

Engineering Show Postponed Until April 12-13

Date for the Twelfth Annual Engineering show which runs concurrently with Texas District Interscholastic league meet has been postponed from April 5-6 to Friday and Saturday, April 12-13, C. L. (Mike) Kelley, publicity manager for this year's event, announced yesterday.

Reason back of the postponement was that the District Interscholastic League meet date was changed and engineering officials favored change of their dates in order to be host to the hundreds who will visit Lubbock during the interscholastic gathering.

Approximately ten thousand are expected to attend this year's event, Kelley said, judging from attendance in previous years of the show. Last year over 9,000 attended the school boy meeting and the engineering attraction.

New Attractions
Many new attractions along with some demonstrations and exhibits of previous years are scheduled for the show. "Isotasy," a display by the petroleum engineering department, will show relation of one earth rock to another, it was revealed. Exhibition of oil well and refining equipment by major oil companies will add much to the immensity of the show, Kelley said.

The department of industrial engineering has worked out a new feature in the form of psychological trade tests which should be interesting to guests as well as Tech engineers. Other plans which will complete arrangements for the show are under way now, Kelley said.

A huge telescope will be displayed by the physics department, it was announced. This apparatus was practically made on Tech campus, reliable sources reported. Officers for this year's engineering classic are Charles Barnard, show manager with Kelley as assistant manager.

According to engineering custom, the student who fills the capacity of assistant manager for the current year is promoted automatically to the manager's position for the following year. The assistant manager is elected each year by the junior engineering students.

Chinese Games To Be Explained

Mathematics involved in the puzzle of the Chinese Rings and the winning technique in the ancient and honorable game of Nim will be explained in a lecture in Lubbock March 15 by Harold D. Larsen of the Mathematical Association of America.

The paper will be read Friday evening, according to the letter received by Emmett Hazlewood, professor of mathematics, recently. Subject for Larsen's talk will be "Binary System of Notation" which will explain certain questions associated with mathematical recreations, such as the Bolshhevik method of multiplication.

Principles involved are extremely elementary and the paper should be comprehensible to any one who has some knowledge of arithmetic. Larsen will leave Alpine early Friday morning, March 15, and will arrive in Lubbock in time for his lecture that evening, according to a letter received from him.

The meeting will be held in Room 208 of the Administration building at 8 p. m.

Textbook Given To Dean Gordon

An elementary textbook of which the senior author is E. B. Fincher, Tech graduate, has been presented to Dean James M. Gordon by the Rev. and Mrs. Fincher of Amarillo, parents of the writer.

The book, titled "The American Way of Living," is evidently designed for use in high school, according to Dr. H. L. Kent. It embodies the principles of living among American communities and discusses the problems of city life. The book probably was written to replace a high school civics course as it is more easily read and understood and is a conciseness of American life.

Does Version Of Song

Arrangement for "Twenty-Third Psalm" written by J. Hollie Cross, physics instructor, was used at the funeral of Mrs. P. W. Horn Tuesday afternoon. The selection was one of her favorites. A quartet arrangement, this composition has been used once before by the choir of the First Methodist church at Broadway and Avenue M. Members of the quartet were Christia Cowan, Miss Beulah Dunn, William Lord and M. J. Erickson.

Missouri Man Praises Tech

Throws Poseys At Engineering School

Dr. Clair V. Mann, head of department of engineering drawing, Missouri School of Mines and Metallurgy, Rolla, Mo., visited in the home of Prof. W. E. Street Friday and Saturday of last week while attending the West Texas Teachers association in Plainview.

"Dr. Mann was very highly pleased with Tech engineering school and complimented it on layout with consideration of the years Tech has been in operation," Street said. Mann is considered by all engineers, Street commented, to be one of the most outstanding authorities on

Several tests such as placement and various aptitude forms, have been compiled along with hundreds of others, it was learned. Dr. Mann spoke at the Plainview convention on "Suggestions for Improved Techniques in Teaching and Testing in Industrial Education." He is president of the Drawing and Descriptive Geometry division of the Society for Promotion of Engineering Education, an organization which is spreading over the entire nation and Canada.

Approximately 40 industrial arts teachers attended the convention in Plainview which was considered a good attendance due to the fact that there are few industrial teachers in West Texas. Finnis Vaughan, teacher in Plainview high school, was elected chairman for the 1941 session, said Street, who is outgoing chairman.

Tech To Offer New Variety Of Sudan Seed Soon

The Better Farm Seed conference at Tech college was closed Saturday afternoon with a prediction that a new variety of Sudan seed would be ready for distribution within a year or two, making it possible to distinguish Sudan and Johnson grass seed. This new variety is being grown and tested at experiment stations in Texas and other states.

Following the welcome address given by Dean A. H. Leidigh of the division of agriculture, Early Peltier, seed analyst at the state seed testing laboratory here, spoke on "Do We Need Better Seed in Texas?" Mr. Peltier pointed out that the main need is not better seed but a need for proper distribution of the good seed we already have.

Miller Talks
R. V. Miller, chief of field seed certification, state department of agriculture, gave a discussion of the effect of the federal seed law on the quality of planting seed.

E. P. Humbert, chairman state seed and plant board, College Station, talked on the part that the plant breeder plays in the production of better seed, and the value of good seed to the dealer and grower was discussed by E. L. Mader, instructor in agronomy here.

With Dr. Young presiding, the afternoon session was a round-table discussion on sorghum breeding and improvement. Leaders in the discussion were Don L. Jones, superintendent of Lubbock experiment station, R. E. Dickson, superintendent Spur station, Roy Quimby, superintendent Chillicothe station, R. E. Karper, in charge of sorghum investigations for the Texas agricultural experiment station, Dr. Humbert and Miller.

