

Yehudi Menuhin, Former Child Prodigy, Will Play For Artists Course Tomorrow

YEHUDI MENUHIN

Final Rally Slated On Rec Hall Green

Last pep rally of the season will be at 7 p.m. tomorrow on the Rec hall green. Polk Robinson, head basketball coach, will give details of the coming basketball season.

Immediately following the pep rally, a platter dance sponsored by the football coaches will be held in the Rec hall until 8:30 p.m.

Head cheerleader Coffee Connor said that the turnout of freshmen at this season's pep rallies has probably been the worst in the history of the school. He urged that freshmen take heed and come tomorrow night to show that their class does have some school spirit.

Senior ROTC Students Represent Tech At National Arnold Society Convention

Judges Place In Chicago Contest

The senior livestock judging team placed twenty-seventh at the Chicago International Intercollegiate Livestock Judging contest R. C. Mowery, head of animal husbandry, said.

On the way to Chicago, the six man team made practice judgments at Oklahoma A&M, Missouri university, University of Illinois, Mathis brothers ranch, shorthorn breeders at Mason City, Ill. and the J. Tolan ranch, Aberdeen Angus breeder of Pleasant Plains, Ill. The team, consisting of Glen Johnson, William R. McMullin, Bobby Gray, William Piper, Alvin Davis and Cecil Mardis, will return tomorrow.

Speech Students Compete At Ada

Five Tech students will participate in the East Central Forensics meet Thursday through Saturday at East Central State college in Ada, Okla., according to Dr. P. Merrill Larson, head of the speech department.

Students who will make the trip are Jim Choate, Sweetwater; David Buechler, Houston; Wanda B. Smith, Lubbock; Thelma deane Hutehins, Pecos; Jane Horton, Stamford; Larson will accompany the group.

The students will participate in various divisions including discussion, impromptu speaking, oratory, debate, women's radio, after dinner speaking, public address reading, extemporaneous speaking and poetry reading.

Senior Record Cards Due Friday

Senior record cards must be returned by 5 p.m. Friday, Kathleen Kilpatrick, La Ventana class editor, said.

Cards may be obtained and returned to the dorms, major campus buildings or the La Ventana office on the second floor of the Press building.

When a four-year-old throws a toy on the floor in angry disgust, he usually gets a "padding." But when Yehudi Menuhin scorned his toy violin because it wouldn't make music, his understanding parents sent him to a violin teacher.

As a result at the age of seven he made his professional debut as a violinist in 1923 with the San Francisco Symphony orchestra before 6,000 people.

Menuhin will play for Tech Artists course at 8 p.m. tomorrow in Lubbock High School auditorium. Tech students will be admitted on receipt of their fee slips and non-students may buy tickets at the door.

The child prodigy, destined to become one of the great violinists of the world, made a world concert tour by the time he was 18, appearing in 110 concerts in 63 cities. Following the tour, Menuhin spent two years in seclusion on the family estate at Los Gatos, Calif. and returned in 1937 as a mature artist.

Menuhin, who was born in New York in 1916 to Jewish school teacher parents, is well developed physically and glows with health and vitality.

The violin genius led a normal boy's life despite his fame. He and his two sisters, Hephzibah and Yaltah, both talented pianists, were educated privately. Menuhin learned to speak six languages fluently. His recreational activities included extensive reading, horseback riding, swimming, hiking and mountain climbing.

During World War II Menuhin gave more benefit concerts in war areas than any other concert artist. He has made over 185 recordings since he was ten and has appeared in three movies.

Senior Crop Judging Team Places Second In Contest

Tech's senior crops judging team returned today after placing second in two national contests, Dr. A. W. Young, head of plant industry department, said.

In both contests, the National Intercollegiate Crops contest in Kansas City and the Annual Collegiate Crops Judging contest at the International Livestock exposition in Chicago, the team was edged by an old rival, Oklahoma A&M.

A new record was set in the Chicago contest Saturday with

Tech's team scoring 5,161 out of a possible 5,400 in an eight team competition. The Oklahoma group scored 5,218.

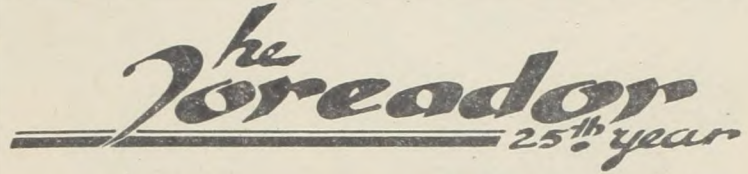

Tech's representatives lost the Kansas City contest Nov. 21 by 54 points although Edgar Hawkins, Lamesa, was second highest scorer with a total of 1,747. Victor Herring, Brownfield, placed fifth with 1,718 and Jack Greathouse, Floyd, N. M., tenth with 1,693.8.

