## FEBRUARY REGISTRANTS MAY PLAN TO GRADUATE

Pictured above is a flight of U. S. bombers as the Slant Eyes of the Land of the Rising Sun will soon see them. Already, the Japs have experienced a few conditioning raids.

### Tech's Political Organ Begins Spring Grinding

BY FELICIA BOULTER  
Toreador Staff Writer

SLOWLY but surely rising over the horizon of campus activities is the forthcoming publication election—an event destined to color another page of Tech's political history.

Despite the seemingly discouraging situations that surround the journalism building and its inmates, such as the deafening

hub-dub of a rolling press, the furrowed brows of struggling journalists, the fatalistic attitude of the columnist "sans inspiration", the merciless pounding of decrepit typewriters, the irregular, unmerciful working hours of the "poor, harassed editor", the financial worries that give the business manager gray hairs and wrinkles instead of finances, Tech students, with the required iron stultification and inspired mind, have started the necessary steps toward campaigning for the publication election to be held Feb. 26.

These candidates are making a bid for one of four positions; namely, editor and business manager of the Toreador and La Ventana—positions that occupy some of the most important and influential niches in campus life.

In the preliminary procedure of becoming a candidate for one of the aforementioned offices, the student must meet two requirements: college work and the completion of at least 60 semester hours before assuming office.

The candidate must make known his intention of becoming a candidate for a publications position at the Student Council office in order that his eligibility can be checked with the registrar, according to Harold Thompson, Student Council president.

After his eligibility is assured, the candidate must obtain a petition form at the Student Council office, the petition stating his plans for running for office. This form is to be filed in the council office, with the signatures of at least 15 per cent of the student association, not less than fourteen days before the election, setting the deadline at Feb. 12.

Melvin Taylor was elected president of the Gargoyle society in the annual election of officers, Monday evening. Other officers elected were Sidney Key, vice-president; Vancille Taylor, secretary; Lewis Blackburn, treasurer; Barbara Fry, reporter.

Committee were appointed to plan the gay nineties ball which will take place in the laboratories Friday evening, February 20. Laboratory chairman for the Engineers' show were appointed.

Feature of the program for the evening were songs composed by Hugh English and sung by Charles Craig with the composer accompanying him.

Today is the deadline for La Ventana Pictures

Today is the deadline for pictures for La Ventana, announces Editor A. J. Kemp. "We are urging all students who have not had their pictures made to do so today," he states. "This is the last opportunity you will have, and every student will want his picture in the yearbook."

Saddle Tramps To Meet

Saddle Tramps will meet Thursday at 7 p. m. in C101. Officials of the club have asked that all members be present and bring their dues for the Tramp's picture in the annual.

### Colonel Finch Outlines ROTC Course of Study

Sixty-two Apply For Entrance In New Artillery Unit

Col. Henry A. Finch, head of the department of military science and tactics, Thursday outlined the planned course of study before the enrollees of the new ROTC unit.

The Colonel stressed the point that the status of the unit is not yet substantiated, since the war department in Washington has not given its approval. Until approval is obtained, the new unit will be without uniforms and complete equipment. However, the Colonel expressed the opinion that the fact that the United States army needs some 90,000 more officers should give the new cadets an incentive to work hard and gain fundamental knowledge which officers in any branch of the service must know. Rifles and a certain amount of equipment are available and a new instructor is to be added to the military force to teach the cadets.

Although 200 applications for entrance into the new unit were at first received, conflicts in schedule forced many of the boys to drop out, and the final count was only 62. The Colonel believes, however, that 62 is quite enough to justify carrying out plans.

The program of the unit calls for three hours of activity per week. One hour will be spent in class instruction, while two hours will be taken up by practical, outside work. Subjects to be studied include national defense, the citizen's obligation to the government, military history, military organization, first aid, reading, weapon study and practice, and drill.

The Colonel said that the new corps will likely be an artillery unit instead of a military unit as is the present one, and later, when adequately trained, will compete with the old unit in firing and drilling.

Although the new cadets will not be eligible for the regular rifle team, there is a possibility that they may maintain one of their own if the proper ability is shown.

### Textile Prof's Article Printed

An article, "Textile Engineering at Texas Technological College and Its Relation to Defense," appeared this week in the New York Daily News Record. The article was written by Prof. C. M. Stanley, head of the textile engineering department.

The article was written at the request of the Daily News Record, which sent the request to President Jones.

Mr. Stanley's article dealt mainly with a description of the textile building, its class rooms and laboratories, the kind of work graduates are prepared for and the fields which they enter upon graduation.

### College Students Register Feb. 16

Arrangements are being made for selective service registration Feb. 16 for all men between the ages of 20 and 44 who have not registered before, according to Dr. H. L. Kent, assistant to the President.

College students and employees who must register for the first time may do so in the office of the Registrar in the Administration building. Regardless of where students live their registration cards will be sent to their local draft boards if requested.

All men who were 20 years of age on or before Dec. 31, men who have become 21 years of age since July 1, 1941 and those who are not 45 years of age on or before Feb. 16, 1942, will be required to register.

### Senate Club Defense Activity

Senate club members are planning to devote their activities this semester to general defense work. Besides this work, arrangements have been completed for several speakers of national importance to speak to the club during the coming months.

Girls may now join the Senate club in accordance with an amendment which was passed at the last meeting.

All Tech students are invited to attend the meetings of the club. Students must have a one point grade average and must be voted on by the members in order to join the club.

HE Club To Meet At 5 P.M.

Home Economics club will meet at five o'clock in the afternoon on the first and third Tuesdays instead of 7:00 p.m. for the duration of the Red Cross First Aid courses.

### Junior Prom To Be Held Feb. 27

In a junior class meeting Monday night, plans were formulated for the Junior Prom, annual junior class dance honoring the senior class.

Nominations for Queen of the Prom will be held Tuesday night, Feb. 10 and the election will be held February 19.

