps Name Saturday Letter Deadline

WITH APPLICATIONS for membership in their colorful Texas Tech cheering organization pouring through the college post office at an ever-increasing pace, charter members of the Saddle Tramps prepared to elect officers this week and map definite plans for Homecoming November 7-8.

An order for 60 additional shirts and a like number of girls' arm-bands was placed with Sam Rosenthal's Hub Clothiers company of Lubbock yesterday to accommodate the rapidly-growing list of Techs who have been posting their letters of application for membership during the past four days. Charter members of the Tramps said their section probably would total more than 100 students by Nov. 7 when the Saddle Tramps launch their Homecoming drive for adrenaized student body spirit during the return of Texas Tech exes.

Hub Clothiers accentuated the request that all orders for shirts and arm bands be presented them not later than Saturday noon, and charter members of the Saddle Tramps have urged that students desirous of membership in the organization submit their letters of application not later than Saturday morning.

In reply to numerous requests, the Saddle Tramps made clear yesterday there were no requirements for membership in their group other than a student's desire to evidence his support of Texas Tech and his athletic teams, and announce such intentions through the medium of a letter addressed to "The Saddle Tramps, Campus."

The membership is, however, limited to sophomores, junior and seniors, in observance of a tradition on the campus.

To simplify a tailoring problem, charter members have requested that future aspirants to Saddle Tramp membership include with their letter neck sizes of their shirts. The original members will meet today or Thursday to elect officers of this year's group. Henceforth, elections probably will be held each spring for terms of the ensuing year.

## Las Leales Keep Women's Activity Records for '41

Filing and maintenance of women's activity records will be done this year by Las Leales, honorary service organization, according to Twila Farrell, president. Plans were outlined for keeping the records, heretofore housed in the dean of women's office, at called meeting Sunday afternoon.

Las Leales members will be on duty at specified hours throughout the day in the AWS office so that the records may be referred to by anyone desiring information concerning activities of any regularly enrolled woman student.

Names of girls to be honored at the annual Women's Recognition Service are taken from the record of activity points on file.

## Tech Instructor Leaves for Army

L. Moffitt Cecil, instructor in English, has been ordered to report to Camp Barkley for active service as a first lieutenant in the infantry. His orders state that after a few days temporary duty at Camp Barkley, he will be transferred to Fort Benning, Ga., for a year's service.

## Tech Professors' Group Holds First Meet Friday

Texas Tech chapter of the American Association of University Professors will have its first meeting of the year at 7:30 p. m. Friday in room 202 of the Administration building.

Prof. Bonnie K. Dysart will lead discussion on the topic, "The Psychology of Faculty-Student Relationships." All members of the faculty are invited to attend, special invitations being extended to new teachers.

COWBOY NANCE and THE KID'S PISTOL  
Ex-Techsan Draws Bead With Outlaw's Hawg-Laig

## Museum Relics Tell Grim Stories of Bloody West

By MARY L. SMITH  
Toreador Staff Writer

AN AURA of the romantic days of the old West when the decision went to the man who was the quickest on the draw hangs over two guns in the collection of firearms at West Texas Museum.

Vivid associations cling to the gun which belonged to Billy the Kid, one of the Southwest's most colorful and best known bad men. The youthful outlaw's weapon was collected and lent to the Museum by Judge Arthur Hays of Monahans.

On display with the pistol is a pair of handcuffs used on the Kid and a picture of his grave. He is buried at Fort Sumner, N. M., alongside two of his partners, Tom O'Folliard and Charlie Bowdre.

A gun which arouses interesting speculations is a small pistol, rusty and with a broken chamber, which is identified by a card bearing the cryptic statement: "This pistol was taken off a professional gambler known as 'Red' after he was killed in a saloon in Mobeetie, Texas, in 1882."

Who was "Red" and why was he killed? Perhaps there was a shooting as the result of an argument of a crooked card game. Or perhaps his activities had carried him outside the pale of the law and a frontier sheriff has, with smoking guns, settled the people's score with him.

## Aggie Prof Eyes Casterbeans As Lubricant Means

Four one-acre plots of castor beans raised on the Tech farm under the supervision of assistant professor of agronomy, E. T. Duke are being given close attention as to cost of production and harvesting.

Oil derived from pressing and filtering the oil from the beans is an excellent lubricant for fine machinery, said Dr. W. A. Young of the plant industry department.

Next week G. R. Russell, supervisor of the division of drugs and related plants for the bureau of plant industry, with headquarters at Texas A&M, will arrive to look over the castor beans and gather the data compiled by Duke.

