

Big Red Goes On Bear Hunt Tonight

by JOHN PETTY
Associate Sports Editor

Texas Tech's Red Raiders—thirsting for a victory after a week's drought of two straight defeats—tackle the Bears from Baylor University tonight at 8 in Municipal Coliseum.

This evening's game will be the third meeting between the two teams this season. Baylor has grabbed both of the earlier games by scores of 78-58 and 71-60. The 20 point loss was in the pre-season tournament in Houston and doesn't count in the conference statistics.

DESPITE the two previous losses to the Bears, the Techsians will go into the game evenly matched with the Baptists. Both own a 3-4 conference record with seven games to play. The Bears have victories over Texas Christian, Tech and Texas University while their losses were to Texas A&M, Rice, Arkansas and Southern Methodist.

The three Raider wins were over Rice, TCU and Arkansas, and they came out on the short end against the Aggies, Texas, SMU and Baylor.

HEADING THE roster of Bears is 6-5 Carroll Dawson with a con-

ference average of 14.3 points per game. Dawson needs only eight points in tonight's tilt to break the 300 points-scored mark for the season. Last year, the big Bear tipped in 319 points over the season.

Rounder out the Baylor quint is 6-2 David Pierce, 6-4 Richard Tinsley, 6-3 Bob Turner, and 5-10 Jerry Walsh. All of the starters have double-figured point averages in conference play. Pierce has averaged 12 points per contest, Tinsley—12.3, Turner—10.4 and Walsh—10.4.

HIGH MEN against the Raiders this season have been Daw-

son who scored 23 points in the tournament and Pierce who racked up 22 when the Raiders played Baylor at home on Jan. 12.

Raider coach Polk Robinson is expected to juggle his lineup somewhat this week. James Wiley and Steve Lee, who have been starting most of the season, will probably be replaced by Mac Percival and Don Perkins. Completing the Tech starting five will be Roger Hennig, Gene Arrington and Del Ray Mounts.

WITH THE addition of Perkins to the starting lineup, the Raiders will have a slight advantage

in height. The sophomore center's 6-7 gives the Techsians an average margin of one inch over the Bears—6-3 to 6-2.

The varsity tilt will be preceded at 6 p.m. by a game between the Picadors and the Ince Oilers.

In their last game Thursday night against the West Texas State frosh, the Picadors walked to an easy 109-83 win. Facing the Picadors tonight will be Tommy Clark, who smashed in 32 points against WTS. Also included in the list of probable freshmen starters are Tom Petty, Bobby Gindorf, Gilbert Varnell and Milton Mickey.

Professors Match Wits

Talk on Improving Academic Efforts

by PRESTON MAYNARD
Toreador Issue Editor

In a lively discussion dented by dry humor, penetrated by probing thinking and punctuated by bursts of laughter from a capacity crowd in Aggie Auditorium, six Texas Tech professors verbally tossed ideas at each other Friday night on the question, "Can We Improve Academic Effort?"

Leading off the commentary, sponsored by the Tech chapter of the American Assn. of University Professors, Dr. Alan Lang Strout, professor of English, asked the question, do we want Texas Tech to be a "pleasant community center," concerned with public relations and "smelling of culture," or do we want it to be a university for West Texas?

Strout said Tech was first rate in its plant, second rate in its faculty and students and third rate in faculty salaries, with the last tinged with unmistakable sarcasm, bringing howls of laughter. Later he added momentum to this with the equally laugh-provoking shout, "as for me, give me salary or give me death!"

Calling for the establishment of a faculty senate, Strout ranged over his ideas for improvement of standards, saying of his own teaching that "my contagious enthusiasm will stimulate anybody who has a spark of enthusiasm to begin with."

Passing over some of the mistakes in word usage which he has found in classes, Strout set the audience into an uproar with the words, quoted from a student's paper, "blessed are the pure in heart, for they shall inhibit the earth."

Dr. Earl Koos, professor of sociology, then took to the rostrum to probe the aspects of large classes and limiting of enrollment and their effect on improving academic effort.

Speaking of a coming "explosion of higher education on the Texas Tech campus," he said he "saw nothing wrong with large classes under certain conditions... but not where a high degree of personal interaction between the student and teacher" is required.

He then called for "shucking off this technical college title which is

ONE PRETTY COED LOST HER CHARM

The deans of women have been searching fruitfully the past few weeks for a Texas Tech coed who left a charm off a bracelet at a dance following the SMU Tech football game in Dallas last semester.

