

## Enrollment Reaches 3700 in Final Tally

Enrollment for the first summer session exceeded last year's by 83 for a total of 3700 students, Floyd F. Boze, registrar, reported Wednesday.

A count of men students registered this session totaled 2,208 while 1,492 women enrolled.

"These figures include all students who were admitted to the college and signed up for college credit, stated Boze. Thus, some workshop people were counted.

Among the workshops underway here is one designed for high school guidance counselors from this state. The Counseling and Guidance Training Institute is sponsored by Tech's departments of psychology and education under a National Defense Education Act grant.

Homemakers may learn short cuts in clothing construction at a Tech workshop July 1-7. Other short courses in clothing are scheduled for July 7-12, July 13-29 and Aug. 1-20.

A course on draping will be offered July 13-30 and one on home furnishings Aug. 1-21.

Interested persons should call the Home Economics Dean's Office.

## Cell Block Seven Stars In Jazz Concert-Dance

Rusty Brown and The Cell Block Seven will be featured at the Tech Union's first special event of the summer season Tuesday at 7 p.m. in the Union Ballroom.

All Tech students will be admitted free to this combination jazz concert and dance and to other events arranged by the Union Program Council.

A 45 minute concert will open Tuesday's program. Following a brief intermission, a three hour dance will wind up the evening. Dress will be casual.

The Cell Block Seven is a widely known concert and dance attraction in the southwest. The group has entertained previously at Tech as well as at other Texas schools including Texas University and Texas A&M.

This band has gained national recognition through appearances

on the Ed Sullivan television show. It has also been featured on shows with such prominent show people as Bob Hope, Pat Boone, Phil Harris, Jaye P. Morgan, Vic Damone and the Four Lads.

The Cell Block Seven has sold over 40,000 record albums and was recently featured in the motion picture "Rock It, Baby, Rock It."

### Program Council Seeks Members

Tech Union Program Council meets Mondays at 7 p.m. in Room A of the Union. Jane Gentry, program director, asks all students who are interested in working with the program council during the summer to attend.

MAKE WAY FOR UNION EXPANSION  
... Jane Gentry watches Faculty Club roll away

### FOR TECH UNION

## New Facilities Seen

Final plans and specifications for the expansion of the Tech Union Building are nearing completion and will probably be submitted to the Board of Directors for final approval at their meeting on August 20.

The new addition will join the west end of the existing building and continue to the west, two stories high, to within about 93 feet of Boston Ave.

The building will then reach south as a one story structure to within about 60 feet of the Music Building. The southern extension will have a width of 150 feet and will join the east wall of the south porch area on the existing building.

Including basement areas, the addition will provide approximately 50,000 sq. ft. of additional floor space with an overall total of nearly 80,000 sq. ft.

Seven multipurpose meeting-conference rooms to facilitate an estimated maximum total of 250 persons and another cafeteria capable of handling approximately

400 persons per hour will be available in the new addition.

A ballroom with a capacity of about 2,000 people for a dance or 750 at a banquet or conference will be situated in the south wing. This area may be used as one large unit or two individual units by extending a folding partition to divide the large enclosure. One of the two units will be larger than the other.

The ballroom may be opened with direct access to the cafeteria in order to handle any overflow of persons.

The new kitchen will be equipped with the most modern equipment available and will provide service to the cafeteria and banquet facilities. The kitchen has direct serving access to the ballroom (s), cafeteria and by elevator to the second floor meeting rooms.

A faculty area will be included at the south end of the addition and is adjacent to the ballroom (s) and gallery. The gallery and exhibit area will extend the

length of the ballroom on the east side of the southern extension.

This area will also be used as the ballroom(s) foyer and opens onto an outside foyer porch.

An additional newstand will be located at the entrance of the new cafeteria while the Ex-students Association offices will be situated in the northwest corner of the addition.

Taped music will be provided to all areas including additional lounge and book-browsing areas.

The lower lounge in the present building will be converted to the music and book browsing area.

... See PLANS, p. 2 ...

## German Prof. Employs Oral Teaching System

A distinguished German scholar is instructing Tech's German classes this summer.

Erich A. Albrecht from Sophie Newcomb College of Tulane University is a visiting professor to the department.

DR. ALBRECHT, who is a strong advocate of the oral method of teaching languages, is professor and head of German studies at Newcomb. He will employ his oral teaching methods in first and second year courses during the summer sessions here.

Albrecht visited Tech once before this year in November when he was the Schiller Bicentennial Lecturer in the Fine Arts Festival.

He is a frequent contributor of articles and books on the subject of German both here and in Europe. Recently he was honored by the International Institute of Arts and Letters for his work in the field.

