Texas Technological College, Lubbock, Saturday, September 17, 1949

Number 1

DR. D. M. WIGGINS  
President

## Many Improvements Seen In Wiggins's First Year At Tech

With the opening of classes today, Dr. D. M. Wiggins will begin his second year as president of Texas Technological college. Looking back over the first 12 months of his administration, the progress which has been made is—to say the least—astounding.

Doctor Wiggins, who came to Tech from Texas Western college Sept. 1, 1948, has in one year set a pace which clearly indicates that he has grasped the full meaning and needs of not only the college but also the city and area in general.

One of the outstanding features of his first year is the large building program which is underway. Within a short time workmen will begin construction of two wings extending 130 feet south of the Administration building at a cost of approximately \$750,000. Later two wings will be added to the Engineering building; a Home Economics building will be constructed, and within a year a Science and Music hall will be added to the campus.

At the present time workmen are busy in the interior of several buildings renovating, repairing and repainting. Perhaps one of the most startling changes has taken place on the campus itself.

### Landscape Work

Under the direction of the new landscape director, Elie Urbanovsky, grass has been planted in many of the bare areas and trees and other shrubs have been set out and are beginning to beautify the campus. Paving of parking lots has also done much to help the appearance of Tech.

Strengthening the faculty, reshuffling of the whole concept of responsibility back to department heads and others in executive positions has also been one of the outstanding features introduced by Doctor Wiggins.

"Good administration rests with having good men doing key jobs and the big thing is to surround yourself with people who can do good jobs," Doctor Wiggins said. "I've been very fortunate in having men like Dr. E. N. Jones, vice

president; Frank Junell, Marshall Pennington and others to join me in the administrative task ahead," he added.

### New Teachers

Thirty-nine new faculty members have been employed for the fall semester. Of the additions two are in Agriculture, 16 in Arts and Sciences, two in Business Administration, 17 in Engineering and two in Home Economics. The faculty at Tech numbers 336 in all. There are 82 professors, 67 assistant professors, 110 instructors, 50 associate professors and 27 teaching fellows.

Doctor Wiggins is stressing public relations with schools of this area and extension of college good will into the ranks of industry, business, agriculture, engineering and geology.

"I think one of the greatest things about Texas Tech is the relationship of the college to the students," Doctor Wiggins said. "I have never known an institution where students have assumed responsibility."

See WIGGINS Page 2

## Board Considers Construction Bids

The Tech Board of Directors will hold a special meeting in San Antonio next Saturday prior to the Tech-Texas A&M football game to consider bids on the wings to the Administration building.

Approval of plans for the wings, which will be added to the south side of the building was given by the board in its last meeting here Aug. 13. They will cost an approximate \$750,000 to construct and will be of the same type Spanish Renaissance architecture as the Administration building.

Original plans for the administration building call for the wings but they have never been built. Also included in the original plan was the addition of a south wing of the building which would join with the east and west wings to form a quadrangle but it is doubtful whether the south wing will ever be added.

## Slight Decrease In Enrollment Expected; Over 5,400 Obtain Permits To Register

By TOMMIE DANIEL  
Toreador Staff Writer

### Student Council Approves Texas Aggie Game As Official Away From Home Trip

The Student Council has approved the Tech-Texas A&M football game in San Antonio next Saturday as the official out-of-town trip for this year according to an announcement made Thursday by Curtis Sterling, student body president.

Sterling said this would be the only away from home game this year which students would be excused from classes to attend.

Arrangements have been made with the Texas, New Mexico and Oklahoma. Bus company whereby special buses may be chartered for the trip.

To be eligible for the trip Sterling said student organizations must have a sponsor and must submit a list of those students attending prior to leaving. Tickets will cost \$8.75 per person round trip but the buses must be filled before this rate becomes available.

Sterling went on to say those students who are on either scholastic or disciplinary probation could not be granted excused absence for the trip.

When student organizations have drawn up the lists of names of students who plan to attend along with the name of their sponsor they should be turned in to the Dean of Men or Women.

Tickets are on sale now in the ticket office under the east stands of Jones Stadium and Morley Jennings, athletic director, has announced they must be picked up before Thursday evening.

He said choice seats were available to Tech students but could not be held here later than Thursday because all unsold tickets must be returned to San Antonio Friday morning. Admission for students will be \$1.20 with a student activity ticket.