It all began about Dead Week before final exams in January. The deans of women received a package from Tom Meranda, an SMU student.

Enclosed in the package was the charm and a note which read:

"The young lady, I don't remember her name, gave me her charm during a dance so that it wouldn't bother her. After we were through dancing I lost her in the crowd and forgot I had her charm... until I got back to the dorm that night. Then it was too late to return it.

"Actually I didn't know what to do then, but I thought that I'd see her again and be able to return it. I should have sent it to you sooner, I know, but somehow it slipped my mind."

The charm is rather large, sort of oval shaped and made of antique gold. Four iridescent stones are set in the charm — two reflect green and yellow, and the other two reflect red and blue. Actually, it looks something like a miniature pendant or cavalier.

The charm is being kept in the Dean of Women's Office in the west wing of the Administration Building.

Although Meranda was not able to recall the coed's name, he did include a description which he thought might help in the search: "She's about 5'5" tall, dark hair and eyes and dark complexioned, and rather good looking. I believe she was a sophomore in classification.

"I know you don't have much to go on," he concluded, "but I'd know her if I ever saw her and hope that you might, too."

Aggie Group Stresses Diversified Chemicals

Diversified use of chemicals in farming and ranching was stressed at the seventh annual Agricultural Chemicals Conference that opened at Texas Tech Wednesday.

ALL ASPECTS of chemicals being used in West Texas agriculture were examined by the end of the meeting Thursday. More than 180 farm chemicals dealers and representatives are registered. Emphasis this year is on farm chemicals and quality production, according to Dr. Gerald W. Thomas, Tech agriculture dean, who said that more than 100 chemicals are used in cotton and grain sorghum production in this area alone.

DR. HARRY C. LANE, Texas Agricultural Experiment Station plant physiologist here, pointed out that cotton's response to fertilizer will be greater if the rate

of the plant's development is considered throughout the season.

SPEAKING ON use of chemicals in meat production, Dr. Ralph Durham, Tech animal husbandry department head, described the important relationship between the cost of chemical additives and the product being produced.

"The general pattern of all of the additives is to increase feed consumption and speed up weight accumulation," he stated.

"We did not say 'increased efficiency and rate of gain' for generally the improved increment of efficiency is far below that of the improved rate of weight accumulation."

Red Raider Day Set For Saturday

JUST SOME GAB

j.s.g.

Heu pietas! heu prisca fides! . . . Virgil

The worthy gentlemen who founded this country broke with England in the Declaration of Independence. In so doing, they made a statement I feel needs repeating, especially in view of a recent happening on this campus (a happening, I must add, to me). That phrase to which I refer is found at the close of the document: ". . . we mutually pledge to each other our lives, our fortunes and our sacred honor." It is with the last of these offerings which I shall deal — "our sacred honor."

Initially, allow me to say that it is not universal on this campus to be without honor, but there is evidently some cause or justification in this regard. Take the case of an instructor of mine: The other day he moved the class up to fill the front two rows of seats; he admonished us to remember that — on quiz days — we should make sure there was a seat between each of us; he added that he was sorry, but that it was "the system" here that "you don't trust us and we don't trust you!" I was at first merely disturbed; since, I have become distressed.

Distressed for many reasons: Primarily, my honor has been impugned indirectly (and I shall not demand satisfaction through a duel, a form of honor best left dead). Nonetheless, it is an appalling state of affairs when so-called mature adults have their integrity questioned in an institution designed to create in them a desire for — yes, even an insistence on — such integrity and honor.

Secondly, I have become distressed due to the fact that the instructor made such a statement regarding the "system." I attended a high school-level military school in which we had a "system" — an HONOR system. One was on one's honor to abide by the rules of military as well as of academic duties. One was responsible for maintaining security against any violation of such honor by others, as well as by himself. Cheating, false official statements, erroneous testimony and failure to support the Honor Code were — every one of them — dismissal offenses. One was shipped F.F.H. (fast freight home) — never to return. There was no such thing as "indefinite suspension."

It was felt that if there was one who would cheat and would be untrustworthy in school, he might do the same in battle; by stealing information, one became a thief — for such the Corps had no room. Those who did not cheat, would not, on the basis of the danger to their reputations, careers, families and personal pride, through pure shame.

