Number 45

Wiggins Named Tech Head

Campus Pastures To Be Cultivated

Funds to irrigate and clear 200 acres of pasture land was approved by the Tech Board of Directors recently, according to W. L. Stangel, head of the Agriculture division.

Other than being used as a laboratory, crops gathered from the 200 acres will help feed Tech's 688 head of livestock. The animal husbandry department will be in charge of the cultivated area, Stangel stated.

"After studying the situation, it was decided that feeds from such an area would prove more valuable than the native grass," Stangel said. Alfalfa and sorghum will probably be the types of feed raised on the new ground.

When Tech was established in 1924, 2008 acres of ground was allotted. From this amount, 800 acres were approved for pasture land for the division's livestock, Stangel said.

In 1947, 160 acres was cleared and put into cultivation. The plant industry department has been in charge of the cultivated ground for the purpose of studying variety crops in this area, Stangel said.

Topographical maps have been made of the area selected and work on it will be under way soon, according to Stangel. A new irrigation well which has been drilled on the 200 acres is the sixth well on the campus.

Surprise Harvest Of Barley Grown

A barely harvest on the Tech farm was a surprise even to the experts.

Dr. A. W. Young, professor and head of the plant industry department, said the barley, Wintex variety, was planted April 3 as a nurse crop to alfalfa, and in a three month's growing period had matured and was ready for cutting.

"Planting that late, we did not expect a yield at all," Dr. Young said. The barley used as nurse crop on the irrigated farm for the late planted alfalfa is ordinarily sown in October and harvested in June. The average yield was a little less than 20 bushels to the acre, he said.

A 400-pound per acre increase was shown in the application of five gallons of liquid fertilizer per acre, Dr. Young stated.

Capt. Neubauer To Teach In Military Science Post

Capt. William C. Neubauer, of Bridgeport, Conn., has replaced Maj. J. M. Goodman as head of the Signal Corps division in the Military Science department. Maj. Goodman is instructing summer ROTC students at Fort Monmouth, N. J., this summer and will report to Harvard for work on his Master's degree this fall.

Capt. Neubauer received his commission in June 1946. He is a graduate of Rutgers university of New Jersey and a graduate of General Staff college at Fort Leavenworth, Kansas. He served 44 months in the Pacific during the war stationed in Australia, New Guinea and the Philippines.

Three Dormitories Undergoing Repair

Miss Mozelle Craddock, director of dormitories, stated repairs to Tech dormitories have been started and will be finished by September.

Painters have finished painting Women's Dorm II and are going to start Doak hall soon. Tables, chairs and woodwork have been refinished in Women's Dorm II. Doak hall will be painted and the tables and chairs refinished, the director said.

When work on Doak is completed, Sneed hall will be painted, windows will be repaired and new window screens installed. Ninety screens have to be replaced, Miss Craddock stated.

Penner and Cheney, painting contractors, are doing the work, but the cost of the repairs has not been estimated because contracts for the window screens are still pending. \$6,000 was paid for the painting of Women's Dorm II.

Miss Craddock said the dormitories would be repaired as much as possible with available finances, but she emphasized that the cost of repairing the dormitories must come out of money the system takes in from the students.

Scholastic Society Approved for Tech

A chapter of Alpha Lambda Delta, national scholastic honorary society for freshmen women, has been approved by the national council, Pres. W. M. Whyburn announced.

Petitioned for approval was submitted through the freshman honor society, a campus organization, Mrs. Louise C. Allen, associate professor of journalism, and Mrs. Fay Hattox, instructor in foods and nutrition, are the faculty sponsors.

Organization of the national society at Tech will begin after the petition for membership is approved by other school chapters over the nation.

