

EOC alerts campus

Storm caution individual matter

By CHUCK LANEHART
Special Reporter

Tornado precautions and warning signals for the Tech campus have been outlined by Clyde J. Morganti, chairman of the Campus Emergency Planning Committee.

Morganti, special assistant to the Office of the President, said the committee tries to provide adequate warning systems for the campus, but because of the unpredictability of tornadoes, every individual must be on the alert and prepared to think and act for himself.

Two types of tornado advisories may be issued by the National Weather Service. A tornado watch indicates that tornadoes and thunderstorm activity are expected. During a watch, persons should not interrupt their normal routines except to watch for threatening weather.

A tornado warning is issued when a tornado is sighted or indicated by radar. Persons in the path of the storm should take immediate precautions.

When a tornado warning or watch is in effect, the city of Lubbock activates the

Emergency Operations Center (EOC) to the extent required and insures that appropriate information and instruction for the public is given to the news media. Persons should keep radios and televisions tuned during severe weather conditions, but should not telephone the Weather Bureau or other information centers.

The EOC contacts the University Police during a tornado warning, as well as contacting other strategic points throughout Lubbock, according to Morganti. The tornado warning signal is a steady, high-pitched tone and on Tech campus is provided by a siren atop the Administration Building. The siren is augmented by police car sirens.

The Tech police contact the main Tech switchboard which in turn relays the warning to dormitories, classroom buildings and other locations where there may be a concentration of people.

If a tornado does occur, persons should seek shelter in a tornado cellar, underground excavation or reinforced concrete building and stay away from

windows, said Morganti. All major buildings on Tech campus are of reinforced concrete.

In office buildings and classroom buildings, persons should stand in an interior hallway in the basement or on a lower floor. Auditoriums, gymnasiums and other structures with wide free-span roofs should be avoided.

Mobile homes should be evacuated. If caught in the open, persons should lie flat in a ditch or ravine. Automobiles should be abandoned and persons should seek shelter in a building if possible.

Morganti said each residence hall or complex of residence halls has formulated its own specific plan for safety during a tornado warning. He said dormitory residents should obtain a list of emergency procedures at their respective dormitories.

All residence halls will sound an intermittent ringing of the alarm bell in each dormitory. The all-clear signal for dormitories is one long ring. Standard procedure for all dormitory residents include the following during a tornado warning:

- Close all windows in your room.
- Close your door, but do not lock it.
- Turn on your ceiling light.
- Go to the wings or lobby of the first floor and stand in the hall with your back to the wall.
- Open the windows at the ends of the halls.

Members of residence hall staffs will take additional precautionary measures and generally direct the procedure during the tornado warning. Morganti said that the residence halls have done well in formulating

procedures during a tornado warning. "We're trying to make the rest of the campus more responsive to tornado warning systems," said Morganti. Because communication is conducted by telephone during a tornado warning, and power failures tend to occur during tornadoes, Morganti said, "I'd be the last person to say the system is foolproof."

"The Campus Emergency Planning Committee is trying to improve the system for reporting tornadoes and disseminating information that will help protect lives in the event of a tornado. All of this is in vain if the individual does not take the effort to read the information available to him on the precautions to take," said Morganti. "I can't overemphasize that individuals must be on the alert to protect themselves."

VICTIMS of the May 11, 1970 tornado pick up debris after the surprise hit of the twister. No signals warned the Lubbock people.

Kissinger says

Viet violation 'cynical'

NEW YORK (AP) — Henry A. Kissinger, President Nixon's foreign policy adviser, said Monday the North Vietnamese had "systematically" and "cynically violated" the Paris peace agreement.

"The profound problem we face as a nation today," Kissinger said at the annual Associated Press membership meeting, is whether the signing of the agreement "should simply be treated as irrelevant."

On the Watergate scandal, Kissinger said he was sure the President would "insist on a full disclosure."

"Then we will have to ask ourselves whether we can afford an orgy of recrimination," he said. "Faith in the country must be maintained."

