Texas Technological College, Lubbock, Friday, June 17, 1949

Number 57

**GOETHE COMMITTEE**—Left to right are Jack Wilson, chairman; Joan Tilley, Eloise Mensch, Carter Wheelock, publicity, and James Block, asst. director, as they make plans for Monday evening's celebration.

## TU German Prof Will Speak Here

Dr. Robert T. Clark, jr., professor of German at Texas university and president of the South Central Modern Language association will speak at Tech at 8:00 p.m. Monday, June 20, on "Goethe and the Twentieth Century."

Doctor Clark's speech is in connection with the foreign language department's celebration of the Bicentennial of the birthday of Johann Wolfgang von Goethe, famous German poet and scientist of the eighteenth century.

Doctor Clark received his B.A. and M.A. degrees at Vanderbilt university in 1928, and his Ph.D. at Stanford in 1932.

The research council of Texas university has granted Doctor Clark a leave of absence for the second semester of next year to complete his biography of J. G. Herder (1744-1803) friend of Goethe, historian, theologian, and philosopher.

The program is to be presided over by Dr. Charles B. Qualia, head of the foreign language department, who will introduce Doctor Clark as the principal speaker.

The Tech summer school band, under the direction of R. A. Dhossche and D. O. Wiley, will play the "Prelude to Faust" and the fifth act from "Faust" by Charles Gounod.

## Negro Minstrel To Appear On Recreation Program

By CHARLES H. SCHAFER  
Toreador Associate Editor

Huddie "Lead Belly" Ledbetter, whom life magazine has called the country's number one Negro minstrel, will be presented on the summer recreation program at 8 o'clock tonight on the Administration building green. He will be the second entertainer to appear on the program this summer.

No Negro singer has achieved Ledbetter's stature in the field of folk music. His is a voice of rare quality, violent and powerful, yet capable of delightful passages in which a natural sensitivity is at once apparent. This fact is exemplified by such records as "T. B. Blues."

Ledbetter accompanies himself with a twelve-stringed guitar. The songs he will sing here are songs of the people, their work, their love, their good times and their bad times. Work songs, spirituals, play party songs, blues, ballads, hollers and reels will all be on the bill of fare.

Few of life's experiences have been denied Ledbetter. His has been a wild life of women music, drinking, fighting, jail and the long hard row on the penal farm. He grew up in the rural south and has had his share of cotton picking. He has also worked in the oil fields as an expert rider as a result of his cowboy days in West Texas. In urban areas conviviality sometimes flares into violence. Trouble caught up with him and he found himself singing with the work gangs in

## AUGUST GRADUATES

August graduates should go to the bookstore for measurements for caps and gowns before July 21, Jack Noyes, class president, said Thursday.

Any student who thinks that he may have a chance to graduate should be measured, but in case he does not graduate he does not have to pay the required fee. This also includes those who are going to receive their masters degree, stated Noyes.

The Veterans Administration will pay the fee for veterans, Noyes said.

Last semester several students did not go by to order their cap and gown until almost graduation time. If it had not been for cancellations they could not have participated in the graduation exercises, the president said.

## PURSEL SELECTED ROTARIAN

James G. Allen, dean of men has announced that Dan Pursel, junior engineering student from Gladewater has been chosen as Junior Rotarian from Tech for the month of June.

All August candidates for graduation should check with their respective dean's office to see if they have met all the requirements for their degree.

## Ad Building Construction To Start Soon; Science, Music Hall Plans In Embryo Stage

A purchase contract on \$2,800,000 in bonds was awarded June 11 to Stife Nigalaus and associates of Chicago at a board of directors meeting in Fort Worth. The sale of the bonds will make possible the addition of two new wings to the Administration building and other improvements.

The Chicago firm's bid was low with an average net interest rate of 1.5965. Officials said that if all options provided for are exercised by directors the average net interest rate will be 1.45.