President Kenneth Robbins presided over the meeting and appointed committees to arrange the program. Appointed to the decorations committee were Vester Lee Smith, Ruth Loflin, Gee Waltz, Betty Jo Wagner, and Ann Moore. The general arrangements committee is composed of Bob Bandeen, Reuby Tom Rhodes, Sara Daviss, Marguerite Brannen, and John Ely; Publications committee, Bud Barnes, and Frances Gary.

The Prom will be held February 27 at the Lubbock hotel and will be a semi-formal affair.

Graduate Studies Well Samples

Jessie Rogers, M. S. in geology, 1936, district geologist for the Texas company of the Panhandle district of Texas, was here last week investigating well samples that are available for use in the geology department.

According to Dr. L. T. Patton, head of the geology department, Tech's geology department has several thousand of these samples which are taken every ten feet. These samples are available to any geologist who wishes to study them.

Marriage Class To Hear Two Schools of Thought On Wedlock Tuesday

The class in marriage will hear two schools of thought on wedlock Feb. 10 when Rabbi Garsek and Abdul Khalig will talk on marriage in Greece and India.

The course is taught by Dr. A. J. Bahm of the sociology department and covers all aspects of marriage.

Miller Speaks To Math Club

Nancy Ann Miller spoke on "Lisajous Figures" at a meeting of Kappa Kappa Mu Epsilon, a math fraternity, held Monday night.

### Spring Flying Courses To Begin Early Next Week

Discussion Meets To Be Held Every Day This Week

Civilian Aeronautics Authority for the spring semester will probably start early next week, according to R. P. Vail, CAA instructor.

Meetings will be held every evening this week to discuss the courses, make definite selections, and plan work. The meetings will be held from 5 until 6 p. m. in room 150 of the Engineering building and are open to all students who are interested in taking the courses next semester. Students who want to take the courses and have proper qualifications are asked to be present at the meetings or contact Mr. Vail in his office in the Engineering building.

Physical examinations will be given the latter part of the week prior to starting of classes next week.

Men students who wish to enroll in the course must be between the ages of 18 and 26, must have at least 30 credit hours in college and enrolled in school this semester. Men who are not college students must have at least 60 credit hours.

Instructors for the course will be H. L. Kipp, associate professor of mechanical engineering; W. F. Gray, assistant professor of electrical engineering; C. G. Decker, instructor in civil engineering; J. F. Harding, instructor in civil engineering, and C. C. Schmidt, associate professor of physics.

A new provision has recently been added to the regulations providing that before a student can be enrolled in the course, he must agree to transfer the course and in addition, as soon as he has completed it, enter immediately upon advanced civilian pilot training courses or go into the army or navy air corps.

There have been no definite selections made for this semester yet.

HE Club To Meet At 5 P.M.

Home Economics club will meet at five o'clock in the afternoon on the first and third Tuesdays instead of 7:00 p.m. for the duration of the Red Cross First Aid courses.

### Journalism Prof Writes Article

Appearing in the current issue of the Texas Press Messenger is an article by Prof. Joseph E. Cowan, assistant professor of journalism at Tech. The article, accompanied by a picture of the Press building, describes the work of the journalism department, discusses the Tech Press, its equipment and work, the faculty and personnel of the department, and the various scholarships offered to students in the department.

Texas Press Messenger is the monthly publication of the Texas Press association, organization of newspaper editors throughout the state.

The induction of students called during the last half of the semester or quarter will be postponed until the end of that quarter or semester. The same will apply to the summer session.

Due to the time involved in setting up the registration, lottery, classification and physical examination of new registrants, it is apparent that such registrant will not be actually called for induction during the spring semester," said the bulletin.

The bulletin which is published by the American Council on Education, Washington, D. C., says that the continuance of the procedures of occupational deferment places a very serious responsibility upon college and university students, faculty and administrators.

For the student, it calls for an unhesitant answer to the question, "In what field of total interest can I best serve and how much further preparation is necessary for me to render such service?"

"I assure you that I am as interested as last year or any other year in deferring men that we must train for the future," said General Lewis B. Hershey, director of the Selective Service system when he spoke to the Baltimore Conference of the American Council of Education recently.

"Obviously, if we are to get rid of luxuries, which some of our former speakers have spoken of today, by the same token we must emphasize more our necessities. If there was necessary time yesterday for which a man would be deferred, certainly if the nation is more in danger today, he is many times more necessary," said General Hershey to the conference.

"Unfortunately," said Hershey, "there is a lag in our social consciousness. We do not understand yet the whole implication of modern war, and we do not today visualize, unless we arm ourselves to think of it, the necessity for a man in a thousands fields other than that of actually detonating, directly or indirectly, some munition of war. Eventually the 130 million of our people must understand what we are trying to do, because it is quite useless to try to operate unless the great majority of our citizens can see the necessity for a man's staying rather than going."

Dean Margaret W. Weeks and Miss Mabel D. Edwin, head of clothing and textiles department, entertained 30 alumni girls in their home, 2602 Twentieth street, Saturday afternoon.

Mrs. Goober Keyes will be hostess to the group March 28. The alumni meet four times each year.

### Induction To Be Postponed Until End of Semester

Deferment Needed For Nation's Health And Production

Students in the new registration Feb. 16 can plan to complete the spring semester according to Higher Education and National Defense Bulletin received today by Dr. H. L. Kent.

According to the bulletin received by Dr. Kent occupational deferment for potentially necessary individual fields necessary to national health, safety, and interest of war production will be continued.

The induction of students called during the last half of the semester or quarter will be postponed until the end of that quarter or semester. The same will apply to the summer session.

Due to the time involved in setting up the registration, lottery, classification and physical examination of new registrants, it is apparent that such registrant will not be actually called for induction during the spring semester," said the bulletin.

The bulletin which is published by the American Council on Education, Washington, D. C., says that the continuance of the procedures of occupational deferment places a very serious responsibility upon college and university students, faculty and administrators.