Most of all, my distress has deepened because we are here considered "guilty until proven innocent." The high school at least gave us the benefit of the doubt. We were training to be adults and were treated so. Only if we violated THEIR trust, were we deemed untrustworthy. Children, they say, react as they feel they are expected to react. Hmm? Do "adults" react similarly?

The ethics of this world are showing strong tendencies toward the belief that an act is only criminal if one is caught. This belief is cropping up in business, in social interaction and in government.

I trust this is not progress — if so, Virgil's statement, above, (quoted from Addison's Spectator No. 517), has too much merit: "Alas for goodness, alas for old-world honor!"

Vandalism Increases At Tech

While vandalism, theft and the destruction of private and school property is nothing new on the college scene, these acts of irresponsible students are on the upswing at Texas Tech.

Recently, a new television set was stolen from Men's Residence Hall No. 7. This brought the total to two new TV sets that have been "borrowed" since the beginning of the fall term. Total monetary loss of the two sets has been set at more than \$400.

Other less expensive, but nevertheless irritating acts, have been the stealing of hub caps, batteries, fender skirts, syphoning of gasoline, throwing of coke bottles against the residence hall walls and the slashing of lounge furniture.

Of a more serious nature, bad checks and check forgery have reared their heads in more than one instance this year. H. L. Burgess, superintendent of room reservations, estimated this week that more than \$16,000 worth of bad checks had been processed this year.

The above acts, many involving moral turpitude, are not the acts of a bunch of joy-crazy high school delinquents but of supposedly mature college men and women.

On whose shoulders does the task of eliminating these wrongs rest? On the school with its various disciplinary branches?

Naturally the school must assume responsibility of curtailing these overt signs of poor citizenship. However, the individual student must also work to rid the campus of those who show no effort to conform to established principles and laws.

No one wants to be called a "stool pigeon." But, is a person a "stool pigeon" when he reports an individual who commits acts of aggression against his classmates? Common sense yells no.

From reports, several students have seen other students stealing hub caps, etc., but failed to report them. In doing so, they have left the thief clear to perpetrate other criminal acts.

The loss of the aforementioned TV sets robbed not Texas Tech, but over 600 individuals who reside in the two halls. It would be possible, although not without undue trouble, to check all off-campus residences to uncover the missing sets.

Texas Tech can grow only as fast as the students will permit it. A good step toward Tech's growth would be the return of the two sets as soon as possible, in any manner possible.

From that point, ALL students, through voluntary control, can make better citizens out of themselves and push Tech to a university status, speaking in terms of mental maturity, with their renewed sense of values.

ARTHUR MAYHEW
 Managing Editor

Avalanche - Journal Honors Lost Techsans

The following is an excerpt from the column, "The Plainsman," which appeared on the Monday editorial page of the Lubbock Evening Journal.

Although Texas Tech has become a large operation embracing some 9,000 students, faculty members and employes, and is to some extent a community all its own, the deaths of three of its students in wintry weather near Silverton last week discloses the big college is still very near to Lubbock's heart.

Thousands upon thousands of local citizens feel that the deaths of Kelton Conner Jr., of Dallas; Robert A. Keplinger and John Arden, both of Waxahachie, are personal sorrows, even though they didn't know the boys as individuals. They were "Tech boys" to the Lubbock public, and as "Tech boys," were numbered among its own.

It's always that way in Lubbock whenever Tech personnel—student, faculty or employe—experiences triumph or disaster. Lubbockites feel that "Tech's our school and Tech people are our people," even though the college long ago became one of the educational giants of the State and a far cry from the small and struggling young institution which first opened its doors in 1925.

Lubbock and Tech were both small then, the town about 10,000 and the college 1,000, but they've come along together, down through the years.

Those of us who live snug against the cold, who ride in closed automobiles and, for the most

port work indoors or in sheltered areas, find our imaginations taxed to realize that the three 21-year-olds could have fallen victim to the weather along the Briscoe County caprock last week.

Yet the searchers who found their bodies Sunday morning in the open country overlooking the brakes 15 miles south of Silverton knew at a glance what had happened. Out in the cold and with a snowstorm short of what usually is described as "blizzard conditions" swirling around them, they perished.

In years gone by, when Northwest Texas was an open range and habitation sparse at its best men often fell victims to quick and vicious weather, so in those days it wasn't considered unusual. But in this era, it is difficult to realize that it can happen, even no more than a few miles from a town.