Present plans call for the Tech band and the Saddle Tramps to make the trip. The cheer leaders will also be on hand Sterling said. There will be a large pep rally and parade Saturday morning in downtown San Antonio. Plans for the pep rally have not been completed as yet but will be announced later.

### ACS Will Meet Wednesday

The first meeting of the American Chemistry Society will be held in the chemistry building room CG at 7:00 p.m. stated Warner Petcolas, president.

Dr. Watson, professor of chemistry will give the purpose and aims of the organization, Petcolas said. Petcolas said that freshmen and sophomores who were majoring in chemistry or chemical engineering are particularly invited and that coffee and donuts will be served as refreshments.

## Discussion Of Teaching Opportunities Set For First FTA Meeting Thursday

Mrs. Jean Jenkins, executive secretary of the Placement service, will discuss "Teaching Opportunities" when the Paul W. Horn chapter of Future Teachers of America meets at 7 p.m. Thursday in the Extension building.

Program for the meeting is to include planning of the organization's work for the school year, said Bill Trenfield, president. High on the calendar of the club's future activities is attendance at the FTA state convention in Denton in the spring.

Any student planning to teach is eligible to join the club and attend the Thursday meeting, the first such this semester, said Trenfield.

Founded 12 years ago, the organization stresses these purposes:

1. To interest the most capable

in the week at the Student Council office.

One of the highlights of the San Antonio trip will be a speech by Gov. Allan Shivers at the annual ex-student luncheon which will be held in the St. Anthony hotel at noon Saturday. A suite of rooms in the Gunter hotel has been designated as the site of an exes party which will be held Friday night and Saturday.

## Former Techsan To Be Presented Annual Ex Award

The executive board of the Texas Tech Ex-Student association voted to give an award each year to an outstanding ex-student of the college in a recent meeting held on the campus.

The group set aside 3 p.m. Oct. 14 as the day for a meeting of the association council. That will be the day before Homecoming.

Board members also appointed a committee to nominate two people for each office of the Ex-Students association and discussed plans for Homecoming this year.

Guy Carter, Wayne Sellers and Chick McElroy compose the committee to plan the mechanics for presentation of the outstanding student award and they will report to the group when they meet in October.

Board members voted that D. M. McElroy, executive secretary, should have charge of all Homecoming arrangements. The annual Homecoming game this year will be with Baylor university in Jones stadium on Oct. 15.

Plans were also discussed for improving the association's official publication by use of more funds for art work. A discussion of redistricting of Texas, which is now divided according to senatorial districts, was tabled until the October meeting.

Attending the meeting were Hurlay Carpenter, Lubbock; E. A. McCullough, Midland; Wayne Sellers, Fort Worth; Fred Rollins, El Paso; George Langford, Lubbock; McElroy, Dallas and McElroy, Lubbock.

Miss Panze Butler, 1947 Tech graduate, is supervisor of music in Coleman schools. She received her master's degree in music from the University of Texas in January.

Registration for the fall semester opened officially Thursday and it found many upperclassmen renewing acquaintances neglected during the summer months and hundreds of bewildered freshmen roaming the halls in search of ever-needed information.

A total of 5,442 permits to register had been issued late Thursday according to the registrar's office. A large number of transfer students and approximately 1,100 entering freshmen should swell the enrollment over the expected mark of 5,800 students.

Of the above amount 1,800 were veterans. Coordinator H. A. Anderson said besides the 1,800 ex-G.I.'s there were also 75 ex-service men and women who were taking advantage of the Hazelwood act for the first time this year.

The Hazelwood act is a state law which allows veterans of either World War to enter a state school tuition free. The veteran must be a citizen of this state. Anderson said the increase of students taking advantage of the state law was largely due to the fact that many of them have completed their allotted time under the Federal G. I. Bill.

### Dorms Filled

Dormitories have been filled to capacity with the exception of the second floor Drane hall which has been reserved for married couples. A waiting list for the other dorms has been started for the benefit of students living in town who wish to move to the dorm as soon as possible.

The familiar long lines greeted students registering Thursday and Friday. For the first time in several years, this fall only two days were allotted for registration. Freshmen and seniors scheduled classes Thursday while sophomores and junior signed up Friday. Classes started this morning at 8 a.m.

The freshman counseling program began Monday afternoon in the gym with all entering students required to take entrance exams. Further instruction and aid was given to new students throughout the week which was highlighted by a reception in the president's home Tuesday evening for all new students.