Reasons for such procedure is an attempt on the part of the government to determine the feasibility of growing the beans for oil. Should production cost be reasonable the beans could be widely raised should there be such a shortage of lubricants in the future to necessitate a supply from sources other than those already to be had.

## Found! One Student Who Really Wants An Education

Mrs. Zoie Newsome travels 166 miles daily to and from Tech. She comes a distance of 83 miles from her Snyder home each day by train, leaving at 6 a.m. and arriving back there at 6 p.m. In the course of nine months, Mrs. Newsome shall have traveled more than 30,000 miles to attend classes here.

Mrs. Newsome, wife of a Snyder attending, is a junior English major.

## Here They Are: Food Likes and Dislikes Of Men and Women Dormitory Residents

By ROY EDWARDS  
Toreador Staff Writer

WHAT FOODS do the students prefer and which group eats the most, boys or girls? These are frequent questions of Texas Tech dormitory visitors.

Surveys of the likes and dislikes of both men and women students of Tech have been completed and an estimate has been made as to types and costs of food consumed.

As a general rule boys eat more food than do girls. Strangely enough boys eat much greater quantities of beauty foods than do the girls. Milk which is recommended to be good for the complexion is scorned by many girls because they think it is fattening.

Employees in the various dormitories think there is no way of filling the boys when it comes to milk. Boys will drink milk as long as it is placed on the table, while girls usually prefer tea or ice water.

A favorite drink of the boys is hot chocolate. This drink is also

popular with the girls, and contrary to popular belief, very little coffee is consumed. Each morning coffee is placed at every table but many coffee pots remain untouched.

## Governor Names Dallas Theater Man to Board

### Rained Out Once, Block and Bridle Rodeo Re-Carded

NOV. 5 AND 6 are dates set for Block and Bridle's second annual all-college rodeo after postponement from Saturday due to excessive rains which made the Panhandle-South Plains fairgrounds unsuitable for the event.

Performances will be given at 8 o'clock on Wednesday and Thursday nights, when Texas Tech cowgirls and cowhands are expected to cut loose for the colorful affair before a record-breaking crowd.

Byron Range, director of the rodeo, and Hubert Moseley, assistant, have announced the following contestants:

Saddle bronc riding: Floyd Eriberg, Gene Finley, Roy Boone, Bill Wycher, James Waddell, Shirley Medlin, John Arnn, Wesley Martin and Eddie Henard.

Barrel race riding: Pat Owen, Roy Boone, Buster Cole, Bill Wycher, James Waddell, Shirley Medlin, John Arnn, Wesley Martin and Eddie Henard.

Steer riding: Delbert Riddle, Buster Cole, Bill Wycher, Glenn Elliott, Bill Stockstill, Roy Parks, Sims Taylor, O. G. Hill, Lewis Byars and Baylor Looper.

Girls' matched calf roping: Elizabeth Miller and Nancy Binford. Ribbon roping: Delbert Riddle, Tom Arnett, Buster Cole, Glenn Elliott, Bill Wycher, Bill Stockstill, Edward Vincent, Roy Parks, Felton Webb, Sims Taylor, O. G. Hill, Lewis Byars, Baylor Looper.

Sponsors' contest: La Verne Allen, Marjorie Beck, Faye Stone, Edith Haddock, Raye Stone, Elizabeth Belew, Jean McLaughlin, Billie Marie Miller, Bonnie Rose and Lucile Reed.

Steer riding: Bill Wycher, Bill Stockstill, Felton Webb, Roy Boone, Wesley Martin, Joseph High, Gene Culver, James Waddell, J. C. Doss, Nathan Allen, "Feets" Strain, John Arnn, O. G. Hill, Billy Arledge, Lewis Byars and Baylor Looper.

## Totaling 50 Now, ROTC Band Sets Pace in Growth

A growing organization on the Tech campus is the ROTC military band.

In its third year of activity, the band members number 50, a considerable increase over the 30-piece band of the first two years. The organization is under the direction of Woodyard McDowell, music major from Little Rock, Ark., who has recently been presented with an honorary second lieutenant's commission. This is the second year for McDowell as director of the band. The musicians receive regular military credit for their work in the band, and the lowest rank of any band member is that of first class private.

Regimental ceremonies have been highly augmented by the performance of the military musicians.

### Weeks Tells Standards

"Standards for Phi U Girls" was the subject of a talk by Dean Margaret W. Weeks to members of Phi Upsilon Omicron Tuesday night.

KARL HOBLITZELLE  
New Tech Board Member

## Scientists Meet Slated in Dallas

Dr. Craig Arranges For Symposia

The annual meeting of the American Association for the Advancement of Science will be held in Dallas, Dec. 29, 1941, to Jan. 3, 1942, and will be a joint meeting of the national association and its southwestern division.