Kissinger, responding to questions from the audience, said, "We have been very disappointed with the compliance by the North Vietnamese" with the Paris pact.

"We have used our influence with our friends in Saigon to bring about substantial compliance with the agreement," he said. "No one can seriously believe that we are looking for pretexts to remain involved."

"We want nothing else than the observance of an agreement freely negotiated," he stated.

Our purpose in negotiating the agreement was to end the American involvement in Southeast Asia," he said.

"We have never said that we want a particular outcome" in any of the Southeast Asia countries, he said. "We

had no illusion that history was going to stop" with the signing of the agreement.

He said all the forces should participate in the negotiations in Cambodia and added, "We are not prescribing one particular government."

He said somberly that when you know individuals involved in the Watergate affair, it is "difficult to avoid a sense...of the tragedy of events." With judgment still to be passed, he said, we can "at least ask for compassion."

In his prepared address, Kissinger said President Nixon was seeking to work out a new Atlantic charter with America's European allies that will reflect the new economic power structure, including Japan.

He said the outline—"not an American prescription but an appeal for a joint effort"—was based on easing the economic frictions and continuing the presence of U.S. forces in Europe.

"For us, European unity remains what it has always been — not an end in itself but a means to the strengthening of the West," he said.

The President's approach "will be to deal with Atlantic problems comprehensively. The political, military and economic issues in Atlantic relations are linked by reality," he said.

"The United States proposes to its Atlantic partners that, by the time the President travels to Europe toward the end of the year, we will have worked out a new Atlantic charter setting the goals for the future," Kissinger said.

Pollution control equipment modifies Tech bus engines

By MARCIA SMITH
Special Reporter

Several campus buses are displaying a sign announcing "I QUIT SMOKING," thanks to the new Low Sac Needle Injection kit, a modification designed to clean up the exhaust emissions of older engines.

At the cost of \$400 per bus, seven of the eight campus buses are now equipped with the device according to Ernie Prenevost, manager of Lubbock Transit Corporation.

Basically a metering valve for each engine cylinder, the kit more nearly supplies the exact amount of fuel the engine requires. Therefore, fuel does not build up while the engine is idle or during deceleration. When fuel build-up occurs, clouds of black smoke are emitted from the exhaust pipe on acceleration.

At present, the gasoline engine converts approximately 35 per cent of its fuel to energy, while the diesel (equipped with Low Sac Injectors) converts 70 per cent of its fuel to energy. Five diesel buses will create fewer toxic gases than one finely tuned gasoline engine, according to Prenevost.

"The diesel engine is not the culprit. It's just thought to be because you can see the black smoke. The gas-powered car is much worse. Fifty-five per cent of all energy consumed today is by the automobile," explained Prenevost.

With the use of the kit, Lubbock Transit is nearing 1975 standards set by the Department of Transportation, according to Prenevost. The standards include the elimination of visible smoke, toxic gases, noise and odors.

Although bus usage has increased in some cities due to public information and improved service, evidence shows people are not willing to give up the luxury of owning a car. "We're still a long way from having complete mass transportation," said Prenevost.

Lubbock Transit Corporation has installed the new device not only because "we are interested in regulations, but also to help eliminate pollution," Prenevost said.

effort, perhaps as early as a few days after the break-in at Democratic headquarters in the Watergate building June 17.

The sources refused to describe the reported cover-up in detail, but said one phase included "attempts to pressure other officials in the government to go along."

The sources said the other officials included ranking members of the Justice Department and FBI.

Acting FBI Director L. Patrick Gray presumably was in that group, and his testimony before the Senate Judiciary Committee regarding the Watergate investigation indicated he refused to cooperate with the reported cover-up.

"The cover-up is even more damning than the Watergate itself," the sources said, and it likely will result in more resignations from the White House staff.

Ehrlichman, they predicted, will be among those forced to resign when the details of the operation become public. Ehrlichman, chief of President Nixon's domestic affairs council, so far has escaped prominent mention in reports of White House involvement in Watergate.