### Freshmen Meet

Wednesday night the Freshman men and women students held separate meetings in the recreation hall and gym. Dean of Women Margarette Walker and Dean of Men James G. Allen addressed the two groups.

All of the divisions, with the exception of the graduate division, are expecting a slight drop in enrollment when the final figures are determined. Approximately 250 graduate students have asked for permission to register this year where only 176 students were enrolled in that division last fall.

Three additional parking areas are now open on the campus, according to Frank Junell, assistant to the president. Junell said the new lots, which are located west of the Engineering building, north of Men's Dorm three and four and west of West hall, brought the number of all weather parking lots on the campus to five.

Curtis Sterling, student body president, was in charge of the freshmen boys meeting Wednesday night and it was in the form of a panel discussion. College life was discussed by student leaders and Tech officials.

The last official day for registration will be Thursday with all students registering after Monday required to pay a late registration fee.

### COUNCIL MEETING

The Student Council will hold its first meeting of the fall semester Monday at 7 p.m. in Ad 216 according to Curtis Sterling, president of the student body. Sterling urged all members of the Council to be on hand for this first meeting because there will be a large amount of business on hand which will require all of the members to be present.

# Opening Of New School Year Finds Tech's Outlook Bright

Once again it is time to forget the memories of another summer and turn again to the books. Although much complaining and groaning is heard around the campus about this time every year most people are glad to be back whether they will admit it or not.

And then there are the new students who are still bewildered and wondering what it is all about. To both groups both old and new—welcome back! All and all, with every one working for the school, this will be a good year here at Tech.

In fact it could and should be one of the biggest and best in the school's history. The administration has had a year now to acquaint itself with the goings-on around the campus and already many noticeable changes are evident.

Look around you, freshmen (and you too, upperclassmen), because all this green grass you see around the campus was not here last year. Nor did we who were here a year ago dream that at long last our museum would come out from "underground" and finally be a beautiful building of which we can be proud.

With the start of classes today Tech will enter its final year on the first quarter century of its short life. If past records are any indication the next 25 years should witness the rise of such a college as has never been seen before in the history of this state.

We who are able to be enrolled here at Tech in this sort of anniversary year should be proud of our school's past and hopeful for its future. While our so-called sister state schools have more or less already reached their peak and leveled off, we are still young and growing.

College officials all over the state have predicted a drop in enrollment this year due to several factors, but early indications from the registrar's office here show that Tech may hold its own. There will probably be no gain in enrollment, but there should be no great drop.

This in itself is proof that our outlook for the coming year is good. A college is as strong as its Freshman class. When first year enrollment shows a sharp decline, it can only mean that the future is none too bright. It is these same Freshmen who will be the upperclassmen of tomorrow. And it is to tomorrow that Tech must look.

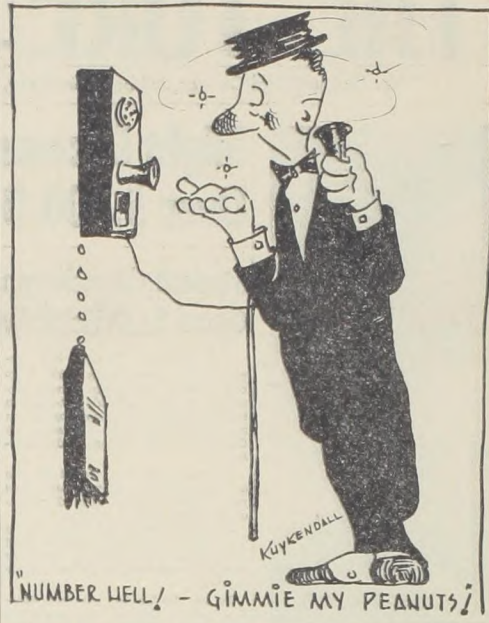

It is fine to have an impressive record as we have here but on the other hand we must not rest on our laurels. When one student or one faculty member ceases to work for the continued betterment of our school, then the school will weaken. It is a job for each and everyone of us to see that Tech is not only in front now but that it stays there.

The advancement made by President Wiggins and his administration is not measured only by the tangible proof which we see as we look around us. It is also measured by the hundreds of hours which have been put in spreading good will not only on the South Plains but all over the state and nation.