Dr. William M. Craig, professor of chemistry at Tech and president of the southwestern division of the AAAS will be local secretary of the section on chemistry. Dr. Craig has been asked to arrange for symposia on "Spectrographic Analysis and the Petroleum Industry."

The program for the two symposia have been virtually completed according to Dr. Craig. Some of the outstanding chemists and physicists of the United States will participate in the meeting, "Spectrographic Analysis," said Dr. Craig, "is directly connected with national defense. It is so rapid and detects such small quantities of metals that it is valuable in this day when modern alloys are important, one-hundredth or one-thousandth of one per cent of a metallic impurity is enough to detect such small quantities of a ruin many types of alloys."

The method developed by astronomers in analysis of the stars, is exactly the same as that used in testing high speed steel and alloys of magnesium and aluminum which are so vital in the airplane industry. Two of the outstanding young astronomers of the southwest have been included on the program.

Dr. Ralph Sawyer of the University of Michigan, who recently installed a spectrographic analysis laboratory in the River Rouge plant, will also be a speaker.

## Engineer Grads Wanted by Uncle Sam in Industry

Graduate engineers and economists with experience are being sought to fill positions in the industry branches of the government, according to information received by Clifford B. Jones today.

Positions paying salaries of \$3200 to \$5000 per year are open for men between the ages of 30 and 35 according to the information which came through the Office of Production Management, Washington, D. C.

Men to assist in operating the government's industry branches such as pulp and paper, printing and publishing, lumber and building materials, plumbing and heating, automotive farm equipment and transportation, rubber and rubber products, electrical appliances and industrial machinery may apply for the jobs.

## Dry-Farmers Off For Lab Study

Thirty-three students of dry farming will further their knowledge in this field next Thursday by making an all-day trip to Spur to study laboratory and instrument work.

Students will leave Lubbock at 8 a. m. and return at 5 p. m. A chartered bus will convey them there and back.

Seniors compose this class, and they are in training for vocational agriculture teaching and plant industry.

## Hoblitzelle Gets Post Opened By Death of West

KARL HOBLITZELLE, colorful Dallas theater pioneer, was appointed to the board of directors of Texas Tech Saturday, to fill the unexpired term of the late J.M. West of Houston.

Appointed by Governor Coke Stevenson, Hoblitzelle's term will expire Feb. 19, 1947. The prominent theater magnate is president of the Interstate Circuit of theaters which operate extensively throughout Texas and adjoining states.

Hoblitzelle came to Dallas in 1905 and built the original Majestic theater. Later he constructed similar theaters in San Antonio, Houston and Fort Worth to start what was to be one of the most colorful pioneering careers in the theater business.

Among achievements of the newly appointed Tech director was his introduction of first class vaudeville to the Southwest and pioneering in securing headline acts and performances for his theatres.

## Tickets On Sale For Annual Tech Engineers' Ball

Tickets for the annual engineers' ball are now on sale, according to Bill Hamm, chairman of the dance committee.

Engineers can get their tickets at the engineering bookstore or from any president of the various engineering societies. Prices established are \$1 for a date, and 75 cents for a stag.

Jack York will play for the ball to be held from 9 to 12 p.m. Saturday at the Lubbock hotel.

## Girls Tag And Stag at Dorm Dance Friday

It'll be "girls tag and girls stag" again Friday night when women dorm residents cooperate and celebrate Halloween with the annual fall dormitory dance. Bashful girls may be coaxed from their shell by the fact that they will be wall flowers if they don't tag their sister's boy friend, and it will be a girl's best chance to snub the gentlemen who didn't ask her to dance at the last all-college.

This year is should be called the "dormitories' dance" however, for the dining hall of both dormitories will be open to all the residents and their dates. Mid appropriate Halloween settings and an innocent form of Halloween spirits, the girls will make it another girls' tag dance, and any girl can come stag. Women students seem to enjoy this form of dance better than any other—perhaps because it eliminates all pre-dance worries about getting "stuck." Male companions will be at the mercy of the fair sex on that Halloween night.

Since the dorm administration was unable to secure an orchestra for that date, music will be furnished by the rockolodex orchestra. The dance will last from 9 until 12 o'clock.

## Dieticians Hear Miss McCrery

Highlights of the American Dietetics convention held in St. Louis last week was the subject of a talk Monday night by Miss Jonnie McCrery, head of the foods and nutrition department, to members of the Lubbock Dietetics association. The meeting was held at the Sisters of St. Joseph's home.

Dean Margaret W. Weeks and Mrs. Mina D. Lamb, foods and nutrition professor, gave reports of the recent meeting of the state nutrition committee in Austin.