15 Students Go To Journalism Get-Together

Outstanding Speakers Featured On Program At New Orleans Meet

Fifteen journalism students and a student council member left this morning to represent Tech at the joint session of the thirteenth annual Southwestern Journalism congress and Student Governing bodies convening in New Orleans Friday and Saturday.

Prof. Cecil Horne, head professor of journalism, Haskell Taylor, instructor in economics and business administration, and Miss Cecile Horne will accompany the group.

Two-day Session
Publications officers elect making the trip are Edward Kidd, Frank Spitzer, A. J. Kemp and George Musick. Student council representatives are Marie Shook, Dexy Sudduth, Jack Myers and John Amos Wright. The following journalism students complete the delegation: Joyce Jones, L. D. Whiteley, Keith Axline, Bobby Felts, Doris Peavy, Mary Latch and Mary Alice Baker.

The delegates will eat dinner at the Worth hotel today and spend tonight at the Washington-Yorke hotel in Shreveport. They will arrive in New Orleans at 5 o'clock tomorrow afternoon, attend the congress Friday and Saturday and drive to Houston Sunday. After spending Sunday night there, they will return to Lubbock Monday.

Students Talk
Student speakers meeting with the editorial section at the congress Saturday morning will be John E. Usher, jr., picture editor of the Daily Reveille, LSU; Joe James, editor of the Texas Ranger, University of Texas; A. Freeman Edgerton, the Gumbo, LSU; Isabel Warren, editor of the Lass-O, Texas State College for Women; and Jack Johnson, editor of the Semi-Weekly Campus, Southern Methodist university.

Those appearing on the program for business managers are Cal Newton, graduate manager of University of Missouri; Marshall Hurt, manager of the Hurst Advertising agency, Jackson, Miss.; and Donald W. Coleman, circulation manager of the Times-Picayune.

Speakers to be featured at the faculty session Saturday morning are Fayette Copeland, associate professor of journalism, University of Oklahoma; George F. Church, associate professor of journalism, Oklahoma A&M college; and Herbert M. Davidson, publisher of the Daytona (Fla.) News-Journal.

The annual dinner at E. Oussard's Old French restaurant, See JOURNALISM page 4

Mrs. Paul Horn Dies Monday

Mrs. Paul Whitefield Horn, 73, widow of the first president of Tech, died Monday morning at the Lubbock sanitarium. Mrs. Horn was the mother of Miss Ruth Horn, instructor in English. She was born Maud Keith in Dayton, Tenn.

Burial was Tuesday afternoon from her home at 2201 Broadway. One of town relatives attending were a niece, Mrs. Walter S. Davis and her husband of Nachogdoches; and Mrs. J. M. Cowan of Dallas. Other survivors are a daughter, Miss Ruth Horn; a brother, E. W. Keith, Savannah, Ga.; and a sister, Mrs. J. E. Miller, Asheville, N. C.

Mrs. Horn attended Martha Washington seminary in Abingdon, Va. She was a member of the First Methodist church, 1911 Needle club, Twentieth Century club and an honorary patroness of Delta Kappa Gamma, honorary teachers' fraternity. She was married Aug. 8, 1890.

Active pallbearers were Drs. W. B. Gates, C. B. Quaila, Professor A. B. Strehli, Dean James G. Allen, R. D. Erwin, and J. J. Kilpatrick.

Classes were dismissed at 3 o'clock p. m. for the funeral and the library was closed from 3 until 4:30 o'clock. The flag was lowered to half mast until after the funeral.

Miss Myrtle Dunn was in charge of music, "Abide With Me" and "Lead Kindly Light" were sung.

DEAN REVIEWS BOOK

"Native Son" by Richard Wright will be reviewed by Dean James G. Allen at the meeting of the YM-YWCA Thursday night at 7:30 o'clock in Seaman hall. The book was written by a young negro, 31 years of age, and shows the psychological factors in the making of a negro criminal. The book was cited the Book of the Month by the Book-of-the-Month club.

Conducts Chorus

Under the general supervision of Julian Paul Blitz, head of the music department, "The Seven Last Words of Christ" will be presented by the college chorus Tuesday night, March 19, in the senior high school auditorium.

Approximately 500 people will sing in the chorus, which is by far the largest chorus for credit ever offered at Tech and probably the largest in Texas, according to Blitz.

In addition to the regular college orchestra, the A and B sections of the Tech band will play the chorus.

An admission of 50 cents will be charged for the entertainment and the proceeds will go to the Millam orphan's home. Tickets may be purchased from members of the chorus or downtown business establishments.

Science Club Hears Spalding

European Chemical Plants To Be Topic

W. L. Spalding, manager of Arizona Chemical company at Brownfield and O'Donnell, will speak to the Science club on the subject of "Chemical Manufacturing Plants in Europe" tonight at 7:30 o'clock in Room 102, home economics building.

Spalding has traveled extensively in Europe making a detailed study of chemical plants in foreign nations. He is also a graduate of Massachusetts Institute of Technology, Cambridge, Mass.

The lecturership committee which is headed by B. C. Goodwin's visit here. Membership of the Science club is restricted to faculty members who teach some subject of science such as mathematics, physics, chemistry, biology, geology and various instructors in engineering, agriculture and home economics, Prof. C. V. Bullen, president of the club, explained.

Any faculty or student interested in the subject to be discussed is invited to attend, Professor Bullen announced. This club is composed of about 35 members and was organized early after Tech's first long session. Members of the lecturership committee besides Dr. Goodwin are Dean O. V. Adams, Dr. R. A. Studhalter and Dean Margaret W. Weeks.

Other officers of the club besides Professor Bullen are Dr. A. W. Young, vice-president; Edna Buster, secretary; and Prof. W. L. Stangel, treasurer.

Textile Grad Is Promoted

W. Paul Temple, 1937 textile engineering graduate, has been promoted to the position of vice-president of Mudrite Chemical company, Inc., Houston, Tex., according to a letter received by Miss Rorothy Rylander, engineering librarian.