Preliminary plans for construction of the two Administration building wings are being drawn up by Wyatt Hedrick, Fort Worth architect. It is expected that construction will get underway by fall. The wings will cost an estimated \$700,000 and are expected to contain upwards of 16,000 square feet of floor space. The space will be utilized to accommodate college administrative offices and to provide additional classrooms and offices for the faculty. The business administration division is expected to occupy much of the building.

The remainder of the income from sale of the bonds will be used to erect two wings to the Engineering building and either a new Home Economics building or wings on the present Home Economics structure. The Engineering building wings will permit concentration of engineering work and release for other purposes space now allotted to engineering over the campus. Studies are also being made on details of a new pure science building which will provide classroom space for biology, geology and physics. It is also hoped that a new music building may be erected if funds are elastic enough.

The bonds are part of the \$4,000,000 building program recently approved by the directors. They will be retired by income from the College Building amendment voted by referendum in Texas two years ago. Under terms of the amendment Tech will be able to issue additional bonds in 10 years and more in 20 years.

Central Investment company of Dallas was employed by the board to arrange sale of the bonds. Bidding took place in the Hotel Texas. Present at the directors meeting were Charles C. Thompson, Colorado City, chairman; C. E. Weymouth, Amarillo; Mark McGee, Fort Worth; Kevin Spiller, Jackboro; O. B. Ratliff, Lubbock; A. C. (Pat) Mayse, Paris; Robert B. Price, El Paso; and Leon Ince,

## CALENDAR IS CHANGED

Dr. Jones, vice president and chairman of Dean's Council, stated that the college calendar in the summer catalog is changed as follows: Final exams for the second term for all students, including graduating seniors, will be held on August 24 and 25 instead of August 25 and 26 as originally scheduled.

ALLIE WHITE

## Summer Enrollment At All-Time High

Enrollment for the first summer semester has reached an all time high with the registration of 2832 students, Miss Evelyn Clewell, assistant registrar, has announced.

The registration of 434 graduate students, an increase of 167 over last year, boosted the total above the previous high of 2728 students who enrolled for the first summer semester last year.

Miss Clewell reported that there are 761 women and 2071 men enrolled with the arts and sciences division having the greatest number. Divisions in order of enrollment are arts and sciences, 915; engineering, 678; graduate, 434; business administration, 354; agriculture, 249; and home economics 172.

## Allie White Is Appointed Freshman Football Coach

Allie White, for the past three years line coach at Lehigh university and former Texas Christian university tackle, has been appointed freshman coach at Tech, the Tech Athletic council announced. He will begin his new duties July 1.

The new Tech coach, 34, is a native of Crosby. He was all-state tackle at Masonic Home, Fort Worth, in 1932, 1933, and 1934, and playing under "Rusty" Russell, now assistant coach at Southern Methodist.

White played tackle for Texas Christian from 1935 to 1938 on the same team with Davey O'Brien and Ki Aldrich, All-Americans. The 1938 team was untied and undefeated and upset Carnegie Tech in the Sugar Bowl, 15-7. In his senior year White was named all-conference and received the Grassy Hinton Trophy as the best all-around player of the Horned Frogs.

In the fall of 1939 he was a guard for the professional Philadelphia Eagles, moving the next fall to San Benito High school as head coach. In 1941 he returned to Fort Worth as line coach of North Side High school, a post he held until he was commissioned in the Navy in April, 1942. In service he played under Bear Wolf at Georgia Pre-Flight in 1942 and under Don Faurot with the Jacksonville Naval team in 1944. He also served as assistant coach at Jacksonville.

During the 1946, 1947 and 1948 seasons White was line coach at

See WHITE, Page 4

## Gordon Gaines, Baritone, Appears Tuesday Night As Tech Guest Artist

Gordon Gaines, baritone, will present a concert on the Tech college summer recreation program, 8:30 p.m., Tuesday night on the lawn of the Administration building.