Gray did say in his Senate testimony, however, that Ehrlichman and presidential counsel John W. Dean III called him on the carpet following news leaks regarding the FBI's Watergate investigation.

The prosecutor in the Watergate case, Earl J. Silbert, has told friends privately that Atty. Gen. Richard G. Kleindienst once called him into his office early in the Watergate investigation and told him to "go slow" in returning indictments.

Silbert reportedly refused, although the seven men originally indicted in the case were only those directly involved with the break-in.

On GOP switch

Watergate bugs Connally

AUSTIN, Tex. (AP) — The Watergate case is one reason former Texas Gov. John Connally has not announced whether he will switch to the Republican party, Rep. J. J. "Jake" Pickle, D-Tex., said Sunday.

Pickle is a former classmate of Connally at the University of Texas where they were both student body presidents, and he has been Connally's friend since those days, in the late 1930s.

Pickle told newsmen on the weekly radio-television show "Capital Eye" that "urging" of Connally to join the GOP has "subsided since the Watergate affair started."

The Watergate complex in Washington was where Republican-financed spies were caught last June in a bugging and burglary episode that is now being investigated by a federal grand jury.

"With so many bold, ugly headlines, it

The Senate sources said there are indications the President didn't know about the Watergate raid until after it occurred but that he was aware there was a political espionage operation within the Committee for the Re-election of the President.

When former Atty. Gen. John N. Mitchell resigned as director of the re-election committee two weeks after the break-in, "the President knew why he was resigning—that it was because of Watergate," the sources said.

Mitchell's public explanation for leaving his post was to devote more time to his wife, Martha.

Recently Haldeman told a group of Republican congressmen that he had set up a system to gather campaign intelligence, but said the system used purely legal means such as clipping newspapers and recording speeches by the other side.

Senate seat run-offs set

Run-off elections for the Senate seats in the Colleges of Home Economics and Arts and Sciences will be Wednesday from 9 a.m. to 7 p.m. at polls in the University Center (UC) and the Home Economics Building.

Volunteers will be paid \$1.60 per hour and may sign up in the Student Association office in the UC.

UD Photo by Jon Thompson

TECH BUSES now don "I Quit Smoking" stickers after the Lubbock Transit Corporation installed the new Low Sac Needle Injection kit which cleans exhaust emissions of older engines.

Packets will be distributed today

Registration materials for the first summer session this year are available in the second-floor conference room of West Hall today through April 27.

Distribution of the material will be from 1 to 6 p.m.

First summer session registration begins at 1 p.m. June 4 and continues through June 5. Second summer session registration begins at 8 a.m. July 16 and continues through 6 p.m. that same day.

Registration for both summer sessions will be in the Lubbock Municipal Coliseum.

Editorial

No bicycle fee for next year, but...

By MIKE WARDEN
Editor

It seems a letter to the editor printed in Monday's University Daily (UD) stirred up quite a bit of controversy across the Tech campus.

The letter, anonymously signed "Stew Dent," sent the telephones in the Parking and Traffic Counselor's Office, the University Police, and even the UD, ringing off the walls.

The letter alluded, sarcastically, to a fictitious fee required for Tech bicyclists next year to register bikes. When the letter was printed, nothing was thought of the possible and highly improbably outcome—someone on this campus actually took the letter seriously.

Calls came in all day to Gene Lake, traffic and parking counselor, and Bill Daniels, chief of University Police, asking if the letter were true and fees ranging from \$5 to \$15 charged for bicycles next year.

The answer, worried cyclists, is an emphatic NO, according to Lake.

"There are no bike registration fees or any sort of requirement for registration of bikes," Lake said.

The University Police and several campus organizations such as Women's Service Organization have sponsored bike registration this past year for Tech bicyclists.

All the registration involved was a short form for name, address and serial number of the bike that was filed with the campus police.

Stolen bikes that were registered in this way, then found, could easily be returned to the proper owner by the police. The registration was a

service to students, according to Lake—"and it's FREE."