For the student, it calls for an unhesitant answer to the question, "In what field of total interest can I best serve and how much further preparation is necessary for me to render such service?"

"I assure you that I am as interested as last year or any other year in deferring men that we must train for the future," said General Lewis B. Hershey, director of the Selective Service system when he spoke to the Baltimore Conference of the American Council of Education recently.

"Obviously, if we are to get rid of luxuries, which some of our former speakers have spoken of today, by the same token we must emphasize more our necessities. If there was necessary time yesterday for which a man would be deferred, certainly if the nation is more in danger today, he is many times more necessary," said General Hershey to the conference.

"Unfortunately," said Hershey, "there is a lag in our social consciousness. We do not understand yet the whole implication of modern war, and we do not today visualize, unless we arm ourselves to think of it, the necessity for a man in a thousands fields other than that of actually detonating, directly or indirectly, some munition of war. ### Gargoyle Elect

# Texas Tech Is Playing Important Part In Defense

ANOTHER proof that Texas Tech is prepared to take an aggressive part in war preparations, and that the federal government recognizes the fact, was offered several weeks ago when it was announced that the college will be granted another R. O. T. C. unit.

The announcement of another unit to be established at Tech followed closely on the heels of a War Department dispatch saying that R. O. T. C. activities on college campuses would be curtailed, since, in the own words, "The Army in time of war is its own best source of officer material."

Officials of the college, therefore, were justified in their gratification at selection of Tech as a spot for another unit in an organization which may diminish in relative size during the war emergency.

The new unit will have a capacity of 150 students as compared with the present unit's capacity of 350. The new unit, however, will not be restricted to engineering students, as the present unit has been.

Likelihood that the new unit will be further expanded to include 300 to 500 members was expressed by President Clifford B. Jones. President Jones also announced that an addition to the military science building will be constructed at once to provide adequate space for the new trainees.

The expansion of R. O. T. C. facilities at the college may be considered almost as a reward for progressive attitude evidenced by administrative authorities from the start.

In addition to making the first move in the nation to throw open their doors to army officers at the air base west of Lubbock, college officials have actually led in arranging courses through the extension division which will enable youths to enlist in the Air Corps and other branches of the service. They have sponsored courses in plane trigonometry, aircraft physics and varied engineering courses.

Even before the present emergency arose, this college was active in training students under the CAA program.

A continuation of this policy of helping to meet the nation's needs, and when even before they arise, will certainly result only in benefits to Texas Tech.—B.C.

## Quotable Quotes

(By Associated Collegiate Press)

"It is a paradox that, although military defense has been a perennial problem of the American people, there has been until recently no conscious, integrated and continuous study of military security as a fundamental problem of government and society. It is another paradox that, although we live in a warlike world, there has been almost no systematic consideration by American scholars of the role of war in human affairs. As democracy is based upon the belief in the power of public opinion and other moral sanctions, we have understandably given great weight to the problem of collective security. It is now necessary, without decreasing our interest in post-war problems of political and economic reorganization,

to restore a balance as between such studies and studies of national power. Indeed, there can be no permanent security unless statesmanship understands the role which controlled and socially directed military forces must play in maintenance of order and stability." Edward Meade Earle of the Institute for Advanced Study, Princeton, N. J., says de-emphasis on military study has resulted in a missing link in American security.

"Basic to sound civilian morale in a democracy is public understanding. America's schools, colleges and libraries, therefore, have a vital part to play in developing civilian morale soundly based on an understanding of the nature of the present struggle against totalitarianism and of the problems which face us as a people in our resolve to defend democracy against all threats, foreign or domestic."—John W. Studebaker, United States commissioner of education, points to a morale function for American educational institutions.

## Rat Exterminators Can Handle This

Statistics show the population of Japan to be 64,450,005 in greater Japan. The area of this territory from which the census was taken is 147,327.2 square miles. From these figures, this allows each person in the land of the Rising Sun to have .00222 of a square mile per person.

By comparison with Texas you may readily see their need of either expansion or eradication. The population of Texas is 6,414,824 (1940 census), and the area is 262,398 square miles. This allows each person in Texas the breathing space of .04 of a square mile, or nearly 20 times as much as a Slant Eye has.

The Japanese are aggressive people and aggressive people can not live cooped up as they are. If you can imagine everyone in Texas taking a twentieth of his real estate and trying to make a living, bring up his family, and have his recreation on that property you can hardly blame the Japs for trying to advance their civilization!

In order to establish world peace after this war, the Allies, should they win and defeat is impossible, are going to have to take care of this density of population one way or the other. Either they are going to have to give the Nipponese more land, or still a better idea, they are going to have to run about fifty million Slant Eyes in the Pacific, which, incidentally isn't such a bad idea.

## The Newspaper Is A Public Institution

Newspapers are devoted primarily to news and not editorial discussion or attempting to represent the party opinion of a majority of the constituencies; and that the comment and discussion function is carried on not only through a paper's editorial column but through various other techniques, mostly non-partisan.

It is not a function of the newspaper to win elections. If it were, then, as Roy Roberts of the Kansas City Star once wisely observed, newspapers would have to add election departments and organize year-round political machines. And Secretary Ickes, of the Department of Interior, was wholly incorrect in saying, after the recent election, that the disparity between popular and newspaper support for President Roosevelt was "unprecedented." A careful study shows that there has been historically, no correlation between the two kinds of support: half of our presidential elections have been won by candidates who did not have the support of a majority of the newspapers. Jefferson won his first campaign with an even smaller proportion of newspaper support than Roosevelt. There is every reason that newspapers should not set themselves up to win elections. They are engaged in the long-time, long-range operation of informing the public from day to day. Just as electoral decisions are only a small part of a newspaper's interests, so also the commentary and discussion are only a small part of the complicated process of the formation of a public opinion.