A quick look at the new year coming up shows that every effort has been made to aid the student. The faculty, with an increase of 40 new teachers, is larger than it has ever been. New courses have been opened in almost every division.

All of these and many other factors are ample evidence that the 1949-50 school year should be a red letter one in the history of the school. We who are privileged to be here should bear in mind we too have a stake in making this a big year.

So to all you upperclassmen, welcome back and may this be the best year you have ever spent at Tech. To you freshmen, a special welcome. We are glad to have you here. Just remember that a friendly smile and a big "howdy" will go a long way in helping you get started in your new surroundings.

## Thinking Allowed

by JERRY HALL

First of all we want to say this is supposed to be a column but as such it is purely tentative. Searching around for a name and also for an idea to fill some space we ran across the column written by Lynn Landrum in "The Dallas News" and not wishing to duplicate too much changed the spelling just a little and came up with the above title. So much for that. As to whether this column will be in this same place each week or not time only will tell.

We ran across head boy cheer leader Jimmy Carter during registration and after the usual hellos Jimmy advanced the idea of running some of the more well known football yells for the benefit of not only all the newcomers to the campus but the old hands as well. In the upper right hand corner of this page are a few of those same yells. Clip them and learn them so you can yell louder than your roommate at the next pep rally.

While we are on the subject of pep rallies the one held in the gym Thursday night sending the Raiders off to Austin was a dilly. There was a good turn out and the walls of the old barn fairly rang with noise. Sounds mighty good to hear such doings again. King football is really perched on his throne and the year is officially begun when the Raiders receive such support as they did Thursday. Let's all turn out again and help send them to San Antonio next week.

Elsewhere in this first paper there is a story to the effect that the Student Council has set the Texas Aggie game as the official out of town trip this year. This is one game which Coach Dell Morgans' boys 'bid fair to win so everyone who is able should try to make the trip. With the generous aid of Hurley Carpenter, president of the Tech Ex-Students association and manager of the TNM&O bus lines a very reasonable rate has been worked out for groups wishing to make the trip. Think about it and if you can make it, go on down and support the team. Oh yes, the TUU game this Saturday will be broadcast straight from Austin sponsored by the Humble Oil company. Veteran sportscaster Kern Tipps will do the play by play. Radio station KFYO will carry the game.

In closing this column would like to invite letters from you readers (providing there are any) on any subject which you would care to discuss. Only one condition goes with the invitation. That is that all letters which are to be published must be signed with the full name and address of the sender.

## Fall Howdy Dance Slated For Tonite

The annual fall Howdy dance sponsored this year by the Double T association will be held tonight in the Tech gym from 9 until 12 p.m., according to Dan Pursel, vice president of the association. Tickets are on sale in the rotunda of the Administration building, or they may be purchased at the door tonight. Admission will be \$1.20 stag or drag. Burl Hubbard's orchestra will play for the affair.

Soft drinks will be on sale during the dance. Pursel said everyone was urged to be on hand and help start the fall term off in a big way.

## Wiggins--

(Continued from page 1) responsibility as they do here at Tech. One of the highest tributes a school can receive is the manner in which its students accept the drive and responsibility which is theirs. So as Doctor Wiggins starts his second official year here at Tech he already has built a record of which he can justly be proud. With such able administrators as Doctor Wiggins and his staff, Texas Tech can look forward to a great future.

er. Any gripe, suggestion or other subject which you want to shoot the breeze about will be welcome. We don't guarantee we will print it but we will try to accommodate every letter we receive.

## Tech Tangles With Cherry's Longhorns In Austin Today

The Texas Tech Red Raiders fresh from their 20-0 win over ACC, journey to Austin today to take on the tough and rugged Texas Longhorns of Coach Blair Cherry.

The Longhorns, untested and not rated too high in the Southwest conference by most sports writers will nevertheless rule as 14 points favorites over the strong red clad Raiders of Coach Dell Morgan.

In 1945 Coach Dana Bible of Texas used 55 Longhorns to run up his 33-0 score, 26 points coming in the final quarter. In 1947 Coach Blair Cherry tossed in 43 reserves to get the same score. Both games were played beneath a hot sun and with temperatures very high. Today Coach Morgan is hoping for the cool spell that has prevailed for the last few days to continue and aid his boys from the plains country.