The young baritone graduated from Tech in 1938 and attended the Eastman School of Music. He is a native of Lubbock.

During his career in New York, he has sung in concerts, oratorio, and has made repeated NBC-radio appearances.

Gaines has also appeared in several Broadway plays, including: *Lady in the Dark*, *Kleopatra*, and *Spring in Brazil*. While serving in the Army Air force, he was attached to the special service division, which produced *Winged Victory*.

During the past year the singer has done extensive work in television. For a 22-week period, he appeared in a series of telecasts sponsored by United States Rubber company over the N. C. television

a brief stay in Lubbock. Gaines will leave for Chattanooga, York, to appear in a series of operas produced by the Chattanooga Amphitheater Opera association. These operas will include: *Tales of Hoffman*, *Mignon*, *The Pirates*, *Barber of Seville* and probably *La Traviata*.

The singer will be accompanied Tuesday night by Rev. Charles E. Fike. Reverend Fike is a graduate of Tech; he also has a master of arts degree in music from Columbia university and Bachelor of divinity degree from Southern Methodist. He is pastor of the Stratford Methodist church.

The program includes: *Arm and the Brave*, Handel; *The Vagabonds*; *Skip to My Lou*, Wolfe; *Old Devil Moon*, Lane; *So In Love*, Porter; *Some Enchanted Evening*, Rodgers; *Hamerstein*, and *Esbon*, Lecuna.

HUDDIE LEDBETTER

## SPEAKING FRANKLY

By FRANKLIN GRANT

The official enrollment figures when issued this week make Rickcy Archer's feature in last week's Toreador seem just a trifle less timely. With a ratio of almost 4 to 1 in favor of the men on the campus we fail to see what Miss Archer and her friends have to cry in their beer about. Maybe the chicks

she was talking about just don't try hard enough. The Toreador staff has put up the Kleenex box and now look in sheer disgust at girls who want a date and can't get one, or so they say.

### They Also Laugh Who Only Sit And Watch

Francis Brockman, president of the 1948-49 senior class, related to us a story we felt worth passing on.

In the past only social clubs have been required to submit financial reports and these usually went to the dean of men. It seems, however, that the dean of women decided this year to have all campus organizations submit financial reports to her or she would refuse to recognize them the coming year.

This seems to us to be all right if she wishes to plod through all of these figures, but the odd part of the story is that she sent a letter requesting a financial report from the senior class. Since they had no report and very little finances Brockman just ignored it. Later he got a call telling him to bring it in. He then went by the dean's office and one of her very capable assistants told him that she didn't think it would be necessary to submit one. Brockman went on back to the dorm and forgot it until the next day when another of the dean's assistants called him and told him that he would still have to submit the report. The assistant was rather hard and threatened, if he did not, that the dean would refuse to recognize the senior class next year.

Well, Brockman did not send in the financial report and we are just sitting here waiting to see how the dean will go about refusing to recognize the senior class next year. Must be a tough job for

a dean to figure out all of these problems.

### Football Players

Several of the football players who are here this summer moved bunks into the dressing room of the stadium and are living there. Marshall Gettys says it has all the conveniences of home that is, except the home cooked food.

### The Campus Grass

Tech's new landscape artist, ELO J. Urbanovsky, can be complimented for the fresh grass that is being put out around the campus. Guess the rains helped his cause. The grass in front of empty Sneed and West halls has grown to a considerable size. Also the wooden walks around the X buildings and the one leading from the sidewalk in front of West to the circle drive is much help in this mucky season. We wonder, however, just where cars are going to park since some of the parking lots are being planted with grass. Maybe the college should conduct a campaign to encourage students to walk from their dormitories instead of driving the block to class. The streets around the Journalism, Engineering, and X-buildings are overcrowded these days.

### Friends Dropped In

Clint Formby, Student Council president last year, dropped by the office and visited awhile. He starts work Monday on a radio station over at Hereford.