No, recent elections have not produced the slightest evidence to show that the newspaper is not still a democratic and essentially popular institution. On the other hand there is the most direct statistical evidence that the people, who are the best judges, believe that the press is distinctively their institutions. In the last five years daily newspaper circulation has reached the highest point ever known in America, and has remained at that peak in spite of subscription rate advances. While we should not, perhaps, paraphrasing the song about the Frenchman, declare that 41,000,000 Americans can't be wrong, we can be fairly sure that the 41,000,000 newspaper buyers do not think the newspapers have sold them out.

The publication of news is still a major function of the democratic system. As Oliver Wendell Holmes observed during the Civil war, newspapers are as necessary to our people as meat. They are of the people, for the people and by the people—the most thoroughly democratic and popular of our institutions.—By Frank Luther Mott, Director, School of Journalism, University of Iowa.

## Techsan From Austria Thinks Texas Girls Cute

By GEORGIA LEE POWERS  
Toreador Staff Writer

AFTER ten years of wishful thinking Theodor W. Alexander, 22 year old Geology major from Austria, has come to Texas. Ever since he was twelve years old, having read books by Zane Grey and Max Brand, he has had a desire to visit the West.

He came to Tech, he says, the best school for him but before making his choice he looked over catalogs for several Texas colleges and universities. The Tech catalog was the most democratic in his opinion. He hopes to graduate here.

Been Here Three Years Since he has been in the United States only three and one-half years, he will not be a full-fledged citizen for two years. Before coming to this country he attended the Real Gymnasium VIII in Vienna, Austria for five years. He went from there to the College for Textile Engineering in Reichenberg, Czechoslovakia, where he studied one year. After arriving in the United States he spent a year at Boston university.

Theodor, who prefers to be called Ted, likes English and takes pride in the latter field may be attributed to the fact that while attending the Gymnasium of Vienna he was a member of a skiing patrol, a military officers training corps which corresponds to our ROTC. However, his interest in tennis is not based on his skill in playing the game.

In regard to Texans, Theodor says, "The girls here have interesting features compared with those on the continent." "In fact" he says, "they are what you call 'cute'." He likes Tech students and the friendly attitude of the West very much and especially does he like the American slang. "His favorite expressions are 'get on the beam' and 'buff' the boys." Cowboy boots have caught his eye, but he believes it would be wise to adapt himself to this section of the country before trying them.

Lots Of Cars The first thing he noticed after reaching America, he says, was the large number of automobiles. He crossed the Atlantic on the S. S. Frankonia in 1939 after spending 2 months in Scotland. His first home in the United States was in Boston, Mass., with a brother. He also has a sister in Dallas. Among the things about the campus which puzzle him, probably the significance of the "agricultural tree department" is the most outstanding.

Tryouts Soon For Club Application for permission to try out for membership in Sock and Buskin, dramatic club, are being received now in the speech office. According to Miss Annah Jo Pendleton, head of the department, they must be in before Thursday.

## Musing On Amusements

By Raymond Piller

"UNFINISHED Business" should never have been started. But despite the handicap of a weak plot, the picture succeeds in being good entertainment. You might enjoy this gay movie about small town school teacher Irene Dunne who meets and falls in love with debonaire Preston Foster, who promptly forgets her. As a result of a drunken spree, and out of spite she marries his brother, Robert Montgomery, but she still can't forget Foster. Bob, gentleman that he is, forgives her, and all is bliss. Stars Dunne and Montgomery do well, and Eugene Pallette is excellent in a minor role. It opens tomorrow at the Lintress.

## A Yank Couldn't Understand This But Texans Can

By ARLEE GOWEN  
Toreador Sports Editor

Four score years ago our neighbors to the north brought forth in this country a gigantic hoax, conceived in ignorance and dedicated to the proposition that the yankees saved the union.

History never found in a text book would have been the result of the famous Battle of Bull Run, fought Dec. 13, 1862, had General Robert E. Lee decided to withdraw before the Union troops and fight the Civil war in Texas.

No doubt exists in the minds of historians as to what the outcome of the Civil war would have been, had it been fought in Texas. Even those Yankees on Tech campus who still have the misconception that the North won the war admit that amid the sand, the cactus and the rattlesnakes the Yankees would have stood small chance with the Apaches and Comanche bogging down in the mud of the East Texas "black lands," scorching in the heat of the desert, cutting their way through dense verdant forests, and fighting off mosquitos as big as modern Messerschmidts, the Union troops would have met a merciful death. Now they are bootlegging.

Still thinking that the North won the war the Yankees tell their children how they made the South safe for "niggers," scawlags and democracy. To shatter the Union's hero-worship of a dastardly deed, the North's ruffians as ever robbed a Confederate corpse, the time has come when the truth must be told.

Southern hospitality stood its greatest test and chivalry was exercised almost to the breaking point before the Union troops decided to quit making fools of themselves and go back home. The Southerner was too much of a gentleman to take the Yankee's horse and gun away from him and send him home afoot, so he humored the Northerner until he had finished his little exploit. One Southerner, Gen. Robert E. Lee, almost forgot his manners when he ran the Unioners all the way back to Washington in the Battle of Bull Run. It is unfortunate that the incident happened to blot the tradition of Southern hospitality, but it must be remembered that Gen. Lee was educated in the North and because of his educational environment, his rash action must be excused.

Fifth Columnists Too Just as a matter of correcting the misconceived idea our Yankee friends have, the North won no war from the South except a war of lies. The Northern "gentlemen" were quite proficient in the gentle art of prevaricating and propaganda before they made their little foray of plantation house burning.

No doubt the union sympathizers will try to construe that final Confederate triumph, Appomattox, as a Yankee victory. Had the finale of the war occurred in Texas, there would have been no Appomattox. The slightest doubt would have been erased as to who won the war.