Outstanding individual scores made at the Chicago contest were Herring, second highest with 1,742

out of a possible 1,800 and a tie for first place in the identification phase with Herring and Robert Kral, Sweetwater, turning in perfect scores. Horace Mitchell, Winters, was the other member of the team.

The contests are divided into three phases: identification, judging and commercial grading. The Tech team's score in both contests was first in identification, fourth

J. ROY WELLS

Ed Smith Resigns; Wells Gets Post

James Roy Wells has been named successor to L. Edwin Smith, assistant to the president, who has resigned effective Dec. 15, Pres. D. M. Wiggins has announced.

Smith will be a partner in a Lubbock certified public accounting firm.

Wells will take the job Feb. 1. He is now head of the department of business administration at Sam Houston State Teachers college. A native of Wellington, he is a graduate of Baylor university. He has done graduate work at Baylor and at Colorado and Texas universities.

He is a member, and past president, of the Texas Association of University Instructors of Accounting, a member of Pi Omega Pi, Phi Gamma Mu and Rotary International.

Smith was an associate professor of accounting before his appointment as assistant to the president in March. A 1938 Tech graduate, Smith was a quarterback and halfback on the football team from 1935-1937. He received his MA degree from the University of Texas and served in the Navy before returning to Tech in 1948.

E. O. Thompson Will Speak At State AIME Meet Here

James T. Shaver Injured In Seventh Campus Accident

Dr. James T. Shaver, associate professor of education, is in serious condition following a three-car accident Monday afternoon.

Shaver, whose right side became paralyzed after crossing the Fourteenth street intersection by the Bookstore, hit the left rear fender of a Ford, sideswiped a Chrysler headed west and angled off across the lawn back of Drane hall. His car struck a tree and halted in a slight ravine on the Drane lawn, according to a report compiled by Traffic Patrolman Ira Scott of the Lubbock Police department.

The accident, seventh of the year on campus, occurred at 4:04 p.m. Shaver evidently became paralyzed and lost control of his car just after crossing the intersection, Scott said. His automobile first struck the Ford driven by Mrs. Emma Lewis, 122 Ave. X, then sideswiped the car driven by Edward Willis, Tech student from Odessa. An ambulance took Shaver to Lubbock Memorial hospital.

Damage to the three cars was extensive, Scott said. Mrs. Lewis and Willis were uninjured.

Damage to the three cars was extensive, Scott said. Mrs. Lewis and Willis were uninjured.

Damage to the three cars was extensive, Scott said. Mrs. Lewis and Willis were uninjured.

Saddle Tramps To Sponsor Dance

A bid by the Saddle Tramps for sponsorship of the spring Howdy dance was accepted Monday night by the Student council in a regular meeting.

No other organization asked to sponsor the dance, Horton Russell, Student council president, said.

The council voted to allocate funds for the repair of a loud speaker system damaged in a wind storm just after its installation in the west tower of the Administration building last year.

Russell said the loud speaker would be used for broadcasting of announcements and Christmas carols. The speaker can be heard for approximately two miles.

Enrollment for the 1934-35 school year reached 2,994, a 1.7 per cent increase over the previous year.

The 1933 editor of La Ventana, Everett Fairchild, created Oscar and Ophelia, typical college comic characters, for the 1935 annual.

Texas sections of the American Institute of Mining and Metallurgical Engineers, Petroleum branch, will be guests of Tech at their annual meeting Friday and Saturday, announced W. L. Ducker, head of the department of petroleum engineering.

The program will be highlighted by talks from Gen. Ernest O. Thompson, chairman, Texas Railroad Commission; D. A. Hulcy, president, Lone Star Gas company and vice president, American Gas association.

Harold L. Hensley, Humble Oil and Refining company; Max K. Watson, natural gas consultant, Amarillo; Henry W. Hinkle, Standard Oil and Gas company; T. C. Williams, Jr., Honolulu Oil Corporation, Midland; David B. Schulz, George P. Livermore, Inc.; George A. Whelstone, Tech civil engineering department; W. A. L. Grossman, Halliburton Oil Well Cementing company, Midland.

Although this meeting will be primarily for petroleum engineers, all Tech engineers will be excused from conflicting classes if they are registered at the meeting, said Ducker.

This meeting is the first such meeting to be held at Texas Tech, Ducker said. Previous meetings had been held at Texas university and Texas A&M.

A record attendance is expected at this state-wide meeting. Registration applications have already exceeded previous expectations, Ducker stated.

Anthology Includes Poetry Of Students

Tech's Lord Byrons aren't the scheduled type with flowing hair and eccentric ways, they're engineers and geologists.