## College Calendar

- Today: Social clubs, Sans Souci Patronesses party, 6; V-8 Ranch.
- Thursday, Oct. 30: Home Economics Halloween party.
- Faculty party, 7. Double T gym YM-YW, 7-8, Seaman hall.
- Friday, Oct. 31: Women's Dorm association dances, 9-12; Women's dormitories, Nos. 1 and 2.
- Saturday, Nov. 1: Engineers' ball, 9-12; Lubbock hotel.

### A Handful at First; But Hundreds Soon

YES, THE Saddle Tramps did ride again. They rode laggardness and indifference out of Double T stadium on a rail Friday night. They touched off the smoldering spark of student body spirit as a gunner would jerk his artillery lanyard. In a number so small they made but a tiny red blotch against the east stands, charter members of the Saddle Tramps and their dates prompted the greatest display of Texas Tech cheering since the Cotton Bowl days of 1938.

A steady stream of applications for Saddle Tramp membership indicate they'll ride again and in vastly larger numbers by Homecoming's Nov. 7th bonfire and pep rally. They symbolize in enthusiasm, though not in actual number, the force that molds nations but breaks tyrannies, a fundamental power capable of more than athletic victory.

Should the spirit which Tech's Saddle Tramps exemplify continue its miraculous growth, there will be more victories for Techsians; there will be a far-reaching and powerful alumni, a tremendous student body. There will be conference athletic events with Rice, Texas, Southern Methodist; there will be an invincible educational empire, thriving within its own self-sustenance, high on the windy, sand-swept South Plains of West Texas. The empire will be called *Texas Tech* and its populace, *Techsians*.

Thus the potential significance of a handful of flaming red shirts and a few crimson armbands—a handful that overflowed the realm of the palm, that spread from corner to corner of a stadium... section to section of a state. We are proud of Texas Tech, the home of the Saddle Tramps.

### Quotable Quotes

(By Associated Collegiate Press)

Greece is starving but firm in her loyalty to the principles for which she fought. The question is how long this passive resistance can continue among a people hungry to the point of death." Dr. Minnie B. Mills, president of Pierce College for Girls at Athens, brings a first-hand view of subject Greece, warns her people are "apprehensive of the future."

"I will not leave Japan even if worse comes to worst in Japanese-American relations: In time I have hopes of seeing America understand Japan's intentions. Even if my Japanese friends should abandon me I will not return to America, but will commit hara-kari and die on Japanese soil. Paul Rusch of Louisville, Ky., instructor at Tokyo's Rikkyo (Episcopalian) university for the last 15 years and the man who introduced American football to Japan, takes his stand in advance of possible Japanese-American hostilities.

University of Cincinnati recently received gifts totaling more than \$43,000.

### Tin-Can Jallopy: A Pre-Requisite To Campus Love

WHO CAPTURES the heart of every college co-ed? Is it Robert Taylor? The hero of Saturday's football game? The campus sheik with the shock-lined pockets? Or the dashing aviator who keeps his head in the clouds for the sake of Uncle Sam? No! It's the fellow with a tin version of an automobile who gets all the attention. A jalopy is the key to any girl's heart.

Most girls like to attract the public eye, and there is no better setting than a seat at the side of "Leaping Lena's" owner, surrounded by countless occupants who in some way or another always manage to find room for one more.

Up and down Broadway they rattle at the reckless speed of twenty miles an hour giggling loudly as terrified pedestrians do a Lindy loop for their lives shake horrified heads and wonder "what on earth this younger generation is coming to."

By skillful manipulation the skillful driver gets more speed from "Lena's" laboring engine and the whole-hearted admiration of his girl friend. This admiration is not dimmed even when "Lena" sputters and stops despondently in the middle of the street, clouds of steam issuing from her heaving radiator.

At this rather common occurrence everyone piles out and offers hopeful suggestions to the harassed driver.

"It must be the exhaust pipe." "Maybe the carburetor's on the blink."

"Or perhaps it's the gas-line." "Gosh, remember the times she stopped on the highway at midnight and—"

Finally someone makes the startling discovery that all poor "Lena" needs is another pint of gas. A hurried collection yields the sum of one dime, four pennies, and a lead nickel.

An obliging fish starts on the run for the nearest gasoline station and is soon back with a leaky bucketful of the precious fluid. Wild shouts of joy greet "Lena's" rear of approval and there is a mad scramble as she lurches forward again.

The co-ed sits beside her idol, whose face has several very becoming streaks of grease across one cheek. She mentally pats herself on the back and smiles smugly. "Boy have I landed a smooth one this time!" —Marianna Coffey.