Temple finished Tech and worked for six weeks with the New Braunfels Textile mill, but began work with Bennett-Clark company of Texas clays and minerals. His work with this company was evaluating clays as to their potential value for use in rotary oil well drilling.

During his experience with this company a deposit of strontium sulphate was discovered on which the Mudrite has a patent pending for its use as mud weighing material in oil well drilling.

In September, 1938, Temple completed his work with Bennett-Clark company and began his duties with Mudrite as plant manager.

Stude To Attend Frat Meeting

Kenneth Germond, senior geology major from Dallas, has been selected to represent the local Alpha Beta chapter of the Sigma Gamma Epsilon fraternity at its national convention in Salt Lake City March 21-23.

Aggies Visit DM Factories, Make Tour Of Texas

Sixteen members of the department of dairy manufactures, fourteen of them advanced students, and two professors in the division, K. M. Renner and M. G. Pederson, will leave Tech March 20, for the eighth annual tour of dairy manufacturing plants and food processing factories over Texas.

The trip is a highlight of the senior dairy manufactures course, which places emphasis on problems of plant management and marketing of dairy foods.

The trip will include visits to plants in Fort Worth, Dallas, Sherman, Denison, Sulphur Springs, Longview, Lufkin, Houston, Kingsville and numerous towns in the lower Rio Grande Valley. Students will make special trips to the Lufkin Paper mill, new \$6,000,000 structure to the King ranch and to the Kraft Cheese corporation plant in Denison, where they will be guests of these respective companies.

Side trips to interesting localities in the Rio Grande valley are also planned.

Teaches Students
Purpose of the trip, one of the most popular in the division, is to give students a practical knowledge of the problems of plant equipment, layout and merchandising in the dairy foods industry. It also serves to introduce the students to a group of men already successful in the dairy manufacturing field.

Students planning to make the trip include Paul Kiser, Sylvester; James Lattimore, Lubbock; Forrest Baumgardner, Wellington; Willie Bell, Dorchester; Roland DeFee, Lubbock; Joe B. Farris, Hermleigh; Wayne Meary, Fluvanna; Samuel Nelson, Clifton; Kenneth Reese, Lubbock; Moffett Ryan, Lubbock; John Teague, Belts; Howard Wilkowske, Athens; Edwin Williams, Dallas; George Wilson, Princeton.

They will make the trip by car and will return to school March 30, taking advantage of the holidays for the tour.

Dorm Students Portray Voques

Coeds to model in the style show will be held Friday at 7:30 p. m. in the women's dorm are: Ina Bacon, Joyce Craven, Patsy Fullbright, Joanne Cox, Mary Helen Johnson, Wynell McClure, Martha Price.

Doris Lee Gore, Rita Mooney, Maxine Wheatley, Mary Price, Marie Yarbrough, Vivian Arnette, Joyce Crow, Jeanne Draper and Jeannette Watson.

The style show, which is sponsored by the home economics club, will emphasize sport clothes although street and evening clothing will be shown.

General chairman is Hazel Ann Wilson. Miss Lila Allred, instructor in clothing and textiles, is faculty sponsor. Heads of committees are: Nina Rose Webb, arrangements; Betty Savage, program; Virginia Lee Barr, advertising; Fay Thompson, publicity; and Alise Roux, costume.

Music will be furnished by Paulie Buchanan, Ernestine Story and Lorenz Garrison. Hair styles of the models will be by Marihelen.

There will be no admission charge and the public is invited.

Museum Group To Meet Here

Twelfth annual meeting of the West Texas museum association will be held in the museum building on Tech campus Friday, March 29.

He's In The 'Know'

Prof. Cecil Horne, head professor of journalism, has been elected to honorary membership in Sigma Delta Chi, professional journalistic fraternity. Horne was initiated by the Southern Methodist university chapter in Adolphus hotel, Dallas, Saturday night, March 9. G. B. Dealey, president of A. H. Belo and company, publishers of the Dallas Morning News, is ritual editor and introduced the initiates.

Coeds To Model At Style Show

Girls Will Display Latest At Levine's

Featuring various types and fashions of spring apparel, a style show will be staged under the sponsorship of Women's Press club tonight at 8:15 o'clock on the third floor of Levine's Department store.

Ten Tech coeds who will model are Winnie Jo Hooser, Carolyn Thomas, Joyce Craven, Vivian Arnette, Desie K. Lewis, Elizabeth Copeland, Anna Ruth Marks, Mary Dallam, Linda Chappell and Ruby Payne Meredith.

Each girl will model a slacks suit, a casual or sport outfit composed of either a skirt and blouse, a skirt and sweater or a dress and a play suit.

Every Tech coed attending will be given a ticket which entitles her to an opportunity to win a dress or suit in the drawing which follows the show.

Four members of Women's Press club, Daphean Hutchings, Doris La Rue Stapleton, Mary Beth Tomlinson and Paula Howard will wear identical slacks and suits and act as ushers.

All Tech girls are invited to attend the showing.

HE Club Sponsors Loan Fund Bridge

Tickets for the benefit bridge to be held in Doak hall Saturday afternoon from 3 to 5 o'clock are on sale for 35 cents in the home economics building.

The bridge is being sponsored by the home economics club as a means of raising money for the Margaret W. Weeks student loan fund.

Women faculty members, town women and all coeds are invited. Chinese checkers and "42" will be provided for non-bridge players, Louise McCrummen, chairman of the project, said.

Desie K. Lewis is co-chairman of the bridge and La Wanda Sherrod heads the publicity committee.

About 200 persons are expected to attend, Miss McCrummen said.

Tech Men Grab Free Copies Of "Gone With Wind"

Havev was wrought at the Tech Bookstore Saturday morning after students read the small ad which appeared on page four of THE TOREADOR, which said the first five students calling at the store would receive free copies of "Gone With The Wind."