Students who read Mr. Stew Dent's letter Monday need not fear they may have to shell out \$15 next year for a parking permit for their bikes.

Such plans are not in the works. However, there is one point I would like to emphasize: tickets ARE being issued by campus police for moving violations on bicycles.

Some even have been stopped for exceeding the 20 mph speed limit on campus.

The former attraction of the bicycle as a means of transportation on this campus other than an overcrowded, and under-staffed bus system has lost much of its appeal. Not allowing bicycles on grassy areas undoubtedly makes the green areas on campus greener and safe to walk on, but only serves to congest the already congested roads on campus.

Until the traffic situation on the inner campus is unclogged, it is still unsafe for the bicyclist to travel the streets of the Tech campus.

When the campus is closed off from the streams of faculty and staff cars, service vehicles, Coke trucks and buses, it will be safe once again for the Tech bicyclist to venture out onto the streets.

But until that time, the only truly "safe" places on campus—the sidewalks and grassy areas—have been declared "off limits" for bicycles.

It makes one wonder just whose interests are being watched out for?

Questions film critic

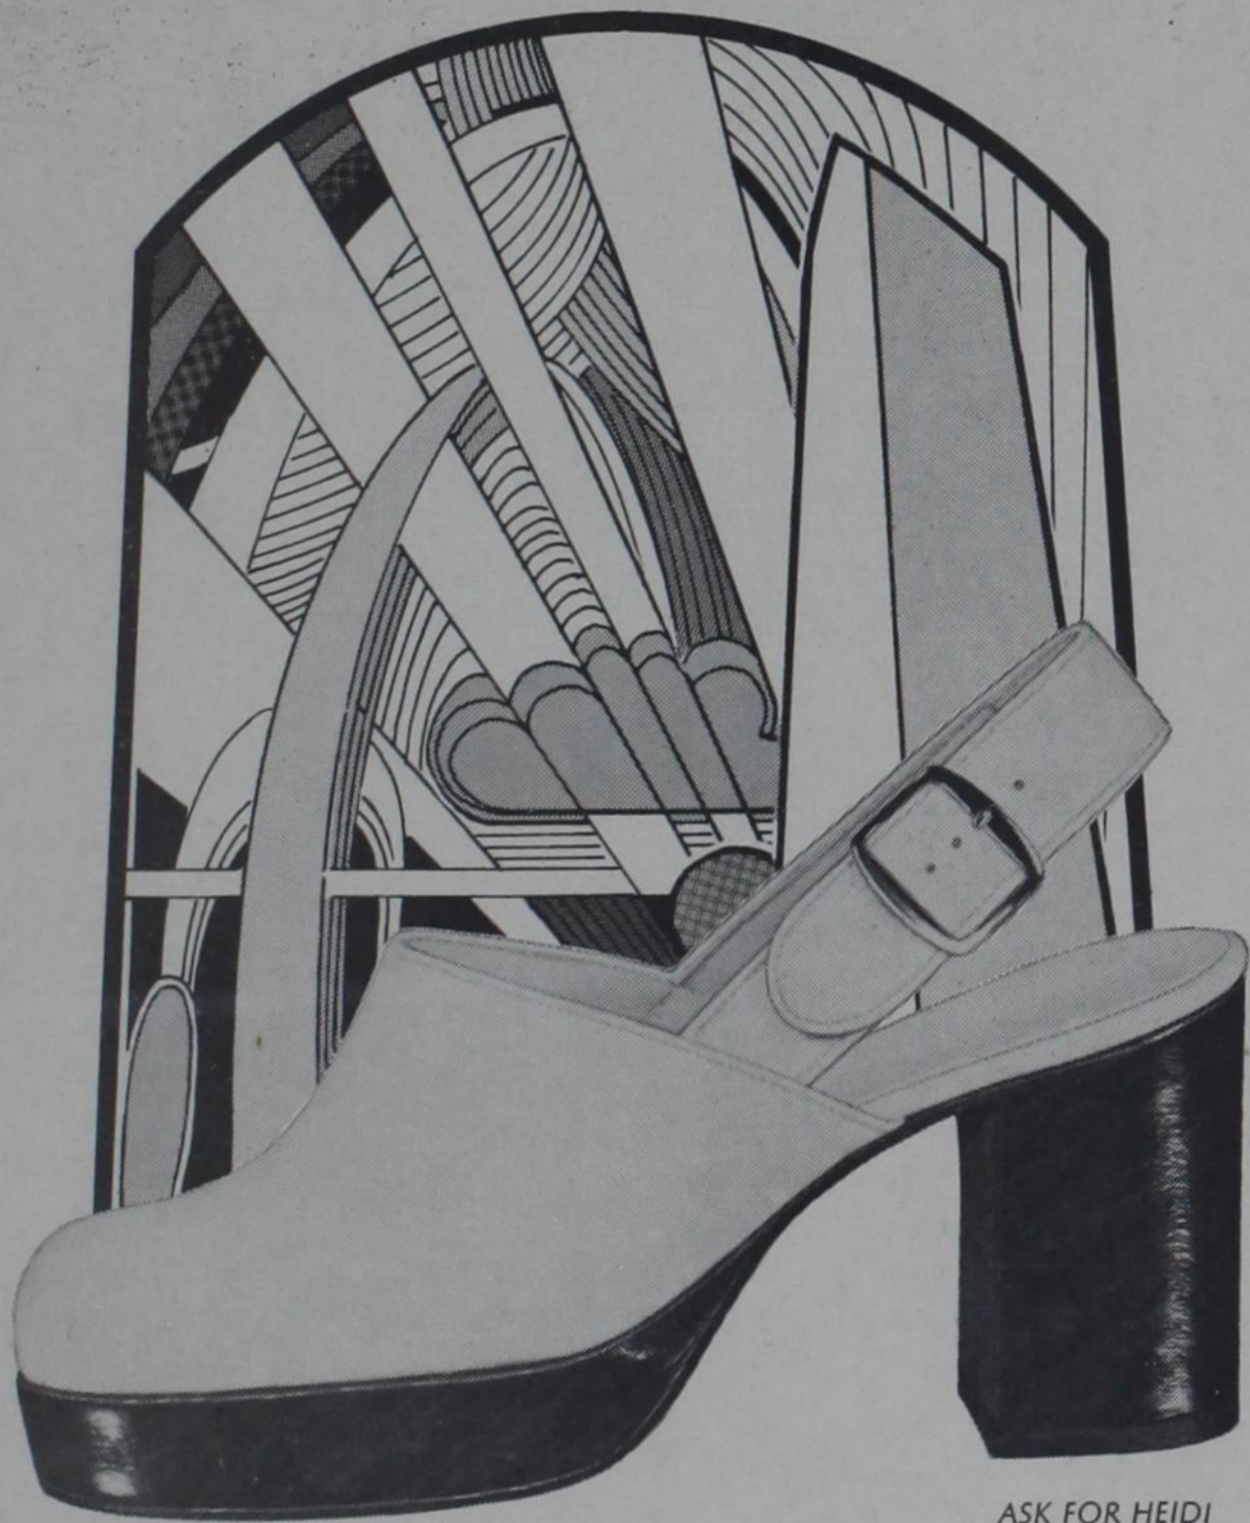

I would like to question the accusations Mike Hallmark made against the film "Freaks."

I was one of the many who had to stand in back of the auditorium. However, I was not sorry for the hour I spent standing. I think the public's view towards deformed people has changed for the worse instead of for the better. Instead of fainting or weak stomachs, there is now laughter towards these crippled people. Some parts of the film were

intended to cause laughter, but for the most part it was meant to be serious. I, too, was caught up in the faint laughter throughout the auditorium. I realized later how sick this humor was, though.