Though not given much of a chance in their own conference, due to the strength of the other teams, Texas still is strong enough in returning veterans from last year Orange Bowl victors to make it interesting for any team in the conference and especially so for Texas Tech.

Back for the Longhorns are such men as Paul Campbell and Bobby Coy Lee at quarterback, Billy Pyle, Randall Clay, Bubba Shands, and Perry Samuels are some fleet-footed backs that any team in the nation would be proud to have on its roster. And back at fullback will be Ray Borneman, All-Southwest conference of last year, but who might miss the game because of an injury. Also on hand will be sophomore Byron Townsend.

Such linemen as Ben Proctor, Ray Stone, Bud McFadin, Danny Wolfe and Dick Rowan will anchor

## Thursday Deadline Set For Securing Tickets

Tickets for the Tech-Texas A&M football game next Saturday night in San Antonio must be picked up in the stadium office by 6 p.m. Thursday, Morley Jennings, athletic director, has announced.

Jennings said sufficient tickets to care for the demand are available, but all unsold ducats must be returned to San Antonio early Friday morning. Students with activity books will be charged \$1.20 per seat, with the admission for non-students set at \$3.60.

the Longhorn forward wall.

Coach Morgan will be taking one of the largest traveling squads in history to Austin in an effort to find the right combination to stop the Longhorns. Expected to start for the Raiders will be: Ends—Luke Thompson and Elbert Johnson; Tackles Marshall Gettys and Jerrell Price; Guards Don Williams and Dan Pursel; Center Bobby Williams; Quarterback Ernest Hawkins; Halfbacks Cal Steveson and Tim Hatch; and Fullback Bud Conley.

## Cabaret Party Heads Year-Long Series Of WRA Social, Athletic Activities

A series of entertainments planned by the Women's Recreation association for the school year will begin Sept. 26 when freshmen and transfer women students are honored with a cabaret party.

The party, to begin at 7 p.m. in the gymnasium, will also herald the start of the WRA-sponsored daily schedule of athletic events for women students.

A program of games and movies has been planned for the party, and refreshments are to be served, Betty Jay, WRA president, said yesterday.

Simultaneous with Miss Jay's announcement of the cabaret social was her release of the list of dances and sport contests which are to begin Sept. 27 under WRA supervision.

The schedule is as follows: Mondays—bowling, 4-6 p.m., Plamor Lanes, 1011 Fourteenth; Monday nights—modern dancing, 7 p.m., at a place to be announced; Tuesdays—tennis, 5-6 p.m., Tech courts;

Wednesdays—All-College dance, 7-8:15 p.m., gymnasium;

Fridays—volleyball and basketball, 4-6 p.m., gymnasium.

Other WRA activities slated for the school year are an All-College dance in October, a fall breakfast, a Christmas party, a spring banquet, the annual Play Day and a square dancing school, Miss Jay said.

First regular meeting of the association will be at 5 p.m. Monday in Ad-220.

"It is imperative that every member be present at this meeting for an election to fill vacancies created when two officers did not return to Tech this semester," she said.

Every woman student automatically becomes a member of WRA when she enrolls at Tech.

"We invite all women students to participate in the association's activities. They will not only receive pleasure from taking part in these programs, but they also will be supporting college-wide events," said Miss Jay.

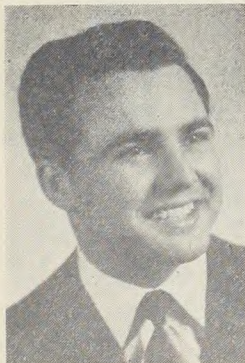

## NEW "ALL-COLLEGE" STORE FOR MEN

Since Tech let out this spring, a new men's store has been opened in Lubbock by a *Tech graduate*, JOHNNY MALOUF. The store is brand new and so is the stock—new and the very latest. It's just what is needed for a Technan to buy all of—or add the finishing touches to—his college wardrobe.

Come on down and look the store over. We've always got time to stop and talk about sports, the weather, or WOMEN.

Remember—it's not just a young men's department in an old store, it's a *young store for young men!*

### Henderson Stops Jeep O'Neal In Fifth

Tuesday night at Sled Allen's Arena, Bill Henderson, Tech's young Agriculture student from Levelland, punched his way to a fifth round KO over the very highly regarded lightweight from Oklahoma City, Jeep O'Neal.