Raymond Brigham, next year's Student Council business manager, came by Sunday to get a copy of the Toreador. He's trying his hand at farming this summer, but wanted the paper so that he would be up on the latest dope when the flock starts gathering in the fall.

Received a letter from Orin Brewer, last year's editor. He is lending his talents to a newspaper in Roswell, New Mexico.

### How About Dropping Us A Line

Several letters to the editor have been received and a column for these will be started shortly. How about giving us your opinion on the current news, late news, or just news if you have any. All letters that are signed will be printed but if so requested the name will not be used.

## Museum To Be Second Tallest Building; Holden Sheds Light On Brick Windows

By RONALD JANSEN  
Toreador Staff Writer

So you, too, have been wondering what "goes" with this strange new animal called the Museum which is slowly taking shape on our campus?

As you walk by, you are startled to note that window spaces which the intelligent student naturally assumes will be filled with glass of one type or another are instead being partly filled with brick.

Perhaps you have even been led to meditate deeply and darkly upon the way the Tech "higher-ups" handle things in general—maybe thinking modestly to yourself:

"Now if I were doing this—"

But, my friend, there is a reason for nearly everything as the over-curious reporter discovered when he could stand the suspense no longer and ran screaming to Dr. W. C. Holden, curator of the museum. Doctor Holden tried to pacify the harassed student and revealed to him the whys and wherefores of this building-to-be. So here are the results of this mysterious interview.

F. Y. I. (which translates literally—for your information) the combination brick and glass windows are according to Doctor Holden, the architect's idea, and are to create the illusion of full-sized windows.

To explain more fully, galleries will run along each wing of the two floors. The galleries must be dust-proof and the brick-glass must be eight feet above the floor in order that the light may filter into the room at a certain angle.

So to maintain symmetry the architect designed all windows on each floor at the same level, is partially filling the gallery windows with brick, and sealing them with brick-glass to keep the proverbial dust out.

Another subject of idle curiosity is the large domed rotunda which will form the entrance hall. The rotunda, when completed, will rise the full height of the building, and the walls and ceiling will be decorated with murals.

**Native Texan Will Be Assistant**

Katherine Bridges, assistant librarian, has been added to the library staff. Miss Bridges comes to Tech from San Diego, California, and has been employed at that city's library system of that city a native Texan, born in Lubbock, and is "glad to be home again."

The librarian received her degree at Texas university spent two years doing work in the library school in Lubbock, Texas, and has previously served in Lubbock, Austin, Orleans and New York City.

Miss Bridges joined the San Diego Public Library system in 1946, and was eventually promoted to the position of children's librarian of the East San Diego of the system.

See her a short vacation in San Diego in 1947 when she was school librarian at San Diego Junior High school in during the spring term.

## Native Texan Added To Library Staff; Will Be Assistant Reference Librarian

Katherine Bridges, assistant reference librarian, has recently been added to the library staff. Miss Bridges comes to Tech from San Diego, California, where she has been employed with the public library system of that city. She is a native Texan, born in Amarillo, and is "glad to be home in Texas again."

The librarian received her B. A. degree at Texas university and spent two years doing graduate work in the library school at Louisiana State college. She has previously served with libraries in Hillsboro, Austin, New Orleans and New York City.

Miss Bridges joined the staff of the San Diego Public library in 1943, and was eventually appointed to the position of children's librarian of the East San Diego branch of the system.

She took a short vacation from San Diego in 1947 when she served as school librarian at Sam Houston Junior High school in Amarillo during the spring term.

"I have always been interested in books and public library work," said Miss Bridges. She began her career while still attending school in Amarillo by serving an apprenticeship as a part-time page or student assistant, in the Amarillo Public Library.

The Tech Library is very extensive," Miss Bridges believes," and compares favorably with college libraries in other large schools. It is a credit to this section of the country."