"Prayer" by Willie Turner, freshman from Melvin, and "It's Only Dark" by Jerry Raun, sophomore from Odem, will appear in the Annual Anthology of College Poetry. The anthology is a compilation of poems written by American college students and were chosen by the Nation Poetry association.

Turner, a civil engineering major, says he writes for fun and has no definite style. While a senior in high school his poem "A Way of Life" was published in the 1950 National Anthology of High School Poetry and Sermons in Poetry.

Raun, a geology major, writes both poetry and prose as a hobby. His poem "Through A Broken Window Pane" was published in the 1949 American Anthology of High School Poetry and Songs of Youth.

Connie Hopping Presented Saturday In Tech Band Sweetheart Ceremony

Connie Hopping, sophomore Home Ec education major from Littlefield, is the 1950 Texas Tech band sweetheart. She was presented by Dr. D. M. Wiggins during the half time show of the game Saturday afternoon.

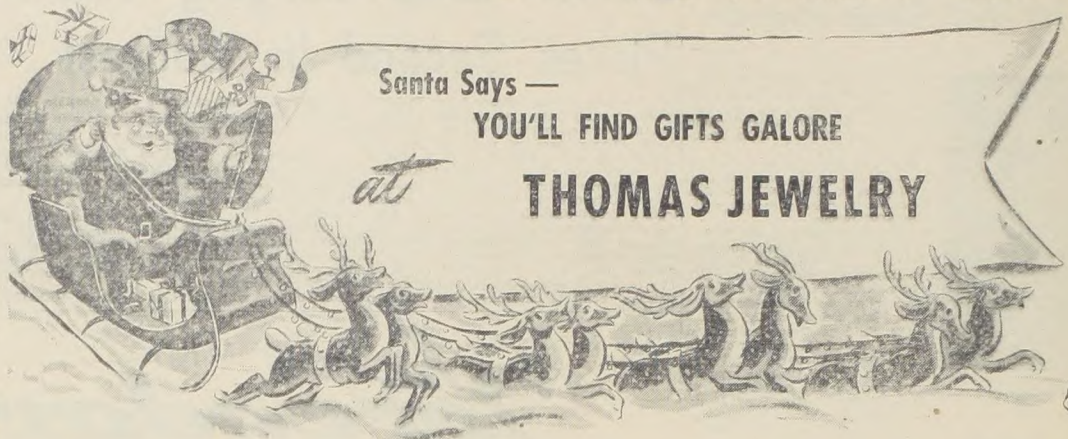

Identity of the sweetheart was a secret until Saturday. A convert brought the three finalists, Diane Wimberley, Katie Atkinson and Miss Hopping to the west sideline for the presentation.

The sweetheart contest, sponsored jointly by Tau Beta Sigma

and Kappa Kappa Psi, began with 28 contestants. The final judges were Calver Hill, advertising director of Hemphill Wells; Rollin Herald of Herald Photo and Winston Reeves of Reeves Photo.

Miss Hopping was sponsored by the American Institute of Electrical Engineers and the Institute of Radio Engineers.

Diane Wimberley, Gainesville junior, was sponsored by College Club fraternity, and the Geology club sponsored Katie Atkinson, Midland sophomore.

Daughter Out, Mama In

Management House Serves As Home For Two Beenes

Cynthia Anne Beene finished her allotted time in the Home Management house two years ago. Now Mama Beene (Mrs. Jean Beene), senior home economics major, is spending her required time in the house. However, mother and daughter have lived there for different reasons.

In 1948-1949 Cynthia was the Home Management house official baby, while her parents attended Tech. Her mother is spending the nine weeks living in the house required by her major.

Two-year-old Cynthia enrolled in Tech nursery school recently. The directors say she is one of the best adjusted children in the school. She has no fear of people and makes friends easily. Her mother attributes her ease with people to the care and training she received while in the Home Management house.

Each year a baby, usually one belonging to Tech students, lives in the house and the girls care for him. Parents of the child are urged to visit him every day and take him home on week-ends and holidays. Cooperation between the parents and the girls is essential to the child's being well adjusted. As the girls change duties frequently, the child does not become attached to one more than another.

A schedule is planned by Miss Marie Drew, director of the house, whereby each girl cares for the baby four days at a time. The baby

Work, Planning Go In Half-Time Show

By CAROLYN HATHCOCK
Toreador Staff Writer

As you watched the crowning of the band sweetheart at the game last week-end, you probably weren't conscious of the approximately 500 man hours that went into the performance. Which is exactly the reaction you were supposed to have.

The formations look complicated—and they are—but they have been so well arranged and carefully thought out that the average show gets, at most, only two rehearsals. In 1947 the band performed after walking through the formation one time.

Pictured on page 5 are the two principal steps in working out a formation.