Allen To Hold Interviews For Three Dunlap Awards

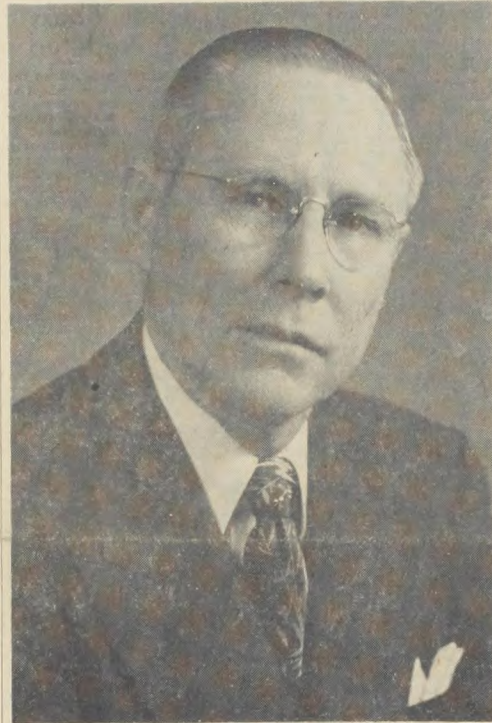

Fifteen of the 18 Dunlap scholarships, awarded annually to graduates from high schools in any of the eight counties which border Lubbock county, have been accepted for attendance next year at Tech, Dean J. G. Allen, dean of men and scholarship administrator, announced.

Interviews for a few more applicants for the scholarships are to be conducted in the dean of men's office Aug. 1. One graduate from each of the 43 schools in the nine-county area is eligible. Each scholarship is for \$100 or \$50 each semester. The awards are made on a competitive testing basis from among the best three candidates recommended by respective schools.

KRAL WINS SCHOLARSHIP

Robt. M. Kral, Sweetwater sophomore, has been awarded the annual \$200 Sears & Roebuck agriculture scholarship for 1948, according to J. G. Allen, dean of men and administrator of awards.

Kahl was selected from 12 sophomore agricultural students who had been in the freshman honorary society.

DR. D. M. WIGGINS

Takes Over Job Beginning of Fall

By DUNCAN ELLISON
Toreador Staff Writer

Dr. D. M. Wiggins, 52, for the past 13 years president of the Texas School of Mines and Metallurgy at El Paso, was selected as president of Tech Saturday night by the Board of Directors and will take office Sept. 1. Dr. Wiggins succeeds Dr. W. M. Whyburn who has resigned to head the department of mathematics at the University of North Carolina.

Fifth President Of Tech

Dr. Wiggins, who will become the fifth president of Sept. 1, was named the unanimous choice of the Board after a day of interviewing 11 other candidates. Dr. Paul W. Horn, first president of Tech, was appointed in 1923 and served until his death in 1932. The second head official, Dr. Bradford Knapp served from 1932 until his death in 1938. Dr. Clifford B. Jones then took office serving until his resignation in 1944 when Dr. William M. Whyburn became the fourth president.

"The Board feels that it has selected the most outstanding man available for the presidency of Texas Tech and that under his guidance the college is expected to continue its fine record of progress as one of the leading institutions of higher learning in the southwest," Chairman Chas. C. Thompson said.

Came To Texas At Early Age

Dr. Wiggins was born in Crowley, Louisiana, December 9, 1895 and moved to Canadian, Texas, at an early age, receiving his grade and high school education there. He attended Goodnight college, received his BA degree from Hardin Simmons university in 1919, and in 1925-26 did graduate work in the University of Chicago. He received an MA degree from Yale university in 1928 and a Ph.D. in 1930. Hardin Simmons university continued.

SECOND SUMMER SESSION SCHEDULE

Tuesday, July 20—Registration for second term.

Wednesday, July 21—Classes begin—7:30 a. m. Dance, 8:30 p. m., Rec hall.

Thursday, July 22—Last day to registrar; late registration fee charged. Movie, "Suez", 9 p. m., Ad building green.

Friday, July 23—Last day to add a course in second term. Artist course number, Maud Scheerer, 8:30 p. m., Ad building green.

Wednesday, July 28—Dance, 8:30 p. m., Rec hall.

Thursday, July 29—Movie, "Tales of Manhattan", 9 p. m., Ad building green.

Friday, July 30—Last day for student to petition to drop course without grade penalty. Artist course number, Frederic Balazs, 8:30 p. m., Ad building green.

Wednesday, Aug. 4—Dance, 8:30 p. m., Rec hall.

Thursday, Aug. 5—Movie, "House on 92nd Street", 9 p. m., Ad building green.

Friday, Aug. 6—Artist course number, John Anglin, 8:30 p. m., Ad building green.

Wednesday, Aug. 11—Dance, 8:30 p. m., Rec hall.

Date Moved Up To Pre-Register

Pre-registration will be continued through 5 p. m. today according to registration officials. Approximately 1531 students had pre-registered Wednesday afternoon.

Scheduling of classes will begin at 8 a. m. Tuesday, while classes will not start until 7:30 a. m. Wednesday. Monday will be the last day students may pre-register, Joe Seay, assistant registrar, announced.