As he instructs, the congenial, silver-haired professor amuses his

students with tales of his experiences in Germany and America and his witty comments. He came to America from Germany in 1932.

During World War II, Albrecht was a special consultant to the U. S. Secretary of War. As he puts it, "The Army was kind enough to ask me to join them."

Albrecht holds his Ph.D. degree from Johns Hopkins University.

# Proofreading Date Set For 59-60 La Ventana

by MARILYN VARDEMAN

Tuesday marks the beginning of the final step in the production of Texas Tech's 1959-60 La Ventana.

After the annual is proof-read for the last time, the presses at Economy Advertising Company in Iowa City, Iowa will roll, printing Tech's thirty-third yearbook.

LA VENTANA sponsor Phil Orman, the two co-editors, Donna Christopher and Marilyn Varde-man, and next year's associate editor, Johnny Wayne Woody will leave Tuesday for Iowa City for a four-day stay at Economy. Here they will give their final okay to the 556 page book.

Their work will consist of proofing some 8,000 inches of copy and matching this copy with more than 12,000 pictures. They will be assisted by Bill Bywater, La Ven-tana Account Executive and Roy Mercer, president of Economy. As they proof-read the book's con-tents, they will finish indexing the names and paste-up the final dum-mies.

This year's annual is the second attempt at the magazine format. It is modeled after last year's book, but is expected to surpass it in many ways. The separate divisions are contained in 12 books

fashioned after "Life," "Mademo-selle," "Playboy," "Future," "Sat-urday Evening Post," "Progressive Farmer," "Look," "Time," and "Sports Illustrated" magazines.

"SPORTS Illustrated," Made-moiselle," "Saturday Evening Post" (dubbed Tech's Hitchin' Post) and "Life" will have four-color covers. "Time's" cover will be in three-colors and the remain-ing books have two-color covers. The individual magazines will be contained in a modern-designed hard back cover.

OUTSTANDING features of the 1959-60 edition include a pic-ture story on the new Classroom and Office Building, a fold-out page on Miss Playmate, full-page pictures of Tech's top ten beauties, the dedication story on Dean Lew Jones, a short story written by a student author, and complete pic-torial coverage of the 1960 Rodeo, athletics and campus buildings.

The editors feel that the stu-dent body will be highly pleased with this year's annual. The staff has attempted to give fair repre-sentation to all organizations and students on campus. Outstanding photographic work is another highlight of the book. The photo-graphic staff was headed by Travis Harrell, summer editor of the TOREADOR.

MORE THAN 6,100 copies of the La Ventana have been ordered. Circulation date is scheduled for September 15, 1960. If you have ordered a book and will not be here to pick yours up, please come by the Journalism Building and make arrangements to have it mailed to you. Many extra cop-ies of individual magazines are being printed to be used for school publicity purposes.

As the door to the La Ventana office closes for the summer and the publication date comes near, anticipation is felt . . . what will the next La Ventana be like? This will be revealed to Techsians on September 15 when the 1959-60 edition of the La Ventana is ready for distribution.

A LARGE INCREASE  
... Plot sketch of new Union addition

# Plans Near Completion

Continued from p. 1

with the erection of east and north walls to eliminate the noise factor. Recessed built-in glass display areas and cork board bulletin space will be provided.

The present Anniversary Room, Ballroom and Ballroom lounge will remain unchanged.

Estimated time for construction is 18 to 24 months, with antici-pated construction beginning sometime during the fall semester.

Cost of the entire expansion program, including construction costs, equipment and furnishings is estimated at \$1,000,000. Adver-tising of bids is anticipated some-time this summer.

# Dr. Lee Attends Exam Conference

Dr. Sam Lee, who has directed Tech's advance standing exams in Chemistry, will attend a con-ference on such standing exams in all fields June 23-25 at the Uni-versity of Illinois in Urbana.

Entering freshmen who pass Tech's advanced-standing test in chemistry are allowed to skip the beginning course in chemistry and take any other course at Tech which they can apply to their training.

Dr. Lee also will attend a con-ference on teaching chemistry for non-majors, scheduled July 17-23 at Montana State in Boze-man.

# Texas Baptists Elect E. N. Jones for Post

Dr. E. N. Jones, former Tech president, has been elected secre-tary of the Christian Education Commission for the Baptist Gen-eral Convention of Texas.

Jones, who served as Tech president from 1952-1959, will as-sume the new post in September. At this time he will have com-pleted one year's service as dean of instruction at Midwestern Uni-versity, Wichita Falls.

In his new capacity, Jones will coordinate the institutional pro-grams of eight Texas Baptist col-leges and universities and one academy.

He will assist in outlining Bap-tist student union ministry to more than 45,000 Baptist college students in this state.