It is a tragic thing, indeed, that the lives of the three young men had to be snuffed out in the dark of bitter wind and cold and the hearts of their parents, kinsfolk and friends are heavy: at Texas Tech, in Dallas and Waxahachie.

It won't change what happened in Briscoe County last Wednesday night or Thursday morning, but it might help the mothers and fathers of Kelton Conner, Robert Keplinger and John Arden to know that in the city where they chose to attend college there are thousands of people who, although strangers to the boys, are sharing the burden of sorrow and regret.

This is a big town now and the college is big, too, but "Tech's still our school" and "Tech boys are still our boys."

JOE WINEGAR AND MIKE MONTGOMERY DISPLAY NEW SPIRIT ROUSER
... 150 pound bell will aid Saddle Tramps at tonight's game.

Fire Bell Will Rouse Spirits Tonight at Basketball Game

Tech's basketball team will receive added support tonight from a noisy source called "The Saddle Tramp Spirit Bell II."

THIS APPEARANCE marks the installment of the eighty-pound bell which will be rung by a Saddle Tramp member after field goals, free throws and as the Raiders come on the court.

The bell was donated to the Saddle Tramps by the Lubbock Fire Department and was originally on a 1924 American LaFrance fire truck.

"**THE BELL'S** main use will be to arouse student spirit and get everybody behind the team at the games," according to Saddle Tramp president, Mike Montgomery.

"Saddle Tramp Spirit Bell I" will not be officially installed until the Tech-Texas University game, February 20th. This bell weighs 150 pounds and will be hauled on a specially-built trailer.

Thetas Turn Kite Flyers For A Day

Kite flying is not limited to elementary school kids.

Pledges of Kappa Alpha Theta will vouch for this fact at 2 p.m. Sunday when they launch kites on the Music Bldg. Green.

BEFORE BEING initiated all Theta pledges must fly a kite. Each kite has to be made by the pledge and either painted in sorority colors or bear sorority symbols.

In case of difficulty, such as the kite getting caught in one of the trees and far between trees or entangled in a power line, the pledge may call on boy-friend, roommate or other innocent bystander for assistance.

THE KITE FLY is an annual Theta event open to the campus. The idea originated from the shape of the Theta pin which resembles a kite.

LUCKY STRIKE presents

Dear Dr. Frood:

FROOD TELLS HOW TO CLEAN UP ON YOUR LAUNDRY

(see below)

Dear Dr. Frood: I told my girl I was in love, and she laughed. I told her I wanted to get married, and she laughed. How can I make her realize that I'm serious?
Serious

Dear Serious: Marry someone.

Dear Dr. Frood: I have been having trouble sleeping at night. Do you think it could be because I drink coffee?
Wide-Eyed

Dear Wide-Eyed: Possibly. It's very difficult to sleep while drinking coffee.

Dear Dr. Frood: A lot of the guys complain because their mothers don't pack their laundry boxes properly. Is there a certain way they should be packed?
Spokesman

Dear Spokesman: Indeed there is. Clip out the instructions below and mail them to your mother.

Instructions:

1. Place bills of varying denominations in shirt collars (A) to keep them stiff.
2. Wrap socks around rolls of dimes (B) to keep them from getting misshapen.
3. Place other change in packets (C) of khaki pants. This way it won't roll around and rattle in the box.

Dear Dr. Frood: Do you believe in the old adage, "Choose a girl by ear rather than by eye"?
Shopping

Dear Shopping: This maxim is indeed a fine guide for any young man who is looking for a girl. But while choosing by "ear rather than by eye," he should also make sure she has two of each.

Dear Dr. Frood: Every night I come home tired and I find the house in a mess. There are dirty dishes and pans in the sink, and clothes are thrown all around. I'm fed up. What should I do?
Married Student

Dear Married Student: You should notify the police. Someone has obviously been there.

Dr. Frood, Ph.T.T.

Dear Dr. Frood: How far ahead should I call for a date?
Straight Arrow

Dear Straight Arrow: It depends. Some girls must be called at least a week in advance. With others, you just holler as you enter the dorm.

Dear Dr. Frood: My husband is an absent-minded college professor. He went out 7 years ago to buy a pack of Luckies and hasn't returned yet. I don't know what to do.
Patience

Dear Patience: Better buy another pack. He's probably smoked them all by now.