### Can You Take Out This Grass Stain by Six?

Students at Texas Tech wear dirty clothes, but so does everyone else according to local tailoring and cleaning shop proprietors.

Debris of every kind, with the exception of money, is found in pockets of student clothes. Lost activity and artist course tickets, identifications and medical cards are frequently unearthed in pockets.

### Campus Camera

PROF. ISAAC M. COCHRAN OF CARLETON COLLEGE ENTERTAINS BY SOLO-ACTING STORIES OF SHAKESPEAREAN AND MODERN PLAYS. HE HAS MEMORIZED OVER 1,000,000 WORDS!

YALE UNIVERSITY HAS THE ADDRESSES OF ALL BUT 80 OF ITS 31,003 GRADS!

### What Techsians Are Thinking: Candidly Speaking

By CLEM SIMPSON Student Opinion Editor

How do you visualize the political world of 1950. PEGGY ANN LEVI, junior arts and science major: "I believe that it will be a world of democracies with dominating power and working toward some sort of a United State of the world."

Mrs. ALFA MAE WOOD, junior arts and science student: "Concerning the political set-up of the world, and particularly the U.S. in 1950, one would have to be a prophet or the prophets to even hazard a guess of just how the picture will work out, but in the light of present day conditions, my opinion is should Britain and the U.S. win the war we shall see a new economic order established. Government and business will be more closely related than ever before and these two great nations will regulate the political and economic policies of the world through an organization somewhat similar to the League of Nations but with much more power."

"National defense will be strengthened and our two great navies will probably be combined and used to police the seven seas." HELENE DUCKWORTH, junior in education: "The world of 1950 will be one of democracy. Hitler and his associates will by that time be subdued and those of us who are peace lovers will again be enabled to draw an easy breath. Too many of our American boys will be lost for the cause but for a world of peace there seems to be no other way. By 1950 the United States and Great Britain will be the great powers of the world and we will be enjoying a truly democratic world. May there never be another Hitler to cause such strife and unrest for the entire world."

REX LOWE, junior foreign language major: "By 1950, Hitler will be no more, but the terrible effects of his gigantic struggle for world domination will clearly be visible. The world will be under reconstruction as the result of the pillaging and plundering of mostly one man. In my opinion, there will probably be a World Federation of States with its government in the United States or Great Britain. To this Federation, will be sent delegates from every power in the world. Something similar to this must be set up if the world is to be saved."

### Library Offers Solution to Tech Record-Problems

No money with which to buy new records? Don't let that worry you. If you are interested in semi-classical music, the library can solve that problem for you.

W. R. Wagborne, former head of the music department, undertakes a serious head operation Sunday at Mayo Brothers clinic, Rochester, Minn. Mrs. Wagborne is there with him.

hoven, Mendelssohn and Schumann. In the suites and tone poems are to be found pieces by Strauss, Bach, Stravinsky, Elgar, Debussy, Sibelius, De Falla, Saint-Saens, Respighi, Purcell, Mendelssohn, Grieg and Massenet.

Among the overtures are works by Bach, Handel, Mendelssohn, Brahms, Rossini, Suppe, Tschai-kowsky, Wagner, Schubert and Weber.

There are symphonies by Schubert, Tschai-kowsky, Mozart, Goldmark, Beethoven, Haydn and Brahms. Also, some introductions and preludes by Wagner.

These records may be checked out for three days by any student interested in music.

### Tech Jitterbug Wreaks Havoc At ROTC Drills With Revised Slang

To an inexperienced bystander, the most striking feature of a Texas Tech ROTC drill might be the amazing verbal improvisations made by student officers in giving commands.

Apparently it is considered a disgrace among the task masters if a given command is clearly audible and understandable. The ability of the cadets to find whether a guttural "harrumph" is to be interpreted as "about face" or "present arms" is actually phenomenal, but they all seem to move in the same general direction when an officer grunts.

From all indications, the old, rhythmic counting syllable, "hep," is definitely outmoded in modern drill. In its stead have been instituted many strange and various sounding syllables, such as "hop," "hope," "hub," "het," "hipe," and "hump." One cadet was heard to alternate his counting words with "hut" and "sut." Inquiry revealed him to be one of the campus' leading jitterbugs.

### YM-YMCA Will Hold Hallowe'en Party In Groove

The Tech YM-YWCA will have its annual Hallowe'en party from 7-8 p. m. in Aggie grove. All students are invited to attend.

Ruth Monk is chairman of recreation committee and Lorene Ellison has charge of the food.