The "idea men," seniors and graduate students who originate

the show, are Bob Robbins, Paul Huntington, drum major Kenneth Cox and Beryl Harris.

Master charts are made for each band member after the idea has been proven. On these charts are the formations with the permanent number of each member, according to row, and where he is to stand. These charts are taken to practice and are an indispensable part of the scheme.

In the band room is a table marked to scale as a perfect football field. Here the formations are worked out using, surprisingly enough, 30 caliber rifle bullets for band members.

Then comes the second step.

See WORK page 5

Exhibit Of Model Farm Buildings Will Be Displayed On Campus

A display of scale model aluminum farm buildings will be shown west of the livestock pavilion from 1 to 5 p.m. Thursday, N. C. Fine, assistant dean of agriculture, said. The exhibit will be brought to the campus by the Farm Institute of Reynolds Metal company.

Season Tickets For Screen Tours Are On Sale In Museum Office

Season tickets are on sale in the Museum office for the Audubon screen tours. Ticket prices are \$2.25 for adults and 60 cents for children for the remaining four performances.

Expanding Minor Sports . . .

The appointment of an official coach for the tennis team is another step towards a well-balanced sports program at Tech. The big three of football, basketball and track have been recognized for a long time, but the minor sports have just recently come into their own.

It is now possible to letter in the minor sports of golf, fencing and tennis. But more important is the added interest in intramurals.

The large number of teams competing in intramural sports makes it possible for almost anyone who is interested to participate in some phase of sports activity. The program shows careful planning to benefit a large number of students.

Tech is a growing school, not only structurally but also academically. The diversified sports program offered to the students is another example of the college's expanding field of interests.

With such a wide range of sports offered, every student should be able to find one in which he is particularly interested and in which to participate. (P. F.)

Grade Yourself . . .

With mid-semester behind us, the impulse to lean back and rest on our laurels is almost overwhelming. At this time of year, between two holidays, we almost invariably settle down and with the convincing thought that we've done well this far—we can just coast now until the end of the term.

Or, if our grades aren't up to par, we reason that this is just a breather between Thanksgiving and Christmas and after we return to school in January there just isn't enough time before finals to do anything about it. And with the decision that we can't do anything about our grades this late, we just might as well forget all about them and enjoy ourselves.

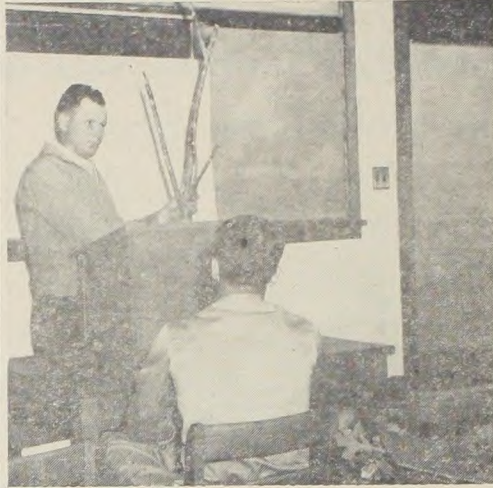

Such is not the case. Many a sagging "C" or "D" has been raised to a "B" in the last half of the semester. And many a "B" has fallen to a "C" or "D" because of the feeling that we've done so well so far that we can just coast from now on.

Mid-semester means just that. It's the halfway point where we can all pause and take stock of ourselves. Mid-semester reports are compiled and sent to students and their parents so that we may know just how well—or how badly—we are doing. They come at a point where there is still time to do something about our grades.

The system of keeping students without a "C" average in the dormitories after 8:30 p.m. is a protective measure. It is designed to encourage students with a low average to study and build up their grade average before it's too late. But most of us realize that when our average is not up to what we should be doing, we'll buckle down and study. The 8:30 rule just makes it easier.

Our instructors and dormitory counselors are ready to help us raise our grades or keep up the grades we already have.

With the passing of mid-semester, let's all sit down and take stock of ourselves and our grade averages. Now is not the time to relax and let ourselves go slack—whether our grades are the best we can do or whether they're not quite the results of our best abilities. There is still time to have those grades that come from our best abilities and efforts. (M. H.)

SENSITIVE TOUCH—Randolph Greene, senior animal husbandry student, gives a demonstration of tree pruning in horticulture class. Greene depends on his fingers and memory, rather than on his eyes.

West Of College Avenue

By SUE HOLMES
Toreador Editor

"Eyes were made to see with," the poem goes, but it doesn't always work out that way.

Randolph H. Greene, senior animal husbandry major, has not been able to see in almost six years, but he will be graduated in January, having completed a regular course in the agriculture division.

The burden of not being able to see has not been insurmountable to Greene. His instructors say he is an inspiration rather than a problem to have in class, and his good humor comes forth in the briefest of conversations.