Besides General Grant never for a moment considered going to Texas as to fight the war and wouldn't have had the Rebels aligned themselves for the battle there. The beary-eyed beer barrel gazed dreamily out over the battle field of Cold Harbor, Virginia, and ponderously expounded, "I'll fight it out on this line if it takes all summer." He meant it too, for with two score jugs of whiskey and some three barrels of rum "confiscated" from the Rebels at the "mud levee of Charleston" he was well equipped to drink the Confederates into submission. But the Charlestonians set him right about the "mud levee of Charleston."

"Sub" said a Southern prisoner of war who surrendered rather than shoot the poor wretched creatures who attacked him, "Charleston is that beautiful, impressive little metropolis situated and shining regally at the spot where the Ashley and Cooper rivahs join aided by snappy feminine admirers, to name Jane Frazee as one. There's that every-place-at-once villain, this time played by Walter Catlett, and his co-worker Iric Adrian to throw a monkey wrench or two into the works.

## Techsans Say:

### England Is Not Doing Her Share In This Fight

By CLEM SIMPSON  
Student Opinion Editor

What do you think of the part England has played in this war? Has she done her part or has she put an undue share of the load on her allies and other parts of her empire?

BROOKS SPEER, sophomore A.H. major: I do not believe England is doing her part. It seems that she not only wants material to fight with but she wants men to do the fighting. What General MacArthur is doing and what England is not doing in the war with Japan should prove this.

J. A. McWHORTER, freshman engineer: Sure, England is doing her best. A nation willing to do the fighting if someone will furnish the fighting material should be complimented and this is the offer England has made us.

Freshman BILLY JOE STOVALL: England has tried to put too much of the load on other nations. But the Nazis have forced them to do a great deal of fighting. I believe that if England gets for much aid she will slack up on her fighting and leave the big load for her allies. England is striking some pretty severe blows though and may continue to do so because we may not be able to help them a great deal.

ELLIS STAGNER, sophomore B. A. major: I think that England has done the most fighting so far, but it was because she had to. It seems as though England has been waiting for the United States and the rest of the allies to do the fighting.

Sophomore Arts and Sciences FRED BEARD: I think England has been in too big of a hurry to push the war off on her allies who have been trying their best to stay out of the war as long as possible.

GERALD HAYS, senior engineer: It seems to me that England has done a good job of defending her own islands, but as far as her allies are concerned, they have been given the "short straw."

Had the Union forces reached Western Texas, which is not likely having to cross the wide, uncivilized expanse of Eastern Texas, the West's infamous sand storms would have enshrouded the hapless troops.

But the Yankees knew the folly of trying to capture Texas, and the intelligent ones (don't laugh, for there were a few) realized that if the Southerners retreated into the wilds of Texas, their cause was hopeless.

"War is hell" was the sagacious little contribution of William T. Sherman, who made the world's greatest chicken-stealing foray across Georgia. Had Bill Sherman got a chance to say his little piece in Texas, he probably would have stated, "War is worse than hell in Texas."

Strong Joy Juice General "Stonewall" Jackson could have easily captured the whole Union army at the Battle of Bull Run, but wisely refrained, knowing that the Confederate treasury could not stand the strain of keeping the Yankees in whiskey. Had he been in Texas, Jackson would have no problem. He could have gone ahead and captured the Yankees with the assurance that Texas mountain water would have had the same effect upon his captives as Yankee rum had shown and would have kept them perfectly in submission.

The Confederate troops could have completely lost the entire Union forces by retreating gradually before them and leading them into a country which would make the Dakota bad lands look like a kindergarten sand pile. Had the Union troops been foolish enough to trail the Confederates to the South Plains area to establish their bivouac near Lubbock, their doom would have been sealed. Finding the country dry they would have been forced to withdraw southward to Segreaves to make the last stand and become hopelessly annihilated in their new Shangri La.

# Tech Fighters Go Into Golden Gloves Finals Tonight

## District Bouts End With Climax In Gym

By ARLEE GOWEN  
Toreador Sports Editor

**GOLDEN GLOVES** competition goes into the finals tonight from which will emerge 16 champions, eight of which will go to the State Gloves tourney in Fort Worth, Feb. 11. Approximately 80 fighters have met in preliminary bouts in the Tech gym in the first two nights of the District championship fights.

Class AA fighters, those who have previous ring experience vie for gold wrist watches, valued at \$35 each. Ivory and gold trophies will go to winners of the Class A, novice division. Miniature golden gloves go to runners-up in all divisions.

Handsome uniform boxing trunks and a free trip to the Fort Worth State Golden Gloves tourney also go to winners in AA competition.

Texas Tech leads the boxing lineup with 15 fighters, classified in all weight divisions. Fighters from all South Plains towns in the Lubbock area are entered as well as boxers from the Lubbock Army Air base, located at Hurwood.

Light-heavyweight Rhea Mitchell is the only returning champion on Tech's boxing squad. Eight other former champions are included on the 1942 Golden Gloves roll. Six of them are from last year's district championship team. Flyweight LaVern Roach of Plainview; Featherweight Buford Bradshaw of Littlefield; Bantamweight Curtis Lebow of Plainview; Welterweight Howell Steen of Lubbock; Light-heavyweight J. E. Ramsey of Lubbock and Middlebury compose the returning Golden Gloves champions.

**Three Other Champs**  
Three other former champions entered are James Stotts, welterweight champion of 1939; Harry Bell, bantamweight champion of 1939; and W. D. McCarty, bantamweight champ for two years now entering from Littlefield as a flyweight.

Thomas Scudday, freshman boxer from Lubbock, entered in welterweight division, brings Tech's boxing squad to 15.

Playweight contenders for the Golden Gloves team from Tech include Everette Sparks of Pampa and Roland Berger from Stinnett. Sparks took his first bout by decision in the Tahoka preliminary tournament.

Rex Lee Jones, Tech bantamweight, decided his opponent in the Tahoka meet also.

**Tech Featherweights**  
Two featherweights contend for the district title. Keith Kivlehen, Miami boxer and Robert Coker of Corsicana meet fighters from the Lubbock area which includes the former champion Bradshaw who returns this year.