COLLEGE STUDENTS SMOKE MORE LUCKIES THAN ANY OTHER REGULAR!

When it comes to choosing their regular smoke, college students head right for fine tobacco. Result: Lucky Strike tops every other regular sold. Lucky's taste beats all the rest because L.S./M.F.T.—Lucky Strike means fine tobacco.

SNOOKER CHAMPION — Ronald Berry shows his championship snooker form. He defeated Leon Ligon in the finals of the Tech Union tournament recently and was awarded a trophy Thursday.

Nine Officers Are Elected By Sigma Chi

Dick Toll has been elected president of Sigma Chi fraternity for the spring semester.

Other officers include Carlyle Smith, vice president; Howell Phelps, secretary; Tommy Morris, corresponding secretary; Billy Helton, associate editor; Jack Aldridge, treasurer and Arden Gifford, historian.

Social chairman is Gayle Mullanex and Bob Smith is pledge trainer.

Women Bowl Today In 'Mural' Tourney

Twenty-six teams have entered the women's intramural bowling tournament which begins today at 11 a.m. at the Lubbock Bowling Club. The second round begins at 1 p.m. Awards will be given to the highest individual and team score.

National Tourney Set For Bridge Players

Texas Tech is one of more than 125 colleges and universities throughout the United States entered in the 1960 National Intercollegiate Bridge Tournament.

The local tournament is set for February 21.

All play in the national tournament will be by mail and will be conducted on the individual campuses in a single session.

Hands will be scored by Geoffrey Mott-Smith, author and contract bridge authority, who will determine campus, regional and national winners.

PRIZES include trophy cups for the colleges winning the national titles, one cup for the college of the pair scoring highest on East-West hands and one cup for the North-South hand winners.

Each of the four individual national winners will receive a smaller cup for his permanent possession.

Each college competing in the tournament for the first time will

be presented with a plaque designed to bear the names of the four individual campus champions. In addition, each winner will receive a certificate.

LAST YEAR, 2038 students representing 118 colleges located in 37 states and Canada participated in the tournament. Teams representing Columbia and Princeton Universities won the national championship titles. More than a hundred other students won regional and campus honors.

The National Intercollegiate Bridge Tournament Committee, a part of the Games Committee, Assn. of College Unions, is interested in developing contract bridge as a supplement to the collegiate social program.

The committee requires that the approval of the dean or other administrative official be granted before a college can be regarded as officially entered in the tournament.

FOR FURTHER information, students may contact Sue Mims, room 148, Doak Hall and sign up at the Union newstand. The tournament is sponsored by the Tech Union.

Professors...

Cont'd from Page One
a handicap to all except the alumni."

Harry Walker, assistant professor of economics, offered a four-point program for academic improvement, including an advanced standing examination before the junior year, a schoolwide honors program to "afford the student a chance to stretch his mind," a senior thesis in each student's major discipline and a qualifying examination for entering graduate students.

E. R. Heineman, professor of mathematics, discussed the relative merits of blackboards and room lighting, ending his remarks with the statement, "I think this grading on the curve is mostly for beauty contest judges."

L. J. Powers, professor and head of the department of mechanical engineering, led with the comment he had learned that his job as a teacher was "not to lead the horses to the water, nor to make them drink, but to convince them they are thirsty."

Dr. George Elle, a professor of horticulture and park management, concluded the professors' remarks with comments that "we encourage mediocrity by not allowing a student to move ahead at his own pace."

ension in bubble blowing

This plastic bubble protects the antenna of a radically new aerial three-dimensional radar defense system.

Sensitive to the inadequacies of conventional radar systems, engineers at Hughes in Fullerton devised a radar antenna whose pointing direction is made sensitive to the frequency of the electromagnetic energy applied to the antenna. This advanced technique allows simultaneous detection of range, bearing and altitude...with a single antenna.

Hughes engineers combined this radar antenna with "vest-pocket sized" data processors to co-ordinate anti-aircraft missile firing. These unique data processing systems provide:

1. Speed - Complex electronic missile firing data was designed to travel through the system in milliseconds, assuring "up-to-date" pinpoint positioning of hostile aircraft.
2. Mobility - Hughes engineers "ruggedized" and miniaturized the system so that it could be mounted into standard army trucks which could be deployed to meet almost any combat problem—even in rugged terrain.
3. Reliability - By using digital data transmission techniques, Hughes engineers have greatly reduced any possibility of error.