Jones held the post of Tech vice president during 1948-52. Positions previously held by Jones include president of Texas College of Arts and Industries, dean of university at Baylor University and dean of the Baylor College of Arts and Sciences.

# Retiring Couple Recall Happy Times

by DAHLIA BRAZELL

Memories of buffing 58,240,000 square feet of floor space and peeping up tons of dust during 10 years they have worked together will always stay with Ed Oden and Mrs. Lora Matthews, retiring Texas Tech custodians.

Both Oden and Mrs. Matthews began their duties in the Administration building in 1949.

Mrs. Matthews, 66, still remembers her school days in a one-room building when sweeping was done with straw brooms and black boards were cleaned with sheepskins—a big difference from today when equipment worth \$5,000 is used by custodians on the Tech staff.

"WE DIDN'T have too much money at first, but with equipment and help we have today we can lick any job we come in contact with," she says confidently.

Oden, who was made foreman in charge of the Ad building's custodial staff only 18 months after

beginning working there, takes pride in the difficult, but well done, task of keeping the 112,000 square feet of floor space in the building clean and in order.

Charles Libby, Tech supervisor and custodian, said that he had difficulty keeping up with Oden's orders because he would frequently check the building on Sundays and holidays.

"Sometimes," remembers Libby, "he even came around on his vacation. He never put in less than 10 hours on his regular working days."

"My heart and soul is in this building," Oden adds. "I know every crevice from the basement to the bell towers. When I felt something had been missed, I wanted to see about it."

His added diligence paid when some students who had been suspended from college decided to take their revenge on the Ad building early one Sunday a few years ago. Their weapon, a gallon of white paint, created havoc, said Oden. Checking the building about 1:30 Sunday afternoon, he discovered the white paint liberally applied to doors and walls.

About 15 janitors and 75 students volunteered their services to clean up the job. "By 5 p.m. the building was clean again and most of the faculty never knew what had happened," remembers Oden, his eyes sparkling.

**THE TWO LAUGH** when they remember the many tricks they've played on each other. A number of times, Oden jokingly told Mrs. Matthews that Libby, her supervisor, had sent instructions for her to work an hour or so overtime. Another time she is locked in the service closet and left in the dark while the water for mopping was running full blast.

"I decided to get back at him no matter what it cost," she recalls, laughing.

"He wore a nice new hat to work one day when he was going downtown and cash his check. I watched to see where he put it, then I told him that someone had called for a hat and had

taken one from a certain room. When I described the room where he had put his hat, he really ran down those stairs to see about it."

"Another time I told him a polishing machine that had been setting out in the hall wasn't anywhere around any more. He almost called it in as missing to Mr. Libby before I told him any different."

Mrs. Matthews, who writes poetry for her pleasure, has written a poem telling what her job has meant to her. Known as "Granny" to several faculty members and students, she intends to stay home and take care of her family after her retirement June 9.

"I'm just going to rest this summer," says 68 year-old Oden

whose retirement became effective a few days ago.

**FORMER** President E. N. Jones has written to Oden commending him on his long and valuable service to Tech. He also received a letter of commendation from M. L. Pennington, vice-president and comptroller of Tech.

When the two were transferred to the newly completed Class-

room and Office building, they were missed by the faculty in the Ad building as much as they missed their old working grounds.

Telling where to find Oden one day, Mrs. Matthews said, "He's gone home—you know, to the Ad building." Even after their retirement, the Administration building will probably seem like another home to them for a long time to come.

WAITING FOR THEIR LAST BUS  
... Ed Oden and Mrs. Lora Matthews retire from Tech custodial service.

## Henry Cited By ASAE

Kenneth Henry, senior from Muleshoe, has been named Tech's outstanding agricultural engineering student of 1960 and was awarded the first William F. Schwiesow Award.

Henry was selected as the student who has made the greatest contribution to the Tech Chapter of the American Society of Agricultural Engineers. He was chosen by secret ballot of the chapter.

In addition to receiving a personal plaque, Henry's name has been engraved on a wall plaque which will be in the Tech Agricultural Engineering Building.

This award is named in honor of Asst. Prof. Schwiesow, sponsor of Tech's chapter of the organization. The award is supported through contributions of chapter members and alumni.

# ★★★ Leaving Tech ★★★

by  
Mary Lora (Granny) Matthews

(Ed. Note: The following is a composition by Mrs. Lora Matthews which she presented to Charles F. Libby, director of building operations, when plans for her retirement from Tech's custodial department became definite.)

As most of you know, I am retiring from Tech — I must get out of the race.

The years have over-taken me; someone else must take my place.