Staff Revises Requirements For Engineers

Engine Council Asks Change After Survey Of Freshman Success

After analysis of the success of freshmen engineering students who entered Tech last fall with and without units in chemistry and physics accepted at time of entrance, the Administrative staff upon recommendation of the Engineering council have made some changes in requirements for admission to the division.

Total number of individuals represented in the survey were 212. This number of students were divided into four groups. Group I, composed of 49 students, had both chemistry and physics in high school; Group II, 31 members, had only physics; Group III, with 52 members, had only chemistry; and Group IV, having 80 individuals, had neither chemistry nor physics in high school.

Fallures Cited
A cross-section examination of each groups' academic record in engineering last fall tallied up that Group I carried an average of 15.2 semester hours, 73.5 per cent passed all hours taken, no one failed all hours taken, with an average of 1.6 hours failed per person. Group II passed 12.2 hours per person, 45.2 per cent passed all hours taken, 6.45 failed all hours taken, with an average of 4.4 hours failed per person.

In Group III 12.7 hours were passed per person, 48.1 per cent passed all hours taken, 5.7 per cent failed all hours, and 3.7 hours were failed per person of the group. Group IV took 10.6 hours, per cent passing all hours taken was 28.8, per cent failing all hours, 10.0; hours failed per person, 5.1.

With due consideration of these statistics, it is borne out that all high school students who plan to study engineering in college should make special endeavor to get off required courses in physics and chemistry. Based on the data mentioned the division of engineering is announcing in the fifteenth annual catalogue of the college an enrollment of physics entrance examinations for students that persons who are not able to present one unit of physics but do present one unit of chemistry will be admitted to the division on condition.

New Requirements
Students conditioned in this way will be required to take one year of college physics in the freshman year before they will be allowed to register for physics. See STAFF REVISES page 4

Noted Artist Demonstrates

Method of making an aquatint etching was demonstrated Monday and Tuesday afternoons and Wednesday morning in West Texas museum by Doris Reed, noted artist from Oklahoma A&M, during his visit on the campus.

Reed criticized Tech classes in drawing and painting and gave lectures on the Fine Arts both Monday and Tuesday. He aided students in making etchings from their own sketches.

Aquatint etching is a method whereby a pencil sketch is transferred to a copper or zinc plate and etched in with nitric acid. The effect produced is that of a dark brown watercolor sketch. After the picture has been etched on the plate through several stages of dipping in acid, varnishing, heating, inking and applying benzene, the plate is placed on a press resembling a small printing press and the final picture is run off.

American Association of Colleges sponsored Professor Reed's visit to Tech as guest of the department of architecture and allied arts. He is noted not only for his etchings but for his work in oil also. He has had his prints exhibited in Paris, Rome, Sweden and all over the United States. Eighteen aquatints and eleven pencil drawings were placed on exhibit in the museum during Reed's stay here.

Davis To Talk At Science Meet

J. W. Davis, instructor in government, will deliver a paper on "The Conflict between the National Commerce Power and the Taxing Power of the States," at the Southwestern Social Science association meeting 22-23 in Dallas.

Other Tech professors attending are L. C. Rietshammer and Spencer Albright.

All problems to be discussed at the conference are related to the Southwest. Schools from Missouri, Kansas, New Mexico, Arizona and other southwestern

Mr. Guy Errs . . .

TORN between scoring Maury Maverick and defending Texas' poll tax law, the Avalanche-Journal got involved in some confusing editorial fact.

The editorial in question followed a very popular belief; that the poll tax law in Texas was enacted to prevent negro and carpet-bagger control of state government. Mr. Guy said "They were enacted as measures of desperate self-defense after the Civil War, when carpet-baggers from the north obtained control of state governments . . ."

One other point advanced in defense of the law was that the money went for education—thus the tax was justified. That is peculiar logic. If it is such a good thing, why would it not be better to raise poll taxes to \$500 and really do a good job in educating boys and girls?

The poll tax of \$1.75 disenfranchises a group of people who may be economically prevented from expressing themselves in government. Because a man does not have \$1.75 does not preclude his ignorance. Some of our best minds are barred from voting because of the tax, and when Mr. Guy says that anyone interested enough in selecting his government can raise that sum of money he talks without facts, figures or reason.

There is no difference in the principle of requiring voters to own \$10,000 in property before exercising the ballot or owning \$1.75. When Mr. Guy rationalizes, saying that "the poll tax is a weapon for war on the ignorance where corruption flourishes best," he forgets that there are other ways of overcoming ignorance rather than by taxing it.

There is no democracy when a state like Texas, with approximately seven million inhabitants, allows something over one million people to participate in elections. Will Mr. Guy please explain how erecting barriers to the privilege of voting has preserved democracy in the South? Perhaps he was referring to "Americanism," or our rising tide of American "Fascism."

Play Golf . . .

PLANS are being rushed by golf and minor sports enthusiasts to assure Tech a 9-hole golf course next year, and there are few needs of the college if more than supplying facilities where students may receive recreation for "recreation's sake" and not for economic or compulsory reasons.

This project can be installed for as little as \$200, and improved as funds increase. It is estimated by golfers that about 500 Tech students and faculty members play golf regularly. If 200 of these take out memberships in the course, is upkeep and improvement would be guaranteed.

Not only would a golf course afford students a necessary form of recreation, but it could be opened for physical education credit. Playing golf for PE would be a diversion rather than the painful processes now used to "insure physical fitness" in the athletic barn.

Students now pay from 50 cents to a dollar green fees on local courses. The proposed fee at Tech would be 25 cents or two dollars per semester. It would allow golfers to play even if they had only an hour or two. As it is, they must gather equipment and secure transportation some distance to indulge in the game. It can seldom be done unless one has a full afternoon off.