Kivlehen, after winning the Tahoka featherweight title, entered the Littlefield preliminary tournament only to lose in the finals.

Only Tech lightweight entered in the Gloves is John Jennings, Wylie fighter.

**Two Tech Welterweights**  
Welterweight scrappers include Scudday and Melvin Robertson, both entered in the novice class.

Four middleweight fighters contend in the 1942 Golden Gloves from Tech. Included in the group are B. F. Hutson, Hugh Harbart, Paul New and James Masterson. Hutson is local, New is from Skellytown, Masterson hails from Estelline and Harbart is a Pleador squadman.

Mitchell, heavy Golden Gloves contender for the past five years, signs as the only light-heavyweight contender from Tech.

Two heavyweights top off the Tech boxing team. J. P. Bussell, Canadian; Joe New, Skellytown complete the fighting lineup.

### Tech Professor Presents Paper

A paper entitled "The Geology of the Sierra de Tlahualilo, Durango," was presented at the December meeting of the Geological Society of America held in Boston.

An abstract of a forthcoming bulletin by Dr. W. L. Robinson, associate professor of geology in Tech and L. E. Kellum, professor of paleontology in the University of Michigan, the paper described work which was carried on for three summers under a grant from the Penrose fund of the society.

Work in this general area of Mexico has been going on for six years with the cooperation of professors from Syracuse university, University of Michigan, Cornell university and Texas Technological college.

The Penrose fund which sponsors these trips was left by a mining engineer who willed over a million dollars for geological exploration.

### Struggles To Speak

"Negro Education" will be the subject of E. C. Struggles when he speaks to the Sociology 7:30 p.m. at the home of Louette Leary, 2205 Thirteenth street.

One hundred four of the first 119 colleges established in the United States had Christian church origin.

### Country Dancing Classes Begin

For the third consecutive year, Jimmie Clossin from the city recreation department in El Paso will again come to Texas Tech to teach country dancing. Clossin will be in Lubbock from Feb. 23 to 27. Classes will meet from 2 o'clock until 3, Monday through Friday and 8 until 9 o'clock p.m. Admission will be \$1 per ticket which entitles a person to attend any of all classes. Classes will be open to students and town people. All persons interested in country dancing, such as the heel and toe polka, Schottische, and many others, are urged to attend these classes. It is the aim of Mr. Clossin to teach a new dance each night.

In order to find out whether or not the students of Tech are interested in learning these dances, the boys' and girls' classes in physical education are being offered instruction in country dancing.

Country dancing is a nationwide pastime enjoyed by millions from the coasts of California to New York. Each state usually has a slight difference to their version of how one of these dances should be danced, but, fundamentally, all are the same.

### Club To See Pictures

Dr. Edgar T. Ruff will show motion pictures of scenes in Mexico at the regular meeting of Capa y Espada at 7:30 p.m. Tuesday.

A memorial to Emma Hart Willard, Pioneer of Higher education for women in the United States, recently was unveiled at Middlebury, Vt.

Patronize Toreador advertisers!

**BIG BOMBERS**—Although not in the B-19 class these Golden Gloves bombers have proved their striking power and long range in previous Golden Gloves bouts. Rhea Mitchell, (left), of Texas Tech and Lockney enters the light-heavyweight bracket with two heavyweight titles in Gloves championships. Mitchell is fast and versatile. As one of his opponents put it, "he hits with everything but the ring post."

Howell Steen (above) with his trainer, Cliff Caraway, has carried two welterweight titles in Golden Gloves tournaments of other years. He hails from Lubbock and fights with a lightning attack full of strategy punches.

"NOW, IT'S LIKE THIS," explains Coach "Burl" Berl Huffman to his Red Raider cage squad which holds second place in Border conference competition. Kneeling are Guard Norman Volz, Coach Huffman, Center Byron Gilbreath, Forward Elvis Erwin, Forward George Allen and Center Vernon Ray. Standing are Center Norman "Frosty" Cox, Center Ed Irons, Forward Bill McCulloch, Guard Billy Hale, Captain and Guard Gabe Gilley, Guard Roy Williams, Guard Max Munn, Guard J. R. Callahan and Guard Garland Head.

### Tech Is Second In Cage Loop

Red Raider basketball team, now standing in second place position in the Border conference competition, are taking a breather until Saturday, Feb. 7 when they meet the Hardin-Simmons Cowboys in Tech gym.

Leading scorer in the Border conference in Canyon's Price Brookfield. Trailing him is Tech's Byron Gilbreath, center, with 87 points scored in the six conference tilts. Trailing Gilbreath on the Tech squad is Elvis Erwin, forward, with 72 points.

Other loop games this week find Flagstaff meeting Texas Mines, Tempe at New Mexico U, West Texas at Hardin-Simmons, Tempe meeting Texas Mines and Tempe meeting New Mexico aggies.

The team standings:

West Texas State	6	0	1000
Texas Tech	5	1	833
Tempe Teachers	4	2	667
New Mexico U.	3	3	500
Texas Mines	2	3	400
Flagstaff Teachers	2	3	400
Hardin-Simmons	2	4	333
Arizona U.	2	5	286
New Mexico A&M	0	5	000

### Qualia Will Speak To Fireside Forum Sunday

Dr. C. E. Qualia, professor and head of the department of foreign languages, will speak to the Fireside Forum Sunday afternoon on "Women Writers of South America."

The public and especially college students are invited to attend.

### Mistaken Identity Makes Bill Boil

**BILL WOOD**, former TOREADOR editor and TOREADOR sports editor, now employed on the Fort Worth Press sports desk has found some duplicity in names when he took over his job on the Press, for on the same paper was found another Bill Wood, a photographer. Bill's (our Bill) own explanation of the situation was published in Pop's Palaver, sports editor's column.