When the photographer snapped the above picture, the class instructor asked Greene if he could see the flash bulb.

"Sure I could," Greene said. "After all I can see as far as you can—I can see the sun."

Coming to Tech in 1946 after serving as an Army engineer, Greene enrolled for a regular course and studied with classmates

At that time he could see with the aid of extra strong glasses. Now, two months before his graduation, the sightless veteran has only light perception—he can distinguish slightly between light and dark—and is finding it difficult to find students in all of his classes with whom to study.

Greene's accident occurred in November, 1944, on the tiny island of Morotai in the Dutch East Indies. Cataracts formed over his injured eyes and blocked his sight until another misfortune turned almost into a blessing. He contracted malaria, and high fever resulted which dissolved the sight-blocking cataracts.

The sightless veteran studies his lessons with the aid of three students, his wife and a recording machine. Dale Tate, Volney Hildreth and Arthur Gohke, Greene's classmates, record their notes. Greene plays the recordings back until he learns the material—"sometimes forty times," he says.

Besides the recording machine Greene uses several other gadgets designed to make life near normal for the sightless. He keeps close track of the time by feeling the bumps on his special watch, then feeling the hands.

One of the most useful gadgets which Greene has is a saw guide. Before entering service the sandy haired young aggie was a carpenter, and the saw guide helps him continue his building. He works on his house and built his own garage, although he is unable to see. The garage took him two or three times as long to build as it would had he been able to see.

Greene knows the Aggie building so well that he does not use a cane to go to his classes. The cane is another interesting gadget. It is an extension model which extends to the proper length, then can be telescoped into a size which fits into a notebook.

After being graduated in January, Greene expects to go to a veterans' hospital in Heinz, Ill. where doctors will check the possibility of restoring or improving his sight. There is a chance that a cornea transplant may improve his condition. Greene says it is amazing how many persons think eyes can be replaced, when actually the cornea transplant is the only operation he knows of which approaches complete replacement.

"Dogs are all right, but I don't want one," the senior said answering a query about seeing-eye dogs. He plans to raise poultry and says a dog would only be in the way. Instead, he plans to take a course in "foot travel,"—learning to get around by himself, braille, shop work and typing at the Heinz hospital.

Right now Greene, who has the outstanding quality of stickability, seems to have but one main worry. His three-year-old daughter has placed her order with Santa Claus for a lawnmower, and lawnmowers don't seem to be in season at local toy stores.

Our hats are off to this Techman who has slapped hard luck in the face.

ABOUT THE CAMPUSES

Warren Rutledge, Trinity University junior, is attending the Westminster fellowship of the Presbyterian church, U. S. A. National council meeting this week in Philadelphia and New York. Rutledge is a former Techman.

Some campus rules of 1952 at North Texas State college included: "Buggy riding at night is forbidden to all students. Young men may visit young ladies only on Sunday afternoon in the parlor. Young men are forbidden to speak to young ladies in the library."

Students at the University of Texas must purchase their pre-registration forms at a cost of ten cents.

Five new members were chosen last week by Texas university's Ten Most Hated. To be elected requires a blackball from all members. A whiteball indicates friendship.

Of the 2,424 students at Texas Christian university, 353 of them are on scholarships.

A University of Texas coed who does practice teaching in a local junior high was horrified when her male students unanimously chose "Why I Like Dogs Better than Girls" for a theme topic. One young chap made a concession, however.

"There's one thing about girls," he wrote. "When they get run over it doesn't take \$25 to get another one."

In money and banking we learn that a dead Scotchman represents rigid economy.—The Campus Chat.

The French on the menu puzzled the coed.

"Homey, what does 'au jus' mean in English?" she asked her escort. Looking down at his pinkish-looking steak, the escort muttered, "Au jus' about done."

Alarm clock necklaces, lamp shade hats, striped blouses, polka-dotted pajamas, bedroom slippers and even the kitchen sink was some of the typical garb worn on Slime Day by the 135 freshmen women on the TCU campus.

North Texas State college needs a supervised lovers' lane according to a recent editorial in the school's newspaper, The Campus Chat.

Eight hundred-fifty students, including those from 84 Texas counties and 13 states other than Texas and two from Africa, were enrolled for correspondence and extension work at West Texas State college last year.

THE TOREADOR, student newspaper of Texas Technological college, is published every Wednesday and Saturday on the Campus of Texas Technological college at Lubbock by the associated students of the college.

Letters To The Editor

Dear Editor:

"School spirit"?—I ask that question from a student's standpoint expecting an answer—not an argument.