I strongly recommend everyone see this movie, given the opportunity, and see what your reaction will be.

President of Mexico visits, studies China

By CHARLES GREEN
Associated Press Writer

PEKING (AP) — President Luis Echeverria of Mexico said Sunday businessmen need not fear that his trip to China and the Soviet Union might mean his government will take a sharp swing toward the economic left.

"For all of us this has been a study trip. And I think that, in reality, no one has been alarmed and no one should be alarmed," he told a news conference.

Several members of the private sector accompanying Echeverria had expressed doubts to newsmen about the necessity of the trip in the face of possible United States reaction because of heavy U.S. investments in Mexico and because they fear he might return to Mexico to nationalize more private industry. Echeverria told the news conference that Mexico's constitution provides for a mixed economy. He said no one should fear that Mexico will try to import social or political systems from abroad.

"We have in our constitution all of the guarantees for unlimited progress and all the individual guarantees and freedom of religion, of thought, of expression, of travel, that man—not only in Mexico but all of humanity—has always needed," he said.

Until right now, I have heard no criticism from our friends in the private sector who are

accompanying us. But I am asking them to come forward, in order to analyze and answer. We are not angered by criticism," the Mexican president said.

After a dinner Echeverria gave in the Great Hall of the People for Chinese government officials, Foreign Ministers Emilio Rabasa and Chi Pengafei signed a one-year, renewable, commercial agreement which gives Mexico most favored nation status in China's foreign trade. It also includes special port privileges and payment in hard currency.

A statement from the Mexican government said immediate results of the agreement would be Mexican exports to China worth \$24.6 million in mineral and agricultural products while China will sell Mexico 50,000 tons of rice worth \$10 million. Mexico will export, before the end of this year, 150,000 tons of sulphur worth an estimated value of \$816,000, 160,000 bales of cotton, 40,000 tons worth \$28.8 million and 100,000 tons of sugar at a price to be fixed in later negotiations.

Sunday afternoon Echeverria had an unexpected fourth meeting with Premier Chou En-lai and Chou announced that he and his wife would accompany Echeverria on an 11-hour train ride into the provinces to visit the model village of Ta Chai.

Campus apartments success with coeds

By ROGER DEAN
Staff Writer

Posters of James Cahn, flower decals and a little "innocent" cheating on visitation hours are still part of the Tech coed's dormitory room life; even when the dorm room is an apartment.

Now that the junior and senior girls of the Gaston Apartments, which were remodeled from dormitory rooms last summer, have lived in their homes for a year, little change can be noted.

"The girls do basically the same things in and with their rooms. They just have more room to work with," said one resident.

The project has apparently gone over well with most of the residents. Gene Haygood, a senior at Tech who manages the complex with his wife Shellie, reported a waiting list for next year of over a hundred.

"There have really been only a few gripes from the girls," said Haygood, "and those were mainly minor maintenance complaints".

For the most part, the rooms themselves look basically the same except in size and the amount of furniture.

Many girls also commented

DPS may sign female patrols

AUSTIN (AP) — For the first time in its 38-year history, the Department of Public Safety (DPS) will accept applications from women to serve on the highway patrol, Col. Wilson Speir said last week.

Speir, director of the department, said applicants must be 20 to 35 years of age, "good moral character, excellent physical condition, height not less than 68 inches nor more than 76 inches, weight not less than two pounds nor more than 3½ pounds per inch of height..."

Applicants also must have at least 30 hours or approximately one year, of college credit.

on the advantages of privacy in the apartments.

"The visitation hours, which are the same as those of the boys' dorms," added Haygood, "are difficult to enforce because there is no main hall. But most of the girls are pretty good about the hours."

When asked about any future conversions of dorms into apartments, Haygood said that he anticipated no action in the near future.

AN EQUAL OPPORTUNITY EMPLOYER

Progressive year seen for UC

By PAM MIMMS
Staff Writer

Next year should be a progressive one for the University Center (UC) according to Janet Nichols, newly selected vice-president of the UC.