Boxes containing pre-registration cards were placed in the Ad, Home Economics, Agriculture and Engineering buildings Tuesday, July 6, when pre-registration began, Seay said.

A comparison of enrollment with that of the first summer semester will be about even, Seay said. A large group of men students, especially many who graduated from high school is expected, he pointed out.

JACKSON IS LIAISON OFFICER

Prof. J. W. Jackson, professor of government, has been appointed liaison officer between the Tech and the Air Force reserve. He can accept enlistments of former personnel, officers and enlisted men. He can accept enlistments of former personnel, officers and enlisted men. His office is room 305 in the Ad building.

Young Announces Faculty Additions

Albert B. LaGasse Jr., Commerce, has been added to the faculty of the plant industry department as an instructor in horticulture. Dr. A. W. Young, professor and chairman of the department, announced LaGasse is to teach landscaping, designing and flower culture, replacing Naud Burnett, who is going into commercial work in Dallas at the end of this term.

The 26-year old Texas A&M graduate is married and has two children. He received his BS degree in June of 1948 in landscape architecture. One of his drawings was published in "Horizon," an Ohio State university magazine on horticulture, and several of LaGasse's drawings were published in "The Agriculturist", a Texas A&M publication. He also did general contracting at Bryan while in school.

British Photographic Society Accepts Tech Student

Charles E. Wendt, junior journalism student from Lubbock, has been informed of his acceptance as a member of the Royal Photographic Society of Great Britain, which includes some of the best known photographers in the world and is one of the oldest societies of this kind.

Wendt, a member of Photographic Society of America, holds membership in Pictorial Photographers of America.

Off the Chest

If Tech awarded a prize for outstanding service in a "thank you" job, it would surely go to Dean W. L. Stangel, who has resigned as chairman of the athletic council. Through his leadership, Tech is knocking at the door of the Southwest conference to compete with larger schools, some having 50 to 75 years "head start". The athletic bookkeepers are also pleased with his work, for they are able to use black ink instead of "red".

Tech's placement center, under the direction of Mrs. Jenkins, is doing a fine job acting as a "clearing house" for prospective employers and Tech graduates. It could do a better job still if the students and graduates would cooperate more fully with it. This relatively new service is another indication that Tech has become of age.

Beginning Sept. 1, Tech will have a new president. The Board of Directors could have selected anyone from an engineer to a medical doctor for the position, all worthy men, but it selected an educator. Dr. Wiggins has proved himself to be an able administrator as well as an outstanding man in his profession.

Through his leadership, eleven new buildings have been constructed on the campus, membership has been established in the Southern Association of Colleges, eight major departments have been added, the curricula has been substantially increased, and five major degrees are being offered, according to a biographical sketch received from the Texas College of Mines and Metallurgy.

With this record he will still have to take long steps to match the pace set by Dr. Whyburn. The Board of Directors has been either very wise or very lucky in its selection of presidents, for Tech has grown too fast and made such a record, that none of its administrators could possibly have been a lemon.

Professional Fraternity To Meet In Big Spring

Delta Sigma Pi, national professional business fraternity, will hold its first annual reunion tomorrow and Sunday at the Hotel Settles, Big Spring, according to Newell Reed, head master.

Reed said he expected about 25 alumni and 30 active members to be present at the reunion. The fraternity will climax its meeting with a banquet at 8:30 p. m., Sunday night in the hotel's coffee shop, Reed said.

Dr. H. E. Golden, associate professor of marketing and secretarial administration, will be the speaker.

The irony is that often we have to undo tomorrow what we did today.

Flavor seems to vanish from food the minute a dietitian enters a kitchen.

The Vicious Circle

By Oleta Stewart

The Circle is feeling up to its eyes in "Vicious" this week and it wants everyone involved in the subject to follow to know that this columnist is not alone in its view! The big question in the collective minds of Tech students is why there must be such undercover secrecy about pre-registration. As the Circle understands it, the approximate purposes of this worthy practice are: 1. To establish a basis of information concerning the prospective number of enrollees in order that master schedules can be made to accommodate the hordes by adding or taking away certain sections. 2. To eliminate so much of the registration-day rush and to facilitate registration procedure for administration and students by distributing routine forms early. As pre-registration now stands it absolutely does none of these, because half of the people on the campus don't even know when the big event is coming off.