Seriously, people—when two girls (Caroline Boyls and Eddie Heard) both independent girls, are spirited enough to trudge through the Ad building on the night of our victory vs. Tucson, Ariz., and turning lights off and on in the building obtaining no results—That's serious! Suppose we had really been in trouble! After all, just what is a "night watchman" for—Anyway?

Caroline Boyls
Women's Dorm III
It was a little difficult to get straight what your trouble was, but it seems that you wanted to ring the Victory bells, couldn't get to the bell tower, then turned lights off and on to get somebody's attention. Your school spirit is to be commended, but we still don't understand whether you are more disturbed over not rousing school spirit or the night watchman.—Ed.

Dear Editor:
It has come to my attention that most of the other schools of Tech's size have majorettes and baton twirlers. Why can't we have them here at Tech? Surely among the many women students attending this institution there are at least a few girls who could twirl a baton or just look pretty.

Also something else, why don't we get some pretty cheerleader's uniforms?

Max Williams
2012 Tenth Street
Several years ago, the authorities tell us, Tech had majorettes. But somehow they

didn't work out, and the school has felt that the band is adequate without them. No doubt you are right about the twirlers and would-be majorettes being on the campus.

As to the cheerleader's uniforms, we weren't aware that they were not pretty. What do you have in mind for prettier ones?—Ed.

Dear Editor:
It was announced in the Lubbock Morning Avalanche this morning (Nov. 22) that Texas Tech is the only school in the Border conference at this time which does not permit Negroes to play against Tech teams on our home field. I think that this situation should be mended at the soonest possible occasion. Tech has always been noted for its democratic principles and spirit of brotherhood. There is no reason why we should allow such schools as West Texas, Texas Western and Hardin-Simmons to get ahead of us in the field of democratic treatment of a minority race. We can not always be great in football but we can strive to be greater sports while playing the game. Forbidding Negro players to compete on our field cannot be supported in any way on the basis of sportsmanlike conduct. By being the last on the list to allow Negro players to play against us here at Tech causes a loss of prestige for us among the other schools and brands us with an unfair name of intolerance and undemocratic practice.

It is a fact, if not a well known one, that our team does play against Negro athletes when out of the state as they did in Tucson last week. The fact that Negro players were on the playing field

did not seem to deter the team spirit as we won by a good score. The only reason that I can think of as to why we do not allow them to play here on our own field is that it is feared that some people might be offended with the thought that the Negro players want to marry their daughters. This is silly of course but is always mentioned when discussing the question of segregation. Any other reasons which might be offered would be as baseless no doubt.

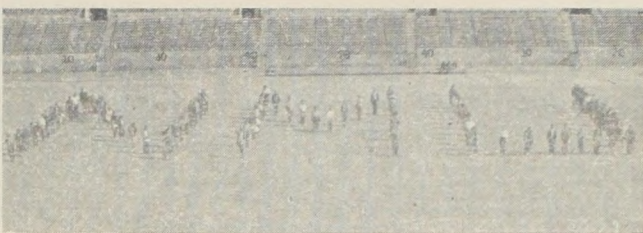

I therefore suggest that the Athletic council take affirmative action as soon as possible to mend this situation before it has a chance to cause unwarranted criticism of our principles and possible friction between our fellow colleges. By taking this action NOW we can prove that Texas Tech is and always will be striving to develop the principles of democracy and good sportsmanship.

David P. Blackburn
Doak Hall

Tech is facing the issue, not to say "problem" which you mention. Athletic council members are working on a report which will be available soon. The Toreador will publish the answer in a few weeks—as soon as it's available.—Ed.

PREPARING THE SHOW—Half-time performances of the Tech band are engineered by Paul Huntington, seated left, Bobbie Robbins, standing, drum major Kenneth Cox and Beryl Harris. Helping them make plans for Saturday's performance were Director D. O. Wiley and Joe Haddon, assistant director. Above the band is shown walking through the formation which football fans saw at the New Mexico game.

Work —

In the second picture the band members are shown after they have "walked through" the formation. If it is possible, they will walk through once more without music before they take their instruments on to the field.

Here the camera comes into its own, as pictures are taken at rehearsals and shown at the next band class. Director D. O. Wiley takes his portable public address system to the press box and corrects any flaws from there.

Then comes the actual show. The football team leaves the field, the band marches on, performs and marches off.

But brother, it's not easy!

Lack Of Screens Provides Specimens For Biologists

By JOHN JONES
Toreador Staff Writer

Lack of window screens has provided several bird specimens for the biology department, says Russell W. Strandmann, professor of biology.

"They fly in the classroom windows and we catch them," he stated.

Since 1937 Strandmann has built up a collection of approximately 200 birds, all of which were taken in Texas. The birds are not mounted in the ordinary manner, but are stuffed with cotton.

Occasionally class groups have made trips to Palo Duro canyon to study live birds with field glasses.