I have worked with lots of people, made lots of friends that is true,

But the friendly family at Texas Tech is among the finest I ever knew.

Each one had a job to do from mopping the floor to washing wall,  
But each one had a smile and "Hello" when you met them  
in the hall.

We were always busy — this just had to be —  
Keeping our College clean, sanitary and dirt-free.

New hands fell right in, willing to learn all there was to do.  
Old hands helped them any way they could, knowing we  
once had to learn too.

Our boss, foreman, and secretary were never too busy to listen; they stood  
ready our battle to fight.

We all knew when they took over, everything would come out right.

We were proud of our College — we think the best to be found.  
Huge buildings over — the Campus looks like a little town.

The yard men worked the year around — trimmed trees, mowed grass — they do  
everything.

Set out trees and the flowers are just beautiful in the Spring.

If we had one penny every time we have climbed the stairs,  
Most of us would think we were millionaires!

Well, working at Tech and with all of you to me has been a big treat.

All of you come to see me; I live at 2116-Fifth Street.

MRS. LORA MATTHEWS  
... Recalls years at Tech.

## Professors Prepare Technical Articles

Dr. Wesley W. Wendlandt, professor of chemistry, and Dr. Russell S. Strandtmann, professor of biology, have been selected to prepare articles for the new McGraw-Hill "Encyclopedia of Science and Technology" to be published this fall in 15 volumes.

Dr. Wendlandt has written six articles concerning inorganic compounds including items on copper compounds, manganese compounds, chemical symbols and formulas, arsenic and antimony. Another article deals with carbon and its compounds.

His articles are based largely on experience gained in his years of research at State University of Iowa and research and teaching at Tech.

Wendlandt is now conducting basic research for the Air Force on the behavior of inorganic chemicals at high temperatures.

He is also engaged in a two-year study of thermal rearrangement of aquo-ammine chromium com-

plexes under a Robert A. Welch Foundation grant.

A native of La Crosse, Wis., he came to Tech in 1954. He received a B. S. degree in chemistry from Wisconsin State College. Wendlandt also holds a M.S. degree in inorganic chemistry and a Ph.D. degree in analytical and inorganic chemistry from the State University of Iowa.

**DR. WENDLANDT** was a resident research associate for the Argonne National Laboratory and is now director of National Cooperative Undergraduate Research project and an abstractor for chemical abstracts.

Wendlandt has published 65 scientific papers on various topics. He is a member of the American Chemical Society, Iowa Academy of Science, Texas Academy of Science and the Central Assn. of Science and Mathematics Teachers.

He also holds memberships in Sigma Xi, Phi Lambda Upsilon and Alpha Chi Sigma.

**DR. STRANDTMANN** has prepared a 450 word article on mesostigmatic mites based on his experience in 16 years of research at the Institute of Acarology,

University of Maryland, University of Texas Medical School and Texas Tech.

A native of Maxwell, Strandtmann holds a B.S. degree in biology from Southwest Texas State College, a M.S. degree in entomology from Texas A&M and a Ph.D. degree in entomology from Ohio State.

Strandtmann was a visiting lecturer at the Institute of Acarology at the University of Maryland for five summers. After acquiring post-graduate research experience at the Texas School of Medicine, he joined the Tech faculty in 1948.

As a recognized authority on medically important parasitic mites, Strandtmann is author of more than 30 articles on scientific subjects published in various journals.

He is a member of Phi Kappa Phi, national scholastic honorary and Sigma Xi, national research society.

Both professors were chosen by the encyclopedia staff to join its team of over 2,000 specialist engineers and scientists who, in the past two years, have prepared 7,200 articles covering the field of science and technology.

## Three Tech Grads Receive Fellowships

Three Tech graduate students have been awarded fellowships for the 1960-61 academic year, according to Dr. W. B. Gates, graduate dean.

Recipients are Carl Eugene Miller, Charles Leroy Kenner and Mrs. Betty Brooks Knowles. Miller received \$1,000 from

Lubbock Auto Co. to apply toward work on a doctorate in education. He holds a B.S. degree from Anderson College in Indiana and a M.A. from Eastern New Mexico University.

Miller began doctoral study at Tech last fall following two summers of graduate study at Sacramento State College in California. Kenner of Elk City, Okla., will receive an \$1,800 property deposit fellowship for work toward a Ph.D. degree in history.

He has been a teaching fellow in history at Tech and earned his B.A. degree from Panhandle A&M College. Kenner also holds a M.A. degree from Oklahoma State College.

Mrs. Knowles of Levelland will receive a \$1,000 property deposit fellowship for a master's degree in home economics. She is a 1952 honor graduate of Tech and has been teaching. Mrs. Knowles is major in clothing and Textile