It was explained to the Circle that registration officials did not want the days of pre-registration publicized because prospective students in surrounding towns would read about it and be flocking to the campus ready to get their classes all set up. If we may be so derogatory as to say so and not denying that the Summer Toreador may be a readable publication, just exactly how large of a circulation does the administration think this college paper has? It seems possible that a story could be phrased in such an emphatic and clarified style by some faculty member that high school graduates could be made to understand the who, what, when, why and where of pre-registration.

And if it is absolutely necessary that pre-registration activities be kept behind an iron curtain, couldn't students in school this semester at least be slipped under the corner of it? Surely it wouldn't break the college treasury to sent out a post card notifying enrolled Techs that pre pre-registration will begin on a certain day and end on a specified day.

SO RIGHT

Dear Circle:

If you are going to have pre-registration, why have it to just the select few who happen to have classes on the side of the ad building where the "A" card box happens to be placed? Of course boxes are reported to have placed in the home economic building, aggie building and engineering building, but perhaps the administration doesn't realize that some of us happen to have our classes in the miniature gyms . . . that is barns . . . otherwise known as X buildings. My one consolation is this is the last registration I have to go through. The strain of another would be too much.

THERE'S HOPE

Dear Miss Stewart:

I filled out a pre-registration card Tuesday a week ago and I have not received my registration blanks yet. Several students I know filled theirs out a day or two later and have received theirs. In order to be able to enroll in some

classes that always have a large number of students, I wasted no time in pre-registration. Now some people have the nerve to ask me why I am disgusted.
A Junior."

Dear Junior:
You're lucky that you even knew about it at all. At least you have a fifty-fifty chance of getting the classes you need. What if you hadn't even pre-registered at all like dozens of others around here.
V. C.

Requisition Books Must Be Redated

Veterans who plan to attend the second semester summer school at Tech must go by the business office and have their requisition books redated, according to H. A. Anderson, veterans coordinator. This is not need for the veteran to go to the coordinator's office unless he is attending school under Part VII (Disable vets) of the GI Bill, Anderson said.

Part VII veterans, entering Tech the next summer session, must report to the training center not later than July 23, according to Franklin Elkins, training specialist. Failure to report to the guidance center will delay the veteran's getting his pay on time, Elkins said.

Miss Geraldine Clewell, associate professor of home economics education at Tech, has been notified she is invited to membership in Omicron Nu, honorary home economics fraternity. Miss Clewell will return to Tech in September after a year's leave of absence at Ohio State university where she has been working toward her doctor's degree.

Band School Ends Six-Weeks Series

Tuesday night marked the end of the 1948 concert series presented by Tech's six weeks summer band school. The school will be brought to a close tomorrow.

Dr. A. A. Harding, guest director, directed the entire program of the concert band which included: "Fanfare from the Seahawk" by Korngold; "Overture to Der Improvisator" by L'Albert; "Third Movement (Wagon Trains of the Pioneers)" from "Santa Fe Trail" Symphony by Earl McDonald; "Meditation from Thal's" by Massenet. The last two selections were transcribed for symphonic band by Dr. Harding.

Other features on the program were: a cornet solo "Song 'L' etc'" by Chaminade, played by John James Haynie; "Hands Across the Sea-March" by Sousa; "Andante and Rondo from Symphonic Suite" by Dohnanyi; "Prelude" by Daldeng Lee. Dr. Harding also transcribed the last two numbers for the band. The concert was concluded with "La Boheme (March paraphrase on Melodies from 'La Boheme')" by Puccini-Alford; "George Washington Bicentennial-March" by Sousa. The National Anthem ended the final 1948 concert.

Don't think that money is everything in the world. It isn't even ninety-nine percent.

Books For Entertainment Added To Library Stock

Mr. A. S. Gaylord, librarian, announced that several new books have been added to the recreational section of the reading room on the third floor of the library.

Fiction:
Contrary Winds; Creighton Sellers.
A View of the Harbor; Elizabeth Taylor
Close Pursuit; Katherine Burt
Johnny Christmas; Forrester
Blake
Non-fiction:
The Last Billionaire; W. C. Richards
It Took Nine Tailors; Adolph Menjou
It Beats Working; John Lardner
The Proper Bostonians; Cleveland Amory
Mystery:
There Was An Old Woman; Elvira Queen
Lady Afraid; Lester Dent
Rendezvous in Black; Cornell Woolrich
There Is a Tide; Agatha Christie

T. I. Brown, senior journalism student from Lubbock, rolled 17 consecutive strikes in a bowling match with Amarillo bowlers this month. He did not achieve the perfect 300 game although only 12 strikes are required for the bowlers' dream.