"I first became interested in bird parasites while in Galveston investigating the cause of parrot fever," says Strandmann, who has been interested in birds since he was in high school.

The two most common parasites are mites and bird lice, he said. Ordinarily parasites don't bother birds much, but the nesting season is the most dangerous period.

"Each year thousands of ducks, geese, quail and other game birds are slaughtered by hunters, but I

Bobby Adams, Nina Starkey and Virginia Kennedy, 1950 Tech graduates, are now teaching in public schools at Borger.

don't think there is danger of these becoming extinct, for there are millions of such game birds that each year take refuge from hunters in game sanctuaries," stated Strandmann.

One of these sanctuaries is located 15 miles south of Muleshoe.

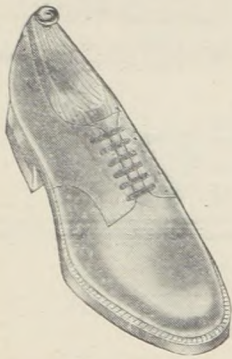

BASKETBALL MANAGERS TO MEET TOMORROW

A meeting of all intramural basketball managers will be held tomorrow at 5 p.m., according to George Philbrick, director of intramural sports.

Anyone interested in officiating intramural league games are requested by Philbrick to contact him in his office at the gymnasium.

Tech Basketball Season Opens Monday As Raiders Prepare To Meet McMurry

★ ★ ★ ★

Glass Backboards Installed In Gym

Rectangular glass backboards were installed Sunday in the Gym, Coach Polk Robison said. The new boards cost \$500 a pair and are made of Nurri fused glass.

George Long, superintendent of buildings, supervised the new installation work.

Metal framework and iron pipes now replace the old wooden construction, said Robison. The glass boards will give fans in the end seats a better view of the court. Robison said new regulations require all inter-collegiate basketball courts to be equipped with these glass boards.

Texas Tech band made a recording of school yells and songs to be played over the broadcasting system when Tech played Loyola in 1940.

Tech basketball schedule will begin in the Gym Monday night when the Red Raiders meet McMurry college of Abilene. Coach Polk Robison believes his team, while generally inexperienced, will give the visitors a tough battle.

Tech's varsity team will give its first public showing Friday night in the Gym in a practice game with the Amarillo AAU Dowell Cafe squad. Coach Robison said. Only one senior is playing with the team.

Tech hoopmen will play TCU at Odessa next Wednesday, when the new gymnasium there will be dedicated. Gov. Shivers will attend the game and dedication ceremonies, Joe Coleman, Odessa high school coach, said.

Colorado Western State is scheduled to play the Red Raiders here Dec. 8. Dec. 10-23 the team will go on an eastern road trip. Opponents will be Oklahoma City university, Washington university at St. Louis, Wesleyan at Bloomington, Ill., Toledo university, Bowling Green university at Bowling Green, O. and Murray State college at Owensboro, Ky.

Robison has four tried lettermen returning which he considers a "fair nucleus" around which to build the Red Raiders. "There is a lot of competition for regular berths," Robison said. "It all depends on how the sophomores come around. We are planning a better season than last year."

Holcomb To Attend Ohio Meeting

Dean Dysart Holcomb will attend the National American Institute of Chemical Engineers meeting being held in Columbus, Ohio Monday through Wednesday.

Red Raiders Trounce Lobos To Win Final Home Game

By LUCILLE SEYBOLD
Toreador Staff Writer

Texas Tech Red Raiders in their final home game of the season Saturday loafed to an easy 37-12 win over the University of New Mexico Lobos.

With this third straight Border conference victory the Raiders

need only a win over the Hardin-Simmons Cowboys Saturday to snch a second place berth.

Aided by the recovery of four of New Mexico's seven fumbles, two of which were turned into touchdowns, the Raiders lazily romped pell mell over a weak Lobo team.

Both teams exhibited weak pass defenses as the Raiders completed seven tosses out of 15 attempted and the Lobos, 11 out of 24. New Mexico did manage to intercept two of Tech's passes, however, one being carried over Tech's goal for a Lobo score.

The Raider team rolled up a total of 440 yards, 292 yards rushing and 148 yards passing. The Lobos were held to a mere 167 yards, only 50 yards of which were gained on the ground.

Quarterback Pete Edwards was good in the passing department as were Bobby Close and Eural Ramsey in the backfield. Three of Edwards' tosses, completed to Dick Jackson, Ike Stuver and Ramsey, were taken over for Raider scores.

Ramsey, recently shifted from a defensive to an offensive position, caught a beautiful 11-yard pass from Edwards and raced, twisting and turning, 40 yards for a touchdown.

Tech's first tally was made after a 55-yard drive, which was powered by Close and fullback Earl Jackson. Jackson plunged the final yard for the score.