Early in the fight it became evident that Henderson intended to waste no time about getting down to business. Appearing almost disdainful of O'Neal's press clippings, Henderson forced the fighting and took the play away from O'Neal in the first round with some nice left hooks to the head. O'Neal was showing a flashy left jab, and some very nice footwork.

In the second and third rounds Henderson kept trying to cut his man down with a sustained body attack mixed with a punishing attack to the head.

Early in the fourth round after missing a right hand shot to the body, Henderson brought up a short powerful left hook to O'Neal's jaw, which dropped the Oklahoma City boy for a nine count. O'Neal, game as they make them, came up at the count of seven, but he was groggy and it was only a matter of time until Henderson sent him down again with a flurry of punches. The end came suddenly in the fifth from a series of lefts and rights to the head and body.

Seth Murphy, 1949 graduate and former track star, is studying for the ministry at Baptist Theological seminary in New Orleans.

### Sports Chatter

by KEITH ANDERSON

Another fall has rolled around and it finds us back in school, and wondering what is going to happen to us and Texas Tech during the next school year. As another semester starts, so does the Toreador and as always the biggest problem is in filling space. In order to help ease that problem, we have received orders from the editor-in-chief to write a signed column.

Our purpose in writing a signed column instead of a collective column as we did last year is so that it will be one man's opinion, and can be read as such. We do not intend to print letters to us, but we do invite such letters, because they will help us get a good index to the feelings of the students upon certain subjects. It is not our aim to step on anyone's toes nor is it our intention to crusade. We merely intend to do what the name says, and that is to chatter about sports that Tech is concerned with.

In closing the first column we would like to say that regardless of what some people think after seeing the first game against ACC, Tech is going to field a team this year that will make all its supporters proud of it.

A new trophy case, donated to Tech by the Alumni and Ex-Student's association, is on display in the rotunda of the Administration building.

### Freshmen Football Candidates To Be Strongest Aggregation In Tech's History

What many observers believe is the greatest assembly of freshman football players in Texas Tech history started working out last week under the direction of Coach Allie White.

The Picadors will field a hefty line which almost outweighs the varsity, and will have on hand at least 20 speedy backs to help carry them through their five game schedule which gets underway with a game September 30th against West Texas State.

Backs for the "fish" squad include Ronnie Miller, Albany; Carroll Drye, McAllen; Hudson Routh, Olney; Jim Turner, Olney; Sandy Welton, Fairmount, West Virginia all-stater; W. H. Barker, Colorado City; Chuck Reynolds, Atlanta,

Georgia all-stater; Jerry Killian, Holliday; Carl Madison, Atmore, Alabama all-stater; Waldo Young, Monahans, all-stater; Joe Sandlin, Paducah; Gene Doss, Arlington Heights, Fort Worth; Denton Lambert and Donald Decker, Lubbock; Don Seale, Idalou; and Kenneth Cochran, Paschall, Fort Worth.

Centers include: Jimmie Williams, Phillips all-stater, and brother to Bobby and Don Williams, varsity regulars, and Sam Jones, Temple.

Ends—Ned Wallace, Lubbock; James Clark, Sundown; Gerald Thompson, Brackenridge, San Antonio; Hollice Davis, Olney; Jack Hensley, Lubbock; James Thames, Alvarado.

Tackles—Edward Briggs, Sham-

rock; Marland Ribble, Arlington Heights, Fort Worth; August Meynig, Colorado City; Joe Harris, Masonic Home, Fort Worth; Harold Harrison, Burkburnett; Charles Goff, McAllen; George Hrohn, Wichita Falls; Jerry Prestidge, Galveston.

Guards—Don Gray, Breckenridge; Neil Rogers, Abilene; Vernon Barron, Temple.

### TECH BAND HONORED

Tech's chapters of Kappa Kappa Psi, national honorary band fraternity, and Tau Beta Sigma, national honorary band sorority, have been awarded the National Intercollegiate Band Achievement Award for 1949.

The gold trophy was presented to Prof. D. O. Wiley, director of the Tech band, at the national convention of the organizations which was held jointly at the University of Colorado in Boulder earlier this month.

### Raiders Trample Wildcats In Season's Opener 20-0

By KEITH ANDERSON  
Toreador Sports Editor

The Tech power-laden Red Raiders opened the season before a crowd of 12,000, by beating down a stubborn Abilene Christian eleven 20-0.