Brown ended one game with nine strikes and struck for the first eight frames in the next. His total three-line series totaled 750 or an average of 250 pins per line.

Bill Henderson Featured On July Boxing Card

By JERRY HENDERSON
Toreador Staff Writer

Bill Henderson, ex-Techsan and Golden Gloves featherweight champion, arrived in Lubbock Monday to train for his six-round bout in the Lubbock Jaycees boxing show, July 22.

Henderson, who twice won the Texas Golden Gloves featherweight championship and went to the Nationals in Chicago in 1947, turned professional early this year

BILL HENDERSON

just after he had won his title. He is in the training camp of Gus Lesnevich at Cliffside, N. J., lightweight champion of the world, and being tutored by Joe Vella, manager of Lesnevich.

A Winning Record

The Levelland boy has had eight fights in the pro circuit, winning six by knockouts and two by decisions. He is now considered one of the leading featherweight contenders of a new crop of prospects who are striving to obtain matches with Willie Pep, present featherweight champion, Bert Kahn, owner of the Kahn health club, said, Kahn, who brought Henderson and J. D. Kirkpatrick of Petersburg into the pro game, arranged the bouts on the fight card for the Jaycee show. He announced that several sportsmen and sportswriters will attend the show including George White, sports editor of the

Dallas News, and Associated Press sports writers.

Jack Dempsey Will Referee

The boxing show which will feature 44 rounds of boxing will be held at Sam Rosenthal field July 22 and will be refereed by Jack Dempsey, ex-heavyweight champion of the world. Henderson will fight a six-round exhibition and Kirkpatrick will be featured in a six-round battle. Tickets for the bouts are: ringside \$4.20; box seats, \$1.20; reserve seats, \$3.60; and general admission will sell at \$3.00 and \$1.80.

Henderson is training for his bout at the Kahn health club and will remain here for a couple of weeks after the fights. When asked the difference between his amateur fights and professional fights, Henderson said that generally better boys were found in the pro fights. He added that his four round bouts were close to amateur standards but the six rounders were rougher.

"They are naturally rougher as you go up," he said. "One thing is easier about professional fights," he said, "You have plenty of time. I was always rushed in amateur fights and was always tense before the bout."

Will Study At Tech Again

Henderson stated that he saw the Louis-Walcott fight and considered it slow but said the crowd was tense, waiting for something to happen.

He added that he needs about a year's work to graduate and intends to finish at Tech in the near future.

Bernie Winkler, Raider tackle and co-captain during the past season, left Tuesday to join the Los Angeles Dons, professional football team. The Dons will train in Ventura, Cal.

J. WILLIAM DAVIS

Dr. Davis Named As Council Head

Dr. J. W. Davis, head of the Government department, has accepted the chairmanship of the athletic council. He was appointed by the Board of Directors July 10 after Dean W. L. Stangel of the Agriculture department submitted his resignation to the Board.

Dean Stangel was the original chairman of the council and has held the position except for a year and a half while on leave. The late W. A. Jackson replaced him, and after Jackson's death, J. N. Michie, professor of mathematics, held the chairmanship. Michie is still a member of the council.

Dr. Davis said that the council would meet this week and any new plans and policies would be formulated then.

Math Department Makes Additions To Its Faculty

Two mathematics instructors will be added to the department's faculty at the beginning of the fall semester, according to Dr. Emmett Hazlewood, chairman of the department.

B. T. Smith, who was a student assistant last spring, will be an instructor this fall. Smith plans to receive his MA from Tech this summer.

John Lindsey, of Austin, the second fall-addition to the department's faculty, received his MA from the University of Texas, and will be an instructor of mathematics at Tech, Dr. Hazlewood said.

EX-TECHSAN TO TEACH

Judd Morrow, Rising Star, will assume his duties as instructor in agronomy Sept. 1, replacing E. L. Mader, who resigned to be associate professor of agronomy at Kansas State college at Manhattan, according to Dr. A. W. Young, professor and head of the plant industry department.

Morrow received his BS degree from Tech in 1947 in agronomy and has worked on his Masters degree as well as taught part-time during the past year. His thesis subject concerns the use of "2-4-D" compound (weed-killer), Dr. Young said.