### In the Mailbox:

#### Tech Motorist Keeps Feet Dry

Editor, The Toreador: It has been said that in time of sickness, and distress, we all turn to God and the Doctor. Disproving this statement, I am turning to the Press.

Many nights in going from Horn hall I was forced off the sidewalk four times by some mental midget who had left his car parked in front of the sidewalk leading to the pavement or some morning who had driven his car up over the sidewalk so that he might not get his feet muddy.

Disgusted,  
B.L.  
(Maybe he has white side-wall tires!—The Editor)

# Unbeaten Raiders Meet Unbeaten Miami Friday Night

## Reds Still Free From Injuries; Seek Sixth Win

By SAM MALONE  
Toreador Sports Editor

TEXAS Tech's Red Raiders face the most severe test of the season in Miami, Fla., Friday when they invade the Hurricane camp to meet the undefeated, untied University of Miami. Both teams clash at 8:30 p.m. in the Orange Bowl where the Hurricanes took a heart-breaker from the Gentlemen in Red, 19 to 0 in 1939. The Raiders were well paid for the defeat by trouncing Florida 61 to 14 here last season.

Outstanding feature of the Hurricane squad is the almost total absence of Florida boys from the football team. Only two candidates on the Miami roster are listed from Florida. The rest are from all over the United States.

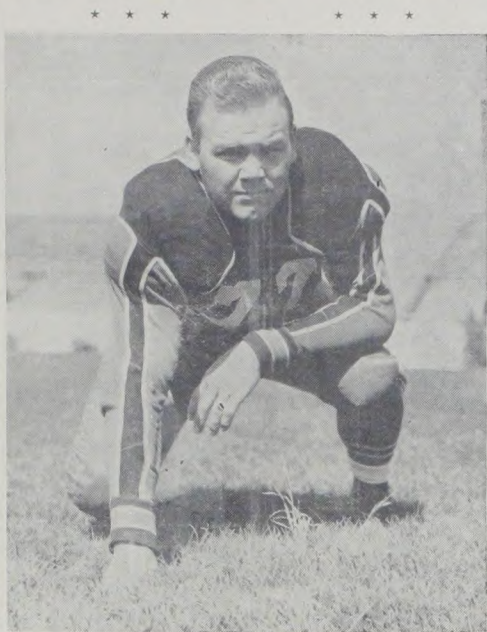

The Red Raiders seek their sixth win of the season and the Hurricanes are after their fifth. Miami, like Tech, has had only one touchdown scored against them this season. They won over Tampa university 20 to 6 last week in their hardest-fought game.

Howard Plosman, brother of the outstanding professional football great Dick Plosman, is the kingpin of the Hurricane attack. Plosman carries the plunging assignments as well as passing and kicking. He has averaged 60 to 70 yards on his boots this season. Tom Kearnes, 215 pound tackle who stands 6 feet 3 inches sparks the Miami line and Russell Coates and John Tobin, both three-year lettermen, are also stalwarts in the defensive line-up.

The Raiders left Lubbock, via train, Tuesday at 4 p.m. and will work out in New Orleans tonight. Thursday afternoon they will have a short workout in Jacksonville, Fla. and will arrive in Miami Friday morning.

Coaches Delicate Dell Morgan and Burly Berl Huffman were well pleased with the performance against the New Mexico Lobos last Friday, and the entire squad finished the game without injury. There have been no serious injuries on the Raider squad in the last five games played.

Raiders who left Tuesday are: Head, Hale, and Irons, centers; Ballio, Caraway, Allbright, Farris, and Jay, guards; Shanks, Cudd, A. Williams, and Sewell, tackles; Tillery, Duncan, Bingham, Gilbreath, and Crossen, ends; Bain and Cocky Robbins, quarter-

## Here's Where We Came In; Tech Made Another Score

By MARIANNA COFFEY  
Toreador Staff Writer

SAFETIES and double-wing back formations are no mystery to the modern coed. Underneath her crazy little hat with its towering feather is a brain fully capable of understanding all the intricacies of the game of football.

The exception to the rule was evidenced at the New Mexico-Tech game Friday night. Wrapped in a brown mink coat she coyly raised inch-long eyelashes to her escort as soon as the game began. "Jimmy darling," she cooed, "why are those men telling secrets out in the center of the field?"

"Jimmy darling" answered with an amused smile. "Telling secrets? Why they're in a huddle." "Well, don't act so superior. After all, no one has ever explained football to me. I want to know all about it."

Jimmy took a deep breath. "Backs, Dvoracek, Douglass, and Lowe, fullbacks; Austin, Amonett and McKnight, right halfbacks; Callahan, Smith and Bates, left halfbacks."