"New people on our committees, with extraordinary ideas are forming new attitudes

of personalism toward the student," said Nichols. "We are trying to be more professional in our programming, and reach the students at the same time, so they can look to the UC for help, not just as someone that programs a few events a year."

Nichols, a junior psychology major from Dallas, will work with the UC president as head of

the Program Council which includes all chairmen and assistant chairmen of the committees.

"We are restructuring our committees to make the Program Council a more workable body. A new system of selecting committeemen which allows chairmen and assistant chairmen to select their own

committee members has been incorporated. In addition, a Program Council workshop is being planned this summer when the council will review UC policies, finances and problems," Nichols added.

To give the student a part in programming, a new polling system is being set up, in order to let the student voice his opinion on matters of budgeting money and entertainment.

The new council wants to provide better entertainment

for the coming year. Nichols explained that the entertainment committee is presently limited in the entertainment it can provide

because of lack of funds. "We are compromising in providing mediocre entertainment for less money," she said.

"The students seem to want more expensive entertainment than we can afford," she continued.

"A Woman's Best Accessory Is A Well Dressed Man"

The Hawaiian dollar is still worth a dollar.

There are lots of ways to save money if you take your vacation in Hawaii. First off, you don't lose through devaluation as you would if you changed your dollars into francs or marks, pounds or yen.

Besides that, we'll send you a free Hawaii Trip Brochure with tips and coupons for big savings on a variety of good things: from hotels to bike rental, from daiquiries to Big Macs. So your dollar is really worth lots more than a dollar.

Then we throw in our Youth Standby Fare which saves you up to 27% on our low Economy fare to Hawaii. And lounges for every class of service.

Continental Airlines to Hawaii. It's the best example of how pride can get things done for you—at a very low cost. And when you get there you'll find the beauty and the beaches cost even less—nothing at all.

Pride gets things done.

Intramural awards given at banquet

By JEFF KLOTZMAN
Sports Writer

With a special emphasis placed on the future, the men's and women's intramural departments handed out awards last night in the annual Noche De Conquistadores banquet.

Dr. John Cobb, director of the department of Physical Education at Tech, was the guest speaker at the banquet. Dr. Cobb spoke on the improved recreational facilities which Tech hopes to have in the near future.

Women's intramural director Jeannine McHaney began the awards presentation by handing out the honors for outstanding teams and individuals in the women's program.

Horn Hall, winner of last year's sweepstakes award, accomplished the feat once more by garnering this year's top women's award.

Winners in team participation were Los Tertulianos for the Club division, Splash for the open division, Alpha Delta Pi for the Greek division and Horn hall in the dorm division.

Taking special women's awards were Knapp Hall for sportsmanship, Debbie Bolner for outstanding sports manager, Laurie Birdwell for participation and Lu Plunk for Senior women's officiating and organization.

Edsel Buchanan, Director of Men's intramurals, announced the award winners for the men's program.

Winners in the outstanding intramural team participation were Sigma Chi, first place and Alpha Tau Omega second place in fraternity division; Wells Hall first, and Sneed second in residence hall division; Phi Epsilon Kappa first and Chi Rho second in Club division; and Scabs first and Nads second in Independent.

In the most winning team awards, Sig Eps beat Sigma Chi in the fraternity division; Wells Hall outpointed Murdough in Residence Hall division and Die Spielen edged the Baptist Student Union for Club division honors.

Best unit participation saw Sigma Nu beat ATO for fraternity honors while Chi Rho outdistanced Die Spielen in the Club division.

Winning outstanding intramural participant awards were Joe Estes from the Sig Eps, Mike Fitch from Sigma Nu, Steve Harden from Sigma Chi and Stewart Rowe from Alpha Tau Omega. Brooks Tinsley from the BSU took club division honors while Paul Thorpe from Coleman Hall and Johnny Modlenhauer from the Scabs took Residence Hall and Independent honors.