A self-sustaining golf course would pave the way for additional sports. Since the State cannot be expected to make such allowances (meanwhile requiring physical education), students should now become conscious of the need and means of financing the projects.

One barrier which will have to be hurdled is the objection upon the part of some faculty members. One, outspoken against the idea, suggested that crowding the course with golfers would be dangerous! That can hardly be classed as an objection, but it is typical of what may have to be overcome before Tech can secure a worthy addition to its sadly lagging sport and recreation program. It is, however, as much to college interests as to students that minor sports be built up to accommodate the demand, and personal objections should be viewed in the light of what benefits can accrue to students and college alike.

Plant A Tree . . .

THURSDAY, March 28, has been designated Arbor Day at Tech, and O. B. Howell, horticulture professor, is in charge of campus beautification.

In previous years there has been a wholesale planting of trees without providing for their care. Result has been that these trees have died by the thousands because of lack of labor and watering facilities to properly care for them. This year planting will be confined to landscaping entrances to college grounds and around buildings where water is available.

There has been much criticism of Tech's barren campus. The reasons have been that lack of appropriations for needed equipment forbids extensive landscaping and the fact that labor is not available. It is up to various campus organizations to provide on March 28 manpower to replenish campus beauty.

Full cooperation from all organizations is being requested, and it is hoped that the same interest displayed in previous years will be evidenced on Tech's Arbor Day.

Things That Happen

On The Campus

Noo Awleens bound, 20 lucky members of the jounalistic fraternity embark this morning, all set to listen to Dorothy Dix and look at Heaven and Jay Harris . . .

Our condolences to Messrs. Axline, Musick, Kidd, Kemp and Spittler—We may have to stay at home but next Monday morning our size 7 3-8 . . .

Hop Halsey's supply of liniment nears exhaustion after Faculty plays THE TOREADOR in volleyball . . . Campus mourns passing of Mrs. Paul W. Horn, wife of Tech's first president.

At Other Schools

The Auburn Plainsman (Alabama Polytechnic) laments lack of athletic facilities for students who indulge in sports merely for recreation . . . It seems we are not alone in our problems . . .

Cracks Herb Martin of the same pepper: Not one negative specimen in 300 Wasseman tests given to students . . . Rice Institute flunkies consoling by free admission to all-college dance that costs everybody else a dollar.

Over The Nation

Headlines about it don't hit you in the face yet, but there's a growing movement for vote reform . . . A Seattle, Wash., home owner's association advocates double votes for all home owners to "protect ourselves from the have-nots." . . .

San Diego (California), the adopted home of Steinbeck's "Okies" grand jury advocates loss of voting privileges for those who accept government relief . . .

Maury Maverick screams from Washington about corrupt political practices in connection with the poll tax . . .

Joe McBride of Dallas, one of Jim Farley's postmen, was assigned to drive a new mail truck to Oklahoma City. He did so, in full uniform. When he got there he asked the way to the postoffice. People looked at his uniform, his mail truck, and laughed in his face. He finally found the postoffice—Oklahoma City isn't that big.

Over Seas

Our nomination for the smartest observation of the week: The 12-year-old who said "The president hasn't got any business trying to settle the war in Europe. What would we think if we were fighting and some guy like Hitler try to stop us?" . . .

Nevertheless, peace negotiations on the Finnish-Russian front proceed rapidly with Uncle Sam taking a prominent part . . . Ex-Kink Zog of Albania makes the newsreels by virtue of first birthday of his expulsion, along with the year-old child who was born just as Mussolini chased his pa and ma out of town.

Short Short Editorials

Ginger Rogers is "airing" Lew Ayres. It proves one of two things—or both. Spring is here or else another movie actress has reached the pinnacle of success and is in line for an Academy award.

"The most important problem in the making of a peaceful country is in the dissolution of any partnership between authority and the press. There has never been an hour when the first aid to autocracy has not been the placing of the press in leash."—D. Lawrence.

"It should never be forgotten that the newspaper is the poor man's book of knowledge. He has no other means of becoming acquainted with the laws and the opinions of society." —Fonblanque

New York university safety educators will visit 20 states this summer lecturing on safety education.

From recent headlines concerning the Russo-Finnish difference of opinion Joe Stalin has found out just what a Mickey Finn is.

THE TOREADOR

THE TOREADOR, student newspaper of Texas Technological college, is published every Wednesday and Saturday on the campus of Texas Technological college at Lubbock by students of the journalism department.

Entered as second class matter, October 31, 1925, at the postoffice in Lubbock, Texas, under the act of March 3, 1879. Editorial offices, Engineering building, 3, 4, 5. Telephones: college switchboard; Night Editor, 1286.

JOINER And Bill Wood Gets Wrought-Up Over The 'Wrath'

Last night we saw Will Hays' edition of John Steinbeck's "The Grapes of Wrath." We credit Mr. Hays with the production, and he had a field day. He might have, however, selected technical advisers for the film. Darryl F. Zanuck did the best he could, including hiring of a fine cast. But we feel the greatness of Steinbeck's novel lies in the author's daring frankness, power of description and his ability to portray a social class without pulling his punches.

We Introduce

Mary Price, senior home economics major from Pampa. Mary attended high school in her home town where she was a senior beauty and yell leader before coming to Tech in 1936. She has been a Tech beauty for three consecutive years and belongs to DFD social club of which she was vice-president in 1939. Mary plans to make a vocation of her hobby, knitting, and to have a knit shop after graduation.

And . . .

Maxine Wheatley, speech major from Ranger, who attended high school at Borger, where she was a member of the National Honor society. She belongs to DFD social club, Inter-club council, Alpha Psi Omega, Sock and Buskin and was a LA VENTANA beauty in 1939. Maxine's special interest is dramatics.

Prince Hubertus zu Lowenstein has been appointed visiting professor in international relations at Iowa State College.

Seventy-eight Indiana University graduates have become college presidents.