"There are 11 players on each team—two tackles, guards, ends, a center, a fullback—"

She interrupted, "A drawback on each team. I think that would be quite a handicap." "Fullback dear."

"Well, what's the difference?" she retorted. The lecture continued for several minutes. Suddenly the bleachers rocked with cheers. "Oooh, what happened?" queried "Baby Snooks."

"Why, Ty Bain just made a touchdown," yelled her One and Only mashing his hat flat and stamping his feet in an unabashed wave of excitement. "Now they're trying to kick the goal."

## Jim Brigham Repeats As Winner In Sears' Grid-Guessing Contest

Again genial Jim Brigham, Tech yell-leader came to the front to pick nine winners for the \$5 merchandise award in the SEARS-ROEBUCK & Co. football guessing contest last week. Missing on-

## Bowling League Launched Here For First Time

TECH PIN toppers drew the curtain on the first college bowling league last Wednesday night. Recently Texas Tech was made a member of the American Bowling Congress and bowling has been initiated on-to Tech campus for the first time.

Eight teams have formed a league which will continue until the end of the fall semester. If enough interest is shown, other leagues will probably be organized for the girls or various other groups that wish to participate in this sport.

In the preliminary round Wednesday night, College Club led the way with three straight victories over the S. A. M. E. Kemas won two bitterly contested games from the Wranglers but dropped the third to the boys from the corral.

The closest matches of the night were between the Silver Keys and Los Camaradas. Not over five pins separated these two teams in any of the three contests. The Cams finally triumphed in two of the three games. Oddly enough, however, the Cams knocked over only 2046 pins while the defeated team scored two more for a total of 2048.

Socil bowled over the Centaurs in two of their three games. Both of these teams seemed badly off form and consequently their total pins of 1712 and 1666 respectively, were lower than the other six teams.

Since the league is worked on a handicap basis, perhaps these two teams will have the edge on the opponents in tonight's games. Watson Carllock, S. A. M. E. flash, grabbed individual high point honors for a single game by going off on a 222 scoring spree. Buck Wetzel, Silver Key kegger, knocked off runnerup honors with a 197 game. Nipping at Wetzel's heels was Dick Holden with 193.

**SCHEDULE FOR TONIGHT**  
Wranglers on alley 1 vs. Socil on alley 2.  
Kemas on alley 3 vs. Centaurs on alley 4.  
College Club on alley 5 vs. Los Camaradas on alley 6.  
S. A. M. E. on alley 7 vs. Silver Keys on alley 8.  
Standings and total pins are as follows:

Club	Won	Lost	Total Pins
1. College Club	3	0	1983
2. Los Camaradas	2	1	2192
3. Los Camaradas	2	1	2046
4. Socil	2	1	1712
5. Silver Keys	1	2	2048
6. Wranglers	1	2	2038
7. Centaurs	1	2	1666
8. S.A.M.E.	0	3	1881

...and when that end floats on the wide stuff, keep crowding me until he comes in; then Ty and Ill high-low him and you cut back," hard-blocking Loyce Ballio advises Blind Tom Smith, who twirled himself like a hand baton through New Mexico's Lobos last Friday night as Tech won its fifth straight victory, 36-0.

## Picadors Make Mud Cookies Out of Aggies

When the going gets rough, even in muck and mire, Texas Tech's Picadors can keep pace with the roughest, as evidenced in the 6 to 0 defeat the Pies handed Cameron Junior college Aggies here Saturday afternoon.

Playing on even terms, despite the weight advantage held by the beefy eleven from Lawton, Okla., the two teams battered through mud the entire afternoon with an abundance of fumbles, and sliding over the slippery field.

Only score of the game was made by a 35-yard pass late in the third quarter from Ray Hopkins on the Aggie 40-yard line to Spider Dillon, who dragged the ball in on the five and galloped across the pay strip without being touched.

Although held in their own end of the field the first quarter, the Picadors fought their way to the center stripe where the two teams fumbled, punted on third downs and slid back and forth.

### Candidly Speaking

Continued from Page 2

civilized world is ever to have peace—even if civilization is to continue its forward march. There must be some central authority to settle disputes between two bickering nations.

Such a plan may seem fantastic, but it is entirely feasible. If it is not and if by 1950 Great Britain and the U.S. are not the dominating powers of the world, let me die now.

NANCY SPARKS, home economics senior: "I'm really not a pessimist, but I don't believe we have a very bright future. At that time if the United States is not in the midst of a great war, this horrible war will have just ended. I definitely believe that Hitler will be disposed of and that good will triumph. New inventions, shattered homes, new adjustments, and a depression is a natural result.