Major W. L. Curik of the Military Science department is taking an air corps indoctrination course at the University of Alabama this summer.

Petroleum Department Plans Building Own Structure Soon

By FRANKLIN GRANT
Toreador Staff Writer

W. L. Ducker, head of department of petroleum engineering, announced that a new petroleum engineering building will be under construction soon. The building will be a \$30,000, one story structure located between the infirmary and X-13. Main offices and laboratories will be housed in the new structure, but due to the small size of the building all petroleum engineering cannot be concentrated there, Ducker said.

Ducker came to Tech in January 1948 to establish a department of petroleum engineering. In cooperation with a "committee of industry", headed by George P. Livermore, he has procured approximately \$15,000 worth of new equipment for the department. Ducker said the department had recently received a drilling control unit valued at \$1,500 and a model oil well which was exhibited at the Engineering Show. Much of this equipment is being secured through manufacturing and supply companies, Ducker stated, but the "committee of industry" is backing the department both financially and physically.

Increase Requirements

Tech's 1948-49 catalog will contain a complete revision of the petroleum engineering curricula, and will put Tech's petroleum engineering department in the running with those of all other colleges in the United States, stated the engineer. The required hours for graduation has been 146, but will be increased to 154. Of the 17 petroleum engineering schools in the United States, Tech's 154 hours required for graduation, will be the optimum.

- Friday, Aug. 27—Final examinations.
- Saturday, Aug. 28—Final examination. Second term ends.

The stories told by women usually leave a man wondering what's funny.

Wiggins---

(Continued from Page 1)

ferred a LL.D. degree upon him in 1943.

He was married to Winnie Kinard of Memphis, Texas, in 1918. They have no children. He began his career as an educator when he became the principal of Burk Burnett High school in 1917. This beginning was followed by a short period of service in the Army, after which he was principal of high schools in first Vernon, then Canadian. He became superintendent of schools in Canadian and in 1925 went to Hardin-Simmons university as dean of students and professor of education. In 1935 he was chosen president of the Texas College of Mines and Metallurgy, a position he has held until the present time.

Enrollment Gain 375 Percent

The student body at Texas Mines has shown an increase of 375 per cent during Dr. Wiggins 13 years there. A total of 600 students was enrolled in the fall of 1935 as compared to 2590 enrolled during the past year.

Dr. Wiggins has been active in civic work in El Paso as a Rotarian, as a director of the El Paso Chamber of Commerce, and the El Paso Country club.

To Attend Next Board Meet

The new president is expected to attend the next board meeting at Lubbock, Aug. 14, and officially accept the position, Chairman Thompson said.

The board accepted the resignation of W. L. Stangel, dean of the division of agriculture, as chairman of the athletic committee "because of the pressure of other duties." Dr. J. Wm. Davis, head of the department of government, was named to succeed Stangel.

Board Accepts Statue

A resolution of appreciation to Aman G. Carter, Fort Worth Star-Telegram publisher, and the Aman Carter Foundation for the gift of a bronze equestrian statue of Will Rogers was adopted by the board. The directors and educators were entertained at a luncheon at the Fort Worth club with Wyatt C. Hedrick, Fort Worth architect, as host.

Attending the meeting were: Chairman Thompson; O. B. Ratliff, Lubbock; A. G. Mayse, Paris; Charles Woodbridge, Dallas; Kyle Spiller, Jackboro; Chancelor Weymouth, Amarillo; Mark McGee, Fort Worth; Robert Price, El Paso; and Leon Ince, Houston.

Mrs. Billie Caskey, instructor of child development, is taking graduate work at Ohio State university.

The average American spent 130 per cent more for recreation in 1947 than he did before World War II.

Jaffa, Mediterranean port for Jerusalem, has the largest ratio of Arabs to Jews in Palestine, about two Arabs to every Jew.

LOST—Solid 14K gold Eversharp fountain pen. Engraved on it is Joan London, Spur, Texas. Reward. Return to the Toreador office.

OUTSTANDING PROFESSIONAL GOLFER

WHY... I smoke Chesterfield

(FROM A SERIES OF STATEMENTS BY PROMINENT TOBACCO FARMERS)

I like to sell tobacco to Liggett & Myers because they buy the best mild cigarette tobacco for Chesterfield and pay the top price.

I've been smoking Chesterfields ever since I started raising tobacco. I know they're made of mild, sweet tobacco.