Local Theatre Gets Irate With Editor

In The Mail Pouch

Editor, THE TOREADOR From time to time we have received quite a few nice free editorials by you, and felt we should do something to show our appreciation for your fine spirit and cooperation.

We have at times wondered as to just what type and kind of person you might be, but please know we have definitely decided. We feel sure that Tech will suffer a great loss on your graduation because we feel your type of person does much to build and add to the growth of a fine college like Tech, and may your success and future gain the same results that you have demonstrated in your college career.

In closing we again wish to thank you and have attached two complimentary tickets to the Broadway Theatre, and we hope that you will find time to use

Joe Whitley Collegian's Broadway

NEW YORK CITY, March 13 Polls from college papers seem to indicate that swing and jitterbugging die a-bleeding, but regardless of the fact that the tempo of dance music is set by the campus, there will always be at least one sanctuary for rug-cutters, where music careers out of this world unmindful of collegiate displeasure.

It is a section of uptown New York called Harlem, where until 1932 swing held sway without undue attention from the rest of the weary world. Then suddenly the smart-set swooped down on Harlem lured by the weird noises that emerged from a place called the Cotton Club. Here, there was no god save swing, and Cab Calloway was his prophet.

The dusky dancers were soon dispossessed by the dinner jacket and sequin crowd. Hi-Ball was the universal watchword.

But that was yesterday and the fad is done. The Cotton Club has moved to Times Square. The white folks have turned to la Conga. And Harlem is itself again.

Most any night you can see Swing a-rocking in the Savoy Ballroom, a gargantuan Taj Mahal dedicated to torrid shuffling. Here come Harlem cafe-au-lait society. Here trek the jaded hoofers from Columbia, a-totin' Wellesley ladies out for excitement. The tariff is modest and the atmosphere ruggedly individualistic. You pay your money and you takes your choice. The mood is Swing with a lickety split.

What else could it be with such worthies as Ellington, Ella Fitzgerald, Erskine Hawkins, Earl Hines and Fats Waller serving as grand marshals?

Life Is Sad Department The other day a posse of the journalism students over at Hunter college here in Manhattan descended en bloc to interview Joan Edwards, a Hunter ex and currently a dispenser of sizzling melody as you may know.

Mostly the theme of the inquisition was to be: Career versus See BROADWAY page 4

these soon and enjoy another one of our fine pictures Yours very truly, Kenneth Taylor, Mgr. of Broadway and Lyric Theatres.

Editor's Note: When the public pays a handsome price to see motion pictures, Mr. Taylor, they do not pay to see advertisements. In a newspaper, the reader can turn the page, but did you even try to turn off a movie ad? Furthermore, when a picture such as "Gone With the Wind," admittedly the best thing ever to come from Hollywood, is subjected to the indignity of these ads, plus a belting crew of soda-pop dispensers, plus an extemporaneous speech, plus a theatron brawl which resulted in cat-calling from the balcony and irate thunderings by an employee from the main floor, any criticism is in order. Nothing more could have been done to degrade a fine picture, and do not think your public appreciated it.

It is our hope that students will continue "boosing" advertisements on the screen until merchants willingly withdraw them in self-defense. It has been amply demonstrated that theatres are not going to forego a little additional profit, even should it result in better entertainment to a public they profess to serve.

Jaywalkers Crush Centaur, 42 to 11, For Mural Crown

Faculty Six Wins Easily

Adding athletic laurels to their already proven academic ability, the Faculty volleyball team won a 15-1, 15-4, 15-5 decision from a hopelessly outclassed team representing THE TOREADOR Monday night.

Led by cannon-ball serving of Bill Pearce, classily net working of C. C. Schmidt and outstanding playing by J. W. Davis, S. S. (Who's Afraid of You) McKay, J. W. Jackson, L. C. Christian, H. L. Burgess and other top-notch players, too numerous to mention, the Faculty netters literally rolled over the Newspapermen.

Another game between the two teams is scheduled Friday.

Big-Time Nines Play In Lubbock

April 4 Is Date Of Pirate-White Sox Tilt

Big-league baseball, exhibition style, will be presented before Lubbock fans Thursday, April 4, when the Chicago White Sox of the American League play the Pittsburgh Pirates of the National League.

The game will be played on Parris field beginning at 2:30 o'clock. It is the first major league exhibition game ever played in Lubbock.

Both clubs are now in California training for the regular season which opens late in April. They play each other ten times on the swing eastward, third game of the ten to be in Lubbock.

Among the top-notch stars Lubbock fans will see in action are Luke Appling, Sox shortstopper, who hit 314 last season; Eric McNair, second baseman, possessor of a hefty 324 swat mark last year; Mike Tresh, considered the best young catcher in the American league; Mike Kreevich, lusty-hitting young outfielder; and Ted Lyons, veteran pitcher who stepped off the Baylor college campus to the White Sox mound staff 16 years ago and has been fooling opposition sluggers ever since.

The Pirates boast a few well-known names, too. Heading the list is Skipper Frankie Frisch, serving his first term as manager after succeeding Pie Traynor last year. Baseball's best-known brother act, the Waners, will play in the Buccaneer outfielder. Arky Vaughan, rated the best shortstop in the National league, will also be in the Pirate lineup.

Monte Stratton, who lost a leg in a hunting accident two years ago, will be on the coaching lines for the Sox. Stratton will pitch in batting practice, perhaps giving fans a line on his ability to pitch in competition this year.

Cage Title Is Fourth In Row

Jaywalkers point-a-minute basketballers added the 1940 intramural cage championship to their long string of titles by kicking Centaur, social loop champions, 42 to 11 Sunday afternoon.

It was the fourth consecutive intramural title for the Independent loop champions. Organized in the fall of 1938, they copped the football, basketball and baseball titles in the 1938-39 school year, then added the basketball title Sunday. No champion was declared in football last semester.