For brief moments the team showed the ability that should make it one of the best in the history of Tech, but for the most part it was a very slow ball game producing nothing much to cheer about, since Coach Dell Morgan did not use anything except straight plays into the line.

The game got underway with fireworks quickly, as quarterback Ernest Hawkins of Lamesa, took the opening kickoff and ran it back to ACC's 35 yard line. Good ball carrying on the part of fullback Bud Conley moved Tech inside the ten yard line, but ACC stiffened and took over on downs.

Play see-sawed back and forth for the rest of the first half, with both Tech and ACC threatening. ACC launched its drive which carried down inside Tech's 20 yard line, but the big forward wall of the white shirted Raiders, held for downs, and Tech gained possession. The most determined bid by either team was made by Tech in the second quarter when Tech moved down to ACC's four yard line with first down and goal to go. Three plays into the center of the line failed to gain, and on the fourth play, Earl Jackson, fullback from Quanah, fumbled quarterback Milton Rathbone's pitchout, and ACC took over on its own six yard line. The score stood at the half, Tech 0, ACC 0.

Tech received to open the second half, and the Red Raiders proved quickly that they were ready for action by moving for a score without losing possession of the ball. Calvin Stevenson, halfback from Brownfield, going over from the two, Tim Hatch, halfback from Wellington added the extra point to make the score stand, Tech 7, ACC 0.

Quickly in the fourth quarter, Tech added two quick counters against the tiring Wildcats to give the final score. Quarterback Milton Rathbone passed to end Dick Jackson in the end zone for the first score and handed off to fullback Bud Conley, who lateraled off to halfback Ike Stuver who went over standing up for the final touchdown. Coach Morgan used almost every man on the bench in trying to find out the strength of his squad. Particularly outstanding for the Raiders in the line were tackles Jerrell Price of

Brownfield, and Marshall Gettys of Amarillo. They received able assistance from Guards Don Williams of Phillips, and Dan Pursel of Lubbock. Center Bobby Williams did a good job at line backing for the Raiders. Outstanding in the backfield were Ike Stuver and Earl Jackson, while Cal Stevenson turned in his usual fine performance at left half.

### Baby Can Come To Tech At No Cost If It Lives In Home Management House

BY CHARLOTTE BLACKBURN  
Toreador Staff Writer

Wanted by seven girls in the Home Management house: one baby, age two months or younger.

A baby is kept in the Home Management house to give the girls training in infant care. This has been a practice for the past 13 years. No baby has as yet been found to fill the position this year, according to Miss Lola Marie Drew, director of the Home Management house.

A student's child is preferred, says Miss Drew, and all expenses are paid for it while under the care of its student mothers.

The baby is given the best of care in the well-equipped nursery of the house, and parents are urged to see it every day or keep it on occasional week ends. It is under the constant care of Dr. M. C. Overton, pediatrician.

The practice of having a child has served a dual purpose in the past few years. It gives the home economics student the opportunity of caring for a baby and gives the baby's parents a chance to work or study. It also acts as a financial aid to student parents.

Cynthia Ann Beene came to the Home Management house last year at the age of six weeks. Her parents are Wilford and Jean Beene, both Tech students from Shallowater.

Girls in the house work with Miss Drew and Miss Sannie Callan, head of the child development department, in caring for the baby.

Any couple interested in having their child cared for in the Home Management house for the school year 1949-50 should contact Miss Drew at her office in the Home Economics building or the Home Management house.

### Los Cam Meeting Slated Wednesday

The Los Camaradas club will hold its first fall meeting at 7:30 p.m. Wednesday in Ad-320, according to the new club president, Hiram Jordan.

Other new officers for the fall semester include: Neal Montgomery, vice president; Joe Conger, secretary; Walter Phillips, treasurer; Bill McCasland, reporter; Andy Behrends, athletic director; Joe Overton, sergeant at arms and Bill Miller, correspondence secretary.

### Chamber Of Commerce To Seek Lighted Ball Field

A lighted softball field is to be the principal project of Tech Chamber of Commerce during the school year, according to Bill McCasland, president.

Together with its work to obtain the lighted diamond, the organization has begun a membership drive. Membership booths were operating during registration.

### Parsons To Visit European Plants

Prof. L. E. Parsons, head of the textile engineering department, is to tour textile schools and factories in France and Great Britain with a party of nine other American teachers.

The group is to sail from New York Oct. 7 on the Queen Elizabeth and return to this country Nov. 21.