Receiving a special award from the intramural officials club was Ronnie Smith, director of team sports. Johnny Moldenhauer and Dan Opitz were honored as the clubs best officials while Jim Carter, club president, was honored for his contributions to the Tech intramurals.

Ruth Sturtz, ticket manager for the Tech athletic department, is shown receiving an award from Saddle Tramp president Miller Bonner. Mrs. Sturtz was honored for her good work and contributions to both Tech athletics and to the Tech student body.

Sisemore to play in all-star game

Two All-America offensive linemen, Jerry Sisemore of Texas and Ron Rusnak of North Carolina, announced Monday they will play in the 13th annual Coaches All-America Football Game set for June 23 in Tech's Jones Stadium.

Sisemore, a 6-4, 260-pound three-year letterman at offensive tackle for Texas will play for Coach John McKay's West team. Rusnak, a 6-2, 225-pound offensive guard, signed with Coach Shug Jordan's East squad.

A native of Plainview, Sisemore was the first round draft choice of the Philadelphia Eagles. Described as one of the greatest offensive linemen in UT history, Sisemore will be clearing a path for Oklahoma's Greg Pruitt who announced last week he will play in the all-star tilt.

A consensus All-America in 1971 and 1972, Sisemore has great balance, coordination and agility which enable him to wipe

Sisemore

out blockers at the point of attack and also downfield.

Rusnak, who played against Tech in the 1972 Sun Bowl, was a consensus All-America in 1972 making all four major teams—Associated Press, United Press International, Football Coaches of America and Football Writers of America. He was the leading vote-getter among the interior linemen on this year's All-ACC team.

Three additional players also announced Monday they will be playing for the East in the All-America contest. They are flankers Isaac Curtis of San Diego State, Pat Keeney of North Carolina State and Darryl Stingley of Purdue.

Already announced to play with Pruitt and Sisemore on the West squad are Mike Holmes, defensive back, Texas Southern, and John Steinke, defensive back, Southwest Texas.

Tech drag racer places second in Texas racing championships

Arlington (Special) — Jerry Richards of Tarrant County Junior College (South Campus) is Texas' College Drag Racing champion for 1973.

He took the title by eliminating Jerry Anderson of Tech last Saturday in the Texas College Drag Championship at Dallas International Motor Speedway sponsored by the University of Texas at Arlington Intramural Department.

Richards drove a 1971 Dodge Demon with a 340 cubic inch Mo Par engine. Anderson drove a 1965 Chevy, hay hauling, pick-up.

An Electronics major from Fort Worth, Richards was introduced to drag racing by his wife Susan, also a TCJC student. Susan, driving a 1970 Nova, actually had a faster qualifying time than her husband but broke out in the second round.

Despite heavy rains which soaked the Dallas-Fort Worth

area, 163 cars made the run for the top prize. Entries represented 24 colleges and universities throughout Texas and came from as far away as Lubbock, Houston and Beaumont.

UT Arlington had the most cars entered (36) followed by Texas State Technical Institute in Waco with 18 and North Texas State with 16.

The margin of victory was slim, indeed, for Richards. Anderson, whose Chevy had a 4.4 second head start, edged Richards out at the finish line and was apparently the winner.

Since both cars broke out of their ET brackets, the one breaking out by the least time was the winner. That was Richards who broke out by .002 seconds to Anderson's .003.

For his victory, Richards received a lot more than the title of Texas Drag Racing Champion. In addition to two five-foot trophies, he won merchandise valued at over \$500.00.

Joining Richards and Anderson as ET bracket winners were Canny Jeans of Dallas Richland College in a '63 Plymouth, Kenneth Martin of Central Texas College in a '71 AMC Hornet, Joe McMichael, also a winner last year, of Texas A&M in a '70 Ford, Dan Pillow of UTA in a '69 Pontiac, Tim Rial of UTA in a '66 Ford, James Dickerson of Texas A&M in a '71 Volkswagen and Chris Steller of North Texas in a '67 Volkswagen.

College students weren't the only ones who ran at DI.