Handsome Obra Miller and his substitute, Noel Shoup, led the Jaywalker scoring parade with 5 field goals for 10 points each. Coach Roy Wilks played his first team in the first half, then let the second-stringers finish out the tilt. Incidentally, the reserves did quite as well as the regulars.

Score at half was 17-4.

Wayne Finnell caged three foul shots and a field goal to lead the Centaur scoring. Joe Rives showed well in ball handling, otherwise the Centaur performance was pretty drab.

The Jaywalkers, featuring a gang of ex-high school stars who for various reasons do not try for the Tech team, outclassed the luckless Centaur five, just as they have outclassed all other intramural opposition this season.

The box score:

JAYWALKERS	FG	FT	FTM	PF	TP
McClelland, f.	2	0	2	0	4
D. Moorehead, f.	0	0	3	1	0
Miller, c.	5	0	0	0	10

Silver Key Wins Consolation

Coming from behind sensation-ally, Silver Key won consolation intramural basketball honors by beating Scotts 26 to 23 in an overtime game Thursday night.

Scotts lead at halftime, 9 to 5; then the Keys came up fast to tie the game at 21-all at the end of the regulation 40 minutes. The social leaguers added two field goals and a foul shot in the extra period to win the game.

Silver Key was runner-up to Centaur in the social league, Scotts placing second to Jaywalkers in the independent loop.

L. D. Whitley led the way for Silver Key with 9 points. Billy Cooke followed closely with 8. Center Williams tallied 9 times to lead scoring for the Scotts.

The box score:

SILVER KEY	FG	FT	FTM	PF	TP
Cooke, f.	4	0	0	1	8
Whitley, f.	4	1	3	1	9

New York University has opened a special course on the economic and political issues of the coming presidential campaign.

Grid Drill Postponed

Spring football practice for Texas Tech's Red Raiders, once postponed, was set back again this week, this time indefinitely.

Originally scheduled to start last Tuesday, coaches reset the first drill for Monday afternoon. When Monday afternoon came around, they still were not ready to start, so another postponement was ordered.

Coaches Pete Cawthon and Dutchy Smith refused to set a definite date for the first drill, but said it would be "soon."

Thursday Noon Is Deadline For Net Tourney Entries

Entries for campus tennis tournament must be made by Thursday noon, according to Dean James G. Allen. Eligible for this tourney are freshman and varsity inchlings. Play will get under way Thursday afternoon.

Drawing will take place Thursday just before the tournament, and everyone interested is asked to get in touch with Dean Allen.

Brown Captains Spears' Nine

Practice Continues On Diamond South of Gym

Doc Spears' baseball team, which inaugurated workouts a week ago, continues to practice daily on the diamond south of the gymnasium. Spears this week reiterated his invitation to all students to try for the team.

Marshall Brown, late of the Red Raider basketball team, is field captain of the nine which will be Tech's only representative in the diamond wars this year. The team is not a varsity nine, since it is not sponsored by the college.

Eighteen candidates have reported for workouts thus far. They are:

Edwin Easterwood, Colon Bishop, J. E. White, T. L. Gilley, John Droppalman, Jack Dacus, Pat Patterson, Bob Andis, Zed Johnson, Homer Hensley, Rex Creitz, Red Handlin, Marvin Peterson, Ovid Foote, Joe Dickson, Ralph "Sleepy" Quest, and Edwin Locke.

Track Team Off To Fort Worth

LAREDO, March 12—Outclassed by other teams from schools where mild weather gave them a chance to practice more, Texas Tech's track team registered but one point in the fourth renewal of the Border Olympics here Friday.

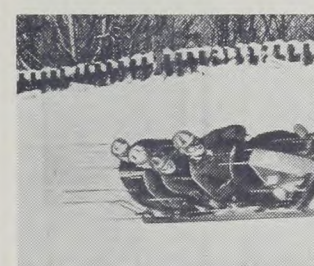

Bauman Roper, recently a star center on the Raider cage team, accounted for that lone point by clearing six feet even for fourth place in high jump. Perry Walters of Baylor copped the event with a 6 feet 3 inch leap.

Tech will be represented in the Southwestern Relays which feature the Fort Worth Fat Stock show at Fort Worth next weekend.

James Foster, holder of the Border conference 440-yard record, failed to qualify in five preliminaries, much to the surprise of his backers.

THEY'RE OFF! Streaking down the mile-long icy trough of the Mt. Van Hovenberg run at Lake Placid, N. Y. with "Bucky" Wells driving. Fifteen breathtaking turns to go. Fifteen chances to taste the supreme thrills of speed. But in smoking it's different, very different. "It's slow burning that makes a cigarette tick with me," "Bucky" Wells says. And he means what he says, because slow-burning Camels have been his cigarette for ten years.

"ONE-TWO-BOB! ONE-TWO-BOB!" And, as the crew bobs, "Bucky" picks up speed...60-70-80 miles an hour, driving high on the glassy wall of ice as he swings the quarter-ton steel sled around the curve. But in the field of cigarettes, this daring speedster gives the laurels to the quality of slow burning that he finds in Camels. You can tell by their mild, mellow taste that Camels burn cooler, slower—and scientists have confirmed this. (See panel, right.)

"SPEED for bob-sledding thrills!
S-L-O-W BURNING for smoking thrills!"
says champion "Bucky" Wells

FOR THE THRILLS AND EXTRAS IN SMOKING—
EXTRA MILDNESS
EXTRA COOLNESS
EXTRA FLAVOR
AND EXTRA SMOKING—I PICK THE SLOW-BURNING CIGARETTE... CAMEL

If you want to know how it feels to go 80 miles an hour on a racing bobsled, "Bucky" Wells of Keene Valley, N. Y. can tell you. He's done it plenty of times. He likes those speed-thrills on a racing bob. But when it comes to cigarettes, "Bucky" Wells is on the slow side...the slow-burning side. That means Camels!