### New La Ventana Secretary Hired

Paula Sittel, senior journalism major, is employed as secretary of the La Ventana for the summer, states R. A. Mills, faculty sponsor of the La Ventana. She will help distribute the annuals.

Students who wish to get the '49 La Ventana will find Miss Sittel in the La Ventana office, room 209 in the journalism building. She will be in the office daily from 10:30 a.m. to 12 o'clock noon and from 2 to 3:30 p.m. except Saturday afternoon.

## Charles Reynolds Signs With Rams

Ranks of Tech football players in professional football have moved to eight with the signing of Charles Reynolds to a Los Angeles Rams contract.

Reynolds, engineering graduate in the spring, was leading Raider scorer the past two seasons and for three years was Border conference sprint champion in track. He is a graduate of Denver City High school and lists Odessa as his home since his parents moved there.

Five former Tech footballers are with the Green Bay Packers. They include Walter Schlinkman, Dumas, fullback; Ralph Earhart, Le-fors, and Glenn Lewis. Quitsaque, halfbacks; Bill Kelley, Idalou, end; and Bob Flowers, Plainview, tackle.

Tuffy Nabors, Lubbock, is a center for the New York Yankees, and Bernie Winkler, Temple, is a Los Angeles Dons tackle.

The Tech pros will report to their teams late in July or early in August. Reynolds, Schlinkman, Lewis, Kelley, Nabors and Winkler will get in shape on the field of Jones stadium.

## Andrews Will Be In Football Book

John Andrews, left tackle from Amarillo, has been chosen by the Dell Publishing Company to appear in its Dell Football Book. They are running a sketch of his career and some action shots.

Andrews, a 185 pound senior, who is greatly noted for his defensive work, his bruising offensive blocking and general all-around play, was chosen as Raider of the Week last season.

He is a 1943 graduate of Amarillo High school and served three years in the navy, 20 months of which were in the Pacific theatre. During the 1948-49 football season Andrews was credited with

## Campus Softball Diamond Will Be Constructed Soon

Work will be started on the new campus softball diamond within the near future, college officials have announced.

The field will result from the parting gift of Tech's 1949 graduating class which left a check to the college for over \$1,000.

The softball diamond will enable night softball games to be played

having blocked three punts, one of which went for a safety and one of which he returned for 16 yards. He also blocked three conversion attempts.

In the Dell Football Book, Andrews, an engineering student, will be listed on an all-sectional team on a future basis. "Andrews is the most improved player on the Tech football team this past year," Clark Schooley, athletic publicity director, said.

on the campus starting in the fall. "This is something we have needed badly," Director O. B. Ratliff, Lubbock, told Francis Bookman, Carlisad N. M., 1949-50 class president, in accepting the gift. "The presentation of a class gift is an old custom on the campus."

### VELMA CUMMINGS CROWNED

Velma Cummins, 1949 La Ventana beauty, was crowned Miss Southwest of 1949 at the All-Southwest Bathing Beauty Revue, held in connection with the annual Fort Stockton Carnival last week. She will receive a trip to Hollywood, as a gift of the Fort Stockton Lions club.

## alschuler's POTPOURRI

Quotation from a Tech co-ed: "I had a positively wonderful time last night—and this morning he called up to apologize."

### INEBRIATE

He drank from her slipper. His toes turned toward Heaven.

### Original Graziani Mural On Exhibit

The department of architecture has on exhibit until Wednesday, the original design of a mural by Sante Graziani which was picked from over 100 entries to be painted at the Museum of Fine Arts in Springfield, Massachusetts. The mural is a fanciful allegory of the museum's place in the community and will be unveiled at the museum October 5.

Also on display are the artist's final design after certain changes had been made, a full scale detail drawing from the original design submitted to the museum competition, and a detail of a mural in the making by Graziani.

### Forty Eight Students Instructed In Different Lubbock Schools

"Forty eight students are taking advantage of the student teaching course offered this summer," stated Donald McDonald, assistant professor of education.