In England, Professor Parsons is to be a guest of the Textile Foundation and the British textile industry.

The educators will study curricula and methods in English textile schools. In Harrogate, they are to attend a two-day conference on "The Cotton Industry in A Changing World."

Their itinerary includes a visit to the Manchester Machinery Exposition and meetings with the Wool Secretariat.

In Buxton, England, the ten will be guests of Sir Raymond Strat, president of the Cotton Board of Manchester, during meetings with the British Cotton Board.

Professor Parsons will go to Paris Nov. 6 to tour French textile schools and manufacturing plants.

# St. Clair Is Appointed Acting Dean Of Engineering As Adams Retires

Appointment of Prof. O. A. St. Clair, head of the industrial engineering department since 1934, as acting dean of engineering effective Sept. 1, has been announced by Pres. D. M. Wiggins.

Dr. Wiggins also disclosed that Dean O. V. Adams, who has been dean of engineering since 1932, is retiring but will continue at Tech as a full professor of civil engineering. Professor St. Clair will serve as acting dean until a permanent dean is secured.

The new acting dean is a graduate of Armour Institute of Technology and spent over 20 years in industry prior to coming to Tech in 1934. For 13 years he held a high position with the U.S. Gypsum company, and for four years he was engineer in charge of 17 plants of the Beaver products company.

He organized the department of industrial engineering here and is a member of several leading professional organizations.

Dean Adams, who joined Tech faculty in 1927, had been head of engineering since 1932. During his regime national recognition has come to Tech in civil, electrical, mechanical, chemical, industrial and textile engineering. Tech engineering graduates have risen to high places in teaching and indus-

try, enrollment has risen from 378 to over 2,000 annually, and graduate students increased from 83 to 1,534.

In addition to the other advances made by the division under Dean Adams, a department of petroleum engineering has been established, and options are now offered in textile, electrical and architectural work.

## Industry Survey Course Offered

A new course designed to give non-petroleum engineers a survey of the technology of the phases of the petroleum industry is being offered at Tech this semester for the first time.

The course, Introduction to Petroleum Industry, 330, is to give a general introduction into the study of the industry.

Lectures will cover exploration, historical development, transportation and refining of petroleum, production methods, proration and regulations covering the industry, and general economics of oil business.

Prerequisite for the course is a junior standing in engineering or geology.

## Tech Day At State Fair To Be Oct. 12

"Texas Technological College Day" at the State Fair in Dallas will be Oct. 12.

The agriculture public relations committee of the Fair has designated that date for honoring Tech, which this year will again be represented on the fairgrounds by a booth.

A feature of the booth will be showings of "Futures Unlimited", the all-college color motion picture which has been presented over Texas and has had screenings in cities as far distant as Los Angeles. Throughout the day, an "admatic" screen is to show over a hundred full-color views of campus life.

Guest towels with "Texas Tech" woven into the fabric are to be produced by a loom from the textile engineering department.

Bordering the college's exhibit will be enlarged photographs of the campus.

The multi-million-dollar annual state exposition opens in Dallas Oct. 8 and closes Oct. 23.

Ernest D. Evans, 1943 graduate, is employed as a research chemist for the Magnolia Petroleum company in Dallas.

Thayne Amonett, 1947 graduate and former football coach at Falls, is to be athletic director for the Crowell schools this year.

### AWS Orientates Students By Mail

Unlike the many campus organizations which go on inactive status during the summer, the Association of Women Students keeps its members working throughout vacation time.

This year, before the spring semester ended, a list of upperclassmen's names was obtained, then a roster of incoming freshmen was compiled.

Each Tech coed—"Big Sister"—was assigned an entering freshman as a "Little Sister." The women correspond during the summer, the students endeavoring to answer questions and supply information.

which might help dispel the incoming freshman's shyness and fears.

Primary among the queries was: "What shall I bring?"

The Big Sister-Little Sister program has been used before, but never so extensively as it was employed this year.

The association caps its summer schedule of acquaintance through letters by sponsoring a Howdy party the first week of school.

Hilmar Wagner, 1949 graduate, is director of the Rochester, Tex., high school band.

Bill Atwood, 1949 graduate, is to teach vocational agriculture at Lequesima High school this year.

Cuddly soft Imported Angora with self design makes this a real heart warmer. Luscious colors in sizes 34 to 40.