Easily recognized by the ex-editor's inimitable style, the explanation may be of interest to Tech students. Here 'tis:

"My new assistant, Bill Wood, evidently has been having trouble with his name, because it is the same as Bill Wood, the photographer. After mature deliberation, Bill, the sports writer wrote a story and handed it to me with a suggestion that it might ease the pressure on him if I ran it in the paper. This is it.

"Just to make a long and rather embarrassing story shorter, I do not take pictures. I do not know the difference between a box Brownie and a speed Gralex. I am not Bill Wood, the guy who does take pictures. I am, or aspire to be, Bill Wood, the sports writer. But if various and sundry bank tellers don't quit accusing me of forgery, I'll be Bill Wood the belligerant.

"Introducing myself has become more of an ordeal than might be expected. People, merchants, coaches, athletes and laymen peer at me with that knowing leer you see in Benchley shorts, as if to say: 'If you're Bill Wood, I am General MacArthur and the Jap war is just a gag.'

"Conversational transactions via telephone have proven more difficult. I have been the recipient of two invitations to bridge games and a telegram from 'Who's Who.' That makes my ensuing identification more of a confession than an explanation. Convincing folks of my identity takes so long the wage-hour maximum catches me before we get down to business.

"I considered pluralizing my surname while in Fort Worth, but am informed by my draft board that such a procedure would take six weeks. I feel Sec. Stimson is busy enough as it is. If I have caused any more than mild inconvenience, I am sorry."

### Intramural Sports Program Announced For College

By **VERNON BUNDRANT**  
Toreador Sports Writer

Athletic Director Morley Jennings released plans early this week which will swing Texas Tech's most gigantic men's intramural sports program.

Okayed by the deans of the arts and sciences, agricultural and engineering divisions, the plan calls for competition in cross country races, track, basketball, volleyball, regular baseball, playground ball and tennis.

Major competition in the program will be between divisions with minor competition between departments in most of the sports. A system of point rating will be used to determine the winning division of the whole program.

Winner of each sport will have 100 points listed to its credit, second will have 50 and third 25. The division piling up the greatest score will be awarded a cup at the close of the intramural season. It may be kept one year for winning and retained after winning three years in succession.

**Urged To Call Meetings**  
Although the program is purely voluntary, Mr. Jennings strongly urged that a meeting of each division be called as soon as possible, preferably early next week. He asks that he or Doc Spears be notified of the time and place of the meeting so that a representative of the athletic department will be present to give explanations, answer questions and discuss further plans.

A main manager will be selected from each division who will have charge of teams in his division and who will be responsible for convenience, this must be accepted as a blanket apology. It has merely been a good laugh, then it's on me."

# Five Social Clubs Name Thirty-seven Spring Pledges

## This Semester's Rush Period Ended Friday

**Las Vivis Pledge Greatest Number With 11 Girls**

CULMINATING the social whirl of women's rush week the final convocation on Friday afternoon was a climatic end.

Girls listed as pledging Sans Souci club are Betty Herring, Norma Younger and Dorothy Wright. Las Chap spring semester pledges include Ebbie Eoulton, Joyce Bumpass, Lois Gibbons, Doris Hardin, Marian Martin, Coby Moser, Francis Watson, Gracie Watt and Mary Ann Worley.

The following gave their preference as Las Vivi potential members: Betty Babb, Ethel Mae Campbell, Juanell Cox, Jeanette Dodge, Helen Ellis, Katherine Green, Betty McCoy, Mary Ann Shaunty, Johnnie Faye Templeton, Frankie Lou Teague and Celestine Wheeler.

To pledge Ko Shari are Betty Albin, Lenna Ellen Ball, Harlene Cook, Marian Coolidge, Bernice Cocanougher, Faye Ruth Harding, and Martha Ann Robinson.

DFD pledges for the spring semester include Mary Dell Butler, Maxine Craddock, Marie Durham, Billie Ewing, Louise Hardin, Mary Jean Kell and Martha Lou Khessler.

## Chess Tourney To Be Ended Monday, Feb. 9

Bringing the Texas Tech championship chess tourney to a close, a deadline for final games has been set Monday, Feb. 9 according to Dr. R. S. Underwood, tournament sponsor. All contestants meet 5:00 p.m. on the deadline date in Room 109 Engineering building to award the championship.

Still leading the nine contenders in the championship bracket is Kenneth Bain with five straight Class A wins, followed by Arlee Gowen with six victories and one loss. Other players in the championship division include David Story, Bob Cartwright, Lee Spring, Joe Lair, Ernest Clement, Thomas Romans and Spencer Milliken.

Matches remaining to be played after the deadline will be forfeited to the player having most games played.

Among the secondary contenders are J. W. Slover, Bob Couch, Harrel Jobe, Lonnie Sibley, Charles Gollihar and Dan Newby.

The tournament under the sponsorship of Dr. Underwood and Dr. A. L. Strout began early in December with 23 entrants.

The tourney standings:

Player	Won	Lost	Pct.
Bain	5	0	.1000
Gowen	6	1	.857
Romans	4	2	.666
Story	4	3	.555
Cartwright	3	4	.428
Lair	2	4	.333
Clement	0	2	.000
Milliken	0	0	.000
Spring	0	5	.000

## Wakerling Is New Math Instructor

Dr. Virginia Wakerling has received a temporary appointment as instructor in mathematics at Tech for the spring semester. A graduate of the University of California, she has had three and one-half years' teaching experience.

The vacancy in the mathematics faculty was caused by the resignation of Mrs. K. T. Miller, Tech instructor for the past eight years. She has joined her husband in Mason, Georgia, where he is a teacher in the air corps. Mrs. Miller will return to the Tech faculty next fall.

Six hundred clerical employees of FBI are studying at Washington colleges and universities in their off hours.

### Co-Ed's Corner

## Tech Girls Enroll In Red Cross Course

By M. M. Tunnell

Tech co-eds, perhaps with dreamy thoughts of Florence Nightingale or Clara Barton, turned out en masse Monday and Tuesday Red Cross course being given on Monday and Wednesday and Tuesday.