Result: the most advanced electronics defense system in operation!

Falcon air-to-air guided missiles, shown in an environmental strato chamber are being developed and manufactured by Hughes engineers in Tucson, Arizona.

Dr Pepper

Star Show Continues At Museum

The West Texas Museum Planetarium will launch the second showing of "Stars by Satellite" Sunday at 4 p.m.

A **BLAST-OFF** will be simulated and the audience will view the stars as they would appear from a rocket in orbit.

With the help of the planetarium projector and other special effects, guest lecturer Steve Ebner will conduct a 45-minute flight in orbit. The sun will appear as a large glowing disk, but will not blot out the view of other stars.

SLIDES of the better-known constellations and planets will be shown and discussed, and the basic movements of the earth will be illustrated by special machines.

Jerry C. Porter, curator of education, stated that the exhibition should be thought of as a show and not a lecture, for it will be entertaining as well as educational.

THE SPEAKER for the "tour of outer space," Ebner, is a senior industrial engineering student and president of the South Plains Astronomy Club.

An admission fee of 25c for students and 50c for adults will be charged. Groups and organizations may make arrangements for special shows by calling the Museum Office.

Scientists!

WE'RE LOOKING FORWARD TO MEETING YOU

Last year we had the pleasure of meeting many engineering and science seniors during our visit to the campus. As a result of our discussions, a gratifying number chose to join our company.

We'll be back on the dates below, and this notice is your invitation to come in and see us. If you're interested in joining a company that's a leader in fields-with-a-future, you'll be interested in the advantages Boeing can offer you. Boeing is in volume production of Bomarc, the nation's longest range defense missile, and is a prime contractor on Minuteman, an advanced solid-propellant intercontinental ballistic missile system.

Boeing is also the nation's foremost designer and builder of multi-jet aircraft. Production includes eight-jet B-52G missile bombers, KC-135 jet transport-tankers and the famous Boeing 707 jet airliner.

Research projects at Boeing include celestial mechanics, solid state physics, nuclear and plasma physics, advanced propulsion systems, and space flight.

Expanding programs offer exceptional career opportunities to holders of B.S., M.S. and Ph.D. degrees in aeronautical, mechanical, civil (structures), electrical-electronic and welding engineering, and in engineering mechanics, engineering physics as well as in mathematics and physics. At Boeing you'll work in a small group where individual ability and initiative get plenty of visibility. You'll enjoy many other advantages, including an opportunity to take graduate studies at company expense to help you get ahead faster.

We hope you'll arrange an interview through your Placement Office. We're looking forward to meeting you.

Suvans Enter TCU Show

The Suvans, a quartet with a singing style similar to the Kingston Trio, will represent Tech at the auditions for the Intercollegiate Talent Show at TCU Student Center, February 18, 19 and 20.

The quartet includes Bob Fielden, David Pool, Sid Simmons and Mike Armstrong. They won top laurels at the Tech Union Talent Show and will enter the second round for a shot at the big time at TCU.

The best acts from 19 southwestern colleges will compete in the Intercollegiate Talent Show, March 11, at Texas A&M.

Chamber Music Program Set

"An Afternoon of Chamber Music" will be presented by the Lubbock Chamber Music Society in the West Texas Museum Auditorium Sunday at 4 p.m.

John Price, Paul Ellsworth of the music department faculty and Jane Ann Henry, Lowell Cross, Henry Randolph and David Watkins, Tech students, will present selections from Beethoven, Schubert and Mendelssohn.

Drills Give Weaver 'Good Feeling'

Twenty-one returning lettermen are among the 73 candidates who began spring training Thursday. They are preparing to launch Texas Tech's first season in Southwest Conference championship football competition.

COACH WEAVER stated that on the first day of spring training he "had a good feeling on a fine day." The offense looked very good and showed much improvement over last year.

End Jerry Garrison of Levelland had a knee operation and will not participate in practice this spring.

WEAVER announced Friday

that the Raiders will hold a practice at 1:45 this afternoon and wind up with a scrimmage at 2:30.

Also carded is an intra-squad game in conjunction with a coaching clinic here at 2 p.m. Feb. 25 on the practice field within the track.

Weaver said that the Raiders will play an intrasquad game climaxing spring training in Odessa at 8 p.m. on March 5. The game will be sponsored by the Odessa Chamber of Commerce sports committee and the Midland and Odessa chapters of the Ex-Students Association.