J. W. Thompson succeeded in making 11- and 12-yard dashes for two tallies. It was after his 11-yard run that the only conversion of

the game was made by Hudson Routh.

Although an abnormal number of rule infractions was committed by both teams, only eight penalties for a total of 75 yards were called against the Raiders and none were called against New Mexico.

The Raiders were deprived of one touchdown when penalties called on both teams nullified an 83-yard pass play from Edwards to Stuver.

Dorm Basketball Begins Tomorrow

Dorm league basketball play begins tomorrow at 7 p.m. when three games will be played.

Sneed east wing meets a team from the Doak hall west wing in the opening game of the season. In following games, Dorm IV north plays the Sneed hall third floor team and the Dorm III Wildcats take on the West hall Eagles.

Independent league play begins on Dec. 7 when three games will be played.

Collins Defeats Hodges 3-0 To Capture Ping Pong Title

Wallace Collins, champion of Men's Dorm IV, defeated Houston Hodges 3-0 last Wednesday night to win the dorm ping-pong championship.

Collins, who drew a bye in the first round, won from Hodges, West hall champ, in the second round and beat Leroy Reynolds in the semi-finals.

Oil Industry Art Will Be Exhibited

A collection of 35 oil paintings, water colors and drawings of the oil industry, will receive a preview showing at 7:30 p.m. Friday in the Museum.

The showing will be presented by the Texas Tech Art Institute through the courtesy of Standard Oil of New Jersey. The paintings will be on exhibit from Saturday until Dec. 21.

Mrs. Elizabeth Sasser, assistant professor of architecture, will give a gallery talk on the paintings at 8:30 p.m. concurrent with the preview showing.

Rehearsals Of Speech Play Have Reached Final Stages

Rehearsals for the speech department's production of G. B. Shaw's "Androcles and the Lion" are in the final stages.

Admission will be charged for the performances which will begin beginning Dec. 11 in the Speech building auditorium. Reservations must be made in advance. Miss Cecilia Thompson, director, said.

Dorene Moore Is Winner Of Texas Sewing Contest

Dorene Moore, Sidney junior, will travel Tuesday to Casper, Wyo., for the national home sewing contest sponsored by the women's auxiliaries of sheep and goat raisers associations.

Miss Moore won first place in the state senior class at the Fort Worth convention of sheep and goat raisers Nov. 21. Previously she had entered a brown flannel topper coat in the area contest held here and claimed first prize.

Winners of the junior class and the original design class were also chosen during the modeling at the Hotel Texas in Fort Worth. Marilyn Jones, Garland sophomore won second place in the junior class.

Kappa Alpha Mu Initiates Four In Formal Ceremony

Kappa Alpha Mu, national honorary photography fraternity, initiated four members in a ceremony held Nov. 21, Robert Duke, president, has announced.

Those initiated were Bill Stucker, Jo Nabors, Bill Holmes and Dolores Ketchersid.

Friedberg Elected Delegate To Marketing Convention

R. W. Friedberg, co-sponsor of the Tech Marketing society, will represent the organization at the annual Marketing convention Dec. 27-29 in Chicago.

Friedberg was selected at regular meeting Nov. 20.

Spellings To Be Tried In ROTC Mock-Military Trial

A mock-military trial will be given by members from the senior Air ROTC classes at 2 p.m. Thursday in X9. The trial is being given in coordination with the classes being held in military law.

Cadet Leslie Spellings has been ordered to report for court martial on the charge of AWOL.

Investigating officers will be H. H. Hamilton, T. C. Allen and G. T. Buchanan. Defense council will be made up of E. D. Prior, M. C. Reeves and Jack Tramill.

Crop Judging — (Continued from page 1)

in commercial grading in Kansas City; second in Chicago; first in judging in Kansas City and fourth in Chicago.

Judd Morrow, assistant professor of agronomy, acted as an official judge at both of the contests.

Cecil Ayers, associate professor of agronomy, coached the team and judged at the Chicago International hay and grain contest held in conjunction with the livestock judging.

New Counselor Named For West

John D. Hickey replaces Laverne W. Nelson as counselor in West hall. Nelson has been recalled to active duty in the navy.

Hickey received a BA degree in business administration from Hill-year college, Hartford, Conn., in 1941. He served in the air force as a radar specialist in the Pacific theater from 1942 to 1945.

The new counselor received his MA degree in guidance and personnel services from Springfield college, Springfield, Mass. in June, 1950. He has had experience as a counselor and physical director at the YMCA in Hartford.

Hickey is 29 years of age, is married and has no children.

Patti Jo Musson, former Tech beauty who graduated in 1950, is a Braniff Airlines hostess out of Tulsa, Okla.