Students taking this course are teaching in different schools throughout Lubbock. The elementary grades are directed by McDonald who has 22 students and the high school grades by James Thomas Shaver, associate professor of education.

The student teachers are under direct supervision of a regular teacher and are observed by McDonald and Shaver.

Many of these are experienced teachers, but must take this course to get the desired certificate. The student must be of junior standing and must have 18 hours of education.

### White—

Lehigh in Bethlehem, Pa., assisting Bill Leckonby, who quarterbacked the Jacksonville Naval team.

Coach White is characterized by L. R. "Dutch" Meyer of Texas Christian as "A fine tackle, a swell fellow and a hard-working and efficient coach." White is married.

## Complete Pump Unit Bestowed On Petroleum Engineering Department

The petroleum engineering department was the recipient this week of a complete pumping unit, donated by the Continental Supply company and the Enisco Derrick and Equipment company. This was the same equipment displayed by these companies at last spring's Engineer's Show.

William L. Ducker, head of the department of petroleum engineering, estimates the value of this equipment at approximately \$4500, and says that as soon as the area to the north of the departmental building is graded, the equipment will be erected.

The pumping unit is ultimately to be set up over a test well of from 1600 to 2000 feet deep, which he hopes to have drilled by next spring, reported Ducker.

The test well, will not be a formation well, but an "underground vessel" or a cased hole that is plugged at the bottom. After the well is cased, cement will be pumped

through the casing to form a cement wall around the casing to prevent one formation from contaminating any other formation. Petroleum engineering students will be observers during this operation so as to familiarize themselves with the cementing process.

The test well will serve a multitude of uses: to rig for various pumping problems, to run bottom hole pressures and well logging methods, to take bottom hole temperature bombs under pressure by filling the well with compressed air or compressed gas. All auxiliary equipment for these operation is on hand with the exception of well logging equipment which is expected before the well is ready for operation.

Ducker emphasized that the well is not for pumping subsurface fluids, and added that any liquid that is pumped from the well will have been introduced into the well from the surface.

### Infirmiry Uses New Drug With Successful Results

A new drug, aureomycin, has been used recently for the first time at the campus Infirmiry, Dr. Embree R. Rose said Wednesday.

The drug was used with very successful results to combat a case of primary atypical pneumonia after penicillin and sulphas had failed to improve the patient's condition.

Clinic hours are from 8 a.m. to 12 noon and from 1 p.m. to 5 p.m. Monday through Friday and from 8 a.m. to 12 noon Saturday. The doctor will be on duty only during these hours but there is a registered nurse on duty at all times day and night, Doctor Rose said.

### WIGGINS LEAVES SUNDAY

President Wiggins will leave Sunday for Kansas City, Chicago, and New York for ten days. The purpose is to interview teachers to fill the college staff and a possible successor to Miss Craddock.

### Women Students Available As Part-Time Employees

Miss June Hanson, assistant to dean of women, has announced that women students are available for part-time jobs such as typing, baby-sitting, and sewing.

Information may be obtained by contacting Miss Hanson at the office of the dean of women, Ad-107.

### Summer Hours Announced On New Library Schedule

New library hours for the Summer session will be 7:30 a.m. to 9:30 p.m. Mondays through Fridays, and 7:30 a.m. to 4:30 p.m. on Saturdays, Miss Lulu Stine, acting librarian, has announced.

The Library will be closed on Sundays.

Miss Geraldine Clewell, associate professor of home economics education, is working toward a Ph.D. degree at Ohio State university this summer.

### HEMMLE VISITS CAMPUS

Gene L. Hemmle, newly appointed head of the music department, visited the campus Monday.

Hemmle has been a professor of music and chairman of the music department at Texas Western college since 1946. He has a master of arts degree from Columbia.

The music department head will assume his new duties in September.