Odessa was host to a similar

spring training game in 1953.

"**WE HAVE** a fine staff and we are well pleased with our new coaches, Jess Thompson and Jim Parmer," Weaver said.

Coach J. T. King feels that the coaching staff is backing a "squad with a lot of promise but since the boys are young they will have to bridge the gap of age and inexperience to meet SWC competition."

KING SAID "Desire, lots of hard work, and good planning on the part of the coaches will help overcome the gap."

"The time factor (youth and inexperience) and manpower determine the strength of a team to a large extent. The entrance into SWC competition from the Bor-

der Conference might be compared to a switch from a junior college to a four-year college. In approximately two years, the Raiders will be in a more stable position and will be able to meet competition in or out of the SWC," King said.

SPRING training is open to all comers to try to gain a spot in every position on the squad, including Holub's if it is possible, and each position will be filled by the best man.

Sophomores are pushing into the varsity ranks. Split back Bake Turner of Alpine, a fine kicker and pass receiver, is showing potential along with Larry Mullins, tackle from Snyder, and fullbacks Carl Gatlin of Waco, and George Fraser of Llano.

IT WILL TAKE about two weeks to tell too much, but the new linemen who caught King's eye were Sonny Armstrong of Sweetwater; Tommy Hayes of Electra; Dennis Grimes of Seagraves; Pete Peterson of Gainesville; Charles Edgemond of Wichita Falls; Randy Weyle of San Angelo; and Jerry Elbert of Wellington.

Outstanding backs were Charles McEntire and Larry Tipton, both of Levelland, and Dean Byrum of Ysleta.

Other promising young backs were Johnny Lovelace of Farwell, Allen Shuler of San Antonio, Richard Mahan of Snyder, Coolidge Hunt of Lubbock and Ed Pesch of Breckenridge.

SCORING 127 POINTS

Wonders Tip BSU

by CHARLES RICHARDS
Toreador Sports Writer
The Independent League No. 1 leaders are apparently unaware that the average intramural basketball score is in the 60's.

The Chinese Bandits set a new record early in the campaign when they soared high above the 100 mark in a 127-47 win. Thursday night the Worthless (???) Wonders duplicated the feat when they defeated the BSU "B" team 127-46.

Intramural Director Edsel Buchanan said the scores this year were the highest ever. Both the Bandits and the Wonders have

other games over 100 points this year.

LEADING THE undefeated victors in their onslaught over the Baptists was Damron with a scorching 44 points, while Jones hit for 28. Haywood led the losers with 12.

In other league action the Chinese Bandits defeated the BSU "A" team 68-42; Air Force won over Delta Sigma Pi 46-37; and the Rinky-Dinks rolled by the Dwarfs 72-57.

IN THE "A" Dormitory League, two contests were played Wednesday night. Dorm 6 beat Bledsoe Hall 55-47 and Gordon took a

58-55 decision over Dorm 7 in close matches. Leading the charges from Dorm 6 was Caldwell with 13, and Watson made 16 for Bledsoe. In Gordon's win H. A. Hanks sank 14 points and Charles Richards led Dorm 7 with 15.

In the Fraternity League Phi Kappa Alpha lost its first game of the season, dropping a 43-41 match to Sigma Alpha Epsilon. Kappa Sigma breezed by Phi Kappa Psi 67-15 for their sixth win without a defeat. Phi Gamma Delta, also sporting a 6-0 record, took a game from Delta Tau Delta 52-40 to stay in the first place tie. In another close game, Sigma Nu lost to Phi Delta Theta 49-46.

DORM 5, as a result of its second forfeit Wednesday night, forfeited all its remaining games in addition to the one game they had won. No team is allowed more than one forfeit without being dropped from the standings. This action places Bledsoe, previously beaten by Dorm 5, back into the title race. No other team is directly affected.

Action will reach climactic proportions next week when the leaders in both the Independent No. 1 and the Fraternity leagues clash in featured contests. The Fraternity leaders are Kappa Sigma (6-0) and Phi Gamma Delta (6-0). The Independent League will see the highest point-makers, the Chinese Bandits and Worthless Wonders, meet in a battle of the unbeaten.

Quote of the Week

J. T. KING, Tech Assistant Coach

"Our opening day of spring training was the best that we've had since I have been at Tech. We are depending on several of our youngsters to move in and help us out next fall."