The course which is sponsored by the Home Ec club under the leadership of Jean Spencer offers a Red Cross certificate in first aid after completing the six weeks' program and passing a quiz. Hence forth, the girls will don their slacks in order to make artificial respiration practice, etc., easier.

All women Techsians should gravely consider the advantages such an opportunity offers before passing it up. Under the tutelage of Dr. Allen T. Stewart and his assistants, many vital facts and techniques in first aid will be presented. Everyone should be familiar with these modern methods of treatment. You may never have an opportunity to put into practice what you would learn in a group of lessons of this sort; but still, how do you know? You may save your best friend from drowning by your knowledge of artificial respiration; you might save the life of a wreck victim by knowing how and where to put a tourniquet. Too, if women are to be drafted as nurses and such this course would certainly give them more than a head start. We should all show our appreciation of such an opportunity by 100 per cent attendance at the Red Cross classes.

Women's Dormitory association is dividing itself into two separate house senates, one for each dormitory. With the erection of the new dorm last year, both of the dormitories were placed under the joint self-governing leadership of one group of girls who represented both residence halls. The tie has been broken, and girls in Dorm. No. 1 will soon have their own newly elected house senate.

Girls on the third floor of Dorm. No. 2 are delighted to learn that they will soon be able to have private phones. This will continue the midnight conversations, telephone jokes, and numerous orders of last year.

Nanette Tanner and Margaret Moncrief have made some of the sauciest chintz covered dressing tables for their room that you ever saw. Taking two orange crates, they lined the shelves with oilcloth and after covering the tops with glazed chintz, made ruffled skirts to match. These little personal touches really add to the hominess of a room.

Women evidently do have a very important part in the present scheme of things. According to Owen Merredith:

"We live without poetry, music and art.  
We live without conscience and

live without heart;  
We may live without friends—we may live without books;  
But civilized man cannot live without cooks."  
This might also be entitled "Ode to a Home Ec Major."

## Mexico's Boys Like Texas Tech But Miss Siesta

BY LOUISE HEATH  
Toreador Staff Writer

Acquiring a new set of customs at short notice is a difficult job, at least Carlos Rios and Cecilio Velasco, mid-semester freshmen from Mexico City, find it so.

In their native land, boys are very polite offering their chair to the girls in crowded classrooms, escorting them from class to their home, assisting them across the streets, "but here it is considered what you call fresh." There, the students await the entrance of the professor before going into the classroom. Then they stand politely by their desks until he is seated, before sitting down. When class is over the professor leaves first, followed by a respectful class.

**Enjoys Music**

Nineteen year old Cecilio is majoring in petroleum engineering and Carlos, eighteen, is a textile major. They learned to speak English in the two year preparatory school, then Cecilio had a private tutor, while Carlos practiced speaking to English tourists on his Saturday holidays by acting as guide. Both played football-soccer in school and are familiar with tennis and basketball. Carlos enjoys hunting, says he once played the guitar and likes to hear Cecilio play the piano.

When asked what he thought of the co-eds, Carlos candidly admitted that the reporter was the first one he had met. He is amazed at the independence of girls on the campus, for "in Mexico nice girls do not go about alone, but are chaperoned by friends or family."

**No Siesta**

Previously they have not gone to afternoon classes until after three, but find one and two o'clock classes odd, but they still get their sleep at night—and often not even the breakfast bell disturbs them—unless of course they are hungry. Dinner is another puzzling thing. "Our big meal we had at noon, but you do not have it until six, by then one is most hungry."

They like the friendly professors

## Draper Delights Audience With Rapid Monologue

Ruth Draper, queen of the dramatic monologue, once again delighted her audience to the highest degree when she appeared in a program at the Senior High school auditorium Monday night under the auspices of the South Plains Music association.

Using only a minimum amount of costumes and no stage scenery except a table and chair, the internationally famous actress performed for over two hours, speaking almost continually at a rapid rate. Her moods, depicting people in all walks of life, ranged from comedy to tense passion and tragedy.

Again and again the artist returned to the stage before an applauding audience and she presented "A Scotch Immigrant at Ellis Island" as a dramatic encore number. Other solo-dramas, all written by Miss Draper, were "In A Court of Domestic Relations," "The Greek Poise" and "In A Church in Italy."

## Mataador Fiesta Open House Held Friday

A Mexican orchestra and Mexican songs were featured on the program at the Mataador Fiesta open house at the First Presbyterian Church last Friday night.

Dr. Benjamin Bock told the group of his observations on a trip to Mexico City and the surrounding country.

The open house was in honor of new students entering Tech this semester. The entire group sang Mexican songs and was favored with solos by Rex Webster and Jess Ballew.

Three University of Texas art professors are painting postoffice murals for the federal government. Five of Louisiana State university's correspondence students are getting their questions and grades by foreign mail.

and informal class discussions and think it will be easier to study here. In most respects the students of both countries are much the same, they said.

"We chose Tech as our school, because our University does not teach engineering. At first we thought of going to Boston, but it was so far away. You see, Tech is only two thousand miles from home."

## Apply Now For Membership In Sock and Buskin

Letters of application for permission to try out for membership in Sock and Buskin, Tech dramatic club, are being received now in the speech office, room 205 of the Administration building. The organization is open to all students who are interested in any form of dramatics.

# California "Whirling Ballerina"

GAY, FLATTERING YOUNG SEERSUCKERS!

Fresh and charming, light as thistledown . . . exciting, carefree young frocks with wide, whirling skirts cut in one huge, complete, rippling circle! Created by Sue Mason for young figures of any age (Mother likes 'em too).

They're delightfully, gracefully feminine . . . with softly accented shoulders . . . slim, smooth-fitting midriffs . . . moulded bodices for a young, high bust line!

Fine seersuckers that wash beautifully and need no ironing . . . printed in beautiful flower designs, stripes, checks, and dots . . . with Sue Mason's careful, skilled attention to pocket and collar detail!