"I've smoked Camels for years, and I know they burn slower," "Bucky" says. "There's cool comfort in a Camel. Mildness—more flavor. And—slow burning means extra smoking. Yes, penny for penny, Camels are the best cigarette buy. I'd walk a mile for a Camel!"

Why would anybody feel that way about his cigarette? Try a Camel and see. Camels are a matchless blend of costlier tobaccos...slow-burning. They give more pleasure per puff, more puffs per pack.

In recent laboratory tests, CAMELS burned 25% slower than the average of the 15 other of the largest-selling brands tested—slower than any of them. That means, on the average, a smoking plus equal to

Misses Childers, Moreman To Be Wed

Childers-Harding Wedding Day Set

Betrothal of Miss Lorene Childers and John E. Harding was announced Saturday afternoon when Mesdames Clifford B. Jones and James G. Allen entertained with a luncheon in the home of the former on Tech campus.

Small envelopes tied to the plate favors, bouquets of violets, contained cards bearing photographs of the couple and their new home with the caption "At Home After March 20." The serving table was centered with a bowl of yellow daffodils and Japanese iris, and the individual foursome tables were decorated with crystal baskets filled with violets.

The wedding will take place at the First Presbyterian church, honoring Miss Childers and Mr. Harding, Dr. and Mrs. Holden and Mr. and Mrs. Edwards entertained with a dinner party at the Mexican Inn Sunday.

Novel Mexican decorations centered the table and the place cards were a bridal couple of silver metal on misty blue and white cards.

Guests were Messrs. and Mesdames W. G. McMillan, William Pearce, Jr., James G. Allen; Miss Dorothy Rylander and St. Slaughter.

Tech Turns Out Hundred Doctors

Ninety-nine students from Texas Tech have entered medical colleges in the nine-year period from 1930 to 1938, according to a report of the Association of American Medical Colleges. The report covers 491 colleges which had ten or more students in the freshman classes of the medical schools of the United States.

In Texas 24 colleges were reported as having sent ten or more students to medical colleges during the nine-year period. Only five per cent of the 24 Texas colleges included in the report had a lower percentage of failures than Tech.

It is pointed out by authorities that pre-medical students at Tech do not take specialized courses in any department, but must take the regular courses as outlined for all students.

Revises

Continued from page 1

in the sophomore year. Prospective freshmen who have had neither physics nor chemistry in high school are urged to attend summer school following high school graduation to remove this condition.

Those in this group who do not do so may be admitted to college, but not to the engineering division until they have had a year of college training in physics, Dean O. V. Adams explained. Through cooperation of the arts and sciences division, students desiring to enroll in the engineering division but who are unable to meet the mathematics or science requirement may enroll as arts and sciences students for one year and thus meet these requirements, Dean J. M. Gordon announced.

COED'S CORNER SAYS

Tech Girls Will Display Easter Bonnet Tonight

By MARY BETH

If your clothes are suffering from late-winter doldrums, a striped taffeta turban will brighten your topknot or a new silk print frock will give you a lot of dash. Whether it's holding a new suit or one of last spring's, no self-respecting shoulder will be without its jeweled clip or unexpected filigree. New plaster write necklaces (whether they're bugles of starfishes) to frost your dark dress will give your "audience" something to remember.

And speaking of clothes, ten of the loveliest of Tech coeds were selected by Women's Press club to model spring clothes at a style show the club is sponsoring tonight at 8:15 o'clock at Levine's. The club, an honorary organization petitioning Theta Sigma Phi, has invited every Tech girl to attend, and each person there will be eligible to receive the garment which will be given away.

Newly-weds Mr. and Mrs. Eugene Whitt are both color blind. With no roommates to advise which clothes look best together, assembling a wardrobe presents difficulties.

Hm-m-m, greatness is not being but many small littles.

Broadway

Continued from page 3

Marriage. The Hunter gals, as a man, leaned toward the latter. Miss Edwards listened to the spokesman pop the questions to her, wrinkled her brow and then smiled.

"Waste all that time preparing yourself for a mere man!" she flipped. "Don't be silly, I'll take a career anyway."

Bagatelles

We almost ran smack into Harry Carey the other day in the colossal blizzard that hit us. The western hero of your youth looked more like a banker than a Galahad of the brush country. He's in town to do a show. Girls here are set-ups for sheiks; everywhere for all we know. (Come to think of it there was the late Mr. Valentino.) Anyhow a real, live sheik named Khalil Ben Ibrahim Al-Rawaf, sporting a tur-

Bride-Elect Is Honored At Tea

Ella Norene Moreman, bride-elect of Reginald Jordan, was honored Saturday afternoon at a seated tea at the home of Mrs. F. R. Friend of 2005 Broadway. The wedding will take place March 21 at the First Methodist church.

Hostesses were Rose Jean Rodgers, Carolyn Thomas, Marian Lee Mason and Lois Marie Daniel. During the afternoon Pauline Buchenau, Brunette Beard and Ranell Chaney presented a program of musical numbers.

The tea table was centered with a bowl of jonquils and corsages of spring flowers tied with blue and white were plate favors. The honoree was presented with a gift of her silver from the hostesses.

Bride Honored By YWA Members

Mrs. Eugene Whitt, the former Mary White, was honored with a breakfast and shower Sunday morning at 1510 Avenue M by the Young Women's Auxiliary of Tech.

Mrs. Whitt has served as vice-president, program chairman, reporter and secretary of the YWA while attending college. She is vice-president of the Association YWA of West Texas which includes four colleges and 11 counties.

Members attending were Barbara Cox, president, Betty Savage, Luzella Bryan, Ermald Floyd, Margie Smith, Miriam Tatum, Morrine George, Imogene Webster, Ruth Allen, Madge Lawrence and Mrs. John Malory, sponsor.