GEORGIA MACHA, senior senior home economics: "In 1950 the United States will have its soldiers back in their own ports. The war for universal democracy will have been won. Hitler will be completely out of existence and there certainly will not be an inch of ground on the entire globe called Germany. There will be a grave economic crisis within the United States of America but it will recuperate rapidly because they fought for what was right and right always wins, even though it may be a long hard struggle."

NATHAN ALLEN, junior animal husbandry: "I think that the U. S. will continue to be the leading figure of the Western Hemisphere. Who will do the dictating for the eastern world will depend on how deeply the U. S. becomes involved in the present war."

### Here They Are

Continued from Page 1

ham and Boston cream pie. Boys prefer sweet desserts such as pecan pie and ice cream but most of the girls think that these foods are also fattening.

Due perhaps to Popeye advertising boys seem to like spinach and other types of greens. Greens are usually preferred with some type of meat.

Average rooms in Tech dormitories cost 27.50 per month while the costs in other state institutions are much higher. In each dormitory there is an average of 25 students who make their room and board by waiting tables. This means that approximately 100 students work for their rooms in the dormitories.

Food is bought in wholesale quantities from Lubbock wholesale houses and for this reason is much cheaper to prepare than if bought at retail stores.

Menus are worked out ahead of time and are planned for tastes of the students as a whole. Naturally it is impossible to satisfy the individual tastes of every student. Boys usually will eat common foods but when a new recipe is run in many of them refuse to eat the concoction. Girls on the other hand are always willing to try new foods and prefer mixed foods much more than do the boys.

Facts concerning quantities of food are not complete but in one men's dormitory the boys consume from 25 to 40 pounds of bacon at breakfast. In the same dorm boys consume approximately 40 loaves of bread for lunch and 50 at night. When beef is served the boys usually eat 120 pounds and for pork the consumption is 175 pounds. In one dormitory about 40 gallons of milk are consumed in a meal.

Costs of food are changing and it is impossible to get exact figures of the cost to feed each student per day. The approximation however, is 50 cents per day for each student. This amount covers the cost of three meals. Remainder of the money that students pay goes for hiring of dormitory help and for making payments on the buildings.

With 1288 students in the four dormitories the approximate sum of \$644 per day goes for food alone. In 30 days this would amount to \$19,320.

### Aggies See Hawaii

Scenes of picturesque Hawaii were shown by A. R. Dalby to members of the Aggie club Tuesday night. Recently Dalby visited Hawaii and other Pacific islands, and while there took both color and black and white motion pictures.

### Hallowe'en Jive At Hayloft Is Friday Feature

By ARLEE GOWEN  
Amusements Editor

ANOTHER pollution of the ether waves emanating from KFYYaaYaa is "Pup" Thomas's Lar's club. Along with other preparators on the program is the M.C. Sam Drake, ex-Toreador sports editor, who was quite proficient in the art before he got into the clothes racket.

For more fun than a bridge-game with the Marx brothers, this corner suggests your attendance at Friday night's gala Hallowe'en jive and jam session scheduled by the Old Hayloft down on Avenue J. Jack York and His Gentlemen will be on hand for the merry-making which begins at 9 p.m.

Even the drizzling rain Saturday night failed to dampen the spirits of the Techsians at the Raider-Lobo game. Few students left and those who did came out of their shelter after the shower was over. Never before the reign of Elmer "the Great" Tarbox has football had the support of the student body like the team has this year.

School spirit in the graduating senior who reaches for his diploma with tear-dimmed eyes; it is the freshman shining shoes in the dormitory; it is the single one gets when the victory bells ring; it is the awe-inspiring silence evidenced when the Matador song is played at the football game.

Free cider, apple-bobbing on the sidewalk, free favors and plenty of noise and hilarity along with "The Mad Doctor" is the Hallowe'en bill for the Broadway theatre preview Friday at 11:30 p.m. The picture combines the sinister villainy of Basil Rathbone as the mad psychiatrist, the loveliness of Ellen Drew, and the appeal of handsome John Howard as a shrewd newspaper reporter.

team to give them a chance at the ball," agreed little Miss Charity. "Why do three of the men wear striped shirts and keep running around the field?"

"They're giving the chain gang version of a rumba," he snapped back. At that moment the Raiders rolled over for another touchdown. Jimmy whistled shrilly, throwing his much maligned hat into the air. "Atta boy Raiders . . . 'At's the way to do it."

His exuberance was short-lived. He felt a tug at his sleeve. "Please Jimmy. It looks like rain and I don't want to spoil this new coat. Let's go home now."

Jimmy's beaming expression turned to one of despair. "For heaven's sake," he exploded, venting all his hatred for the entire opposite sex into the on exclamation.
